First, I think Senator HATCH, who is a member of our committee—and who, by the way, allowed this nomination to be reported, which I think is to his credit rather than to his debit. Notwithstanding his deep reservations he did not want to hold up the operations of the committee or the Senate. Senator HATCH showed a very deep understanding of OSHA when he gave the nominee a very thorough grilling at his confirmation hearing. That was the beginning of the education of Bert Cottine, which I think is a good thing.

Second, we must remember that in these cases administrative law judges make the initial determination. Under section 12(j) of the Occupational Safety and Health Act their decisions are the final word, unless it is overturned by the Commission within 30 days. Only about 20 percent of the total OSHA cases are reviewed by the Commission. Any commissioner, who believes a case merits further consideration has the authority to bring it up for review. Also, my colleagues should know that split decisions are comparatively rare. For example, out of 507 decisions issued between May 1, 1977, and March 31, 1978, only 33 were split decisions, which is about 7 percent. These involve some very serious questions, but they will be determined by the courts.

For example, there is a split between the two members now on what constitutes a repeated violation, and another division over the relevance of economic impact in abating excessive noise levels. Frank Barnako would have the Commission take a cost-benefit approach. Certainly cost should be a factor to be considered, but not necessarily the decisive factor. I think we intended that when we passed this law.

Mr. Cottine is an able lawyer, and his youth is an advantage, not a disadvantage. I believe his own thinking, since he uttered the sentiments that Senator HELMS referred to, has matured, and it will mature further.

But what I think should be made crystal clear is that OSHA is such a hot subject that our committee is bound to be in it very deeply, and it is not quite a fact that the regulators have the field all to themselves. Our committee will continue to evaluate the impact of the act as implemented by the Commission. Congress will ultimately have the final say as to whether the law is being fairly and effectively administered.

So, Mr. President, I pledge myself to listen very seriously to deficiencies which my colleagues may find with this Commission. Like Senator HELMS, I have little doubt that this nominee will be confirmed, and I will do my utmost to use the oversight authority of the committee to review the Commission's actions.

I believe Mr. Cottine will do an objective job here, because that is what he is sworn to do and that is what he is appointed for.

Gradual maturation of his view which has come about since his twenties continues and it ought to be accelerated. This is a very touchy subject. I am deeply interested in the law, and I want the law to be as good as it humanly can be. I know my chairman (Mr. WILLIAMS) and I share that very deeply. The best way to see that the law continues to have a vital and effective influence in respect of the safety of the work place and the safety of workers is to have it administered with a concern for fairness and common sense. I would only tell my colleagues I will vote for Mr. Cottine, but I want them to know my frame of reference for that vote as a responsible senior member of this committee.

(Mr. ALLEN assumed the chair.)

Mr. MORGAN. Will the Senator yield?

Mr. JAVITS. Yes.

Mr. MORGAN. Will the Senator advise me the compensation of this position?

Mr. JAVITS. I am told it is executive level 4, which is $52,000.

Mr. WILLIAMS. We will shortly have the right figure. We believe it is $52,000. It may have been changed.

Mr. MORGAN. For a young man right out of law school but 6 years, that is a right good salary.

Mr. WILLIAMS. I will talk of Senator BIDEN and some of our other Members. I believe the Senator is questioning our own group when he suggests that. I would suggest that to our good friend from North Carolina. Some of our most active young Members here contribute so much.

Anyway, I believe that this is not really the point.

I do want to take the time to clarify one point, however, or I would suggest it is in the nature of clarification, with respect to one of the points which has come into the RECORD. I gathered from the junior Senator from North Carolina, or he seemed to suggest, that he wished more time to consider this nomination. That is almost a statement that there is surprise at this nomination being here. Really, this nomination was reported from the committee for the first time on September 30, 1977, and reported again on January 26, 1978. We have had official documents before this body for all these months. I would not want the RECORD to suggest that we are sneaking this thing in here fast, without notice.

Mr. MORGAN. I would say, if the Senator will yield, I thought I had a hold on this nomination, which would at least have entitled me to a little prior notice that it was coming up. This morning I had to come from the Armed Services Committee markup. I am not implying that the committee did not do its work. I am just saying I wish I had had the time. I would have had the time, had I had notice that it was coming up.

Mr. WILLIAMS. I am glad we have clarified it. I understand that it was only because of the nature of the hold that the Senator from North Carolina made his comment, and not that the committee had not presented all materials needed for thorough study of the nominee's background.

Mr. MORGAN. I believe the Senator knows that every Senator has so many responsibilities to carry. There were no reports on my desk this morning when I came in and found that it was to be considered. Here, again, it may be partially my fault. My office had sent a hold, which apparently the leadership had not received.

Mr. WILLIAMS. I believe we now understand.

The grade level is four for this position, and the salary for the position is $52,000.

I would like to read section 12(a) of the law, which describes the qualifications for nomination to be a member of this Review Commission. I will read it verbatim:

> The Occupational Safety and Health Review Commission is hereby established. The Commission shall be composed of three members who shall be appointed by the President, by and with the advice and consent of the Senate, from among persons who, by reason of training, education, and experience, are qualified to carry out the functions of the Commission under this act.

I have heard the words "neutral" and "business" to describe the members of the Commission. There is nothing here that requires that the background and experience of a candidate be in any particular sector of life, as long as the individual has the training, education, and experience to carry out the functions of the Commission under the act.

Other Presidents have presented their nominees. One, Mr. Moran, was chosen by Mr. Nixon. He worked at the Wage and Hour Division and then was nominated to the Review Commission.

Mr. Cleary worked for the Solicitor in the Department of Labor, and from that position came to the Commission.

Mr. Barnako came from Bethlehem Steel Co., from a management position.

Those are the backgrounds of the Commissioners we have had. I suggest that we review again the profile or curricula vita, as we say, of this nominee, Mr. Cottine. His adult life has just been packed solid with background in the area we are talking about here, occupational safety and health.

Somehow we hear he is a young man just out of law school. That is the flavor in this debate. Well, he is young. He is 31. And he is relatively recently out of law school. But let us see what he was doing in law school. He was an adjunct professor of law at Georgetown. He graduated from Boston University several years ago. He went to law school and then, because of his record of proven excellence, was chosen by one of the finest law schools in this land, Georgetown, to be an adjunct professor of law.

I am sorry I do not at this moment see the junior Senator from North Carolina in the Chamber. I wanted to read to him what one of the members of our committee said at the time of the hearing. I think it is important because this member has reservations on this nominee but not on the basis of lack of qualification. It is our good friend from Utah (Mr. HATCH), who said at the hearing:

> I feel like Mr. Cottine is extremely well qualified for this position.

That came from the Senator from Utah (Mr. HATCH). It indicates that he was satisfied that Mr. Cottine has the qualifications for this position.

I do believe, as he expressed here this morning, that his opposition to the nominee is not based on qualifications, not on age, not on experience, not on all of those things that are the criteria for selection. Rather, his reservations now are basically on the economic and philosophical base, which we respect. I did want to point that out to the Senator from North Carolina (Mr. MORGAN), that the nominee clearly has the qualifications for this position. There could always be discussion about philosophical basis and background.

We must have confidence that the incumbent in such a position will have objectivity. A man of Mr. Cottine's training in the law has the best kind of training to be objective, because objectivity, in a sense, is a judicial posture.

I wanted that to be part of this record, because I did not want to leave the impression that the President nominated someone with inexperience, right out of law school. He is out of law school, but as a professor of law. I suggest that, too, to the senior Senator from North Carolina.

Mr. HELMS. Will the Senator yield?

Mr. WILLIAMS. Yes.

Mr. HELMS. This Senator from North Carolina has not raised any question about the intelligence of Mr. Cottine. My point is that there is a need for fairness and for evenhandedness. As I look at the young man's posture on the various issues, he is clearly biased. Now there is nothing wrong with that; we all have our biases, I suppose. The criticism is not of him, I say to the Senator, but of those who encouraged the President to propose this particular nomination.

As a matter of fact, I think Mr. Cottine would be very well qualified for any number of other posts. He is obviously a bright young man. When I met him, I was impressed wtih his mental ability. But the question is his objectivity, not his intelligence.

Last October 19, the Environment and Public Works Committee postponed indefinitely the nomination of Marion Edey to the Council on Environmental Quality. In explaining the negative vote, the distinguished Senator from Maine, Mr. Muskie, stated:

> She has been an inflexible and undiscriminating opponent of the kinds of projects and activiites which the council must review

. . . (the nominee) appeared to lack the sense of balance and ability to make objective judgments that are necessary to the performance of (her) . . . assignments.

My objections to Mr. Cottine, I say to the able Senator, are precisely the same as expressed by Senator MUSKIE with reference to Marion Edey. Mr. Cottine is also, to use Senator MUSKIE's words, "an inflexible and undiscriminating" advocate and he, too, appears, as the Senator from Maine said about the other nominee, "to lack the sense of balance and ability to make objective judgments that are necessary in the performance" of his duties.

I thank the Senator for yielding.

Mr. WILLIAMS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. Mr. President, I ask for the yeas and nays on the nomination.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. WILLIAMS. Mr. President, I ask for the yeas and nays on the Luna nomination.

The PRESIDING OFFICER. Is there a sufficient second for the rollcall vote on the nomination of Mr. Luna? There is a sufficient second.

The yeas and nays were ordered.

Mr. HELMS. Mr. President, I ask unanimous consent that a member of my staff, Mr. Richard Bryan, be accorded the privilege of the floor during the ensuing votes.

The PRESIDING OFFICER. Without objection, it is so ordered.

NOMINATION OF BERTRAM R. COTTINE

The PRESIDING OFFICER. The hour of 12:30 o'clock having arrived, in accordance with the previous order the Senate will now proceed to vote on the question, Shall the Senate give its advice and consent on the nominaton of Bertram R. Cottine to be a member of the Occupational Safety and Health Review Commission for a term expiring April 27, 1983, in lieu of Robert C. Moran whose term has expired? On this question the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from South Dakota (Mr. ABOUREZK), the Senator from Delaware (Mr. BIDEN), the Senator from Iowa (Mr. CULVER), the Senator from Mississippi (Mr. EASTLAND), the Senator from Colorado (Mr. HASKELL), the Senator from Montana (Mr. HATFIELD), the Senator from Louisiana (Mr. JOHNSTON), and the Senator from Washington (Mr. MAGNUSON), are necessarily absent.

I further announce that, if present and voting, the Senator from Washington (Mr. MAGNUSON), would vote "yea."

Mr. STEVENS. I announce that the Senator from New Mexico (Mr. DOMENICI), Senator from Oregon (Mr. HATFIELD), and the Senator from Maryland (Mr. MATHIAS), are necessarily absent.

I further announce that, if present and voting, the Senator from New Mexico (Mr. DOMENICI), would vote "nay."

The result was announced—yeas 56, nays 33, as follows:

[Rollcall Vote No. 141 Ex.]

YEAS—56

Anderson	Hart	Muskie
Bayh	Hathaway	Nelson
Bentsen	Heinz	Packwood
Brooke	Hodges	Pearson
Bumpers	Hollings	Pell
Burdick	Huddleston	Percy
Cannon	Humphrey	Proxmire
Case	Inouye	Randolph
Chafee	Jackson	Ribicoff
Church	Javits	Riegle
Clark	Kennedy	Sarbanes
Cranston	Leahy	Sasser
DeConcini	Long	Schweiker
Durkin	Matsunaga	Sparkman
Eagleton	McGovern	Stafford
Ford	McIntyre	Stevenson
Glenn	Melcher	Weicker
Gravel	Metzenbaum	Williams
Griffin	Moynihan	

NAYS—33

Allen	Goldwater	Scott
Baker	Hansen	Stennis
Bartlett	Hatch	Stevens
Bellmon	Hayakawa	Stone
Byrd, Harry F., Jr.	Helms	Talmadge
	Laxalt	Thurmond
Byrd, Robert C.	Lugar	Tower
Chiles	McClure	Wallop
Curtis	Morgan	Young
Danforth	Nunn	Zorinsky
Dole	Roth	
Garn	Schmitt	

NOT VOTING—11

Abourezk	Haskell	Johnston
Biden	Hatfield, Mark O.	Magnuson
Culver		Mathias
Domenici	Hatfield, Paul G.	
Eastland		

So the nomination was confirmed.

Mr. WILLIAMS. Mr. President, I move to reconsider the vote by which the nomination was confirmed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senate will be in order. Senators will please return to their seats and clear the well.

NOMINATION OF CHARLES LUNA

The PRESIDING OFFICER. In accordance with the previous order, the Senate will now proceed to vote on the question: Shall the Senate give its advice and consent to the nomination of Mr. Charles Luna to be a member of the Board of Directors of the National Railroad Passenger Corporation for a term expiring July 18, 1980? If the nomination is confirmed, it will be a reappointment.

The yeas and nays have been ordered. When the well is cleared and the Senators have returned to their desks, the clerk will call the roll.

The clerk will call the roll.

The second assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from South Dakota (Mr. ABOUREZK), the Senator from Delaware (Mr. BIDEN), the Senator from Iowa (Mr. CULVER), the Senator from Mississippi (Mr. EASTLAND), the Senator from Colorado (Mr. HASKELL), the Senator from Montana (Mr. HATFIELD), the Senator from Louisiana (Mr. JOHNSTON), and the Senator from Louisiana (Mr. LONG) are necessarily absent.

Mr. STEVENS. I announce that the Senator from New Mexico (Mr. DOMENICI), the Senator from Oregon (Mr. HATFIELD), and the Senator from Maryland (Mr. MATHIAS) are necessarily absent.

The result was announced—yeas 70, nays 19, as follows:

[Rollcall Vote No. 142 Ex.]

YEAS—70

Allen	Gravel	Packwood
Anderson	Hart	Pearson
Bayh	Hathaway	Pell
Bentsen	Hayakawa	Percy
Brooke	Heinz	Randolph
Bumpers	Hodges	Ribicoff
Burdick	Hollings	Riegle
Byrd, Harry F., Jr.	Huddleston	Roth
	Humphrey	Sarbanes
Byrd, Robert C.	Inouye	Sasser
Cannon	Jackson	Schweiker
Case	Javits	Sparkman
Chafee	Kennedy	Stafford
Chiles	Leahy	Stennis
Church	Magnuson	Stevenson
Clark	Matsunaga	Stone
Cranston	McGovern	Talmadge
Danforth	McIntyre	Thurmond
DeConcini	Melcher	Tower
Dole	Metzenbaum	Wallop
Durkin	Moynihan	Weicker
Eagleton	Muskie	Williams

Glenn	Nunn	

NAYS—19

Baker	Hansen	Proxmire
Bartlett	Hatch	Schmitt
Bellmon	Helms	Scott
Curtis	Laxalt	Stevens
Garn	Lugar	Young
Goldwater	McClure	
Griffin	Morgan	

NOT VOTING—11

Abourezk	Haskell	Johnston
Biden	Hatfield, Mark O.	Long
Culver		Mathias
Domenici	Hatfield, Paul G.	
Eastland		

So the nomination was confirmed.

Mr. BAYH. Mr. President, I move to reconsider the vote by which the nomination was confirmed.

Mr. HELMS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HELMS. Mr. President, I move that the President be notified as to the confirmation of the nominations.

The PRESIDING OFFICER (Mr. FORD). Is there objection? The Chair hears none, and it is so ordered.

Mr. BAYH. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. Mr. President, I ask unanimous consent that Dr. James B. Lucier and Mr. John Carbaugh be allowed the privilege of the floor during the discussion of the Sayre nomination and any votes thereon.

The PRESIDING OFFICER. Without objection, it is so ordered.

NOMINATION OF ROBERT MARION SAYRE

Mr. SPARKMAN. Mr. President, I ask unanimous consent that we proceed to the nomination of Mr. Robert Marion Sayre, of Virginia, a Foreign Service officer of class 1, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Brazil.

The PRESIDING OFFICER. Is there objection?

Mr. HELMS. Reserving the right to object, I want to discuss this with the distinguished Senator, and I suggest the absence of a quorum.

The PRESIDING OFFICER. The Clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. SPARKMAN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SPARKMAN. Mr. President, I ask unanimous consent that the Senate delay action on the nomination of Mr. Sayre, and proceed to the nomination of Mr. Coleman of the District of Columbia, Calendar No. 20.

The PRESIDING OFFICER. Is there objection?

Mr. HELMS. Mr. President, we are getting into a thicket here. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of the nomination of Mr. Sayre at 1:30 p.m. today.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. HELMS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAYH. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECESS UNTIL 1:30 P.M.

Mr. BAYH. Mr. President, I move that the Senate stand in recess until 1:30 p.m.

The motion was agreed to; and at 1:14 p.m. the Senate took a recess until 1:30 p.m.

The Senate reassembled at 1:30 p.m., when called to order by the Presiding Officer (Mr. FORD).

NOMINATION OF ROBERT MARION SAYRE

The PRESIDING OFFICER. The nomination will be stated.

The assistant legislative clerk read the nomination of Robert Marion Sayre, of Virginia, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Brazil.

The PRESIDING OFFICER. The Chair, using his prerogative as the Senator from Kentucky, suggests the absence of a quorum. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SPARKMAN. Mr. President, is the order of business the consideration of the nomination of Mr. Sayre?

The PRESIDING OFFICER. The Senator is correct.

Mr. SPARKMAN. Mr. President, on February 24 of this year, the Committee on Foreign Relations considered the nomination of Robert Sayre to be U.S. Ambassador to Brazil. Ambassador Sayre appeared before the committee at that time and, 4 days later, the committee, without a single dissenting vote, reported the Sayre nomination favorably to the Senate. There the nomination has sat for almost 2 months.

The Committee on Foreign Relations favorably recommended this nomination with full knowledge of the facts surrounding Ambassador Sayre's previous service in Panama and his involvement in the 1972 incident concerning the return of Moises Torrijos to Panama. At his own initiative, Ambassador Sayre went into this matter when he appeared before the committee.

Similarly, the Justice Department has investigated it, as has the Senate Intelligence Committee. Indeed, the full Senate had an opportunity to examine the issue during the secret sessions that were conducted in the course of the Panama Canal debate.

But, Mr. President, from all of the inquiries and investigations, the discussions and debates, nothing has emerged which casts any doubt on the favorable recommendation rendered by the committee back in February. No, Mr. President, this is one of those cases of all smoke and no fire—despite the best efforts of the Panama Canal Treaty opponents to find one issue, any issue, which they could set ablaze.

Mr. President, the Sayre nomination was not an issue during the Panama debate and it is not an issue now. Robert Sayre's qualifications to be Ambassador to Brazil speak for themselves. I hope the Senate will get on with his confirmation and I ask unanimous consent that his biographic sketch and his testimony of February 24 before the Foreign Relations Committee be printed at this point in the RECORD.

There being no objection, the Material was ordered to be printed in the RECORD, as follows:

ROBERT MARION SAYRE

Position for which considered: Ambassador to Brazil.

Present Position: Inspector General of the Foreign Service.

Office Address: Department of State, Washington, D.C.

Born: August 18, 1924, Hillsboro, Oreg.

Legal Residence: Falls Church, Va.

Marital Status: Married.

Family: Wife: former Elora Moynihan; children: Marian Amanda, Robert Marion Jr. and Daniel Humphrey.

Home Address: 3714 Bent Branch Road, Falls Church, Va.

Education: B.A. 1949, Willamette University, M.A. 1960, Stanford University, and J.D. 1956, The George Washington University.

Language Ability: Spanish and French.

Experience—Military, 1942–46: United States Army, Captain.

Government 1949: Intern Program, Department of State; 1950–52: International Economist, Bureau of Economic Affairs and Bureau of Inter-American Affairs; 1952–56: International Relations Officer, Bureau of Inter-American Affairs; 1955: Appointed FSO–4; 1956–57: Officer in Charge of Inter-American Security and Military Assistance Affairs; 1957–60: Chief of Political Section, Lima; 1960–61: Financial Officer, Habana; 1961: Executive Secretary, Task Force on Latin America; 1961–64: Officer in Charge of Mexican Affairs; 1962: FSO–3; 1964–65: Senior Staff Member, National Security Council, The White House; 1965: FSO–2; 1965–67: Deputy Assistant Secretary, Bureau of Inter-American Affairs; 1967: FSO–1; 1967–68: Acting Assistant Secretary of State for Inter-American Affairs; 1968–69: Ambassador to Uruguay; 1969–74: Ambassador to Panama; 1974–75: Foreign Service Inspector; and 1975 to present: Inspector General of the Foreign Service.

Awards: Superior Service Award, 1964 and 1976; Government Outstanding Employee, 1952.

Memberships: American Academy of Political and Social Science; Association of United States Army; Audubon Society; Phi Delta Theta Fraternity; and American Foreign Service Association.

STATEMENT OF THE HONORABLE ROBERT MARION SAYRE, OF VIRGINIA, TO BE AMBASSADOR TO BRAZIL

The CHAIRMAN. Mr. Sayre, did I understand that you had a statement you wished to make to the committee before we began our questioning?

Ambassador SAYRE. Yes, Mr. Chairman, I do.

First I would like to speak to Brazil.

I look forward to the opportunity to serve in Brazil. After some 25 years in Latin America and four years in the Inspection Corps evaluating our foreign relations in every country and area of the world, I am profoundly conscious of the importance of the mission the President has asked me to undertake of assuring sound relations between the two largest countries in the Hemisphere—the United States and Brazil.

Brazil covers half of South America. It is the fifth largest country in the world. With 117 million people, it is the most populous country in Latin America. Our two-way trade was almost $25 billion in 1977 and our investments there are some $4 billion.

We were the first country to recognize Brazilian independence in 1822 and our relations have been close and friendly since that time.

We have had some recent difficulties in those relations. But I think that it would be fair to say that both countries are interested in finding ways to accommodate any differences and in maintaining a sound and friendly relationship based on mutual respect.

There is another matter with which your committee is concerned, and in which I had a role, and on which I believe it would be appropriate for me to comment.

This committee is informed of an incident that took place in Panama while I was Ambassador there concerning the brother of General Torrijos, and I understand that the Justice Department has looked into the matter and the committee has been informed of its conclusions.

However, I thought it would be appropriate at this time to make the facts pertinent to my involvement a matter of public record.

I learned, on or about December 6, 1972, from CIA reporting that Moises Torrijos planned to return to Panama from Spain by ship on or about December 9. Reportedly, Moises planned to disembark at the port of Cristobal in the Canal Zone.

In December, 1972, United States relations with Panama were somewhat strained. Treaty negotiations were not progressing well and Panama was in the process of arranging a meeting of the United Nations Security Council in Panama in early 1973 to discuss the Panama Canal Treaty issue. We had had some sharp confrontations with the Panamanians over narcotics issues.

Panama bitterly protested the arrest of a Panamanian official, Him Gonzales, in the Canal Zone, as a violation of United States treaty obligations to Panama.

As I recall the events of December, 1972, I asked the CIA Station Chief in Panama to be sure that State Department officials saw the intelligence reports in question. Subsequently, I was instructed by the Department to contact General Torrijos and let him know that we were aware of the plans, which I did.

Subsequently, I learned that Moises Torrijos left the vessel in Venezuela and did not enter the Canal Zone.

I thought the committee would like to have these facts on the record.

Finally, Mr. Chairman, I would be pleased to respond to any questions you may have on my work as Inspector General.

Thank you.

The CHAIRMAN. Senator Percy, did you have questions?

Senator PERCY. Yes, thank you, Mr. Chairman.

I referenced your name several times on the Floor of the Senate, Mr. Sayre, from the standpoint that I couldn't surmise what the purpose of the State Department was when the State Department caused you to call General Torrijos and notify him about the impending action affecting his brother. What was the General supposed to do? What was he to surmise?

I can only conjecture—and I made a conjecture at that time on the Floor of the Senate, not having spoken to you—but I think it is appropriate now that you have raised that issue that we have from you a statement as to what the underlying motivation was when the Department instructed you to make that phone call. What was it being made for? What did you expect General Torrijos to do?

Ambassador SAYRE. I was acting on instructions from the Department of State, Senator. I can assume what the Department of State had in mind, and that was that this would create a serious diplomatic incident in relations between the United States and Panama, and we already had strained relations with Panama.

As to the second part of your question, I would not want to try to surmise what Torrijos would do. We were simply interested in letting him know that we knew of the plans.

Senator PERCY. Can we assume that he would infer from that fact that he was being notified that it was our expressed feeling that he should do something about it? Did we expect him to do nothing? Were we shocked when he notified his brother and then we found that he was not on the ship as planned?

What was in the mind of the United States Government, essentially of the State Department, at that point, then?

Also, do we blame Torrijos for notifying his brother?

Ambassador SAYRE. Well, Senator, as I said, I can only assume what the Department had in mind, and that General Torrijos knew about the indictment of his brother because he had been told about it by the director of BNDD in June of 1972.

So, our objective was simply to let him know that we knew about the plans that were going on. We didn't really have any expectations about what he would do, other than that he should be clear in his mind that we knew what was happening.

Senator PERCY. Did you see the article yesterday in "The Washington Post" reporting an interview with Moises Torrijos?

Ambassador SAYRE. I believe I read the article, Senator.

Senator PERCY. I ask unanimous consent that that article be incorporated into the record at this point, Mr. Chairman.

The CHAIRMAN. Without objection, it is so ordered.

(The information referred to follows:)

Senator PERCY. I would like to read from that article.

He said, "I've never gone home by ship from Spain. I can prove it. I always fly." That is a direct quotation.

Does the United States have positive evidence that he was on the ship about which you spoke to General Torrijos?

Ambassador SAYRE. The information we had, Senator, was intelligence reports. All of those reports were made available to the Senate Select Committee on Intelligence so that I assume they are available to you. The information we had led us to believe that, in fact, he was on a ship.

Senator PERCY. There is a letter from the Department of Justice to the Department of State dated February 23 relating to this matter and to Ambassador Sayre's role. I ask unanimous consent that the letter be incorporated into the record at this point, but subject to a decision as to whether the sensitive nature of this matter will allow for it to be a matter of public record. If not, I ask that it be placed under whatever classification would be desired.

The CHAIRMAN. Why don't we just make that part of the records of the committee.

Senator PERCY. Refer it to our committee?

The CHAIRMAN. To make it a part of our records.

Mr. JONES. Yes, Mr. Chairman. We will do that.

The CHAIRMAN. We will do that because it is a sensitive letter.

Without objection, that will be done.

Senator PERCY. I have just a few other questions.

Mr. Sayre, our relationship with Brazil involves many, many issues, but one where we do have some difference of opinion is on the issue of nuclear energy development and appropriate safeguards.

The Senate has just recently passed a bill with an overwhelming margin and there was an even larger margin in the House calling for a new set of safeguards and a new role for the United States to play and a new leadership for us to exercise.

I wonder if you would comment in light of the very strong position Congress has taken now, which is fully supported by President Carter, on what the differences are between the United States and Brazil in our respective thinking and what will happen in the relationship between Brazil and the United States if those differences continue to be as deep as they are and cannot be resolved through the process of negotiation and rationalization.

Ambassador SAYRE. Senator, I think a considerable amount of the alleged difference between the United States and Brazil derives out of a misunderstanding between the two countries on this particular issue of their perceptions of what we were interested in and our perceptions of what they were interested in. The legislation that the Congress has passed I think is a significant contribution to resolving the problem.

The Brazilians have a very serious energy problem, really much more serious than ours, because they don't have coal, like we do. They must depend on petroleum even to a greater extent than we do. They have about used up their hydroelectric potential unless somebody can come up with new technology in long lines transmission which would permit them to develop other energy.

So, this matter of energy is, to Brazil, a very vital matter.

But, I think with the help of Congress and with some understanding, I am persuaded that the objectives of the United States and Brazil on this particular issue are the same. It is the biggest problem I realize I will have to deal with with the Brazilians. But I honestly believe that we can possibly work it out.

Senator PERCY. Do you think that it can be worked out consistent with our policy? One of the purposes of this bill is to insure that we would be a long-term reliable supplier for technology and materials, that we would undertake with other supplier nations to insure and guarantee those supplies, but subject to safeguards, pledges, et cetera, that will take all the benefits from these programs, but also remove the hazards and dangers which potentially are horrendous for any of us to contemplate.

Do you think that Brazil's stated intention to have a full cycle which would make available plutonium, bomb material potentially—do you think their concern is strictly energy, a concern with which we are fully sympathetic, and we want to work that out? They have every right to have a supply of energy which would guarantee their economic viability. But they have to weigh also that if they do it, then Argentina and Pakistan and every other country eventually is going to want to have the full cycle. That will raise the threshold of danger to a much greater degree.

Can we work it out within that framework, giving the assurances that they need, but also having their cooperative appreciation of what we are attempting to do to safeguard humanity, in a sense?

Ambassador SAYRE. Well, Senator, I think those are the objectives of this Administration. It certainly is going to be my highest priority objective as Ambassador to Brazil to try to work it out along the lines you suggest. I wholeheartedly agree with you that Brazil has a right to the energy it needs to develop, whatever form that may take, and that the United States has a great interest in working with Brazil for that objective. I think Brazil and the United States have a common objective in a peaceful work.

So, it will be my objective to arrive at some satisfactory solution to satisfy both countries.

Senator PERCY. I think in this case you can certainly assure the government of Brazil, with which we have had a wonderful relationship, that there is no issue now on which the Congress and the Executive Branch are more united than this one. We stand right together on it.

We have now worked out a program for the future that we think is sensible and sound. We speak with one voice on this matter. We consider it one of the highest matters of urgency and priority in the relationship between our two countries.

Brazil is a great leading nation of the world. She could be a real leader now and could help get us off this dangerous course that we are going if she will seek truly the self-interest which she has in the economic area and help us and lead the way in providing a model for other countries not to go the dangerous route that potentially other countries might emulate and follow in the developing world.

Thank you very much.

The CHAIRMAN. Senator Humphrey.

Senator HUMPHREY. Thank you, Mr. Chairman.

I am intrigued with your mission in Panama because we have been so busy discussing this in the last few days.

What do you think might happen in Panama if the Senate doesn't ratify the treaties?

Ambassador SAYRE. Well, Senator Humphrey, I am not really sure I would want to speculate on that. I have heard all kinds of views on the subject.

I happen to believe that the Panamanians and the Panamanian Government have acted in a very constructive and rational way. I realize that I had continual difficulties while I was there trying to assure a stable relationship. But the fact of the matter is, despite all of the strains and the actions that we had taken, it never got out of hand while I was there. I have put a little confidence in the good sense of the Panamanian people and the Panamanian leadership. I certainly put confidence in the good sense of this committee—it has already demonstrated it—and in the Congress. I really think that the United States, acting, in its own interest, will do what needs to be done. For myself, I believe what really needs to be done is bring about a new, effective relationship with Panama.

The existing treaties between the United States and Panama simply are no longer in the national interest of the United States. They cause entirely too much friction, and I have spent endless hours when I was in Panama trying to resolve the frictions that derived out of this existing treaty arrangement, which started in 1903 and which is no longer suitable to 1978.

I am firmly persuaded that we must make a change. I am certainly pleased that the President insisted that the United States had to have a treaty which gave us the right to defend the canal in perpetuity. I urged that strongly when I was Ambassador to Panama. I lost the round at that time, but I am very pleased to see that President Carter insisted on it in the new treaty.

The other thing that has really bothered me about the existing treaty arrangement with Panama is that our defense rights in Panama are so ambiguous under the present treaty.

For example, under Article XXIII of the present treaty, if you look at it closely, you will see that our rights are conditional. It says, "if it should become necessary at any time," the United States may put troops in Panama.

The provision in the treaty with Colombia which didn't get approved by the Colombians prohibited stationing of U.S. forces in Panama. So, the legislative history of the 1903 treaty raises doubts in my mind about our treaty rights on that subject and the way we carried them out.

Further, the language in the present treaty only says "land and naval forces." The language in the proposed treaty clearly covers the Air Force. So, I think the language in the present treaty and the arrangements in the Neutrality Treaty put us on a much sounder basis than we are under the existing treaty. Since it does put us on a much sounder basis, I think we will be much better off under the new arrangements.

Senator HUMPHREY. Thank you.

The CHAIRMAN. Mention was made about the little incident you brought up. You know, of course, that the Department of Justice has looked into that?

Ambassador SAYRE. Yes, I do. I have seen the letter from the Justice Department.

The CHAIRMAN. So then you know the Justice Department has given you a clearance.

Ambassador SAYRE. Yes, sir, I do.

The CHAIRMAN. I thought it might be well to state that for the record since the letter itself will be restricted.

All right, Mr. Sayre. Thank you very much and we wish you well in your next assignment.

It is a great country that you are going to.

Ambassador SAYRE. Thank you, Mr. Chairman.

The PRESIDING OFFICER. The question now is on the nomination.

Mr. McCLURE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. I thank the Chair.

Mr. President, I want to thank the leadership for their courtesy to the Senator from North Carolina, and other Senators who questioned the Sayre nomination, in postponing consideration of it until after the Senate worked its will on the Panama Canal treaties.

It is perhaps unavoidable that connections between the nomination and the treaties would be suggested. However, it was my desire, and the desire of other Senators, that the politics of the treaties not get mixed up with the merits of this nomination.

It was my hope, and the leadership has been generous in helping that come about, that the nomination not be considered until after the passions and political pressures of the treaty debate were over.

So I want to make it clear at the outset, Mr. President, that the outcome of the treaty votes had nothing to do with my opposition to this nomination.

A newspaper article published yesterday—and I am certain it was written in good faith by the reporter—characterized my opposition to Mr. Sayre's nomination as "a personal vendetta" against Mr. Sayre.

Nothing could be further from the truth. I do not know Mr. Sayre. I have never met him. I have had no personal relationship with him whatsoever. My opposition is based solely upon the historical facts in this case and Mr. Sayre's own testimony before the Foreign Relations Committee.

Indeed, I made no public statements about Mr. Sayre until this week and I did so then only by request of one of the major television networks.

My intention was to keep this consideration as far separated from the treaty situation as possible, and I believe that intention has been carried out.

Mr. President, having said that, I rise to oppose the nomination of Robert Marion Sayre as U.S. Ambassador to Brazil because I believe that this nomination does not serve the best interests of either the United States or Brazil. Because of President Carter's mishandling of our relationship with Brazil, our standing with that country is already at an all time low. Brazil has been closely allied historically with the United States. Of all the Latin American countries, Brazil was the only one whose troops fought with ours in World War II. The Rio Pact—the foundation of the Organization of American States—bears witness to the importance of Brazil in our relationship with the Southern Hemisphere.

In the last decade or two, this importance has grown enormously. Like some other countries, Brazil experienced an apparently relentless slide into socialism, and stood teetering on the brink of totalitarian communism; but Brazil's experience in pulling back from that brink has been a textbook experience of the rehabilitation of freedom. Economic freedom is, after all, the very basis of human rights, and the cornerstone for the restoration of human rights. Some people would attempt to reverse those priorities, but human experience teaches us otherwise.

Certainly the experience of Brazil is a case in point. The restoration of a commitment to private enterprise in 1964 triggered the resurgence of the Brazilian economy. For 10 years, Brazil experienced what was popularly called "the Brazilian miracle," that is an economic growth rate of 10 percent every year. Although Brazil has one of the most highly developed hydroelectric systems in the world, the Arab oil embargo and subsequent price increases put a tremendous strain on Brazil's balance of payments. Yet with careful management, the dynamic Brazilian economy has rebounded and once more shows a trade surplus—small to be sure, but enough to assure a return to at least a 6 percent growth rate.

Brazil is the fifth largest country in the world in land mass, and its domestic economy is the sixth largest. Its potental is practically unlimited.

I cite these facts to put the Carter administration's Brazil policy in perspective. Within months after coming into office, President Carter had our relationship with Brazil in a shambles. By selective enforcement of our human rights policy, he had alienated a friendly country that had looked to the United States for guidance and assistance; by attempting to interfere with Brazil's peaceful nuclear requirements, he appeared to be undermining Brazil's economic strategy of cutting down on oil imports.

President Carter's visit to Brazil in recent weeks did little to alleviate the situation. Press reports that Brazilian officials regarded the President's visit as uninvited were confirmed in the cold but correct reception he received in Brazil. The President's popularity was not helped by his naive comments about the necessity of electrification in a country that has been a leader in hydroelectric power, and whose nuclear requirements the United States attempted to block. Finally, Mr. Carter's highly publicized attempts to seek out opposition political figures and magnify their complaints were regarded by many as overt interference in the internal affairs of Brazil.

All of this reflects a total lack of understanding of the importance of Brazil in this hemisphere and in the world, and of the abysmal state of our relations with that country. To repair that relationship will require an ambassador with extraordinary tack, sensitivity, and, above all, unblemished reputation.

Ambassador Sayre is not such a person. Let me emphasize this: I would not bring serious charges against any person who has served this country in high office without evidence that appears clear to me.

I have no desire to end Ambassador Sayre's career in the Foreign Service. Doubtless there are other positions that he can fill, and fill ably. But I believe that his own testimony before the Foreign Relations Committee has compromised him so badly that he would lack both the credibility and support necessary to repair our relationship with Brazil.

It is well known by all Members of the Senate that Moises Torrijos, brother of Omar Torrijos, the dictator of Panama, was indicted by a Federal grand jury in New York for being involved in the smuggling of millions of dollars forth of heroin into New York. This was not a minor case; six Panamanians were arrested and convicted. They admitted that they had successfully smuggled similar amounts of heroin on five different occasions, in toto about enough to supply the heroin market in New York for 6 months. The indictment of Moises was therefore one of the most important cases in the war against narcotics smuggling in U.S. history.

When the U.S. Customs learned that Moises Torrijos was en route from Spain to the Canal Zone—the Canal Zone being our territory, I emphasize—on a cruise ship, officials in New York instructed the customs agent in Panama, Mr. Leland L. Riggs, Jr., to act upon the warrant and to arrest Moises when he landed in U.S. territory, the Canal Zone.

Mr. Sayre testified before the Foreign Relations Committee that he saw the CIA reports on Moises travel plans and made those reports available to his superiors in Washington. He then testified that he was instructed by his superiors to inform General Torrijos about the situation. Subsequently, Moises left the cruise ship in Venezuela and flew directly to Panama, thereby bypassing U.S. jurisdiction in the Canal Zone, and leaving Mr. Riggs, the U.S. representative, waiting at the dock.

When I examine this set of facts, I can draw only one conclusion: Mr. Sayre, in an official act, took steps to frustrate the judicial branch in the performance of its official duties. In other words, he used his office for the obstruction of justice. He did this not only in contravention of U.S. law, but also in violation of his constitutional oath as an officer of the United States and a member of the Foreign Service.

Only 4 years ago, the House Judiciary Committee approved a resolution of impeachment against the President of the United States, charging that he had prevented, obstructed, and impeded the administration of justice. The President resigned. I submit, Mr. President, that the same words apply to Ambassador Sayre.

Now, it is said that the Department of Justice has found no case against Mr. Sayre. I have not been privy to the Justice Department's findings; but it is not inconceivable that all the evidence was not available before the statute of limitations had run. The Department of Justice, unfortunately, has become highly politicized. I would not be surprised to find that the Department was not anxious to prosecute a case that would have publicized the true nature of the dictatorial Torrijos regime at a time when the State Department was anxious to make treaties for the Panama Canal giveaway.

In any case, the full evidence did become available about 60 days after the statute of limitations had run, when the Ambassador testified before the Foreign Relations Committee. Even then, Mr. Sayre's statements were carefully constructed to avoid open admission of culpability. He does not specifically admit that he was aware that Moises would be arrested. He does admit, however, that he saw the CIA reports on Moises' plan to disembark in the Canal Zone, and he (Mr. Sayre) initiated steps to make sure that his superiors in Washington saw those reports. His superiors, not surprisingly, then instructed him to let General Torrijos know "that we were aware of the plans." He so told the general.

Is it not a strange coincidence that Moises Torrijos just happened to return by a route by which he was able to avoid U.S. jurisdiction, and therefore avoid arrest, on the basis of the sealed indictment handed down against him in New York City for alleged complicity in an enormous smuggling racket involving incredible amounts of heroin being shipped into this country?

There can be no other interpretation that his actions were intended to avoid an international incident by frustrating the actions of the U.S. Customs agent. If Mr. Sayre was unaware of Leland Riggs' order to arrest Moises, there would have been no need to inform General Torrijos about anything, or to contact Washington for instructions.

Mr. SCOTT. Mr. President, will the Senator yield?

Mr. HELMS. I yield, gladly, to my friend.

Mr. SCOTT. Mr. President, I appreciate the Senator yielding. I believe he is doing a wise thing in bringing before the Senate his concerns about this appointment.

I notice that Mr. Sayre has a Virginia residence. The calendar indicates that he is appointed from Virginia, that he is a first class foreign service officer. That is his classification, in the first class. I have not met the gentleman; I do not know him.

However, from what the Senator from North Carolina is saying, it does appear to be an obstruction of justice. But to me it is an obstruction of justice by one Government department against another Government department. I wonder what official of the State Department authorized Mr. Sayre to sound the alarm in this case, if the distinguished Senator from North Carolina knows, so that Mr. Torrijos could escape the clutches of the law.

Mr. HELMS. The Senator from Virginia knows how difficult it is to find out anything from the State Department. They have not provided any names, I say in response to the Senator's question.

Mr. SCOTT. Well, we have the distinguished chairman of the Committee on Foreign Relations in the Chamber at this time. It seems to me that the appropriate committee of Congress—that may be the Committee on Foreign Relations—should make inquiry and should know who did this. I understand they have conducted a hearing on the nomination.

But I am not aware of them probing into this to find out who told Mr. Sayre that he should alert Mr. Torrijos that the law was waiting for him at his destination and enabled him to evade lawful process and arrest had he landed within the Canal Zone.

I do not have any brief for Mr. Sayre carrying out the order, and yet it seems to me that the more guilty agency is the State Department rather than this individual man. If the State Department did it in this case and it goes unnoticed—certainly it is not unnoticed—but if it is not in some manner corrected, it seems to me it could very well happen on numerous occasions, and it is something that apparently should not happen. Just by my limited knowledge, and it is quite limited, of the case, it is something that should be prevented from happening in the future. One Government agency should not interfere with the administration of justice by another Government agency.

So I think it goes far beyond what Mr. Sayre was doing and his guilt or innocence of wrongdoing. I think it is an indictment of the State Department, and I think that the Department of State would want this to be clarified so that it could let the Senate know the facts in the case.

(Mr. MOYNIHAN assumed the chair.)

Mr. FORD. Mr. President, I know I have to go through the distinguished Senator from North Carolina to ask the Senator from Virginia a question. So will the Senator yield?

Mr. HELMS. I am delighted to yield to the two able Senators, if they desire that I do so.

Mr. FORD. Who was the Secretary of State at the time this occurred?

Mr. SCOTT. I am not aware as to the date that it occurred.

Mr. HELMS. The Senator asks a relevant question. That was in 1972, so it was a previous administration.

Mr. FORD. The point I am making is we are fussing about the State Department and the problems that are there. I am not saying I am objecting to the approach or the tack that the Senator is taking as it relates to this nomination. But I think we are beginning to paint with a broad brush here now and we should be just a little bit reluctant. We are talking about something that happened in 1972, and this is 1978. If it was wrong in 1972 it is wrong now. But, nevertheless, I think we should bring it down to a point and look at where it happened and under whose instructions and take it from there. I do not think we should take it from today and say this organization, or this group, this State Department, allowed it to happen.

Mr. SCOTT. Mr. President, if the Senator will yield further, I do not believe it is a question as to who was Secretary of State or who was President of the United States. I believe we all know that there is a self-perpetuating bureaucracy within the State Department, and I want it to be investigated to find

out who gave the order, whether or not they are still with the State Department, and it would be my guess, a pure guess, that they are still there because the State Department does have a vast bureaucracy.

I do not necessarily use the word "bureaucracy" in any evil or bad sense of the word because a bureaucracy sometimes is necessary to get the work done that a particular department is charged with.

But I believe that we should find out, and I believe it is a function of our Foreign Relations Committee to determine who it was that gave the alarm and prevented the apprehension of a man who is charged with a criminal violation under U.S. law. To me whoever did it was wrong in what he did. I think we should prevent such activity happening regardless of the administration in power. And it is not too late to investigate. It may be that it is too late for criminal prosecution, but I do not know.

Mr. HELMS. I will say to the Senator the statute of limitations has run, of course, on this matter. But that is not the basis of the doubts of the Senator from North Carolina about the advisability of the confirmation of the nomination of Mr. Sayre. The Senator from Kentucky is entirely correct. He points out that this episode occurred in a previous administration. But this administration is defending Mr. Sayre's actions, and is seeking to promote him.

I say to him, and I say to the Senator from Virginia, it is just as reprehensible for one administration to approve such actions as it is for the other to engage in them. It is bipartisan folly.

The Senator from Virginia mentioned that most of the echelons of power in the State Department continue to hold power when the administrations change, and he is exactly right about that. But I do not know whether Henry Kissinger had anything to do with the judgment on this or not. He was not yet Secretary of State, but he already had much power. I would not be surprised if he was involved. But I remind the Senator that I did not vote for the confirmation of Henry Kissinger as Secretary of State.

My concern about this nomination is nonpartisan. I just think it is reprehensible for the executive branch of the Government to interfere with the judicial branch, particularly in a matter involving such a serious crime as the smuggling of enormous amounts of heroin into this country—a drug which has ruined the lives, the families, and the financial stability of so many thousands of Americans. To sweep this thing under the rug and say, "Oh, well, boys will be boys," is unthinkable as far as I am concerned.

Mr. SCOTT. As I understand this, this was not even interfering with the judicial branch. It was one executive department interfering with another executive department. There was an arrest warrant out for this individual Torrijos, and the State Department, through Mr. Sayre, alerted him that there was a warrant for his arrest.

Mr. HELMS. There was a sealed indictment against Moises Torrijos, under order of a Federal judge.

Mr. SCOTT. A sealed indictment. I appreciate the Senator enlightening me on this matter. But there was wrongdoing.

We have two classifications of wrongdoing, as the distinguished Senator knows, in the law. We have one that is wrong because it is forbidden, mala prohibita, because the statute says it is wrong, and then we have an act, mala in se, where it is wrong in itself. I think it is wrong in itself to do what was done in this case. I think it violates our system of justice.

So I hope that the matter still might be looked into regardless of the administration in power so we can determine whether the person who gave the order is still an employee of the Government.

I appreciate very much the distinguished Senator yielding.

Mr. HELMS. I certainly appreciate the comments of the able Senator.

Mr. McCLURE. Mr. President, will the Senator from North Carolina yield?

Mr. HELMS. I am delighted to yield to the Senator from Idaho.

Mr. McCLURE. I thank the Senator for yielding. I could not help but become interested in the exchange that was going on. I have a very brief statement, if the Senator will permit, that I will make and then engage in a colloquy with the Senator from North Carolina and the Senator from Virginia on this subject.

Mr. President, I am especially concerned about this nomination because it appears that we have a pattern of actions by Mr. Sayre, a pattern that is detrimental to the conduct of our foreign policy. It is not just that he tried and succeeded in his attempt to prevent the arrest of Moises Torrijos. The earlier incidents involving the agents of the Bureau of Narcotics and Dangerous Drugs shows that he was desperately trying to keep the lid on the Panamanian situation.

Mr. Sayre must have known that the Torrijos government was riddled through and through with corruption—not just ordinary graft and corruption, but a conscious, governmental policy of corruption. The highest officials of the Panamanian Government were using government facilities in the narcotics traffic, and they were using government policy to direct and protect it. The record shows, for example, that the government's airport at Tocumen was being used to distribute shipments to North America, that the Foreign Minister was signing illegal diplomatic passports to facilitate the trade, and that diplomatic processes, such as declaring U.S. drugs agents persona non grata, were being used to harass drug enforcement.

Mr. Sayre appears to have been a willing partner in covering up this policy. I do not say that he participated in the sordid aspects of the trade; but he was aware of nature of the officials with whom he was dealing. He was willing and ready to go to considerable lengths to prevent incidents and to curry their favor. I do not believe that any foreign policy goals can justify such action.

Mr. President, this Nation continues to hear questionable actions by public officials justified on the grounds that "I was only acting under orders." The double standard which the media and some Members of Congress maintain sometimes pursue such statements to the very top. Sometimes they do not. But the fact remains that the statement usually leaves a bad taste in our mouths.

"Acting under orders" was a popular phrase during the Watergate era. We heard it several times during last week's television series, "Holocaust." And it would not surprise me if Bert Lance utters these words in the near future.

Today, the Senate is being asked to approve the nomination of another man who was acting under orders, Robert M. Sayre. He is accused of alerting the brother of Panamanian Dictator Omar Torrijos that he was the subject of a sealed grand jury indictment.

Was the security of the United States at stake? No.

Was the welfare of either the people of Panama or the United States at stake? Certainly not by helping an accused drug smuggler escape criminal punishment.

Would the relationship between the two nations in any way be impaired?

It is difficult for me to imagine how a relationship between two nations would be impaired by the arrest of an alleged drug runner, even if that drug runner was the brother of a dictator, and how that could have long-range diplomatic implications for us.

No, the truth of the matter is—and we all know it—that the impetus for a canal treaty was so strong that all other considerations, from moral leadership to normal diplomatic procedures, were shunted aside. Many of us have long suspected that "international cronyism," practiced by State Department personnel, will put personal philosophy ahead of our country's best interests. If we confirm Robert Sayre under these conditions, we not only admit that such things exist, we are giving them the green light to do it again.

An awful lot of people—including many Senators—have urged the Congress to resume its rightful role in the development of foreign policy. Well, we have a chance to take the first step in that direction today. We can do it by rejecting outright the nomination of a man who admits he put himself above the law and protected a citizen of another country to the detriment of the American people.

Mr. President, I think it is high time we give a consistency to the moral leadership that this country demands and asserts. I remember the discussions during the Mylai incident when Lieutenant Calley was on trial for having obeyed orders, and that was his justification for the action that he took, and he paid the price by being convicted of a criminal offense.

I remember the repeated assertions during that television special "Holocaust" of the erosion of the moral strength of the German people, the bit-by-bit manner in which they got pushed into positions of rationalizing their wrongdoing and were able to rationalize to the extent that they were no longer morally offended or outraged by the atrocities against the Jewish people under the Nazi regime.

I remember how the same kind of reaction was undertaken during Watergate. Every little bit of deception, every little bit of dishonesty, every little bit of obstruction of justice was built upon the last one and became rationalized to the very top of the administration of this country.

We are asked now by one of the committees that was most active in the Mylai incident in investigating what was said there, one of the committees that has applauded our President, as I applaud the President, for trying to establish a respect for human rights and to elevate the moral consciousness of the international community, to forgive or forget the policy of this Government in obstructing justice in furtherance of diplomatic goals.

Mr. Sayre is not the issue. He happens to be caught in the middle of that issue. But we cannot avoid the issue simply because Mr. Sayre is involved in it.

I thank the Senator from North Carolina for yielding and for having taken this time to point up not the wrongdoing just of one man but the wrong of a policy that permits this to go unnoticed and almost without any indication at all of moral outrage on the part of anyone, that our Government could obstruct justice and could do what we did in this instance by allowing somebody who is charged with crime—and I will be very quick to say he has not been convicted of crime, but charged with crime—to avoid having to face his accusers in a court of law, as would every other person if he did not happen to be the brother of the dictator.

Mr. HELMS. I thank the Senator for his splendid comments. Needless to say, he has put his finger on precisely the point. Mr. Sayre is not important in terms of what we are talking about here today. We are talking about the morality of this Government and the policies it will pursue in achieving whatever ends it may wish to achieve at a given time, and that is the defect the Senator has so eloquently emphasized.

Mr. McCLURE. I thank the Senator for mentioning that.

He mentioned earlier that this was not an insignificant drug charge. If I recall the information correctly, I think it was reported in the newspaper in several places that this young man, who was traveling under a fraudulent diplomatic passport, was arrested with a suitcase full—I think the facts are it was four suitcases and a carryon bag—and I think the heroin that he carried into New York had a street value of $65 million. It is that character of charge with which we are confronted.

Mr. HELMS. That is correct.

Mr. CURTIS. Mr. President, will the distinguished Senator yield for some questions?

Mr. HELMS. I am delighted to yield, yes.

Mr. CURTIS. First, let me ask, what position did Moises Torrijos hold when this happened?

Mr. HELMS. Moises Torrijos was Panama's Ambassador to Spain.

Mr. CURTIS. To what country?

Mr. HELMS. To Spain.

Mr. McCLURE. Mr. President, will the Senator yield? I think he is now the Ambassador to Spain and also to the Netherlands, and also Director of Treaty Information for the Government of Panama.

Mr. CURTIS. I would like to make sure that I understand the facts in this case. Did Ambassador Sayre take steps to frustrate the processes of justice in the Moises Torrijos case?

Mr. HELMS. I will say to the Senator that the record of his own testimony showed that Mr. Sayre initiated and carried out the steps that resulted in Moises Torrijos evading U.S. drug enforcement agents that were waiting in the Canal Zone to arrest him.

Mr. CURTIS. Did Ambassador Sayre's testimony state specifically that it was his intention to frustrate the arrest?

Mr. HELMS. Well, I guess the best way to respond to that question is to say that Ambassador Sayre's testimony is not entirely candid, which is consistent with his handling of all these events. What Ambassador Sayre says is this:

First. The arrest of Him Gonzales in the Canal Zone had created an international incident.

Second. The CIA had information that indicated that Moises Torrijos was going to disembark ship in the Canal Zone.

Third. Ambassador Sayre was afraid that this would result in another international incident.

Fourth. Ambassador Sayre took steps to ensure that his superiors in Washington were aware of the possibility of the incident.

Fifth. His superiors instructed him to contact Omar Torrijos and inform him that we were aware of the travel plans of Moises.

On getting this information Moises Torrijos, of course, changed his travel plans so as to avoid U.S. jurisdiction.

I will say to the Senator that none of Mr. Sayre's testimony makes any sense at all unless something was going to happen in the Canal Zone that would precipitate an international incident. The mere disembarkation of Moises Torrijos would not have caused an incident. The incident would have been created only if he were arrested. It follows therefore that, based on deductions from his own testimony, Ambassador Sayre was fully aware that an arrest was planned. But, on the other hand, we know from the sworn statement of Leland Riggs, Jr., the agent who had orders to arrest Moises Torrijos, that both the CIA and the State Department were aware of his orders. It is simply not credible that the Ambassador did not know that an arrest was planned.

Mr. CURTIS. Did Ambassador Sayre tell Omar Torrijos to change his brother's travel plans?

Mr. HELMS. Of course, the record does not show in detail what Ambassador Sayre told General Torrijos.

Mr. CURTIS. Did Ambassador Sayre tell Omar Torrijos that U.S. agents planned to arrest his brother if he disembarked in the Canal Zone?

Mr. HELMS. Again, the record does not show what was said. However, both Ambassador Sayre and Omar Torrijos were aware that a sealed indictment existed against Moises. The fact that both of them knew this was in itself an obstruction of justice, since the existence of a sealed indictment is not supposed to be revealed to anyone. Yet Mr. John Ingersoll of the Bureau of Narcotics and Dangerous Drugs had already traveled to Panama to tell Omar that the indictment existed. So even if Ambassador Sayre had refrained from telling the general that an arrest was planned, the general would have to be stupid not to put two and two together. I find it incredible, however, that no mention of an arrest was made in the conversations between Mr. Sayre and Omar Torrijos.

Mr. CURTIS. What did he say was the purpose of making the phone call?

Mr. HELMS. He said his intention was to avoid an international incident. That international incident could only have been the arrest of Moises Torrijos. The deduction is inescapable that Ambassador Sayre had every intention of frustrating this arrest. There is no way out of it, I will say to the Senator.

Mr. CURTIS. If he had the intention of frustrating the arrest, then his intention was to obstruct justice, was it not?

Mr. HELMS. I submit that the record supports as a reasonable conclusion that his intention was to obstruct justice. He took steps to inform his superiors about the problem—in effect, seeking ratification for his actions—and then actually took the steps which resulted in justice being obstructed.

Mr. CURTIS. Were these unnamed superiors the responsible parties, since they gave him instructions to act?

Mr. HELMS. Of course, the superiors were guilty as well as the Ambassador. An Ambassador does not have to follow instructions to do something illegal.

Mr. CURTIS. The State Department seems to be saying that the international stakes were too high to allow the arrest to proceed. Is there any justification for an Ambassador to act as Mr. Sayre did when the stakes are so high?

Mr. HELMS. In the judgment of the Senator from North Carolina, there is no justification for doing what Ambassador Sayre did. He did not even pretend to act under color of law. He simply took a so-called pragmatic decision to do something which is both illegal and contrary to his constitutional oath. We had a President of the United States, as I mentioned earlier, who resigned when he was charged with the obstruction of justice; surely an Ambassador is not exempt from what applies to a President, where the stakes are infinitely higher, of course.

Mr. CURTIS. Is it not true that the Justice Department has found no case against Mr. Sayre?

Mr. HELMS. To my knowledge, the Justice Department has made no public statements about Mr. Sayre. I do not know. However, it stands to reason that the Justice Department has no case once the statute of limitations has run. In this case, the statute of limitations had run about 60 days before Mr. Sayre publicly admitted to his role in this affair.

Mr. CURTIS. Is it fair to take Mr. Sayre to task when he has not been found guilty in a court of law?

Mr. HELMS. We are not attempting to judge Mr. Sayre as in a court of law; we are attempting to judge his fitness to be a U.S. Ambassador. There still remains the question of moral turpitude, and whether an Ambassador with such a record can be effective.

Mr. CURTIS. Was not the situation particularly difficult in the light of the fact that the United Nations Security Council was preparing to meet a few weeks later in Panama City to debate the treaty question?

Mr. HELMS. I would have to say in response that that situation was one of our own making; that is to say, the State Department's making. If our policy had been one of defending our rights, an arrest of Moises Torrijos and a full exposure of Panama's role in international drug trafficking would have demonstrated to the world that the Panamanian Government is corrupt. Instead, we elected to cover it up, and become partners with the Torrijos regime. Ambassador Sayre's problem stemmed from trying to implement a completely indefensible foreign policy.

Mr. CURTIS. About when did all this occur?

Mr. HELMS. This was in 1972.

Mr. CURTIS. Was the offense upon which the sealed indictment was made a serious one?

Mr. HELMS. It was awesomely serious, I would say to the Senator. It involved substantial amounts of heroin being shipped on a regular basis into New York City. One shipment was investigated, and I believe, if my memory serves me correctly, six Panamanians were arrested and convicted.

But to reiterate a previous statement that I made. To the suggestion that "Well, this was not all that bad in terms of violation of the law," I say I can think of no worse violation of the law, because the heroin involved in that one shipment was enough, as I recall, to supply all of the addicts in New York City the fixes they would need for 1 month's time. Let those who suggest it is not serious try to convince the mothers and fathers of the victims who are addicted to heroin; but do not let them try to tell it to the Senator from North Carolina.

Mr. CURTIS. And the indictment charged Ambassador Torrijos as being involved with this shipment?

Mr. HELMS. That is correct.

Mr. CURTIS. It is my understanding of the law that you do not need to be in the United States to be guilty of violating the narcotics law in bringing narcotics in.

Mr. HELMS. That is also correct. Anyone who is involved anywhere in the world in the chain of production or shipping is answerable to U.S. law if he enters U.S. jurisdiction.

Mr. CURTIS. I would like to know one other thing. Is there any evidence that those who thought that this arrest should not be made, that it would create an international incident, went to the arresting authorities and to their superiors, stated their case, and asked that the arrest not be made? Is there any evidence that that took place?

Mr. HELMS. Not to my knowledge.

Mr. CURTIS. It seems to me that that is real point here.

It is conceivable that if there was a minor offense, or even an offense which was serious but not extremely serious, involving the brother of the head of a state, there might be some hesitation to go through with the arrest, because conceivably it could create problems. If Ambassador Sayre and his superiors felt that they were justified in taking a position against making an arrest, the right procedure would have been to go to those who were about to make the arrest, and to their superiors, stating their case and asking that it not be done.

If the two agencies cannot agree, they can appeal to the superior of both, the President. I think that is done many times when there is a conflict of position between two agencies. If they honestly believe that the arrest would have created a bad situation, they had that course they could have followed. But to join hands with a defendant and tip somebody off to have him avoid arrest seems indefensible.

Mr. HELMS. I agree with the Senator, and I thank him for his comments.

Mr. McCLURE. Mr. President, will the Senator from North Carolina yield?

Mr. HELMS. I am delighted to yield.

Mr. McCLURE. Mr. President, I believe the Senator from Nebraska has put his finger on a portion of the problem, but, again, I want to get back to the point I tried to make a moment ago, that Mr. Sayre is not the major issue. Indeed, the Senator from Nebraska is correct in suggesting that maybe it is wrong for us to condemn Mr. Sayre if, as a matter of fact, he has never been tried and found guilty of a criminal offense. But it was not just an incident, a single attempt to protect the Government of Panama; it was a concerted policy expressed by the Ambassador and by our State Department to cover up the corruption in the Torrijos government so that we could do business with them on something which we thought was important to us.

Mr. HELMS. The Senator is exactly right.

Mr. McCLURE. That is what disturbs me. As I recall, it is not the incident or the severity of the incident that alone would cause the Senator from Idaho to take the floor today as I am doing, and I am sure the Senator from North Carolina would not be so motivated. But if we put that into the context of the pattern of our Government trying to make certain that nothing would rock the boat to disturb the ongoing negotiations and relationships between our countries, and remembering that a much lesser violation of the law occurred when some burglars ineptly broke into an apartment in the Watergate, the web of circumstances which flowed from that and the obstruction of justice that was apparent after that fact was enough to topple a President from office.

Mr. HELMS. That is correct.

Mr. McCLURE. And we have a much more serious offense here. Fundamentally, the crime with which Moises Torrijos is charged is a much more serious offense, and the pattern and the web of circumstances is a much more morally indefensible pattern than that which was condemned roundly, in this body and elsewhere, in the situation involving the Watergate burglary.

I think it is that fact upon which we must focus.

Mr. HELMS. The Senator is eminently correct.

The colloquy between the Senator from North Carolina and the Senators from Idaho and Nebraska emphasizes the fact that Mr. Sayre's actions were intended, at best, to avoid an international incident by frustrating the actions of the U.S. customs agent, who was representing the judicial branch of the Government.

Let me emphasize again that a sealed indictment against Moises Torrijos was at the heart of this matter.

Mr. Sayre notified General Torrijos, the dictator of Panama in effect, saying or implying, "Do not let your brother land in the Panama Canal Zone because U.S. agents are there to pick him up on a drug charge."

There is no way that Ambassador Sayre can pretend that he was unaware of the conditions which existed. He cannot pretend that he did not suspect that General Torrijos would not warn his brother. Mr. Sayre is far too experienced and intelligent a diplomat to plead ignorance on that point.

His testimony on this subject, Mr. President, simply was not candid. It is not, in the judgment of this Senator from North Carolina, believable.

Let me quote from the record. This is Mr. Sayre testifying.

> I learned, on or about December 6, 1972, from CIA reporting that Moises Torrijos planned to return to Panama from Spain by ship on or about December 9. Reportedly, Moises planned to disembark at the port of Cristobal in the Canal Zone.
>
> In December, 1972, United States relations with Panama were somewhat strained. Treaty negotiations were not progressing well, and Panama was in the process of arranging a meeting at the United Nations Security Council in Panama in early 1973 to discuss the Panama Canal Treaty issue. We had had some sharp confrontations with the Panamanians over narcotics issues. Panama bitterly protested the arrest of a Panamanian official, Him Gonzales, in the Canal Zone, as a violation of United States treaty obligations to Panama.
>
> As I recall the events of December, 1972, I asked the CIA Station Chief in Panama to be sure that State Department officials saw the intelligence reports in question. Subsequently, I was instructed by the Department to contact General Torrijos and let him know that we were aware of the plans, which I did.
>
> Subsequently, I learned that Moises Torrijos left the vessel in Venezuela and did not enter the Canal Zone.

It is clear that Ambassador Sayre is putting his actions in the context of our foreign policy goals in relation to Panama. He talks of the strain in relations, the problems of narcotics trafficking issues, and the lack of progress in the treaties. He is more specific later on in his testimony:

> I was acting on instructions from the Department of State. . . . I can assume what the Department of State had in mind, and that was that this would create a serious diplomatic incident in relations between the United States and Panama, and we already had strained relations with Panama.

Mr. President, what kind of a deal is this? What are we supposed to do in the face of the consequences of major drug trafficking in the United States? Are we supposed to say, oh, well, it might hurt somebody's feelings down in Panama? That is an argument that this Senator will never buy.

Mr. Sayre cannot absolve himself by pretending that he was only an instrument of the State Department, supposedly unacquainted with the arrest plans. The whole context is about narcotics arrests in the Canal Zone, and the possibility of a serious diplomatic incident if Moises entered the zone, our territory, our property. Mr. Sayre can only have reference to the planned arrest of Moises Torrijos as a result of that sealed indictment handed down in New York City.

A schoolboy can understand what went on and why. So let us not kid ourselves that the best interest of the United States was involved in this in any way.

Let us move on to the second point, a point which may be even more important that Mr. Sayre's actions. And that point is the grounds which the State Department chose for the defense of Mr. Sayre. In a letter to me from the Assistant Secretary of State, Mr. Douglas Bennet, I am told that:

The arrest by USG authorities of a Panamanian Ambassador enroute to report to his government would have undoubtedly provoked a most severe incident between the two governments.

Ambassador Sayre was acting on instructions from Washington when he informed General Torrijos that the United States Government was aware of his brother's travel plans. An Ambassador in the field is expected to act on the instructions he receives, and the Department of State is satisfied that Ambassador Sayre's conduct was entirely proper.

Well, let me dissent, Mr. President. That is the same argument that was used at Nuremberg, that was the same argument used in Watergate, that was the same argument used by Lieutenant Calley. Now comes the State Department with the same argument.

I yield to the Senator from Idaho.

Mr. McCLURE. I thank the Senator for yielding.

Beyond that argument about whether or not he acted correctly when directed is whether or not the Senate of the United States, by voting affirmatively on his nomination, is going to say that we approve of that kind of conduct in foreign policy.

Mr. HELMS. That is precisely why the Senator from North Carolina and the Senator from Idaho are standing here on Thursday afternoon talking about this issue. I do not propose to give the stamp of approval of this Senator—and I know the Senator from Idaho has the same feeling—to this kind of conduct.

Mr. McCLURE. That is precisely correct. I think we cannot overstress the feeling of outrage which the American people ought to have about a foreign policy that gets so perverted in its goals that the overriding issue is that of keeping good relations or avoiding bad relationships with a government as corrupt as the one in Panama that will lead us, ourselves, to be corrupted, as is evidenced in the course of conduct by our State Department, as shown in the actions by Ambassador Sayre.

Mr. HELMS. I thank the Senator.

Mr. SPARKMAN. Mr. President, will the Senator let me get in a few words?

Mr. HELMS. Yes, sir, I am delighted to.

Mr. SPARKMAN. I appreciate his yielding.

Mr. HELMS. If the Senator would let me complete my statement, I shall yield the floor to him.

Mr. SPARKMAN. I shall be very brief.

By the way, Mr. President, I ask unanimous consent to have printed in the RECORD, as a part of this discussion, a letter—Senator HELMS may have already introduced it. It is a letter to him dated March 15, 1978, a copy of which was sent to me.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF STATE,
Washington, D.C., March 15, 1978.

Hon. JESSE HELMS,
United States Senate.

DEAR SENATOR HELMS: I have your letter of March 9, 1978, to the Secretary of State concerning the nomination of Ambassador Robert M. Sayre to be Ambassador to Brazil. Your letter raises three points regarding the previous service of Ambassador Sayre.

1. The events of December 1972 involving Moises Torrijos were thoroughly reviewed by the Senate Select Committee on Intelligence. That Committee has compiled a complete file on this matter including all information known by Ambassador Sayre. The Select Committee has reported its findings in detail, first to the Senate Committee on Foreign Relations, and then to the Senate. In addition, the Department of Justice examined the issue of obstruction of justice and concluded that the Ambassador was following instructions and that the matter lacked prosecutive merit. Ambassador Sayre took the initiative himself to put in the public record the facts pertinent to his actions in the matter.

As the Select Committee reported to the Senate, General Torrijos was informed of the indictment of his brother, Moises, by an official of the Department of Justice in June 1972, some six months before the events of December 1972.

In 1972 relations between the United States and Panama were somewhat strained and Panama was preparing to present its case on the Panama Canal to the United Nations Security Council which met in Panama in March 1973. The arrest by USG authorities of a Panamanian Ambassador enroute to report to his government would have undoubtedly provoked a most severe incident between the two governments.

Ambassador Sayre was acting on instructions from Washington when he informed General Torrijos that the United States Government was aware of his brother's travel plans. An Ambassador in the field is expected to act on the instructions he receives, and the Department of State is satisfied that Ambassador Sayre's conduct was entirely proper.

The Department of State is aware of the affidavit signed by Mr. Leland Riggs. At the time of the events in question, Mr. Riggs was a member of the staff of the American Embassy in Panama, and advised both the Ambassador and the Government of Panama on customs matters. His supervisor was Ambassador Sayre. Another unit in the Embassy staffed by the Bureau of Narcotics and Dangerous Drugs (BNDD) was responsible to the Ambassador for advising on drug enforcement matters. Neither the Ambassador nor anyone under his supervision had any authority in the Canal Zone. Ambassador Sayre does not recall being informed by anyone that Canal Zone authorities intended to arrest Moises Torrijos or that Mr. Riggs discussed the matter with him. Nor has the Department found any record of discussion of this matter with the Department of the Treasury. Accordingly, the Department is unable to comment on Mr. Riggs' affidavit.

With respect to the questions on page 2 of your letter, all available information is on file with the Senate Select Committee on Intelligence. As to the questions on page 3 of your letter, the Department of State has no doubt that Ambassador Sayre is well qualified to represent the United States abroad and appreciates the prompt action of the Foreign Relations Committee in recommending that the Senate advise and consent to his nomination as Ambassador to Brazil.

2. The Department of State thoroughly checked the allegations against the Foreign Minister of Panama at the time they were made by the Chairman of the House Subcommittee in March 1972. The Assistant Secretary of State for Inter-American Affairs, Charles Meyer, then wrote Foreign Minister Tack on March 21, 1972, assuring him that the United States agencies concerned had no information connecting him with drug trafficking and apologizing for the injustice done to him.

When the news report first appeared the Panamanian Government declared persona non grata the personnel of the BNDD office in the Embassy of Panama. Because the departure of the personnel of this office would disrupt an increasingly effective cooperative drug control program with Panama, the Department and the Ambassador were anxious that these agents remain. The Special Agent in Charge of the office informed Ambassador Sayre that he had not discussed the Foreign Minister with Congressman Murphy and volunteered to say so in writing if that would help persuade the Panamanian Government to change its decision. The Ambassador agreed that he should prepare a letter and the Ambassador would see whether such a letter would do so. Department records indicate that the Special Agents were authorized by their headquarters in Washington to prepare the letter and the Ambassador was authorized by the Department to provide it to the Panamanian Government (a copy of the letter dated March 14, 1972, is enclosed for your information). The Panamanian Government was not satisfied with the letter and reaffirmed its decision on the expulsion of the agents. However, it agreed to accept replacements immediately thus making clear its intention to maintain the cooperative drug enforcement program.

The Department of State was completely informed by telephone and cable throughout this entire incident and all the actions taken by Ambassador Sayre were with the full knowledge and approval of the Department.

3. Ambassador Sayre first learned of the allegations that he knew one Cacho Otero in November 1977 during the review by the Senate Select Committee mentioned above. Your letter is the first indication the Department had that this allegation may have been brought to the attention of a Department officer. A search of the Department's records does not disclose any report as you describe. Mr. Prengel has retired but occupied the position as described from 1965 to 1969. In any event, Ambassador Sayre does not recall ever having any association, official or otherwise, with anyone by that name. The Department would note that it is not uncommon for persons to claim that they know Department officials, especially Ambassadors, when in fact such claims are baseless.

In summary, Ambassador Sayre acted in the incidents discussed above with the knowledge and on instructions of the Department of State and had then, and has now, its full confidence. It should also be noted that the Drug Enforcement Agency on February 20, 1974, awarded Ambassador Sayre its Certificate of Appreciation for "out-

standing contributions in the field of drug law enforcement" covering the period of his service in Panama.

Sincerely,

DOUGLAS J. BENNET, Jr.,
Assistant Secretary for Congressional Relations.

EMBASSY OF THE
UNITED STATES OF AMERICA,
PANAMA, REPUBLIC OF PANAMA,
March 14, 1972.

Hon. ROBERT M. SAYRE,
American Ambassador,
Panama, Republic of Panama.

DEAR MR. AMBASSADOR: We have not seen the article by Mr. Jack Anderson which is reported to have appeared in the Washington Post of this date. However, we understand that it reports that Congressman John Murphy has stated that representatives of the United States Bureau of Narcotics and Dangerous Drugs in Panama implicated His Excellency, Juan Antonio Tack, the Minister of Foreign Relations of Panama, and a brother of General Omar Torrijos, the Commandant of the National Guard of Panama, in international drug trafficking.

We, the undersigned, as the representatives in Panama of the United States Bureau of Narcotics and Dangerous Drugs, had one brief meeting with Congressman Murphy, at his request, during his recent visit to Panama. We wish you to know that neither during that meeting nor at any other time have we mentioned to the Congressman either the Foreign Minister or any relative of the Commandant of the National Guard.

Respectfully,

WILBUR V. PLASE,
RUBEN MONZON.

Mr. SPARKMAN. I think this letter covers a great deal of what the Senator has been saying and what I would like to say. I should like to read the concluding paragraph in the letter. This was written by the Assistant Secretary for Congressional Relations of the Department of State, Douglas J. Bennet, Jr.:

In summary, Ambassador Sayre acted in the incidents discussed above with the knowledge and on instructions of the Department of State and had then, and has now, its full confidence. It should also be noted that the Drug Enforcement Agency on February 20, 1974, awarded Ambassador Sayre its Certificate of Appreciation for "outstanding contributions in the field of drug law enforcement" covering the period of his service in Panama.

Something has been said here about the sealed indictment in New York City involving Moises Torrijos. I have forgotten the tremendous amount of drugs and money that involved. It seems to me that an effort was made to tie Ambassador Sayre to that. Yet he was given the highest award in 1974, 2 years after that, a certificate of appreciation for outstanding contributions in the field of drug law enforcement.

I also would like to call attention to the fact that in this letter it is brought out that these matters we have been talking about were examined by the Senate Intelligence Committee, and I believe that, in the secret sessions of the Senate, we had a full discussion of this issue.

Furthermore, the Department of Justice checked into all of these things, investigated them, looking toward prosecution, but reported that there was no cause for any prosecution, that there was no violation of law which required the Department to take action. I think we ought to bring out all of these things and let the whole truth be known.

Mr. HELMS. I agree.

Mr. SPARKMAN. By the way, I was greatly interested in the dialog between the Senator from North Carolina and, particularly, the Senator from Nebraska, one reading a question and the other answering it, showing an apparently well-prepared dialog between them. I always like to discuss thing straight from the shoulder. I am not criticizing, but I just could not help but comment on that.

Mr. McCLURE. Will the Senator yield?

Mr. SPARKMAN. I yield to the Senator.

Mr. McCLURE. I thank the Senator for yielding. Did I understand the Senator to say that the Department of Justice has certified that there was no violation of law?

Mr. SPARKMAN. Yes.

Mr. McCLURE. Do I understand from that that the Department of Justice says that someone who tips off a person who is about to be arrested—

Mr. SPARKMAN. Let me read the letter. I think that would be better, rather than try to—

Mr. McCLURE. I just wanted to get a little bit of that dialog right straight from the shoulder that the Senator was talking about.

Mr. SPARKMAN. All right. This letter is from the Department of Justice, addressed to Mr. Herbert J. Hansell, Legal Adviser of the Department of State. It says:

DEPARTMENT OF JUSTICE,
Washington, D.C., February 23, 1976.

Mr. HERBERT J. HANSELL,
Legal Adviser, Department of State, Washington, D.C.

DEAR MR. HANSELL: This is in reference to the Department of Justice's inquiry into the actions of former Ambassador to Panama, Robert M. Sayre, during December of 1972.

We had received information that Mr. Sayre may have violated the obstruction of justice statute (18 U.S.C. 1503) when he notified Omar Torrijos, the Chief of State of Panama, that his brother, Moises, who was under a narcotics indictment in New York, was about to return to Panama from Spain and could be subject to arrest if and when he entered United States territory.

The Criminal Division has carefully reviewed the evidence and documents concerning this incident and feel that it does not warrant prosecution. Since this incident took place in late 1972, it is of course barred by the statute of limitations.

Notwithstanding that obstacle, the facts themselves were not of sufficient seriousness to warrant a full criminal investigation since Ambassador Sayre was following written instructions when he notified Torrijos.

Therefore, even if the matter were not time barred, the matter lacks prosecutive merit.

We trust that this information has been of help to you and if you desire further assistance, please do not hesitate to contact me.

Sincerely,

ROBERT L. KEUCH,
Deputy Assistant Attorney General.

I do not see how there could be a fuller statement from the Department of Justice as to whether or not the facts would justify prosecution.

They say they would not.

Mr. McCLURE. Will the Senator yield further?

Mr. SPARKMAN. Surely.

Mr. McCLURE. I thank the Senator for yielding, because it is revealing that the terminology in the letter is not exactly the same terminology the Senator had used in his earlier statement and I am grateful to have this on the record.

The Senator earlier said there was no crime involved. What the Department of Justice says is that it does not warrant prosecution.

Now, those are quite different matters, in the first place, and, in the second place, the judgment that it does not warrant prosecution is based, according to the letter, upon two things. One is the lapse of time, the other is that he was following written instructions.

I assume from that, if Lieutenant Calley had had written instructions at My Lai, the Department of Justice would have said, therefore, that it did not want prosecution.

If, as a matter of fact, we had had a similar finding in Watergate, there are a number of the White House officials who were prosecuted for obstruction of justice who would not have been prosecuted because it did not warrant prosecution.

If the Senator will recall, the Department of Justice at that particular time had that feeling concerning it.

Mr. SPARKMAN. Let me reread this sentence. I cannot believe that the Senator heard this clearly.

Mr. McCLURE. I hope the Senator will.

Mr. SPARKMAN. And the conclusion that we draw from it.

Mr. McCLURE. Read it again in case anybody misses its meaning.

Mr. SPARKMAN. It says:

. . . the facts themselves were not of sufficient seriousness to warrant a full criminal investigation since Ambassador Sayre was following written instructions when he notified Torrijos.

Mr. McCLURE. That is precisely what I just said I understood the letter to say.

Mr. SPARKMAN. It says there were not sufficient facts.

Mr. McCLURE. Do written instructions constitute a bar to a violation of law?

Mr. SPARKMAN. I am not going into a discussion of ifs, ands, or buts.

I have read what the Department of Justice of the United States had to say.

Mr. McCLURE. Let me state categorically to the Senator then, not asking him for his opinion, but I would welcome any comment he might make, that written instructions are not a bar to prosecutions, that a person who carries out a written instruction which is, in itself, a violation of law is guilty of a violation of law.

The law is very clear on that.

Mr. SPARKMAN. If the facts warrant it, but the Justice Department said they did not in this case.

Mr. McCLURE. They said they did not warrant a full investigation.

The same thing was said by Attorney General Mitchell at the time of Watergate.

Mr. SPARKMAN. By the way, just a little side statement as a matter of interest. The Senator has referred repeatedly to the Watergate break-in. I have always said that if the President at that time would have said that he regretted to learn what he had been told, and he apologized to the country, there never would have been all of the other stuff that followed.

Mr. McCLURE. The President did not resign from office because he had been found guilty of a crime, but some of the people on the White House staff were convicted of a crime, and the crime that they were convicted of was obstruction of justice, precisely the charge that is being made here.

Mr. SPARKMAN. But I am sure the Senator remembers that the House Judiciary Committee had voted articles of impeachment against him.

Mr. McCLURE. That is correct.

Mr. SPARKMAN. And the process to remove the President had begun.

Now, I do not care about going back into all that, and I do not want to deal in personalities. However, I knew Richard Nixon. I knew him in the House. I knew him in the Senate. I knew him when he was Vice President. I knew him when he was President.

I was with him in his office on the two nights preceding his resignation when he was wrestling deep in his soul with what his course of action should be.

I recall very well that second night when he talked with us a while, and told us that he was going to make a TV appearance immediately following that meeting. He invited us to stay there in the TV room with him. I decided I would go home and watch it on TV. And I did just that.

But I remember that second night about 15 or 20 Members of Congress when he was talking to us. There were whom he had invited to come in. He talked with us about matters generally as they had developed when finally he broke into sobs, and could talk no further. He got up and just left the room without saying anything further.

I want to say I was sorry for the man. I really was. But I always felt that if he had just made a clear announcement, an apology to the country for the Watergate break-in, we would have heard nothing more about it.

Mr. McCLURE. I suspect what the distinguished Senator from Alabama is saying, that if the President had apologized there would have been no prosecution of his subordinates and if the President had apologized they would not have gone to prison, if I understand.

Mr. SPARKMAN. Does the Senator refer to impeachment?

Mr. McCLURE. Excuse me.

The Senator knows that some of the Watergate figures were tried for an obstruction of justice. They were found guilty and they were sentenced and they have been in prison.

What the Senator is suggesting, that if the President had apologized the Department of Justice would have said that there was not sufficient reason to investigate.

Mr. SPARKMAN. I am talking about the break-in.

Mr. McCLURE. Well, I am talking about the Department of Justice.

Mr. SPARKMAN. I think to the country as a whole the break-in itself was a minor thing at that time.

Mr. McCLURE. I understand the point the Senator is making. But the point I am trying to make is that the obstruction of justice charge was that of the people who were trying to prevent the Department of Justice from bringing charges against people who had violated law. People involved in that were found guilty. They were sentenced. They served time in prison. We have in this instance an official of the Government of the United States obstructing justice by making it possible for someone charged with crime to avoid being arrested so that he can face his accusers in court. That, by any test, is an obstruction of justice.

Mr. SPARKMAN. I am not trying to brush it off. I do not think it can be. I am not arguing with the Senator on that.

What I say is this: I sat through these hearings, when Ambassador Sayre was before us. He formerly had been Ambassador to Panama and to other Latin American countries. He was before us in connection with his nomination as Ambassador to Brazil. I heard every word of that testimony. We brought out all we could, and he told us voluntarily about the matter discussed earlier.

The Foreign Relations Committee—Democrats and Republicans alike—voted, to a man, to recommend favorably to the Senate confirmation of the Sayre nomination. I think that says a lot.

Mr. McCLURE. I understand the compassion with which the Senator is looking at the person of Robert Sayre, and it is not my point to condemn Mr. Sayre. My point, throughout all this, has not been even to suggest that he is the issue. I do not think he is the issue. I think the issue is whether or not one Federal agency of Government has the right to obstruct the enforceemnt of law by another agency of Government, as was done in this case.

The Senator from Nebraska has indicated that there is a way to resolve that conflict. If you do it in the appropriate way, you lay out before the Department of Justice and the Treasury Department what is involved in the policy decisions that must be made as to whether or not the Constitution will be carried forward. The State Department did not do that in this case. They did not bother to consult with either the narcotics enforcement agency or the Department of Justice prior to the time they tipped off General Torrijos that his brother was about to be arrested.

That is the issue. It is not the policy so much and it is not the result so much as it is the way in which they undertook to frustrate the prosecution of a violation of the criminal laws of this country. The State Department succeeded in doing it, and they succeeded in doing it in the very worst possible way. That is the issue.

Mr. SPARKMAN. I do not know anything further that I can say. When the entire Committee on Foreign Relations, in performing its duties as given to it under the rules of the Senate and under the Constitution of the United States, holds a hearing and goes into these things and reports favorably on the man's nomination, I do not see much more we can do. I heard the testimony. I voted with the other members of the committee to report the nomination, and I believe the nomination should be confirmed. That is all I have to say.

(Mr. ZORINSKY assumed the chair.)

Mr. GRIFFIN. Mr. President, will the Senator yield?

Mr. HELMS. I yield to the distinguished Senator from Michigan.

Mr. GRIFFIN. Mr. President, I am a member of the Committee on Foreign Relations, and I have listened with interest and attention to the distinguished chairman of the committee, for whom I have great respect. I am sure he is right, that the committee did unanimously report this nomination to the floor.

I feel compassion and concern about the nominee and the situation he was in, in that he was following instructions when he took the action which can be regarded as obstruction of justice. Yet, I also am troubled by the fact that in some situations, such as this one, we seem to find many people saying that it is all right to break the law in the national interest, but in other situations it is not.

Perhaps the plight and the difficulty of the FBI already has been discussed in this debate. I am not sure. But there is a gentleman by the name of LaPrade, who was the head of the New York Bureau of the FBI. I cannot help recall that his defense is that he was following directions. The FBI was trying to protect the American people against the terrorism and the threat of the Weathermen a few years ago. I do not think that anyone who lived through that period could dismiss the fact that there was some danger and a threat from that underground group.

The FBI, as I understand the situation, engaged in some acts which were certainly technically in violation of the law; but they did this under instructions from above. I find it very difficult to distingushed between that situation and the situation of Mr. Sayre. It may be that in his case, the statute of limitations has run, but that is a distinction that I am not willing to admit, when we are talking about the confirmation of a nomination.

Apparently, if you break the law in the national interest and you are in the State Department, you get promoted; but if you are in the FBI and you break the law in the national interest, in accordance with instructions, you may be prosecuted. At least, that is the situation right now with regard to Mr. LaPrade.

Can the Senator from North Carolina help me? Is there something wrong with my analogy and reasoning?

Mr. HELMS. Not at all. The distinguished Senator has a firm handle on the basic question. It is not a matter of whether you disagree with the Foreign Relations Committee. It is a matter of one thing: Was the law abrogated? I do not think there is any question about the answer to that question.

Then you get into the discussion of it in terms of how you can defend it, and then you reach the Senator's dilemma: Is it all right for the State Department to do it but not all right for the FBI to do it?

The Senator's question is obvious and it is relevant, and I greatly appreciate his comments.

Mr. GRIFFIN. This troubles me very much.

I also was troubled by the fact, as I recall, that the nominee in this situation did not really provide the information as to who in the State Department authorized him to take the action which resulted in General Torrijos' brother not being arrested.

I hope that if the Senator from North Carolina is going to give the Senate an opportunity on this, he might consider the possibility of moving to recommit this nomination to the committee, with the suggestion or recommendation that they investigate further into some of these questions that still are unanswered, about what happened in this situation.

Mr. HELMS. That is exactly my intentions. I am going to give the Senate that opportunity. I thank the Senator from Michigan for proposing that suggestion.

Mr. President, I have no desire to prolong this discussion, but let me say again that I find it rather appalling that the Department of State or anybody sympathetic with the Department of State, or representing the Department of State, should attempt to justify Mr. Sayre's actions as Ambassador of Panama on the ground that he was acting on instructions.

That is the basic point, and I could not more vehemently disagree with any defense of that nature.

What kind of argument is it? Of course, any official of the United States is supposed to act upon the instructions of his superiors but that does not go so far as to say that any official must act in violation of the law. That is the point and that is the only point involved here. It is not a matter of whether the statute of limitations has run. Of course it has, but that is beside the point in considering this nomination.

It is a matter of whether this man, by his own initiative, set up a set of circumstances resulting in a deliberate obstruction of justice. Any reasonable man looking at the evidence must conclude that that is precisely what happened, and here, as the Senator from Michigan has just said, we propose to promote him.

No one is required in this Government to obey unlawful, improper instructions. An ambassador is supposed to have the experience and the expertise to deal with local situations. He is also supposed to be intelligent enough to know what the law is. We are not dealing here with something that is obscure or that is a fine point that can be interpreted in several different ways. There is just one answer or the other. Was it obstruction of justice or was it not? And that is the only reason I am standing on this floor on Thursday afternoon in opposition to this nomination.

I am just not going to lend whatever credibility I have to a stamp of approval of one who, by his own acknowledgement and by the State Department's own acknowledgement, is guilty of obstruction of justice.

I reiterate that I am appalled that the Department of State says that an Ambassador is expected to act upon instructions even if he is instructed to do something that is unconstitutional or illegal.

Mr. President what kind of morality in foreign policy is this? How can we pose as champions of human rights with a foreign policy rooted in moral principles when the U.S. Department of State makes such an assertion? Is the prosecution of justice to be subordinated to foreign policy aims? How can we criticize Brazil for its attitude to human rights when the U.S. State Department says that foreign policy is more important than law? What authority can Mr. Sayre wield in Brazil on human rights when, by his own admission, he took steps to frustrate the arrest of a major drug trafficker? What destroys human rights more than dope? What is more heinous than a government officially protecting and arranging the dope traffic?

Of course an Ambassador is expected to act upon instructions. But if he doesn't agree with those instructions, he has two alternatives. First, he can use his special knowledge of the situation to persuade his superiors to change his instructions. Secondly, if he still thinks his instructions are unwise or illegal, he can resign. Ambassador Sayre did neither. Moreover, his own testimony makes it clear that his aim was to avoid a diplomatic incident at any cost, even if it meant frustrating the arrest of Moises Torrijos.

The judgments at Nuremberg, the judgment of Lieutenant Calley, the convictions in the Watergate cases have effectively disposed of the argument that a subordinate may suspend judgment as long as he is acting under instructions from his superiors. We can not project a dynamic foreign policy nor win the confidence of our allies if we sustain the doctrine that our ambassadors can take any actions to achieve our policy goals as long as they are acting under instructions.

Mr. President, the nomination of Ambassador Sayre is not to be judged solely by the Moises Torrijos incident. The fact is that the Torrijos incident only confirms that Mr. Sayre apparently acted without scruple to attain what he conceived to be the goals of U.S. foreign policy. There is another incident, well documented, which shows clearly that he did not hesitate to resort to deception and falsehood in his effort to placate the corrupt Torrijos dictatorship. The methods which he used certainly do not represent an acceptable standard of conduct for representatives of the United States abroad.

Moreover, this other incident does not only represent a deception and manipulation of the truth; it was a frontal attack on the integrity of Congress and of a very distinguished Member of the House of Representatives, Mr. JOHN MURPHY of New York. It was a deliberate attempt to mislead the American people and to coverup the narcotics trafficking of high Panamanian officials. Indeed, the Ambassador's disreputable actions in this earlier incident were a prelude to the obstruction of justice in the Moises Torrijos affair and necessary to a full understanding of the lengths to which Mr. Sayre was prepared to go.

In Mr. Sayre's testimony, which I quoted earlier, he said:

> We had had some sharp confrontations with the Panamanians over narcotics issues. Panama bitterly protested the arrest of a Panamanian official, Him Gonzales, in the Canal Zone, as a violation of United States treaty obligations to Panama.

Mr. President, what Ambassador Sayre characterizes as "sharp confrontations" is again another example of a lack of candor. The sharpness came from the Panamanian side; as for Mr. Sayre, he proved that he was willing to use deception and the clear abandonment of U.S. rights in order to placate a gangster government.

By way of background, we should note the circumstances of Mr. Sayre's arrival in Panama. Previously, Mr. Sayre had been named Ambassador to Uruguay in 1968; yet only a year later he was sent to Panama to replace Ambassador Charles Adair. The reason for the change of ambassadors was a fundamental change in the State Department's attitude toward Panama. Whereas before the United States had maintained a hands-off attitude toward Torrijos, a decision had apparently been reached in 1969 to accept Torrijos despite the fundamental illegality of his regime and to make him a partner of the United States.

Parenthetically, it should also be noted that this decision apparently sprang from the visit of Nelson Rockefeller in 1969 to Panama, and Mr. Rockefeller's promise to assist Torrijos in legitimizing his regime. Torrijos subsequently visited New York, met wth both Nelson and David Rockefeller, and came back and revised Panamanian banking laws to make Panama the off-shore banking haven it has since become.

Thus, Torrijos suddenly was hailed as a "progressive" military dictator, that is to say, a dictator of the left. It was well known to our officials that Torrijos' sister for example, had been apprehended in 1965 by the legitimate Panamanian Government while carrying Communist propaganda; and that Moises Torrijos had been denied a visa to the United States because of his trips to Moscow and other Communist connections.

So Ambassador Sayre was installed as part of the change in policy. A news story from Washington Post of December 22, 1969, reports on the change. With the arrival of Ambassador Sayre, embassy officials stopped describing our relationship with Panama as "cool but correct," changing to one of "dealing with each other on terms of mutual respect." Stripped of its diplomatic pretension, that phrase can be better understood as appeasement of Panama at any cost.

Mr. President, I ask unanimous consent that the Washington Post article be printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Dec. 22, 1969]

U.S. WARMS UP TO PANAMA

(By John M. Goshko)

PANAMA CITY.—After a year of holding Panama's military government at arm's length, Washington has switched to trying to improve its strained relations with the regime of Gen. Omar Torrijos.

The subject is one that U.S. officials are reluctant to discuss. They will say only that they are following the guidelines laid down by President Nixon in his October speech on Latin American policy.

Mr. Nixon spoke then of his administration's determination to accept governments as they are and not try to force upon them U.S. judgments about the respective merits of democracy and military dictatorship. He also intimated that Washington would adopt a more subdued stance.

Both concepts are evident in the current U.S. posture toward this 29,298 square mile nation (the size of South Carolina) of 1.3 million people. But the explanation that the U.S. Embassy here is only following the directive of the President does not fully account for the changes that have taken place.

In no other Latin country does the U.S. presence loom so large. Because of the life-and-death role played by the U.S.-controlled Panama Canal in the affairs of this country, the rest of the region traditionally regarded Panama as a quasi-colonial dependency of Washington.

That relationship underwent a violent wrench in October, 1968. The U.S.-trained and equipped National Guard then ousted a civilian president who had been in office only 11 days. Suddenly Washington, which had long taught democracy and military submission to civilian authority, found a star pupil staging a coup on the doorstep of the Canal Zone schoolhouse.

The new regime was dominated by Torrijos, a brigadier general in command of the National Guard.

Some U.S. officials are known to have argued for an economic boycott against the takeover group, but that was never done. In time, the United States recognized the new government.

However, the then U.S. Ambassador, Charles Adair, was instructed to adopt an attitude described privately as "correct but cool." This resulted in considerable friction. Torrijos seemed incapable of mentioning Adair's name without adding several unprintable adjectives.

Within the State Department, opinions about the Panama policy varied widely. Its opponents argued that the policy was neither getting the National Guard out of power nor checking the spread of hemisphere militarism.

The contention also was made that Torrijos' efforts to end corruption in Panama aligned him with reformist officers coming to the fore elsewhere in Latin America and entitled him to be regarded in a different light.

At any rate, the change was decided upon even before Mr. Nixon made his policy speech. It came in October, when Washington ordered Adair to change places with the U.S. ambassador in Uruguay, Robert Sayre.

Sayre had already served a long stint as Deputy Assistant Secretary of State for Inter-American Affairs. Observers had often identified him with a policy making faction that advocates the "realistic" stance of recognizing that militarism is a powerful force in Latin America and learning how to work with it in relative harmony.

Shortly after Sayre's arrival in Panama, embassy officials stopped using the "correct but cool" term. Now the phrase is "dealing with each other on terms of mutual respect."

Sayre is known to have been working to establish rapport with Torrijos.

When Torrijos' two chief deputies in the National Guard, Cols. Ramiro Silvera and Amado Sanjur, staged an abortive coup a week ago, it was feared that the United States might get caught in the backlash. Sanjur, with a strong pro-American record, had frequently been rumored as the man being set up by Washington to take Torrijos' place.

However, the U.S. Embassy's assertion of strict neutrality in respect to internal guard affairs seems to have been accepted by Torrijos at face value and no criticism has been heard.

If Washington's relations with the regime are indeed improving, probably the first result will be a substantial increase in aid, which has been at a virtual standstill since the 1968 coup. Some U.S. policymakers believe Torrijos is sincere in his desire to make sweeping reforms and deserves help. If the regime moves toward restoration of civilian government, there is a strong likelihood of aid resumption.

A more crucial indicator would be the status of the long-stalled talks about a new canal treaty and the possible building of a sea-level canal. After the '68 coup, Washington indicated that it could not negotiate a new treaty with a military regime because any agreement might later be repudiated by a constitutional government.

Now the United States says it is willing to talk any time the Panamanians are ready. In theory, Panama's position is the same.

Mr. HELMS. Mr. President, the problem Mr. Sayre faced was that he was dealing with a gangster government. There was no way that we could deal with Panama on terms of mutual respect and at the same time keep our own self-respect. As has already been well documented, Panama was the center of heroin smuggling into the United States at this time. Without the complicity of Panama, the narcotics explosion of 1969 could not have taken place. Panama was the necessary way station without which the drug traffic could not operate. And the Government of Panama, that is to say, Torrijos and his gang, were directly controlling it.

Mr. President, some have tried to say on this floor that drug trafficking was endemic in Latin America, and that the role of Panama was no different than many other countries. That simply does not fit the facts. In no other country, with the exception perhaps of Paraguay, was the drug traffic directly controlled by the government. And even Paraguay ultimately cooperated in shutting down the traffic. Panama, on the other hand, put up roadblock after roadblock. Panama was the only country that did not cooperate, the only country. And the major traffic of the late sixties was shut down in Panama only because the sources in Paraguay and other countries were shut off with the cooperation of those countries.

Meanwhile, Mr. Sayre was our Ambassador in Panama. Instead of attempting to bring these facts out in the open, he was attempting to cover them up. The arrest of Him Gonzales in the Canal Zone—an arrest that took place outside of Ambassador Sayre's jurisdiction—made it impossible to cover it up. Him Gonzales was the top official in Tocumen airport, a Panamanian governmental agency. With the conviction of Him Gonzales, there could be no doubt that high officials of Panama were involved.

That is the real reason, Mr. President, why Mr. Sayre says that "Panama bitterly protested." There is absolutely no way that the arrest of Him Gonzales in the Canal Zone could be considered a violation of our treaty obligations in Panama. The United States has full jurisdiction in the Canal Zone. Panama protested because the arrest made it too hot for Torrijos and his gang. The fact that Mr. Sayre is still citing those Panamanian objections today as objections related to U.S. treaty violations shows his complete lack of candor. The Panamanian officials simply saw that U.S. law enforcement was getting to close to themselves. They were afraid that they would go to jail if they themselves were caught in the Canal Zone.

In order to placate the Panamanians, Mr. Sayre decided to prevent U.S. drug enforcement officials from having free rein. I have talked to some of our officials who were involved at that time. The sworn statement of Leland Riggs makes it clear that Mr. Sayre himself was putting up road blocks even on routine enforcement of U.S. drug laws. However, the incident involving Mr. Wilbur Plase and Mr. Ruben Monzon, both agents of the U.S. Bureau of Narcotics and Dangerous Drugs, demonstrates the extent to which Mr. Sayre would go.

In 1972, the distinguished chairman of the House Panama Canal Subcommittee held sessions in the Canal Zone to investigate the drug situation. I am referring, of course, to Mr. JOHN M. MURPHY of New York, who is now the very able chairman of the full House Merchant Marine Committee. At that time, however, he was chairman of the subcommittee. Special Agents Plase and Monzon, in executive session, reported that Foreign Minister Juan Tack and other high officials of the Panamanian Government were involved in the narcotics rackets. Mr. MURPHY subsequently reported those statements in a report of the subcommittee.

Now it is important to note, Mr. President, that the statements of Special Agents Plase and Monzon were absolutely correct. Their report was borne out by the Raphael Richard case which led to the indictment of Moises Torrijos, and which showed that Foreign Minister Tack was deeply involved. So there is no doubt about the facts.

However, when the subcommittee report was published in the press in the United States, Omar Torrijos and Tack were incensed. Once more the activities of U.S. Government law enforcement agents were coming too close for comfort. Plase, Monzon, and a third U.S. BNDD agent were declared persona non grata.

Instead of commending the U.S. agents, Ambassador Sayre summoned them to make a retraction. He or his staff composed a letter—it was not composed by the agents in question—which is a model of duplicity. Let me read the first paragraph:

> We have not seen the article by Mr. Jack Anderson which is reported to have appeared in the Washington Post of this date. However, we understand that it reports that Congressman John Murphy has stated that representatives of the United States Bureau of Narcotics and Dangerous Drugs in Panama implicated His Excellency, Juan Antonio Tack, the Minister of Foreign Relations in Panama, and a brother of General Omar Torrijos, the Commandant of the National Guard of Panama, in international drug trafficking.

That is the first paragraph, Mr. President. Note that it sets up as the main

proposition the charge that Tack and Moises Torrijos were involved in drug trafficking. Today the whole world knows that these charges were true. There can be no doubt about them.

Now examine the second paragraph:

We, the undersigned, as the representatives in Panama of the United States Bureau of Narcotics and Dangerous Drugs, had one brief meeting with Congressman Murphy, at his request, during his recent visit to Panama. We wish you to know that neither during that meeting nor at any other time have we mentioned to the Congressman either the Foreign Minister or any relative of the Commandant of the National Guard.

Mr. President, the only conclusion that one can draw from the second paragraph is that the two agents involved are denying the proposition in the first paragraph, namely, that they had implicated Tack and Moises Torrijos. The whole thrust of it was to destroy any public evidence that Panamanian officials were involved.

But the letter turns upon a deceptive equivocation, a manipulation of words that no one could decipher who did not know the facts. The first paragraph does not say that Congressman MURPHY had been told of the Panamanian involvement; it merely says that the BNDD agents had implicated the Panamanians. The second paragraph, however, says only that the involvement was not, and I quote, "mentioned to the Congressman." The letter technically does not deny the involvement; it merely denies that it was "mentioned to the Congressman."

Unless you know one important fact, however, you will be completely deceived by the letter. That fact is that the Congressman had stepped out of the room during that part of the briefing, and the facts were taken down by staff. Now all of us know how the staff system works. The staff was representing the Congressman, and for all practical purposes, the information about the Panamanian involvement had been presented to the subcommittee.

Yet Ambassador Sayre sought to placate Foreign Minister Tack—a man involved in international drug trafficking—and to protect his reputation by concealing a material fact. The letter was intended to deceive. It was intended to destroy Mr. MURPHY's credibility, and the credibility of the committee system in Congress. Mr. Sayre was fully prepared to use concealment, deception, distortion, and denial of fact to accomplish his goal, which was the coverup of the narcotics trafficking in Panama, and the involvement of high Panamanian officials in gangster-type activities.

Mr. MURPHY has put the entire history of this event on record in a letter to me of March 21, which I have already placed in the RECORD. There is no person who, over the years, has done more to protect U.S. interests in the Canal Zone, and to expose the corruption in the State Department in this regard. I commend him for his efforts, and I thank him for his contribution to this debate. With regard to the letter addressed to me from Assistant Secretary Bennet, he states:

I left the meeting to go to another scheduled session and the three staff persons remained to finish the briefing by Agents Plase and Monzon. While it was true I was not there during this particular part of the discussion, in my absence the staff represented me and to be charitable to the letter of March 14th it is totally misleading.

Mr. President, note what he says. "It is totally misleading." Not only did Ambassador Sayre attempt to mislead the American people, but the State Department is still attempting to mislead the American people. Assistant Secretary Bennet's letter to me seeks to imply that the agents volunteered the letter; but Mr. MURPHY reports otherwise:

According to Plase's statement to the Committee he did not "volunteer" to write the March 14th letter, but upon learning that I was not in the room during the time Tack was discussed, Ambassador Sayre (or if not he, then presumably someone in the State Department) wrote the letter and urged the two agents to sign it. Therefore, according to the agent Plase it is not true that "the Ambassador agreed that he (Wilbur Plase) should prepare such a letter."

Mr. MURPHY further says:

Plase further told the Committee that he and Monzon were told to accompany Sayre to Tack's office and they were forced to wait outside in an anteroom "like two school boys cooling their heels" while Sayre went in to placate Tack with a letter they signed but which was not of their own doing.

Finally, the distinguished Congressman from New York adds:

I would further say that the agents expressed concern and frustration to my staff over their inability to apprehend Panamanian officials because of the interference of the Department of State . . . The fact that such a State Department policy was in effect was confirmed in lengthy testimony by the then Director of the Bureau of Narcotics and Dangerous Drugs, John Ingersoll. He testified that as a result of the Him Gonzales case the Bureau of Narcotics and Dangerous Drugs would never again arrest a Panamanian official in the Canal Zone. He further stated the State Department had a higher priority on maintaining good relations with Panama than they had on stopping the traffic in heroin.

Mr. President, that last statement sums up the whole attitude of Mr. Sayre. This incident demonstrates that he was willing to deceive and conceal facts to attain his foreign policy goals. Such a course of action, once set upon, inevitably leads to more serious aberrations of conduct and policy. Before the year was out, Mr. Sayre was willing to engage directly in the obstruction of justice for foreign policy aims, as I have already outlined earlier. I submit that it disqualifies him from representing the United States abroad.

Mr. President, I ask unanimous consent that certain materials relating to the Sayre nomination be printed in the RECORD. They include:

First. My letter of March 9, 1978 to Secretary Vance.

Second. The letter of Assistant Secretary Bennet of March 15, 1978 to me.

Third. The letter of Wilbur V. Plase and Ruben Monzon to Ambassador Sayre of March 14, 1972.

Fourth. The Statement of Leland L. Riggs, Jr., of December 1, 1977, to the Separation of Powers Subcommittee.

Fifth. The letter of Chairman JOHN M. MURPHY of March 21, 1978 to me.

Sixth. The Statement of the Honorable Robert Marion Sayre, of February 24, 1978, before the Foreign Relations Committee.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
Washington, D.C., March 9, 1978.

Hon. CYRUS VANCE,
The Secretary of State,
Washington, D.C.

DEAR MR. SECRETARY: The nomination of Robert Marion Sayre to be Ambassador to Brazil has raised three important questions as to his suitability to represent the President of the United States abroad. Before the Senate votes on his confirmation, I would appreciate having your comments so that they can be discussed on the Senate floor.

1. During the confirmation hearings before the Senate Foreign Relations Committee, Mr. Sayre admitted to the Committee that, as Ambassador to Panama, he had passed on to Brig. General Omar Torrijos the information that U.S. Customs officials were prepared to arrest his brother, Moises Torrijos, who was planning to disembark from a vessel in the Canal Zone. Mr. Sayre, testified as follows:

"I learned, on or about December 6, 1972, from CIA reporting that Moises Torrijos planned to return to Panama from Spain by ship on or about December 9. Reportedly, Moises planned to disembark at the port of Cristobal in the Canal Zone.

"In December 1972, United States relations with Panama were somewhat strained. Treaty negotiations were not progressing well and Panama was in the process of arranging a meeting of the United Nations Security Council in Panama in early 1973 to discuss the Panama Canal Treaty issue. We had some sharp confrontations with the Panamanians over narcotics issues. Panama bitterly protested the arrest of a Panamanian official, Him Gonzales, in the Canal Zone, as a violation of United States treaty obligations to Panama.

"As I recall the events of December, 1972, I asked the CIA Station Chief in Panama to be sure that State Department officials saw the intelligence reports in question. Subsequently, I was instructed by the Department to contact General Torrijos and let him know that we were aware of the plans, which I did.

"Subsequently, I learned that Moises Torrijos left the vessel in Venezuela and did not enter the Canal Zone."

Although the statute of limitations has apparently run on this incident, it appears, prima facie, that Ambassador Sayre participated in an obstruction of justice. Moreover, he himself places his actions in the context of United States relations with Panama, and the lack of progress in treaty negotiations. According to his testimony, Ambassador Sayre arranged for the intelligence reports about the planned return of Moises Torrijos and the planned arrest of Moises Torrijos in the Canal Zone by U.S. officials to be brought to the attention of officials in the U.S. State Department. As a result of that arrangement, these same officials contacted the Ambassador and instructed him to let General Torrijos know about the plans.

It is clear from his testimony that the Ambassador initiated the sequence of events for the purposes of foreign policy, and that he himself took the action which frustrated the arrest of a man indicted by a United States grand jury for a heinous crime. In other words, for the sake of foreign policy goals, he was willing to take an action obstructing justice.

The testimony of Ambassador Sayre should be compared with the affidavit of Leland Riggs, Jr., who was the U.S. official who had undertaken the responsibility of arresting

Moises Torrijos in the Canal Zone. A copy of that affidavit is attached.

Before the Senate votes on the confirmation of Ambassador Sayre, it is important to know who else participated in this obstruction of justice.

(a) Who were the officials in the State Department who made the decision to instruct Ambassador Sayre to inform Omar Torrijos about the plans?

(b) Was this decision made wholly within the Department of State, or did other U.S. government officials participate? If so, who were they?

(c) Is it the policy of the Department of State to subordinate the impartial process of justice to foreign policy goals? If it is not a policy, was it, in your judgment, appropriate in this instance to do so?

(d) Is it appropriate, in your judgment, to select Ambassador Sayre to represent the United States abroad after he has publicly admitted to an obstruction of justice? Does that convey the proper message with regard to the rule of law and protection of human rights to the international community?

2. Ambassador Sayre was involved in another incident which also raises doubts about whether or not his ability to serve has been compromised. The circumstances appeared in the Report of the House Merchant Marine Committee of January 2, 1973.

The report states:

"The briefing team concluded that based on the Customs investigation, this case reached into the highest levels of Panamanian officialdom and included Moises Torrijos, the brother of General Omar Torrijos, and the Panamanian Foreign Minister, Juan Tack. This involvement was confirmed by BNDD officers in the Republic of Panama on February 23 during a Subcommittee briefing in that country. . . .

"After a preliminary Subcommittee report was released in March of 1972 on the involvement of Panama's Foreign Minister and others in that government in the narcotics traffic, three BNDD agents assigned to work out of the U.S. Embassy in Panama City were declared persona non grata and given 12 hours to leave the country. This ultimatum was delivered on national television by Foreign Minister Juan Tack. This was done after Tack had arranged for the agents to sign letters written by the U.S. Ambassador in Panama denying they had discussed with the Chairman of the Subcommittee the relationship of government officials of Panama to narcotics smuggling into the United States. In subsequent testimony before this Subcommittee, one of the agents stated that he had, in fact, discussed with staff members of the Subcommittee such high-level involvement. There were public denials by various administration agency heads of the charges made in the Subcommittee report—the most heated coming from the Department of State."

The U.S. Ambassador in Panama at that time was, of course, Ambassador Sayre. This report raises very serious charges about the Ambassador's conduct, for it indicates that, in order to attain foreign policy goals, Ambassador Sayre was prepared to induce U.S. officials to sign papers attesting to falsehood. This incident bears a disturbing similarity to the Moises Torrijos incident which followed several months later.

(a) Is it correct that Ambassador Sayre wrote, or caused to be written, letters denying that they had discussed with the Chairman of the Subcommittee the relationship of government officials of Panama to narcotics smuggling into the United States? Would you submit to me the letters in question for insertion into the Congressional Record?

(b) Did Ambassador Sayre initiate these alleged actions on his own, or were they taken at the instigation of Foreign Minister Tack or of officials of the U.S. Department of State? If the latter, what officials were involved in this decision?

(c) Is it appropriate for a U.S. Ambassador to prepare false papers for signature by U.S. officials in order to attain U.S. foreign policy goals?

(d) Has Ambassador Sayre been compromised in his ability to represent the United States by reason of the House Merchant Marine Committee Report on this incident? If not, why not?

3. I have been provided with information by former high officials in U.S. Customs that Customs narcotics enforcement officials were deeply disturbed by the above incidents, as well as the general lack of cooperation from Ambassador Sayre in the enforcement of U.S. narcotics laws. As a result of this attitude of non-cooperation, U.S. officials made a formal report to Mr. Alex Theodore Prengel, of the Personnel Office of the Department of State, who had the responsibility of investigating the ethics and suitability of State Department employees. Among the information presented to Mr. Prengel was evidence that Ambassador Sayre maintained a continuing social association with one Cacho Otero, known to the Customs Bureau as one of the five key figures controlling the flow of narcotics through Latin America to the United States. It was particularly disturbing according to my informants, that this association had begun while Mr. Sayre was Ambassador to Uruguay, a center of narcotics involvement, and continued while he was Ambassador to Panama.

(a) Can you confirm or deny that such information was presented to Mr. Prengel or other proper authorities in the Department of State?

(b) Was Mr. Sayre investigated as a result of this official report?

(c) What was the disposition of the investigation?

(d) Were any actions taken against Mr. Sayre? Was the matter considered by any personnel board at any level?

(e) Was any inquiry made by the U.S. Department of Justice? If so, what was the outcome?

(f) Is there any evidence from other sources that Mr. Sayre had such an association with Mr. Otero or other figures connected with narcotics trafficking?

In the light of the evidence of narcotics trafficking by high officials of the Panamanian government, and Mr. Sayre's own admission that he helped to cover up this involvement, it is important that all the facts be put upon the public record before the Senate votes on his nomination. I urge you to make public any information in the possession of the Department of State relating to these incidents and alleged incidents. I further urge you to use your influence with the U.S. Attorney General to make public the Department of Justice letter of February 23, 1978, which is referred to in the Senate hearings.

I await your replies to these important questions with great interest.

Sincerely,

JESSE HELMS.

DEPARTMENT OF STATE,
Washington, D.C., March 15, 1978.

Hon. JESSE HELMS,
U.S. Senate,
Washington, D.C.

DEAR SENATOR HELMS: I have your letter of March 9, 1978, to the Secretary of State concerning the nomination of Ambassador Robert M. Sayre to be Ambassador to Brazil. Your letter raises three points regarding the previous service of Ambassador Sayre.

1. The events of December 1972 involving Moises Torrijos were thoroughly reviewed by the Senate Select Committee on Intelligence. That Committee has compiled a complete file on this matter including all information known by Ambassador Sayre. The Select Committee has reported its findings in detail, first to the Senate Committee on Foreign Relations, and then to the Senate. In addition, the Department of Justice examined the issue of obstruction of justice and concluded that the Ambassador was following instructions and that the matter lacked prosecutive merit. Ambassador Sayre took the initiative himself to put in the public record the facts pertinent to his actions in the matter.

As the Select Committee reported to the Senate, General Torrijos was informed of the indictment of his brother, Moises, by an official of the Department of Justice in June 1972, some six months before the events of December 1972.

In 1972 relations between the United States and Panama were somewhat strained and Panama was preparing to present its case on the Panama Canal to the United Nations Security Council which met in Panama in March 1973. The arrest by USG authorities of a Panamanian Ambassador enroute to report to his government would have undoubtedly provoked a most severe incident between the two governments.

Ambassador Sayre was acting on instructions from Washington when he informed General Torrijos that the United States Government was aware of his brother's travel plans. An Ambassador in the field is expected to act on the instructions he receives, and the Department of State is satisfied that Ambassador Sayre's conduct was entirely proper.

The Department of State is aware of the affidavit signed by Mr. Leland Riggs. At the time of the events in question, Mr. Riggs was a member of the staff of the American Embassy in Panama, and advised both the Ambassador and the Government of Panama on customs matters. His supervisor was Ambassador Sayre. Another unit in the Embassy staffed by the Bureau of Narcotics and Dangerous Drugs (BNDD) was responsible to the Ambassador for advising on drug enforcement matters. Neither the Ambassador nor anyone under his supervision had any authority in the Canal Zone. Ambassador Sayre does not recall being informed by anyone that Canal Zone authorities intended to arrest Moises Torrijos or that Mr. Riggs discussed with matter with him. Nor has the Department found any record of discussion of this matter with the Department of the Treasury. Accordingly, the Department is unable to comment on Mr. Riggs' affidavit.

With respect to the questions on page 2 of your letter, all available information is on file with the Senate Select Committee on Intelligence. As to the questions on page 3 of your letter, the Department of State has no doubt that Ambassador Sayre is well qualified to represent the United States abroad and appreciates the prompt action of the Foreign Relations Committee in recommending that the Senate advise and consent to his nomination as Ambassador to Brazil.

2. The Department of State thoroughly checked the allegations against the Foreign Minister of Panama at the time they were made by the Chairman of the House Subcommittee in March 1972. The Assistant Secretary of State for Inter-American Affairs, Charles Meyer, then wrote Foreign Minister Tack on March 21, 1972, assuring him that the United States agencies concerned had no information connecting him with drug trafficking and apologizing for the injustice done to him.

When the news report first appeared, the Panamanian Government declared *persona no grata* the personnel of the BNDD office in the Embassy of Panama. Because the departure of the Personnel of this office would disrupt an increasingly effective cooperative drug control program with Panama, the De-

partment and the Ambassador were anxious that these agents remain. The Special Agent in Charge of the office informed Ambassador Sayre that he had not discussed the Foreign Minister with Congressman Murphy and volunteered to say so in writing if that would help persuade the Panamanian Government to change its decision. The Ambassador agreed that he should prepare a letter and the Ambassador would see whether such a letter would do so. Department records indicate that the Special Agents were authorized by their headquarters in Washington to prepare the letter and the Ambassador was authorized by the Department to provide it to the Panamanian Government (a copy of the letter dated March 14, 1972, is enclosed for your information). The Panamanian Government was not satisfied with the letter and reaffirmed its decision on the expulsion of the agents. However, it agreed to accept replacements immediately thus making clear its intention to maintain the cooperative drug enforcement program.

The Department of State was completely informed by telephone and cable throughout this entire incident and all the actions taken by Ambassador Sayre were with the full knowledge and approval of the Department.

3. Ambassador Sayre first learned of the allegations that he knew one Cacho Otero in November 1977 during the review by the Senate Select Committee mentioned above. Your letter is the first indication the Department had that this allegation may have been brought to the attention of a Department officer. A search of the Department's records does not disclose any report as you describe. Mr. Prengel has retired but occupied the position as describe from 1965 to 1969. In any event, Ambassador Sayre does not recall ever having any association, official or otherwise, with anyone by that name. The Department would note that it is not uncommon for persons to claim that they know Department officials, especially Ambassadors, when in fact such claims are baseless.

In summary, Ambassador Sayre acted in the incidents discussed above with the knowledge and on instructions of the Department of State and had then, and has now, its full confidence. It should also be noted that the Drug Enforcement Agency on February 20, 1974, awarded Ambassador Sayre its Certificate of Appreciation for "outstanding contributions in the field of drug law enforcement" covering the period of his service in Panama.

Sincerely,

DOUGLAS J. BENNET, Jr.,
Assistant Secretary for Congressional Relations.

EMBASSY OF THE
UNITED STATES OF AMERICA,
Panama, Republic of Panama,
March 14, 1972.

HON. ROBERT M. SAYRE,
American Ambassador,
Panama, Republic of Panama.

DEAR MR. AMBASSADOR: We have not seen the article by Mr. Jack Anderson which is reported to have appeared in the Washington Post of this date. However, we understand that it reports that Congressman John Murphy has stated that representatives of the United States Bureau of Narcotics and Dangerous Drugs in Panama implicated His Excellency, Juan Antonio Tack, the Minister of Foreign Relations of Panama, and a brother of General Omar Torrijos, the Commandant of the National Guard of Panama, in international drug trafficking.

We, the undersigned, as the representatives in Panama of the United States Bureau of Narcotics and Dangerous Drugs, had one brief meeting with Congressman Murphy, at his request, during his recent visit to Panama. We wish you to know that neither during that meeting nor at any other time have we mentioned to the Congressman either the Foreign Minister or any relative of the Commandant of the National Guard.

Respectfully,

WILBUR V. PLASE.
RUBEN MONZON.

STATEMENT OF LELAND L. RIGGS, JR.

Leland L. Riggs, Jr., being duly sworn, deposes and says as follows:

I, Leland L. Riggs, Jr., am a retired Special Agent in Charge of the United States Drug Enforcement Administration. I am familiar with facts involving narcotics intelligence collection in Central America.

I first became a criminal investigator for the U.S. Bureau of Customs in January, 1964, after having spent 8½ years as a highway patrolman. I was first assigned by the Bureau of Customs to duties in California where I conducted narcotics smuggling investigations for a period of 6½ years. Thereafter, I was promoted from Customs Special Agent to Senior Customs Representative and was transferred to Mexico City, Mexico. Inasmuch as I am bilingual and speak Spanish, my assignment to Mexico was deemed to be advantageous to the agency.

While assigned to Mexico City, I had sole responsibility for Customs narcotics intelligence gathering and for conducting follow-up investigations forwarded to me by our domestic offices of investigation. My area of responsibility included not only the Republic of Mexico but additionally all of Latin America. However, 95 percent of my investigative time concerned either Mexico or the Republic of Panama.

During the time I was in Mexico in 1970 and 1971, I conducted several investigations in Panama. Subsequently, in June of 1972, I was appointed Customs Attache and instructed to establish an office in the American Embassy in Panama City, Panama. This occurred during the period when the entire Bureau of Narcotics and Dangerous Drugs agents force had been expelled *persona non grata* from Panama. I served as Customs Attache until July 1, 1973, at which time the Drug Enforcement Administration was formed and I then also assumed command of the Panamanian functions of the Bureau of Narcotics and Dangerous Drugs when the Bureau of Customs narcotics functions were merged with those of the BNDD. In short, I became the Special Agent in Charge of the combined office.

I left Panama on June 17, 1974, to become the Special Agent in Charge of the DEA District Office in Brownsville, Texas. Thereafter while on temporary assignment as Project Manager for a special DEA operation in Colombia directed against clandestine cocaine processing laboratories in Colombia, on November 30, 1975, I was attacked, beaten, and pushed off a retaining wall to a street below and suffered several fractured vertebrae, a broken ankle, kidney damage, and assorted cuts and bruises. The DEA subsequently retired me on August 24, 1976, for medical disability reasons.

When I first began conducting investigations in Panama, the BNDD Agent in Charge advised me that we had to be very careful about informing Panamanian government officials concerning our work since they were corrupt and also involved in nacotics trafficking. I soon learned from personal experience that this advice was sound.

During September, 1970, I traveled to Panama to conduct a follow-up investigation regarding a Yolanda Sarmiento case involving shipments of heroin from Panama to New York. Although I do not have presently in my possession intelligence reports prepared by me at that time, I do recall certain aspects of the case. Yolanda Sarmiento reportedly was smuggling approximately 100 pounds of heroin monthly into the United States. This heroin was reported to be stored in the Colon Free Zone in the Republic of Panama.

The Colon Free Zone is a large, fenced-in, heavily guarded section of Colon, Panama, on the Atlantic side where duty-free items are displayed in numerous stores for purchase by persons and businesses based primarily in South America. I was advised by U.S. Canal Zone officials and a confidential source that the Guardia Nacional controlled and guarded this enclosed area. I later did manage to gain entrance with a U.S. Canal Zone official; however, we were only permitted to go into the showcase areas of the various stores. The Colon Free Zone is entered at a gate guarded by uniformed members of the Guardia Nacional. Although the Government of Panama does have a Customs Office and there are Panamanian Customs Agents, Panamanian Customs does not have responsibility for control of the Free Zone.

During 1970, United States Customs Agents in New York were able to effect the arrest of Yolanda Sarmiento, Emilio Diaz Gonzales, and others; however, Yolanda Sarmiento was released on bail, subsequently fled the country, and became a fugitive in Argentina. As best I recall, Emilio Diaz Gonzales escaped from prison in New York and is believed also to have fled the country.

My efforts to continue a follow-up investigation of the Sarmiento case were essentially unsuccessful because of the problems inherent in free movement within the Colon Free Zone resulting from the control of the Free Zone by the Guardia Nacional of the Government of Panama.

During my trips to Panama, I became aware of a BNDD investigation concerning the Panamanian chief air controller, Juaquin Him Gonzales. Juaquin Him was reportedly directing heroin from Panama into Texas and using his official capacity in the Government of Panama to facilitate the movement of this heroin. He was subsequently indicted by a U.S. Grand Jury in Texas and was arrested when he entered the U.S. Canal Zone to attend a softball game. Juaquin Him was tried and convicted for facilitating the transportation of narcotics into the United States.

I understand that the arrest of Juaquin Him has caused considerable dissension between the Ambassador and the U.S. narcotics agents in Panama. I experienced similar problems in connection with the Raphael Richard-Moises Torrijos case.

I learned of the Richard-Torrijos case after my assignment as the Customs Attache to the American Embassy in Panama. In fact, I became directly involved in the investigation concerning Moises Torrijos, now Panamanian Ambassador to Spain, and Raphael Richard Gonzales, the son of the then-Panamanian Ambassador to Taiwan. Richard was arrested on the evening of July 8, 1971, at John F. Kennedy Airport in New York in possession of 151 pounds of heroin. Immediately prior to his arrest, he claimed diplomatic immunity and asserted that his suitcase could not be opened and searched due to his diplomatic passport. A U.S. customs inspector advised him that he was accredited as a diplomat in Taiwan, not in the United States, and therefore had no diplomatic status in the United States. Also arrested that evening was Nicolas Polanco, a reported chauffeur-bodyguard of Moises Torrijos. Moises Torrijos was then the Panamanian Ambassador to Argentina, and he is the brother of Dictator Omar Torrijos.

The day following the Richard arrest, Guillermo Alfonso Gonzales was also arrested upon his arrival in New York City from Panama for the purpose of accepting delivery of the heroin Richard had attempted to bring into the country. Others arrested the same day were Jose Francisco Oscar San Martino, an Argentine, and Cesar and Amarico Altanirano, both Panamanians.

Subsequent investigations of the same case led to the indictment of Moises Torrijos by a Grand Jury of the U.S. District Court for the Eastern District of New York. Torrijos was indicted as a co-conspirator with the abovementioned defendants. Thereafter, a warrant for the arrest of Moises Torrijos was issued by the U.S. Court for the Eastern District of New York. On the basis of the evidence of a warrant, I was instructed to be on the alert to effect an arrest in the event Moises Torrijos traveled from Spain through the U.S.-controlled Panama Canal Zone.

During either late 1972 or early 1973, I was advised that Moises Torrijos, accompanied by his wife, was traveling from Spain to Panama on a passenger vessel. Subsequent information showed that the vessel would dock in Cristobal, Panama, within the U.S.-controlled Panama Canal Zone. Arrangements were therefore made to effect the arrest of Moises Torrijos in the U.S. territory upon his arrival. However, Moises Torrijos was obviously informed of his impending arrest and departed the vessel at Caracas, Venezuela, where he flew by commercial airliner to Tocumen Airport within the Republic of Panama. When the vessel arrived, only Mrs. Moises Torrijos disembarked. Inasmuch as the only parties aware of the planned arrest of Moises Torrijos other than BNDD were the U.S. Department of State and the Central Intelligence Agency, Moises Torrijos could only have been alerted to the planned arrest by United States authorities.

During my tenure as Special Agent in Charge of Drug Enforcement, I did not have another opportunity to effect the arrest of Moises Torrijos. In fact, during my tour of duty as Customs Attache before assuming command of the combined Customs and BNDD forces, I was advised that Washington officials of the Bureau of Narcotics and Dangerous Drugs traveled to Panama, met with Colonel Noriega, Chief of Panamanian Intelligence, and with General Omar Torrijos, and alerted them both to the existence of an indictment and warrant concerning the General's brother, Moises. To the best of my knowledge, the warrant for the arrest of Moises Torrijos is still in existence and presumably, if he touches U.S. soil, he is still liable to arrest.

During my tour of duty in Panama, several cases which were presented to the Panamanian enforcement officials were mysteriously terminated or not given proper attention. Due to my knowledge of their involvement, many cases were not presented to Panamanian enforcement officials so as not to compromise my investigation. Finally, I did not feel that I had the full support of the diplomatic community in the pursuit of my assigned mission in Panama, especially in those matters which tended to implicate officials of the Government of Panama. In any event, due to the eventual assignment of a State Department employee as the narcotics coordinator, I was relegated to a secondary position. Similar conditions now exist in most embassies where Drug Enforcement personnel are assigned, and in almost all cases, the Department of State employee has no narcotics training nor expertise. It is my opinion that Department of State personnel are placed in the position of narcotics coordinator primarily to insulate and protect the activities of the Department of State from any so-called disrupting incident regarding narcotics enforcement directed against an official of the host government.

Given under my hand and seal on this the first day of December, 1977, in the City of Washington, District of Columbia.

U.S. HOUSE OF REPRESENTATIVES,
Washington, D.C., March 21, 1978.

Hon. JESSE HELMS,
U.S. Senate, Washington, D.C.

DEAR SENATOR HELMS: I have reviewed the correspondence between yourself and the Department of State concerning the nomination of Robert M. Sayre to be Ambassador to Brazil. I seriously question the March 15th response by the Department of State to your letter of March 9, 1978 concerning an incident involving myself as Chairman of the Panama Canal Subcommittee and staff members of the House Merchant Marine and Fisheries Committee which occurred on February 23, 1972. Page 3 of your letter states:

"2. Ambassador Sayre was involved in another incident which also raises doubts about whether or not his ability to serve has been compromised. The circumstances appeared in the Report of the House Merchant Marine Committee of January 2, 1973.

"The report states:

"The briefing team concluded that based on the Customs investigation, this case reached into the highest levels of Panamanian officialdom and included Moises Torrijos, the brother of General Omar Torrijos, and the Panamanian Foreign Minister, Juan Tack. This involvement was confirmed by BNDD officers in the Republic of Panama on February 23 during a Subcommittee briefing in that country. . . .

"After a preliminary Subcommittee report was released in March of 1972 on the involvement of Panama's Foreign Minister and others in that government in the narcotics traffic, three BNDD agents assigned to work out of the U.S. Embassy in Panama City were declared persona non grata and given 12 hours to leave the country. This ultimatum was delivered on national television by Foreign Minister Juan Tack. This was done after Tack had arranged for the agents to sign letters written by the U.S. Ambassador in Panama denying they had discussed with the Chairman of the Subcommittee the relationship of government officials of Panama to narcotics smuggling into the United States. In subsequent testimony before this Subcommittee, one of the agents stated that he had, in fact, discussed with staff members of the Subcommittee such high-level involvement. There were public denials by various administration agency heads of the charges made in the Subcommittee report—the most heated coming from the Department of State."

The State Department response to you of March 15th states, in part,

. . . "The Special Agent in Charge of the office informed Ambassador Sayre that he had not discussed the Foreign Minister with Congressman Murphy and volunteered to say so in writing if that would help persuade the Panamanian Government to change its decision. The Ambassador agreed that he should prepare a letter and the Ambassador would see whether such a letter would do so. Department records indicate that the Special Agents were authorized by their headquarters in Washington to prepare the letter and the Ambassador was authorized by the Department to provide it to the Panamanian Government (a copy of the letter dated March 14, 1972, is enclosed for your information) . . ."

The Subcommittee report, of course, itself differs with the State Department version of what happened. I regret to say that the State Department presentation to you does not comport with the facts either which are a matter of record.

The facts include the following:

Special Agent Wilbur Plase could say "that he had not discussed the Foreign Minister with Congressman Murphy." The meeting at which Tack was discussed *began* with myself and three committee staff members present. I left the meeting to go to another scheduled session and the three staff persons remained to finish the briefing by Agents Plase and Monzon. While it was true I was not there during this particular part of the discussion, in my absence the staff represented me and to be charitable to the letter of March 14th it is totally misleading.

According to Plase's statement to the Committee he did not "volunteer" to write the March 14th letter but upon learning that I was not in the room during the time Tack was discussed, Ambassador Sayre (or if not he, then presumably someone in the State Department) wrote the letter and urged that the two agents sign it. Therefore, according to the agent Plase it is not true that "the Ambassador agreed that he (Wilbur Plase) should prepare such a letter, . . .". Plase further told the Committee that he and Monzon were told to accompany Sayre to Tack's office and they were forced to wait outside in an anteroom "like two school boys cooling their heels" while Sayre went in to placate Tack with a letter they signed but which was not of their own doing.

As to the discussion that took place in Panama on February 23rd between agent Plase and Monzon and my staff it is a matter of record in an Executive Session held ter of record in an Executive Session held by the Panama Canal Subcommittee on April 25, 1972 that Wilbur Plase answered in the affirmative when asked if he had discussed Foreign Minister Tack with my staff and his involvement in the Raphael Richard drug case.

I would further say that the agents expressed concern and frustration to my staff over their inability to apprehend Panamanian officials because of the interference of the Department of State. This was a result of the arrest of Juan Him Gonzales and the subsequent furor raised by Omar Torrijos and Foreign Minister Juan Tack. The fact that such a State Department policy was in effect was confirmed in length testimony by the then Director of the Bureau of Narcotics and Dangerous Drugs, John Ingersoll. He testified that as a result of the Him Gonzales case the Bureau of Narcotics and Dangersous Drugs would never again arrest a Panamanian official in the Canal Zone. He further stated the State Department had a higher priority on maintaining good relations with Panama than they had on stopping the traffic in heroin.

I hope that this letter has been of help in clarifying the events surrounding this incident.

Sincerely,

JOHN M. MURPHY,
Chairman.

(NOTE: Mr. Sayre's statement of February 24, 1978, before the Committee on Foreign Relations is printed earlier in today's RECORD.)

Mr. DOLE. Mr. President, the Senator from Kansas rarely objects to a Presidential nomination, whether it be an Ambassadorship or a Cabinet position. In many respects, this is a prerogative that enables a Chief Executive to execute the policies of his administration, and therefore nominations should not be lightly opposed on the basis of partisan objections.

Certainly, in the case of Robert M. Sayre, I have no personal quarrel with him as an individual, nor with his general qualifications in the field of foreign service. He has served both Republican and Democrat administrations, and has been U.S. Ambassador to both Uruguay and Panama. His diplomatic experience is broad.

What I do question, however, is his judgment in specific instances, while performing his official duties overseas. Those instances have already been discussed in detail here on the Senate floor. I understand that Mr. Sayre's admitted role in advising Panamanian General Omar Torrijos of his brother's imminent arrest has been defended by the State

Department on the grounds that he was acting under orders.

This, of course, raises fundamental issues of propriety in the field of public service—issues which have been much discussed and debated in recent years.

All of us here today recall that the excesses of Watergate were attributed to "orders from above," and we recall as well how strongly this defense was denounced by many of my colleagues who now support the Sayre nomination. Nor has it been many years since Army Lt. William Calley was held to account for the senseless killing of innocent Vietnamese families—again, because we recognized the fact that a man must be held personally responsible for his actions, regardless of where his orders came from.

That, really, is the issue here today. It may well be that Ambassador Sayre received specific direction from Washington to warn General Torrijos that his brother would be arrested on drug charges if he set foot in the Panama Canal Zone. By his own admission during Senate Foreign Relations Committee confirmation hearings last February, Mr. Sayre gave no particular consideration to what the result of his action would be—he simply carried out a designated task.

This is what is most disturbing—the idea that an individual entrusted with an important diplomatic post would blindly accept an order of this type without considering the consequences of his action. I do not believe the Senate can, in good conscience, condone such behavior on the part of our Foreign Service officers.

Approval of Mr. Sayre's nomination to be Ambassador to Brazil would, in view of this situation, be a tacit acceptance of his action. I believe Mr. Sayre's poor judgment in this instance cannot go unnoticed and for that reason I oppose his nomination.

We have had a precedent for this kind of action in Watergate, a precedent for that in the instance of Lieutenant Calley and in many other areas. If we are going to say now that it is all right for State Department people to follow orders from above and those in the FBI or other agencies not to follow orders from above, I think we have a double standard.

For that reason, I oppose the motion to table the motion to recommit the nomination.

Mr. HELMS. Mr. President, if the Senator from Alabama has no further discussion I propose to move to recommit this nomination so that some of these unanswered questions can be resolved.

Mr. SPARKMAN. Mr. President, I have no desire for any further discussion. There is no reason to postpone it.

I move to lay on the table the motion of the Senator from North Carolina.

Mr. HELMS. I have not made the motion yet.

Mr. SPARKMAN. I thought the Senator announced he did.

Mr. HELMS. No, I said I would make such a motion if the Senator had nothing further he wished to say.

Mr. SPARKMAN. Very well.

Mr. HELMS. So that we will be parliamentarily in order, Mr. President, I offer the motion.

Mr. SPARKMAN. I move to lay that motion on the table.

Mr. HELMS. I ask for the yeas and nays.

The PRESIDING OFFICER (Mr. RIEGLE). Is there a sufficient second? There is not a sufficient second.

Mr. HELMS. I suggest the absence of a quorum, Mr. President.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion to table the motion to recommit.

On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from South Dakota (Mr. ABOUREZK), the Senator from Minnesota (Mr. ANDERSON), the Senator from Delaware (Mr. BIDEN), the Senator from Iowa (Mr. CULVER), the Senator from Mississippi (Mr. EASTLAND), the Senator from Colorado (Mr. HASKELL), and the Senator from Montana (Mr. HATFIELD) are necessarily absent.

I further announce that, if present and voting, the Senator from Iowa (Mr. CULVER) would vote "yea."

Mr. STEVENS. I announce that the Senator from New Mexico (Mr. DOMENICI), the Senator from Utah (Mr. HATCH), the Senator from Oregon (Mr. HATFIELD), and the Senator from Illinois (Mr. PERCY) are necessarily absent.

On this vote, the Senator from Oregon (Mr. HATFIELD) is paired with the Senator from Utah (Mr. HATCH). If present and voting, the Senator from Oregon would vote "yea" and the Senator from Utah would vote "nay."

The result was announced—yeas 62, nays 27, as follows:

[Rollcall Vote No. 143 Ex.]

YEAS—62

Bayh	Durkin	Kennedy
Bentsen	Eagleton	Leahy
Brooke	Ford	Long
Bumpers	Glenn	Magnuson
Burdick	Gravel	Mathias
Byrd, Harry F., Jr.	Hart	Matsunaga
Byrd, Robert C.	Hathaway	McGovern
Cannon	Hayakawa	Melcher
Case	Heinz	Metzenbaum
Chafee	Hodges	Moynihan
Chiles	Hollings	Muskie
Church	Huddleston	Nelson
Clark	Humphrey	Nunn
Cranston	Inouye	Packwood
Danforth	Jackson	Pearson
DeConcini	Javits	Pell
	Johnston	Proxmire
Randolph	Sasser	Stevenson
Ribicoff	Sparkman	Talmadge
Riegle	Stafford	Weicker
Sarbanes	Stennis	Williams

NAYS—27

Allen	Hansen	Schweiker
Baker	Helms	Scott
Bartlett	Laxalt	Stevens
Bellmon	Lugar	Stone
Curtis	McClure	Thurmond
Dole	McIntyre	Tower
Garn	Morgan	Wallop
Goldwater	Roth	Young
Griffin	Schmitt	Zorinsky

NOT VOTING—11

Abourezk	Eastland	Hatfield, Paul G.
Anderson	Haskell	Percy
Biden	Hatch	
Culver	Hatfield, Mark O.	
Domenici		

So the motion to lay on the table, the motion to recommit was agreed to.

(Later the following occurred:)

Mr. CURTIS. Mr. President, on the last rollcall vote I entered the Chamber and misunderstood the nature of the vote. Intended to vote "nay" and mistakenly voted "yea." I ask unanimous consent that I be recorded as having voted in the negative.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

(The foregoing rollcall vote has been changed to include the above order.)

Mr. MELCHER. Mr. President, I move to reconsider the vote by which the motion to lay on the table was agreed to.

Mr. SPARKMAN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HELMS and Mr. MELCHER addressed the Chair.

The PRESIDING OFFICER. The Senator from Montana.

Mr. MELCHER. Mr. President, I ask unanimous consent to proceed briefly as in legislative session.

The PRESIDING OFFICER. Is there objection. Without objection, it is so ordered.

S. 3003—RURAL ELECTRIFICATION ACT AMENDMENTS

Mr. MELCHER. Mr. President, I am today introducing the Rural Electrification Act Amendments of 1978, in order to assure that many of the material benefits available to the people in urban areas of our country, accrue to the citizens in our vast rural areas through the delivery of information, education, entertainment, and social services over broadband facilities including the provision of cable television. This bill is identical to the companion House bill already introduced by my good friend and former colleague Congressman Ed Jones.

The bill will provide a program to prove the feasibility under the Rural Electrification Act to assure that the citizens of our rural areas are able to receive the benefits of new technologies emerging in the telecommunications industry. This bill amends the Rural Electrification Act to permit the Rural Electrification Administration to participate in financing of these facilities, and will make it possible for rural telephone sys-

tems to deliver a wide range of telephone and broadband services to their subscribers over a single facility at a small incremental cost over providing basic telephone services.

Without the REA telephone loan programs of the past, telephone systems of today would not be bringing telephone service to rural America.

A more detailed explanation of the bill follows:

The Rural Electrification Act Amendments of 1978 amend the Rural Electrification Act to permit financing of broadband facility construction including facilities for the provision of cable television and other broadband services in small towns and rural areas.

This legislation will provide a program to prove the feasibility under the Rural Electrification Act to assure that the citizens of our rural areas are able to receive the benefits of new technologies emerging in the telecommunications industry.

Recent developments in the areas of digital technology, electronic switching capacity, coaxial cables and, in the fairly short term, utilization of fiber optics, will soon make it possible for rural telephone systems to deliver a wide range of telephone and broadband services to their subscribers over a single facility at a small incremental cost over providing basic telephone service.

Without the REA telephone loan programs of the past, the rural telephone systems of today would not be bringing telephone service to rural America.

The passage of this legislation will allow many of the material benefits available to people in urban areas of our country to accrue to the citizens in our vast rural areas through the delivery of information, educational, entertainment and social services over broadband facilities.

The rural telephone systems are willing to undertake this dynamic challenge. The REA financed rural telephone systems have basic facilities in place and their personnel are trained and competent.

Most of the rural telephone systems are managed by a local area representative. These are people completely aware of area conditions and subscriber requirements.

The Rural Electrification Administration appears to be strongly in support of the contention that joint provision of broadband facilities is the most economically efficient means of bringing these services to rural areas.

My introduction of this legisation is predicated on the belief that rural subscribers are not to be denied access to the broad range of telecommunications services promised by the advent of dramatic technological innovations in the United States.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3003

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 203 of the Rural Electrification Act of 1936, as amended, is amended by striking out subsection (a) and inserting in lieu thereof the following new subsection:

"(a) As used in this Act, the term 'telephone service' shall be deemed to mean any telecommunication service for the transmission of voice, data, sounds, signals, pictures, writing, or sign of all kinds by wire, radio, light, or other electromagnetic systems, and shall include all lines, facilities, or systems used in the rendition of such service, including community antenna and cable television facilities; but shall not be deemed to mean message telegram service, or radio broadcasting services or facilities within the meaning of section 3(o) of the Communications Act of 1934, as amended.".

DEPARTMENT OF STATE

The Senate continued with the consideration of the nomination of Robert M. Sayre.

The PRESIDING OFFICER. The question now recurs, Will the Senate advise and consent to the nomination?

Mr. HELMS. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. HELMS. The yeas and nays have not been ordered on the confirmation of the nomination itself; is that correct?

The PRESIDING OFFICER. The Senator is correct. The yeas and nays have not been ordered.

Mr. HELMS. Mr. President, I have no desire to put Senators to the inconvenience of having a rollcall vote on the nomination itself. I simply wish to be recorded as opposing the nomination. I am willing to have the question submitted on a voice vote.

The PRESIDING OFFICER. The question is, Will the Senate advise and consent to the nomination?

The nomination was confirmed.

Mr. SPARKMAN. Mr. President, I move to reconsider the vote by which the nomination was confirmed.

Mr. GLENN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from Alaska.

Mr. SPARKMAN. Mr. President, will the Senator yield?

The PRESIDING OFFICER. Does the Senator from Alaska yield to the Senator from Alabama?

Mr. STEVENS. I am happy to yield to the chairman of the Committee on Foreign Relations.

Mr. SPARKMAN. I ask unanimous consent that the President be immediately notified of the confirmation of the nomination.

The PRESIDING OFFICER. Without objection, it is so ordered.

PAT YOUNG

Mr. STEVENS. Mr. President, my attention has been called to a delightful article published in the Grand Forks (N. Dak.) Herald, of Sunday, April 23, 1978, concerning our good friend Pat Young. The article is entitled, "'Ask Pat,' The Woman Behind Senator Milton R. Young Says She's Ready To Retire, But 'He'll Make Up His Own Mind.'"

I have read this article, and find it, as I say, a very delightful article about Pat Young. Ann and I have very much admired her and enjoyed being with her and her husband as members of the Senate family. I would like to share this article with all Senators and their wives, and, as in legislative session, I ask unanimous consent that the article be printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD as follows:

ASK PAT

THE WOMAN BEHIND SENATOR MILTON R. YOUNG SAYS SHE'S READY TO RETIRE, BUT "HE'LL MAKE UP HIS OWN MIND"

(By Marilyn Hagerty)

WASHINGTON, D.C.—Outside, the yellow forsythia and pink tulip trees are in bloom. Inside the nation's capitol, Pat Young makes her way down a corridor off the Senate chambers.

She ponders current speculation that her husband, U.S. Senator Milton R. Young, 80, might retire before the end of his term.

"It's not his nature to quit," she says, "I kind of think he'll finish his term."

Pat wears a light blue suede jumper with a coordinating blouse, and she has a bright way about her. She steps into the Senate elevator, and she says, "I would like him to retire while he's still in good health."

And as the elevator takes her to the special subway cars to take Senators back to the Dirksen Office Building, she says, "I know I'm ready for retirement!"

Pat Young, 55, has been associated with the senior Senator from North Dakota—the dean of the Senate's Republicans—since the first year he came to Washington.

She came here on Sept. 19, 1945—"scared to death."

Since then, she has become his personal secretary. Eight years ago, she became his wife.

She continues as a member of his staff under a grandfathering clause that was attached to the ruling against family members serving on Congressional staffs.

"It's perfectly legal," she says.

When—in the heat of his last political campaign—her position was questioned, Senator Young responded, "I couldn't run my office without her."

Born at Bowman, N.D., on March 31, 1923, Pat is the daughter of Attorney and the late Mrs. M. S. Byrne. After finishing high school, she attended Dakota Business College at Fargo and worked as a court reporter for the late Cass County Court Judge P. M. Paulsen.

She was 22 and itching to go west when the call came asking her to come east to join the staff of the newly appointed Senator Young from North Dakota.

Now, 33 years later in the spring of 1978, the Youngs smile at the way her father told her to ask, "Is the job permanent?"

When she joined the Republican Senator's staff, Pat says, "I think I was a Republican. My Dad had been active as a Republican; but my mother was a secretary for the Democrats."

Even now, Pat is low key about politics.

She made her way up the ladder in the office with shorthand and typing.

"I've never felt I could give him political advice," she says. "I think sometimes he uses me as a sounding board for his ideas, but he never asks me what to do."

In the office, Pat says, the Senator is demanding. "He works hard, and he expects the same of his staff.

"He gets impatient sometimes," she concedes, "but I don't know anyone who doesn't."

At times like that, the Senator's wife says, "It's best not to say anything . . . and let him get over it."

The Senator never holds a grudge, she says. "He explodes, and then he forgets it. That was kind of hard for me to understand at first."

Lately, Pat thinks a lot about the home they are establishing at Sun City, Ariz. She

talks of the golf course—and the electric golf cart given to them at a testimonial dinner attended by 800 people in Fargo last October.

For the Youngs, there couldn't have been a more perfect gift.

Golf has been their escape valve from the pressures of the Senate.

It started years ago when the Senator lived alone in Washington. (His late wife, Malinda, was not well enough for the rigors of the city, so she remained at La Moure, N.D.)

"We'd watch the Senator work day and night," Pat says, "and the office staff decided to buy him some golf clubs.

"In those days, Senator Young didn't have a car. So either his administrative assistant or I would drive him to a golf range for practice or to a golf course.

I'm convinced he wouldn't still be here if he hadn't started playing golf.

"He is nervous, and he is hard working. He had himself all tied up."

Through the years, Senator Young has used golf as his means of entertaining guests. Golf has taken his mind off the cares of the Senate. And now that he has had two successful lens implants to correct cataract conditions, golf looms large in his plans for retirement.

In the background, Pat has become an avid golfer. Good enough to break 100. Good enough to win tournaments now and then.

There has been no problem, she says, of the Senator keeping up with "a young wife." Instead, she says, "I can hardly keep up with him."

Their spacious apartment on the 16th floor of Veazey Terrace in Washington has a comfortable, lived-in look. From two comfortable chairs, the Youngs like to watch the evening news. They never miss Lawrence Welk, and he likes to watch the Wild Kingdom.

Pat's knitting is always close by. "I can't stand to just sit still," she says. "I guess I'm a little nervous, too."

There's a copy of the Washington Post on the footstool and a Newsweek magazine underneath it.

Together, the Youngs do a fair amount of office work at home.

With a member of the Senator's office staff driving the Senator's car, the Youngs leave the apartment building around 7:30 each morning. On a "good day" they are home by 6:30 p.m.

On Saturdays almost all year, Senator Young is up early and out on a golf course. Pat does her grocery shopping at a neighborhood Giant-Foods store and often has lunch with friends.

She never misses mass on Sunday—whether she visits a Roman Catholic church on their travels or attends St. Thomas Apostle Church in Washington. The Senator—who says he doesn't know why Pat should worry about getting into heaven—attends with her occasionally.

The Youngs limit their social life.

"If we accepted every invitation to embassies and the like, we would be on the go all the time," Pat says. "We do go to events sponsored by North Dakotans."

As a member of the Ladies of the Senate Red Cross unit, Pat is one of the nation's Senators' wives who are always looking for an extra toilet paper roll or someone's old nylons.

"We use them in our new project of making puppets for children's hospitals," she explains.

The whole state of North Dakota is considered "home" to the Youngs. They visit her family in the western part and his family at La Moure, N.D.

Their "family tree" includes 13 grandchildren and 16 great grandchildren which have grown from the Senator's three sons. They are Duane, Wendell "Mix" and John who farm separately near La Moure. On Pat's side, there are 13 nieces and nephews—children of her sister, Dorothy Christman, Williston, N.D., and her brothers, Tom Byrne, Williston, and Dr. William Byrne, Amery, Wis.

There are plaques, trophies and awards throughout Senator Young's Washington office. But the greatest feeling, Pat says, is to visit North Dakota and see the places he has helped to establish.

"We were really thrilled last year," she says, "when tenants in the elderly housing unit at Minot chipped in to put a sign on their building reading 'Milton R. Young Towers'."

Pat takes a quiet pride in the good things that come to Senator Young. She seethes inwardly when she thinks he is criticized unfairly.

As a good secretary, she knows when to speak and how much to say.

She is proud of how faithfully the Senator attends meetings of the agriculture and appropriations committees.

She will not tell you what the Letter R. in his middle name stands for.

"He doesn't like it, so he doesn't tell people. I guess I shouldn't either."

Mr. YOUNG. Mr. President, will the Senator yield?

Mr. STEVENS. I am happy to yield to the Senator from North Dakota.

Mr. YOUNG. Pat and I deeply appreciate your putting this article by a very talented writer, Marilyn Hagerty, in the RECORD. It is a wonderfully written story, and I have learned from it some things about Pat that I never knew before. I'll appreciate her even more if that is possible.

Mr. STEVENS. I am not impertinent enough, Mr. President, to ask the Senator from North Dakota what those things might be exactly.

Mr. MOYNIHAN. Mr. President, will the Senator yield?

Mr. STEVENS. I yield.

Mr. MOYNIHAN. I would like to associate myself with those remarks, and might I say that among the things I have learned about my family and Senator YOUNG's family is that we are probably the only two families in this Chamber which are in fact united. Our grandchildren will apparently be great nephews and nieces of one another.

That was a delight I had not expected to share, and was glad to learn it from the very same article.

Mr. METZENBAUM. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. GRIFFIN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

NOMINATION OF FRANK H. NEEL

Mr. GRIFFIN. Mr. President, even though the nomination of Frank Neel is not technically before the Senate pending the arrival of the Senator from Nevada, I am conscious of the fact that many of our colleagues are eager to get the next nomination acted upon. I am going to go ahead with a statement I have. The Senator from Nevada is familiar with my concerns and what I am going to say. Nothing that I am going to say will surprise him.

I will proceed. When he arrives, we can have the nomination laid down.

The very distinguished writer and commentator with the Washington Post, David Broder, really said it all about this nomination in an article on February 8, 1978, which was headlined "Riding The Political Rails: A Born-Again Independent Is Up For Amtrak Post."

Let me read it:

Down in Thomasville, Ga., they are a little surprised to hear what has happened to Frank Neel.

The former member of the Democratic state central committee has been born again as a political independent.

The air-conditioning contractor who last rode a train in 1964 has been picked as a consumer representative on the board of directors of Amtrak.

It was Jimmy Carter who decreed Neel to be an independent and a consumer representative. He had to, if he was going to get him on the Amtrak board. It already had five Democrats—all the law allows one political party. And the same law said there had to be some consumer representatives.

Carter cared enough to see that Neel was both, because Neel had long ago showed Jimmy Carter he cared, too.

In 1966, when Carter made his first losing bid for governor of Georgia, his Thomas County campaign chairman and fundraiser was Frank H. Neel.

In 1970, when Carter ran again and won. Carter county chairman Neel was appointed to the Georgia Democratic Committee and two other state boards.

Mr. DURKIN. Will the Senator yield for a question?

Mr. GRIFFIN. If the Senator will just be a little patient, I will be glad to yield to him in a moment.

Mr. DURKIN. Senators want to know if there will be a rollcall vote on this nomination.

Mr. GRIFFIN. The Senator will have a chance to vote for this nominee. I assure the Senator from New Hampshire.

Mr. DURKIN. I thank the Senator from Michigan.

Mr. President, I ask unanimous consent that the time of the interruption not be taken from the Senator's time.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GRIFFIN. I will continue reading from the article by Mr. Broder:

In the winter and spring of 1976, Neel left his $2 million-a-year business for months and campaigned for Carter in the New Hampshire, Florida, North Carolina, Wisconsin, Pennsylvania and Ohio primaries. In the fall, he joined the Peanut Brigade in New Hampshire and Vermont.

Well, Mr. President, this is not a big job, being a member of the Amtrak Board. I think the compensation is $300 a year. But that is not the point. This does not say nearly as much about Mr. Neel's appointment as it does say a lot about Mr. Carter and the Carter administration, and a pattern that is developing with regard to nominations by the Carter administration.

I cannot come to any conclusion other than the Carter administration is flouting the law, disregarding the law, and not only the letter of the law but surely the spirit of the law.

Since the board already has five Dem-

ocrats, and Mr. Carter wants to somehow favor his friend, Mr. Neel, who campaigned for him so hard in Georgia, the only way to get him on the Amtrak Board is to say he is an independent, despite the fact that he has a long history of activity as a Democrat in Georgia.

Mr. CURTIS. Will the distinguished Senator yield?

Mr. GRIFFIN. I am glad to yield to the distinguished Senator from Nebraska.

Mr. CURTIS. It seems to me Mr. Neel is not the important factor in this, and neither is this board, but there is a very important principle involved. The Congress, for good reasons, has made certain of these regulatory agencies bipartisan. In other words, in order to command the respect of the public and to command respect for the decisions made, Congress has decreed that they shall be bipartisan boards, not partisan.

Mr. GRIFFIN. That is correct.

Mr. CURTIS. If a President can, by the use of words, say a Democrat is an independent for this particular purpose, it is flouting not only the will of Congress but the established law.

I remember reading about this case at the time that article which the Senator referred to was written. I commend the distinguished Senator from bringing it to light.

It is the little chipping away and chipping away at the established law, men totally disregarding the law.

Mr. DURKIN. Will the Senator yield?

Mr. GRIFFIN. I will be glad to yield to the Senator from New Hampshire in a few minutes. I will yield the floor so that he can make the case for the other side in defending this appointment, which I know he is eager to do.

I thank the Senator from Nebraska.

Not only is Mr. Neel, a Democrat, involved, but let me refer to the statute. In addition to saying that not more than five shall be appointed from the same political party, it also says this:

> Not less than three members appointed by the President shall serve as consumer representatives.

I do not know what Congress had in mind, but I rather suspect that they did not have quite the kind of person that Mr. Neel is when we designated and required by statute that there be three consumer representatives.

What is Mr. Neel? Well, he is a past president of the Chamber of Commerce of the Georgia town that he is from. He is the president of a large air-conditioning manufacturing company. There is nothing wrong with that. I am all in favor of having businessmen come into the Government. But I am a little surprised and rather taken aback that President Carter would appoint a person with these credentials as a consumer representative—not exactly what I think most people had in mind.

The point is that the law is being disregarded. The law is being evaded. Can you imagine what would be happening if a Republican President were to pull this same stunt and bring such a nomination before this same body? I can tell what would happen: The nomination would be thrown out. But today, it is going to be approved overwhelmingly, along partisan lines. There is no question about it.

There will be a little notice in the press, but that will be about all there is. It is one more indication of the way the Carter administration is operating with respect to nominations.

I yield to the distinguished Senator from New Mexico.

Mr. SCHMITT. I thank my friend from Michigan. I associate myself with his remarks.

I call the Senate's attention to the attempt this morning on the part of the Senator from New Mexico to call attention to another incident of disregard for the letter and spirit of the law in the case of the nomination of Charles Luna for a position on the same board. In that case, we were dealing with Mr. Luna's disregard for the law and the White House's acquiescence for that disregard. In this case, we are dealing primarily with the White House's disregard for the spirit, at the very least, and, I also believe, the letter of the law.

The Rail Passenger Service Act, which created the Amtrak Board, requires that of the eight members appointed by the President "not more than five shall be appointed from the same political party."

If the President's five nominees are confirmed, the composition of the Board will be five Democrats, one Republican, two Independents, and one vacancy.

As one of the President's nominees, Frank Neel, of Georgia, lists his political affiliations as Independent. In responding to the Committee's questionnaire, Mr. Neel stated:

> Voted as Independent over last 40 years. Was County Chairman for Carter in 1966 and in 1970. Was appointed to State Democratic Committee for one year in 1970. As County Chairman for Carter, I raised money from supporters and sent it in to headquarters. Campaigned for Governor Carter for Democratic Nominee in New Hampshire, Florida, North Carolina, Wisconsin, Pennsylvania, and Ohio. Campaigned in General Election in Vermont and New Hampshire.

Whereas Mr. Neel's active political association since 1966 with Carter might bring into some doubt his independent status, the fact that for 1 year, 1970, he was appointed to the State Democratic Committee, would certainly seriously question his independent claim. Furthermore, Mr. Neel's appointment appears to be more in repayment for his long and active support of Carter than for any particular expertise he can bring to the Board. Nothing in Mr. Neel's background or responses to the Committee indicates much familiarity with either Amtrak or rail passenger service issues.

One of the most telling remarks of all of these is that he was appointed to the State Democratic committee in 1970. I do not know what the rules of the State Democratic committee might be, but that sounds to me like they thought he was a Democrat.

Mr. GRIFFIN. The Senator from New Mexico brought out one point I think ought to be underscored. If these nominations by President Carter for the Amtrak board are all confirmed, how many Republicans will there be on this board?

Mr. SCHMITT. As of now, one Republican.

Mr. GRIFFIN. One.

Mr. SCHMITT. There will be two vacancies.

Mr. GRIFFIN. I understood there would be one vacancy.

Mr. SCHMITT. The Senator is absolutely correct.

Mr. GRIFFIN. There will be five Democrats, one Republican, and two so-called independents.

One Republican. That is certainly in keeping with the spirit, is it not? That is the new Carter spirit.

Mr. SCHMITT. If the Senator will yield just one moment further, I not only am disturbed by the nature of these nominations to what one might call a minor board, although increasingly a more significant board in the future of the rail transportation network of this country, but I think the Senator's additionally most important point is that Mr. Neel is just not qualified. When you put the two things together, I find it hard to believe, once again, that the Senate will almost certainly confirm this nomination.

I hope that, as the next few years go by, the Senate will start to have a new sense of fairness, a new sense of morality, and a new sense of the law in its considerations of nominees. The Senator from Michigan on other occasions, and this Senator on still others, have tried to raise these issues. I certainly intend to continue to raise these issues where either violation of law or lack of competence and lack of experience are issues with respect to nominees. It appears to me, as a new Senator in this body, that the present administration has no great consideration for either the law, or the intent of the law, or the quality of appointees to various boards and positions that we deal with. I am immediately concerned with those that come before the Commerce Committee and the Banking Committee. With some rare exceptions, I would say the quality of appointees is not what one would hope is available to serve this great country.

I shall oppose Mr. Neel's nomination and I thank the Senator from Michigan for taking the lead in this.

Mr. GRIFFIN. I thank the Senator from New Mexico. I yield the floor to the Senator from New Hampshire.

Mr. DURKIN. I thank the Senators.

Mr. President, at this point, I ask unanimous consent to bring up the nomination of Frank Neel to the Amtrak Board.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

The clerk will state the nomination.

NOMINATION OF FRANK H. NEEL

The second assistant legislative clerk read the nomination of Frank H. Neel, of Georgia, to be a member of the Board of Directors.

Mr. DURKIN. Mr. President, Mr. Frank

Neel was nominated by the President on October 19, 1977, to serve as a member of the Board of Directors of Amtrak as a consumer representative. The Commerce Committee held hearings on his nomination on November 4, 1977, and the committee favorably reported his nomination on March 2, 1978. I chaired the nomination hearings of that committee.

During the committee's consideration of Mr. Neel's nomination, questions were raised concerning the status of his political affiliation as an independent. Although Mr. Neel was an active supporter of President Carter in his campaign, he has also been an active supporter of Republican candidates, including Presidents Nixon and Eisenhower. The committee is satisfied that Mr. Neel is indeed an independent.

Questions were also raised concerning Mr. Neel's qualifications to serve as a consumer representative. Although Mr. Neel has had minimal experience with railroads in the past, he has been diligently learning about Amtrak's problems since his nomination. It should be noted that the Amtrak statute does not require any particular qualifications for consumer representatives. It states that not less than three members appointed by the President shall be designated by him at the time of their appointment to serve as consumer representatives, of whom not more than two shall be members of the same political party.

Let us lay to rest right now that there is anything in violation of the law. The law is clear and it is clear that Mr. Neel's nomination in no way contravenes the law.

The National Association of Railroad Passengers, the major consumer organization for passenger railroads, was satisfied with Mr. Neel's qualifications, and has endorsed his nomination.

I ask unanimous consent that their endorsement be printed in the RECORD.

There being no objection, the endorsement was ordered to be printed in the RECORD, as follows:

NATIONAL ASSOCIATION OF
RAILROAD PASSENGERS,
Washington, D.C., March 1, 1978.

Hon. HOWARD W. CANNON,
Chairman, Senate Commerce Committee, Washington, D.C.

DEAR MR. CHAIRMAN: On the basis of representations made to our Association in telephone calls, and summarized in the attached letter, the National Association of Railroad Passengers recommends that the Senate confirm President Carter's nomination of Frank Neel to serve on the Amtrak Board of Directors.

This reiterates testimony in support of all the nominees filed at the time of the hearing, and is specific regarding Mr. Neel because of questions asked us about him.

Thank you for considering our views.

Sincerely,

ORREN BEATY,
President of NARP.

THOMASVILLE, GA.,
February 10, 1978.

Senator HOWARD CANNON,
Chairman Senate Commerce Committee, U.S. Senate, Washington, D.C.

DEAR SIR: This is to answer questions that were asked of me.

I have voted for the following Presidents. In 1948 Truman, 1952 and 1956 Eisenhower, 1960 Kennedy, 1964 Johnson, 1968 and 1972 Nixon and in 1976 Jimmy Carter.

The only two people that I made contributions to were Nixon and Carter. Contributions to Nixon were $25.00 one time and $50.00 another.

I made $100.00 in donations to Carter in 1966. He lost. I voted for Howard (Bo) Callaway a Republican who lost to Lester Maddox in the general election.

In 1970, I supported Carter and helped with fund raising locally. I contributed $300.00 in several small contributions.

In 1975 and 1976 I contributed on Jan 21, 1975 $100.00. February 16, 1975 $600.00; and March 2, 1976 $200.00. I also was an active campaigner and a member of the Peanut Brigade.

My wife contributed a one time contribution of $1,000.00 in 1976.

I ran for the Thomasville City Commission twice in a general election, no party was named—elected two times 1958 and 1960.

I have long been an advocate of the consuming public, and especially the poor person. This geographical area, at the time I ran had experience an out-migration of people because there were no jobs. We were teaching people in school and they were leaving the South for other areas.

I had an attorney named Sol Altman draw up a bill to introduce into the Georgia Legislature that would amend the charter of the State of Georgia to create a Payroll Development Authority for the City of Thomasville. After much hard work, this bill passed a local election and passed the Georgia State General Election and became law. It has been invaluable in getting jobs for this area and in stopping the outmigration of people from this area. We have now, at last, actually reflected a growth in population instead of a loss in population as a result of this effort.

I have been one of the proponents of getting black people in management positions by active work in their behalf. This effort has resulted in blacks being elected on bank boards, to membership in civic clubs, and on various boards of the City and County.

I hope that this letter will help establish the fact that I am very definitely an independent voter and that I have over the years championed the cause of the common person and the consumer.

If confirmed for the Amtrak Board I will do my best to work as a Board Member that will do everything possible to make the passenger have the best possible railroad system. Satisfied customers generate more riders for the system.

Sincerely yours,

FRANK H. NEEL.

Mr. DURKIN. The Commerce Committee is also satisfied with Mr. Neel's qualifications. On behalf of the Committee on Commerce, Science and Transportation, I urge that the Senate confirm his nomination at this time.

Mr. President, I think everyone in the Chamber knows that even though I am a member of the same political party as the President of the United States, I have been critical of the President when I thought the President had erred.

I think the nomination we are going to take up next week, the nomination of Lynn Coleman as General Counsel of the Department of Energy, is a mistake—an absolute, total, complete mistake.

The President says it is the moral equivalent of war that we are faced with, and the energy problem is the moral equivalent of war, and he goes out and appoints an oil company lawyer as General Counsel for the Department of Energy. That is a strange war, indeed, when we hire as general counsel the lawyer from the enemy camp.

But that is what the President has done on the Coleman nomination, and I, and others, will fight the nomination. I hope we have the support of the Senator from New Mexico and the senior Senator from Michigan.

The point I am trying to make is that when the President has erred, I have been very critical of him. I think he made a grievous mistake with Mr. Coleman and I hope we can convince Members of this body to return him to John Connelly's lawfirm and let him represent oil companies full time, because if he does get confirmed and he does abstain from as many cases as he says he will because of past conflicts, the general counsel will turn out to be an honorary position because there will not be a case he can involve himself in.

But we will argue that next week.

The facts are fairly clear, he voted for Eisenhower, he voted for Nixon, contributed to Republicans. Mr. Neel contributed to Republicans. He is an independent, has been an independent. He is an air-conditioning contractor.

I probably spent more time riding Amtrak than any other Member of the Senate. I probably have more time cumulatively on it than the rest of the body together, because rather than sitting in a stuffy committee room, listening to the same set of professional witnesses testifying for the last 20 years here, I decided to find something out about the railroads, putting on an old shirt and suit of clothes, riding the rails to find where our money is going.

So I have more experience, and have probably spent more time than the whole board of Amtrak.

If Mr. Neel can get the air-conditioning working on those old cars, he will do more for the consumers than anyone of us has done yet.

[Laughter.]

Furthermore, as to one of the great untapped markets, every night we see on the evening news the "go on Amtrak" ad, "Come ride the rails," geared to the senior citizens. One of the tremendous things Amtrak could be attracting is the senior citizen market.

Here is Mr. Neel, a very distinguished senior citizen, to go on this board and represent the interests of senior citizens, to start making some changes in policy to attract that market, which should be a very lucrative market and help diminish the deficit with respect to Amtrak operations.

Now, just because he does not wear sandwich boards saying, "I am a consumer," and does not come out of one of the professional consumer organizations that seem to abound here in Washington, does not mean he is not concerned with the senior citizens, does not mean he is not concerned with the plight of the consumer on Amtrak.

As I said, the law only requires that there be three consumer representatives.

I wonder where the hue and cry was a few years ago when they were appointing presidents of major corporations to the

Amtrak board as a consumer representative?

If my memory serves me correctly, the president of one of the big auto companies in Detroit was put on the Amtrak board as a consumer representative.

I suspect, if we check the record, there will be no hue and cry that he represented business and did not represent the consumers of Amtrak.

Let us label this thing what it is. This is a blatant, political attempt to embarrass the President of the United States by trying to torpedo a distinguished citizen, a distinguished senior citizen, who just happens to come from Thomasville, Ga., and it is nothing more than that.

Mr. President, if there is no further debate, I move the nomination.

The PRESIDING OFFICER (Mr. PELL). The question is on agreeing to the nomination.

Mr. GRIFFIN. Mr. President, there are a number of Senators on the floor. I do not think there is much point in extending the debate at this point.

Mr. DURKIN. I do not think we have convinced them.

Mr. GRIFFIN. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is, Will the Senate advise and consent to the nomination of Frank H. Neel, of Georgia, to be a member of the Board of Directors of the National Railroad Passenger Corporation for the remainder of the term expiring July 18, 1978? On this question the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from South Dakota (Mr. ABOUREZK), the Senator from Delaware (Mr. BIDEN), the Senator from Iowa (Mr. CULVER), the Senator from Colorado (Mr. HASKELL), the Senator from Montana (Mr. HATFIELD), the Senator from Minnesota (Mr. ANDERSON), the Senator from Idaho (Mr. CHURCH), the Senator from Mississippi (Mr. EASTLAND), the Senator from Minnesota (Mrs. HUMPHREY), and the Senator from New York (Mr. MOYNIHAN) are necessarily absent.

I further announce that, if present and voting, the Senator from Minnesota (Mrs. HUMPHREY) would vote "yea."

Mr. STEVENS. I announce that the Senator from New Mexico (Mr. DOMENICI), the Senator from Utah (Mr. HATCH), the Senator from Oregon (Mr. HATFIELD), and the Senator from Texas (Mr. TOWER) are necessarily absent.

The result was announced—yeas 61, nays 25, as follows:

[Rollcall Vote No. 144 Ex.]

YEAS—61

Allen	Case	Glenn
Bayh	Chafee	Gravel
Bentsen	Chiles	Hart
Brooke	Clark	Hathaway
Bumpers	Cranston	Heinz
Burdick	DeConcini	Hodges
Byrd, Harry F., Jr.	Dole	Hollings
	Durkin	Huddleston
Byrd, Robert C.	Eagleton	Inouye
Cannon	Ford	Jackson
Javits	Metzenbaum	Sarbanes
Johnston	Muskie	Sasser
Kennedy	Nelson	Sparkman
Leahy	Nunn	Stafford
Long	Packwood	Stennis
Magnuson	Pell	Talmadge
Mathias	Proxmire	Thurmond
Matsunaga	Randolph	Weicker
McGovern	Ribicoff	Williams

Hansen	Schmitt	

NOT VOTING—14

Abourezk	Haskell	Moynihan
Anderson	Hatch	Tower
Biden	Hatfield, Mark O.	
Church	Hatfield, Paul G.	
Culver		
Domenici	Humphrey	
Eastland		

So the nomination was confirmed.

Mr. DURKIN. Mr. President, I move to reconsider the vote by which the nomination was confirmed.

Mr. JAVITS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the President be immediately notified of the confirmation of these nominations.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate return to the consideration of legislative business.

The PRESIDING OFFICER. Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that there now be a period for the transaction of routine morning business for not to exceed 30 minutes with statements limited therein to 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Chirdon, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

EXECUTIVE ORDER ON EXPORT OF SPECIAL NUCLEAR MATERIAL TO INDIA—MESSAGE FROM THE PRESIDENT—PM 170

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with accompanying papers, which were referred to the Committee on Foreign Relations:

To the Congress of the United States:

I am transmitting herewith, pursuant to Section 126b(2) of the Atomic Energy Act of 1954, as amended, an Executive Order authorizing the export of 7,638 Kgs. of low-enriched uranium to India for use in the fueling of its Tarapur Atomic Power Station.

In our Agreement for Cooperation with India, the United States agreed to supply all of the fuel requirements for that Power Station, and India agreed to operate it exclusively on U.S.-supplied fuel. We contracted to supply the specific fuel here involved a number of years ago.

An application for a license to export this fuel was submitted to the Nuclear Regulatory Commission early last year. This application was carefully reviewed within the Executive Branch, which concluded that the proposed export would not be inimical to the common defense and security, that it would meet all the immediate statutory criteria under the then pending Nuclear Non-Proliferation Act, and that the license should be issued. Later that month, the Commisison was officially notified of the Executive Branch findings and recommendations.

On April 20, the Nuclear Regulatory Commission found itself unable to agree upon the issuance of this license, being divided by a 2–2 vote. The Nuclear Non-Proliferation Act of 1978 wisely provided for just such a contingency. Previously, there was no clear way of dealing with a situation in which the Commission was unable to decide upon the issuance of an export license, and no way of ensuring that in cases where the licensing process would lead to a result that the President believed would be seriously prejudicial to the achievement of United States non-proliferation objectives, such prejudice could be avoided.

I have determined that this is such a case. The Government of India has given us its commitments to use our exports only at the Tarapur Atomic Power Station and not for any explosive or military purpose, and I have the highest confidence that it will honor these commitments. I am convinced that denial of this export would seriously undermine our efforts to persuade India to accept full-scope safeguards, and would seriously prejudice the achievement of other U.S. non-proliferation goals. I intend to pursue these matters further with the Government of India.

A period in which to seek agreement to full-scope safeguards was clearly provided for in the Act. The Act permits a continuation of exports during this period, including exports in cases where

there are questions as to whether and when that objective may be achieved. Rather than prejudice the prospects for success in such efforts by refusing to fulfill an existing commitment that is important to India's power supply, we should be using this period to find, in the light of the new legislation's requirements, mutually acceptable ways of meeting both India's need for continued operation of the Tarapur Atomic Power Station and our need for full-scope safeguards and the attainment of other nonproliferation objectives.

In transmitting this Executive Order to you pursuant to Section 126b(2) of the Act, I wish to make clear that I am not departing from the reservations I expressed at the time I signed the Nuclear Non-Proliferation Act of 1978 concerning the constitutionality of provisions of that Act which purport to allow Congress to overturn my decisions by actions not subject to my veto power.

JIMMY CARTER.

THE WHITE HOUSE, *April 27, 1978.*

PRESIDENTIAL APPROVAL

A message from the President of the United States stated that on April 27, 1978, he approved and signed the following enrolled act:

S. 2452. An act to authorize funds for the Hubert H. Humphrey Institute of Public Affairs and for the Everett McKinley Dirksen Congressional Leadership Research Center.

MESSAGES FROM THE HOUSE

ENROLLED BILL SIGNED

At 2:31 p.m., a message from the House of Representatives delivered by Mr. Berry, one of its reading clerks, announced that the Speaker has signed the following enrolled bill:

S. 2597. An act to amend title 28, United States Code, to move the place for holding court for the district court of the eastern district of New York to Brooklyn and Hempstead, and for other purposes.

The enrolled bill was subsequently signed by the Acting President pro tempore (Mr. HODGES).

At 4:58 p.m., a message from the House of Representatives delivered by Mr. Hackney, one of its reading clerks, announced that the House has passed the following bill, in which it requests the concurrence of the Senate:

H.R. 11832. An act to authorize appropriations for fiscal year 1979 under the Arms Control and Disarmament Act.

HOUSE BILL REFERRED

The following bill was read twice by its title and referred as indicated:

H.R. 11832. An act to authorize appropriations for fiscal year 1979 under the Arms Control and Disarmament Act; to the Committee on Foreign Relations.

ENROLLED BILL PRESENTED

The Secretary of the Senate reported that on today, April 27, 1978, he presented to the President of the United States the following enrolled bill:

S. 2597. An act to amend title 28, United States Code, to move the place for holding court for the district court of the eastern district of New York to Brooklyn and Hempstead, and for other purposes.

COMMUNICATIONS

The Presiding Officer laid before the Senate the following communications, together with accompanying reports, documents and papers, which were referred as indicated:

EC-3464. A communication from the Acting Administrator, Rural Electrification Administration, Department of Agriculture, reporting, pursuant to law, a commitment to guarantee a non-REA loan in the amount of $12,178,000 to United Power Association of Elk River, Minnesota, to finance installation of three 25 MW combustion turbine generators in its system for peaking purposes; to the Committee on Appropriations.

EC-3465. A communication from the Acting Administrator, Rural Electrification Administration, Department of Agriculture, reporting, pursuant to law, approval of an REA insured loan in the amount of $5,419,000 and a commitment to guarantee a non-REA loan in the amount of $11,539,000 to Cooperative Power Association of Minneapolis, Minnesota, for the financing of a 47 MW combustion turbine and a Supervisory Control and Data Acquisition System; to the Committee on Appropriations.

EC-3466. A communication from the Acting Assistant Secretary of the Army (Manpower and Reserve Affairs), transmitting a draft of proposed legislation to amend section 4346 (d) of title 10, United States Code, to permit the Secretary of the Army to prescribe the oath to be taken by appointees to the United States Military Academy; to the Committee on Armed Services.

EC-3467. A communication from the Principal Deputy, Department of Defense, transmitting, pursuant to law, the Fourth Annual Report on the Defense Industrial Reserve; to the Committee on Armed Services.

EC-3468. A confidential communication from the Assistant Secretary of Defense, reporting, pursuant to law, that the Department of the Air Force and Department of the Army intend to exercise the provision for the exclusion of the clause concerning examination of records by the Comptroller General; to the Committee on Armed Services.

EC-3469. A communication from the Chairman, Federal Home Loan Bank Board, transmitting, pursuant to law, the annual report of the Federal Home Loan Board for the calendar year 1977; to the Committee on Banking, Housing, and Urban Affairs.

EC-3470. A communication from the Chairman, Interstate Commerce Commission, transmitting, pursuant to law, a report concerning the Commission's proceedings in Docket No. 36441, Brunswick Corporation v. Soo Lines Railroad Company, et al; to the Committee on Commerce, Science, and Transportation.

EC-3471. A communication from the Acting Secretary of the Interior, reporting, pursuant to law, that the Pennzoil Producing Company and the Pennzoil Offshore Gas Operators, Inc., have submitted an application for repayment of royalties totalling $67,161.79 and $232,712.79, respectively; to the Committee on Energy and Natural Resources.

EC-3472. A communication from the Assistant Secretary for Congressional Relations, Department of State, reporting, pursuant to law, on the agreement on trade relations between the United States and the Hungarian People's Republic; to the Committee on Finance.

EC-3473. A communication from the Secretary of the Treasury, transmitting, pursuant to law, a report entitled "Antirecession Fiscal Assistance to State and Local Governments," April 7, 1978; to the Committee on Finance.

EC-3474. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Effect of the Employee Retirement Income Security Act on the Termination of Single Employer Defined Benefit Pension Plans," April 27, 1978; to the Committee on Governmental Affairs.

EC-3475. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Rail Crossing Safety—At What Price?", April 25, 1978; to the Committee on Governmental Affairs.

EC-3476. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Continuity of the Federal Government in a Critical National Emergency—A Neglected Necessity," April 27, 1978; to the Committee on Governmental Affairs.

EC-3477. A communication from the Chief, Records Management Division and Privacy Liaison Officer, Federal Communications Commission, reporting, pursuant to law, on a new system of records; to the Committee on Governmental Affairs.

EC-3478. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a list of reports of the General Accounting Office for March 1978; to the Committee on Governmental Affairs.

EC-3479. A communication from the Secretary of Commerce and the Secretary of HEW, transmitting, pursuant to law, a report entitled "Assessment of the Accuracy of the Survey of Income and Education," February 1978; to the Committee on Human Resources.

EC-3480. A communication from the Administrator, Veterans Administration, transmitting a draft of proposed legislation to amend title 18, United States Code, with respect to the protection of certain officers or employees of the United States, and for other purposes; to the Committee on the Judiciary.

EC-3481. A communication from the Director, Administrative Office of the United States Courts, transmitting, pursuant to law, a report on applications for orders authorizing or approving the interception of wire or oral communications; to the Committee on the Judiciary.

EC-3482. A communication from the Special Assistant for Management, Office of the Special Representative for Trade Negotiations, reporting, pursuant to law, on the requirements of the Freedom of Information Act; to the Committee on the Judiciary.

EC-3483. A communication from the Administrator, Veterans Administration, transmitting a draft of proposed legislation to amend title 38, United States Code, in order to extend the authority of the Administrator to make grants and carry out a pilot program for the exchange of medical information between Veterans Administration facilities and the medical community, and for other purposes; to the Committee on Veterans' Affairs.

EC-3484. A communication from the Administrator, Veterans Administration, transmitting a draft of proposed legislation to amend title 38, United States Code, to limit the circumstances under which the expenses of travel of certain veterans traveling to or from a Veterans Administration facility in connection with the furnishing of medical care and treatment for non-service-connected disabilities will be reimbursed; to the Committee on Veterans' Affairs.

EC-3485. A communication from the Administrator, Veterans Administration, transmitting a draft of proposed legislation to

amend title 38, United States Code, to provide readjustment professional counseling to Vietnam-era veterans and their families, and for other purposes; to the Committee on Veterans' Affairs.

PETITIONS

The PRESIDING OFFICER laid before the Senate the following petitions which were referred as indicated:

POM-622. A joint resolution adopted by the Legislature of the State of California; to the Committee on the Judiciary:

RESOLUTION CHAPTER —

"Assembly Joint Resolution No. 73.

"Whereas, There has been insufficient attention to the rights of victims and witnesses in our society; and

"Whereas, It is the duty of all citizens and institutions to play positive roles in improving the plight of victims of violent crime and their survivors and to restore effectiveness to the administration of criminal justice; and

"Whereas, Better reporting of crime and greater willingness of persons to testify are essential to the control of crime and the improvement of justice; and

"Whereas, Creating a better understanding of the rights of victims and witnesses and the nature of our criminal justice system will help to achieve the goals of crime reduction, and the restoration of fairness and effectiveness to the administration of criminal justice; and

"Whereas, California was the first state to establish a crime victim compensation system and to highlight the plight of crime victims by declaring a state "Forgotten Victims Week"; and

"Whereas, New York, Illinois and several other states are this year following California's lead by declaring their own Forgotten Victims Weeks; now, therefore, be it

"Resolved by the Assembly and Senate of the State of California, jointly, That the Legislature of the State of California respectfully memorializes the President and the Congress of the United States to officially proclaim April 24th through the 28th, 1978, as "National Forgotten Victims Week," and to formally adopt a resolution declaring April 24th through 28th, 1978, as "National Forgotten Victims Week"; and be it further

"Resolved, That public recognition of the observance of "National Forgotten Victims Week" be encouraged, and that the citizens of the United States be urged to assist in the prevention and the reporting of crime, and in the recognition expansion of public understanding of the rights of victims and witnesses, as well as the accommodations and services available to them; and be it further

"Resolved, That the Chief Clerk of the Assembly transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States."

POM-623. A concurrent resolution adopted by the Legislature of the State of Hawaii; to the Committee on Banking, Housing, and Urban Affairs:

"SENATE CONCURRENT RESOLUTION No. 73

"Whereas, the National Flood Insurance Act of 1968 defines 'base flood' as the flood having a one-percent chance of being equaled or exceeded in any given year, and utilizes this definition in determining 'areas of special flood hazard' or 'coastal high hazard areas'; and

"Whereas, in order for communities to qualify for subsidized federal flood insurance under this Act, local governments must impose specific development restrictions and requirements for construction in locations designated as areas of special flood hazard or coastal high hazard areas; and

Whereas, the 1973 Flood Disaster Protection Act effectively mandates community participation in the National Flood Insurance Program by denying flood relief funds from non-participating communities; and

"Whereas, it can reasonably be anticipated that the effect of new codes and ordinances which conform to these federal requirements will be to the economic detriment of the community at large, particularly in communities such as Hawaii where affected areas constitute a significant portion of populated and developable land; and

"Whereas, the State of Hawaii, plagued by spiraling housing costs and an absence of great amounts of developable land, can ill afford to restrict the availability of reasonably priced housing and opportunities for economic development by the application of unreasonable building limitations; and

"Whereas, the legislature of the State of Hawaii recognizes that the intent of these restrictions is to minimize the loss of life and property due to flood, storm surf or tsunami; and

"Whereas, the legislature of the State of Hawaii feels that the 100-year base flood zone constitutes an overly stringent standard by which to measure the likelihood of damaging or catastrophic floods; and

"Whereas, increasingly sophisticated early warning systems have significantly reduced the hazards of loss of life or personal injury from storm surf and tsunami in the State of Hawaii; and

"Whereas, a fifty year standard would more realistically represent the economic life of structures, reduce pressure of urbanization on agricultural and conservation lands, and reduce the detrimental effects of building restrictions while adequately protecting and preserving the intent of the Flood Insurance Act requirements; now, therefore,

"Be it resolved by the Senate of the Ninth Legislature of the State of Hawaii, Regular Session of 1978, the House of Representatives concurring, that the Congress of the United States is respectfully requested to reduce the one hundred year base flood of the National Flood Insurance Act to fifty years; and

Be it further resolved that certified copies of this Concurrent Resolution be transmitted to the President of the Senate of the United States; the Speaker of the House of Representatives of the United States; The Honorable Daniel K. Inouye, U.S. Senator; The Honorable Spark M. Matsunaga, U.S. Senator; The Honorable Daniel Akaka, U.S. Representative; The Honorable Cec Heftel, U.S. Representative; The Honorable George R. Ariyoshi, Governor, State of Hawaii; the Council of Housing and Construction Industry; and the Hawaii Advisory Committee for National Flood Insurance."

POM-624. A concurrent resolution adopted by the Legislature of the State of Hawaii; to the Committee on Commerce, Science, and Transportation:

"SENATE CONCURRENT RESOLUTION No. 64

"Whereas, there is presently before the United States Congress S. 1381 and H.R. 6601 which would enact a national motor vehicle no-fault law; and

"Whereas, the State of Hawaii enacted its own Hawaii No-Fault Law effective September 1, 1974, after three years of intensive study and legislative consideration; and

"Whereas, Hawaii's law has been further refined by legislative amendments since that time and continues to be subject to constant scrutiny and study; and

"Whereas, 24 states with over 53 percent of the national population have enacted some form of no-fault legislation and at least 11 additional states have no-fault legislation currently under consideration; and

"Whereas, it is only by a process of trial and error that the true costs and benefits of the different no-fault programs of the various states can be tested and improved through practice; and

"Whereas, a single untested nationwide plan would not be able to meet the varied needs of the different states as well as legislation enacted by their own legislatures; now, therefore,

"Be it resolved by the Senate of the Ninth Legislature of the State of Hawaii, Regular Session of 1978, the House of Representatives concurring, that the United States Senate and House of Representatives be advised that it opposes federal no-fault legislation, and requests such legislation be withheld so that Hawaii and the other states may continue to develop their no-fault laws to best serve the interests of their own citizens; and

"Be it further resolved that certified copies of this Concurrent Resolution be transmitted to the President of the United States Senate, the Speaker of the United States House of Representatives; the Honorable Daniel K. Inouye and the Honorable Spark M. Matsunaga, Senators from the State of Hawaii; the Honorable Daniel K. Akaka and the Honorable Cecil Heftel, Representatives from the State of Hawaii."

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. CANNON, from the Committee on Commerce, Science, and Transportation, with an amendment:

S. 1895. A bill to amend the Natural Gas Pipeline Safety Act of 1968 to authorize appropriations for fiscal year 1979 (Rept. No. 95-768).

S. 2508. A bill to amend the Regional Rail Reorganization Act of 1973 to authorize additional appropriations for the United States Railway Association (Rept. No. 95-769).

By Mr. TALMADGE, from the Committee of Agriculture, Nutrition, and Forestry, without amendment:

S. Res. 443. An original resolution waiving section 303(a) of the Congressional Budget Act of 1974 with respect to consideration of the Conference Report on H.R. 6782. Referred to the Committee on the Budget.

By Mr. CANNON, from the Committee on Commerce, Science, and Transportation, with amendments:

S. 2727. A bill to promote and coordinate amateur athletic activities in the United States, to recognize certain rights for United States amateur athletes, to provide for the resolution of disputes involving national governing bodies, and for other purposes (Rept. No. 95-770).

By Mr. CHURCH, from the Special Committee on Aging:

Developments in Aging: 1977, parts I and II (together with additional and supplemental views) (Rept. No. 95-771).

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

Mr. HARRY F. BYRD, JR. Mr. President, from the Committee on Armed Services, I report favorably the nominations of 3 in the Army Medical Department to be major general and brigadier general in the Army (list beginning with Raymond H. Bishop, Jr.); and there are 43 rear admirals in the U.S. Navy for permanent promotion to the grade of rear admiral (list beginning with Robert W. Watkins); and Lt. Gen. Gordon Sum-

ner, Jr., U.S. Army, to be placed on the retired list in that grade. Also, there are 36 temporary appointments in the Army to the grade of brigadier general (list beginning with John E. Rogers); and Adm. Frederick H. Michaelis, U.S. Navy, (age 61) for appointment to the grade of admiral on the retired list; and Maj. Gen. Philip D. Shutler, U.S. Marine Corps, to be lieutenant general. Also Maj. Gen. Ranald T. Adams, Jr., U.S. Air Force, to be lieutenant general; and there are 4 in the Army National Guard for appointment to the grade of brigadier general and major general (list beginning with John R. Phipps); and Rear Adm. Fran McKee, U.S. Navy, for appointment to the grade of rear admiral. Also, Col. Margaret A. Brewer, U.S. Marine Corps, for appointment to the grade of brigadier general; and Lt. Gen. Charles E. Buckingham, U.S. Air Force, (age 54) for apointment to the grade of lieutenant general on the retired list; and Lt. Gen. Thomas W. Morgan, U.S. Air Force, (age 56) for appointment to the grade of lieutenant general on the retired list. Also, Maj. Gen. Richard C. Henry, U.S. Air Force, to be lieutenant general; and Vice Adm. Donald C. Davis, U.S. Navy, for appointment to admiral. I ask that these nominations be placed on the Executive Calendar.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HARRY F. BYRD, JR. In addition, there are 42 Air National Guard officers for promotion in the Reserve of the Air Force to be lieutenant colonel (list beginning with David L. Ahrens); and there are 33 Air National Guard officers for promotion in the Reserve of the Air Force to be lieutenant colonel (list beginning with William J. Austin); and there are 1,166 for appointment in the Regular Air Force to be first and second lieutenants (list beginning with Errol S. Aboe). Also, there are 129 for promotion in the Regular Army of the United States to the grade of colonel and below (list beginning with William E. Linn); and there are 28 in the Navy to be permanent and temporary captains and below (list beginning with Douglas Cook, Jr.); and there are 57 in the Navy for permanent and temporary appointment to the grade of commander and below (list beginning with Barry Coome). Also, there are 1,220 for permanent promotion to the grade of captain in the Reserve of the Navy (list beginning with James G. Abert); and there are 283 to be permanent and temporary lieutenants in the Navy (list beginning with Darwin B. Bingham); and there are 681 for promotion in the Regular Air Force to the grade of colonel and below (list beginning with Clark E. Aamodt). Also, there are 979 cadets, U.S. Air Force Academy, for appointment in the Regular Air Force in the grade of second lieutenant (list beginning with Michael R. Ackley); and there are 344 in the Reserve of the Army and the Army National Guard for promotion to the grade of colonel and below (list beginning with James Bennie, Jr.); and there are 331 in the U.S. Navy and Naval Reserve for temporary and permanent appointment to the grade of commander and below (list beginning with Emanuel D. Ascarelli). Also, there are 1,529 in the Navy for temporary promotion to the grade of lieutenant commander (list beginning with Kenneth C. Ables III); and there are 466 in the U.S. Navy for temporary promotion to the grade of lieutenant commander (list beginning with Joseph H. Anderson); and there are 412 in the Navy for permanent and temporary promotion to the grade of lieutenant (list beginning with Richard R. Amelon). Also, there are 847 including Naval Academy graduates, to be permanent and temporary commanders and below in the Navy (list beginning with Ronald L. Aasland); and there are 14 in the Reserve of the Air Force for promotion to the grade of colonel (list beginning with Richard E. Bennett); and there are 30 in the Air Force and Air Force Reserve for promotion to the grade of colonel and below (list beginning with Thomas F. Schammel). Also, there are 1,311 scholarship students for appointment in the Regular Army of the United States in the grade of second lieutenant (list beginning with Benjamin F. Adams); and there are 37 in the Navy to be permanent and temporary commanders and below (list beginning with Wade A. Armstrong). Since these names have already appeared in the CONGRESSIONAL RECORD and to save the expense of printing again, I ask unanimous consent that they be ordered to lie on the Secretary's desk for the information of any Senator.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The nominations ordered to lie on the Secretary's desk were printed in the RECORD of March 22, March 23, April 3, April 6, and April 17, 1978, at the end of the Senate proceedings.)

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first time and, by unanimous consent, the second time, and referred as indicated:

By Mr. HART (for himself, Mr. DOMENICI, and Mr. HASKELL):

S. 2999. A bill to amend the Federal Nonnuclear Energy Research and Development Act of 1974, and for other purposes; to the Committee on Energy and Natural Resources.

By Mr. HART (for himself and Mr. DOMENICI):

S. 3000. A bill to amend the Internal Revenue Code of 1954 to allow for certain deductions related to enhanced oil recovery; to the Committee on Finance.

By Mr. ANDERSON:

S. 3001. A bill for the relief of Kirthi Chandher; to the Committee on the Judiciary.

By Mr. GOLDWATER:

S. 3002. A bill to modify a portion of the south boundary of the Salt River Pima-Maricopa Indian Reservation in Arizona, and for other purposes; to the Select Committee on Indian Affairs.

By Mr. MELCHER:

S. 3003. A bill to amend the Rural Electrification Act of 1936, as amended, to provide for the financing of telecommunication facilities for cable television and other broadband services in small towns and rural areas; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. KENNEDY:

S. 3004. A bill to amend section 552 of title 5, United States Code, known as the Freedom of Information Act, to secure to employees of the Government the right to disclose information which is required by law to be disclosed by agencies; to the Committee on the Judiciary.

By Mr. METZENBAUM (for himself, Mr. KENNEDY, and Mr. RIBICOFF):

S. 3005. A bill to broaden the rights of citizens to sue in Federal courts for unlawful governmental action; to the Committee on the Judiciary and the Committee on Governmental Affairs jointly by unanimous consent.

By Mr. STEVENS:

S. 3006. A bill entitled the "Fisherman's Training and Development Act of 1978"; to the Committee on Commerce, Science, and Transportation.

By Mr. DOLE:

S. 3007. A bill to disregard, for purpose of certain taxes imposed by the Internal Revenue Code of 1954 with respect to employees;, certain changes since 1975 in the treatment of individuals as employers; to the Committee on Finance.

By Mr. GARN (for himself, Mr. HATCH, Mr. DECONCINI, Mr. MCCLURE, Mr. DOMENICI, Mr. LAXALT, Mr. HANSEN, Mr. WALLOP, and Mr. SCHMITT):

S. 3008. A bill entitled the "Uranium Mill Site Restoration Act of 1978"; to the Committee on Energy and Natural Resources.

By Mr. METZENBAUM:

S. 3009. A bill to prohibit the denial of a professional or occupational license by a State or local government agency, and employment, or access to employment, by a Federal Government agency on grounds of conviction of a Federal offense; to the Committee on Governmental Affairs.

By Mr. LUGAR (for himself and Mr. BAYH):

S. 3010. A bill to establish the Highway of Flags National Servicemen's Memorial, to the Committee on Energy and Natural Resources.

By Mr. STEVENSON:

S. 3000. A bill to amend the Internal Revenue Code of 1954 to allow for certain deductions related to enhanced oil recovery; to the Committee on Finance.

ENHANCED OIL RECOVERY COMMERCIALIZATION ACT OF 1978 AND THE ENHANCED OIL RECOVERY TAX ACT OF 1978

● Mr. HART. Mr. President, today I am introducing a bill entitled the "Enhanced Oil Recovery Commercialization Act of 1978." This bill is designed to speed the commercial application of newly developed techniques for getting more oil to the surface from existing reservoirs. These techniques, called enhanced oil recovery, can recover as much oil from old reservoirs as has previously been pumped over the last half century. Most importantly, these techniques can yield large amounts of oil during the late 1980's when our oil situation will be critical. If commercialization can be accelerated, enhanced oil recovery can provide an amount of oil equivalent to two Alaska pipelines in 10 years. Furthermore, this technology can provide needed petroleum fuels with very little threat of environmental damage.

Enhanced oil recovery, also called tertiary oil recovery, means the use of methods to recover oil from a reservoir after primary and secondary recovery (water flooding) have taken place. There are three methods of enhanced oil recovery. Each involves the injection of materials which, in effect, push drops of oil caught in tight rock spaces to the well where the oil can be pumped to the surface.

The United States needs all of the environmentally clean substitutes to imported oil that it can get. Enhanced oil recovery (EOR) is the sleeping giant of alternatives to oil imports. And becase of the very few envronmental problems with EOR, this giant can be called a green giant.

There have been three major studies of the potential for enhanced oil recovery. These studies by industry (the National Petroleum Council), the administration (Energy Research and Development Administration), and the Congress (Office of Technology Assessment) are in general agreement that EOR can potentially supply large amounts of oil in the late 1980's and through the 1990's. Under the right financial conditions, for example, the Office of Technology Assessment finds that EOR could supply 1.3 million barrels of oil per day in 1985; 2.8 million barrels per day in 1990; and 8.2 million barrels per day in the year 2000.

By comparison, total oil imports are now about 8 million barrels per day. The Alaskan pipeline supplies about 1 million barrels per day. And a full-scale oil shale industry would supply about 1 to 3 million barrels per day.

Left to itself, without further encouragement by the Federal Government, enhanced oil recovery may arrive a decade or two too late, if at all. The primary impediment to the rapid development of a full-scale EOR industry is financial uncertainty. Well-managed American firms invest where financial uncertainty is low. To encourage rapid investment in EOR, financial uncertainty must be reduced as much as possible, given reasonable limits on the Federal budget.

The financial uncertainty comes from two sides. First, the EOR technologies may not produce as much oil in full-scale operations as they do in small pilot studies. Thus, the cost per barrel for EOR could be much greater than anticipated. This production uncertainty can be reduced only by experience. A few dozen full-scale operations are needed to prove how well the new technologies work. The Department of Energy is assisting private industry in funding a number of mini-scale pilot projects to demonstrate the technologies can work at all. But pilot projects alone can never show how well the technologies will work on a scale 10 to 100 times larger.

The second financial uncertainty concerns the sales price of oil produced by EOR. All oil companies expect prices to rise, but companies are uncertain whether they will rise enough to pay the high costs of EOR. Hence, with the price uncertainty, firms will wait for prices to rise before they begin to establish expensive, first generation EOR programs which will take about 5 years to implement. The Government can accelerate these programs by guaranteeing now that EOR oil can be sold at a predictable price in the future.

A further problem concerns the ability of all firms to acquire the capital needed to invest in "first of a kind" EOR operations. Small producers simply do not have the tens of millions of dollars required to invest in chemicals for EOR a few years before the oil begins flowing to the surface. Banks will not lend the money until there is established a favorable history of such ventures. Unless they are helped directly, small producers may have to sell off reserves to large producers who have the cash for pioneer EOR operations.

The legislation I propose today will speed EOR commercialization by reducing the uncertainty over sales prices, by helping small firms gain financial backing, and by assuring that tax rules do not suddenly change the effective costs of EOR operations.

$25 FOR SELECTED PIONEER PROJECTS

Although EOR oil is expected to cost less than OPEC oil in the mid 1980's, there is a need for price guarantees on selected, "first of a kind" operations. Due to the risk associated with new techniques on new geological structures, and due to the high costs of chemical injection, a price of $25 per barrel will be needed to induce private action.

In the absence of government price guarantees, firms will wait until the mid to late 1980's, when the market price of oil is projected to reach $25, before they initiate these EOR operations. It then will be another 5 to 10 years before large numbers of full-field operations are undertaken.

This decade of lead time can be eliminated if the Department of Energy guarantees $25 per barrel now for a few of these high cost operations. With successful demonstration of these techniques in the early 1980's, the industry will be ready to initiate dozens of these ventures in the mid to late 1980's, when the market price is over $25.

I propose that the Department of Energy guarantee a $25 price only for EOR operations which are not economically feasible at current world prices and which will demonstrate a technology having wide applicability thereafter.

The full-field operations which may receive price supports will get underway in the early 1980's, when world prices are expected to be $5 or so less than the $25 support price. By the mid-1980's the market price is expected to equal the support price, so that the Treasury is not expected to incur further costs. To test the two major high-cost techniques (micellar-polymer and carbon dioxide) in the most promising geological zones would require 10–12 full-field demonstrations. A maximum of $200 million is suggested for this purpose.

DEREGULATED PRICE FOR SECOND GENERATION

For EOR projects which use a particular technique on a type of reservoir which has already been shown successful, the risks are much less. Therefore, a high incentive price is not necessary. Furthermore, a price higher than market price is undesirable, because the EOR industry should be developed to operate without Government subsidy. Thus, for "second generation" EOR operations, I propose the oil be sold at a price equal to world oil prices. Deregulation of EOR oil is needed because the costs of chemicals alone ($5–$13 per barrel) exceeds the price of most controlled oil.

The Department of Energy is now considering a regulatory change to allow EOR oil to sell at a deregulated price. However, there are other problems with DOE's proposal. The DOE must calculate the price of deregulated EOR oil in the composite price under current law. This means that the price of some old oil must be kept low in order for the higher priced EOR oil not to increase the average (or composite) oil price above statutory maximums.

If the price of old oil is kept too low, costs will simply make high volume production from old wells uneconomical. If production is reduced to 10 barrels per day, the well will qualify for a deregulated price under "stripper oil." Such action by DOE and by producers will reduce oil production. To overcome this problem my alternative will take EOR oil out of the composite. Thus EOR production will have no effect on the rates of production from old wells not under EOR programs.

To protect consumers from unfairly high prices for old oil, the deregulated

or $25 price should apply only to old oil produced from the costly EOR methods. As part of present plans to deregulate EOR oil, DOE is developing methodologies to calculate the incremental amount of oil which will come from a reservoir solely as a result of EOR operations. Under my proposed legislation, DOE shall apply these methodologies to EOR projects which are qualified according to State or Federal agencies.

LOAN GUARANTEES

High prices themselves are not sufficient to insure that small and intermediate-sized oil companies can enter a new enhanced oil recovery industry. Enhanced oil recovery operations require the expenditure of tens of millions of dollars for injection of chemicals before oil is actually brought to the surface. Small companies will need to borrow $20 to $40 million in order to undertake EOR. Banks will be unwilling to loan tens of millions of dollars unless there is evidence that they will get their money back. Until EOR operations establish a successful history, banks will be willing to loan for these purposes only if there is guaranteed repayment.

In this legislation, therefore, I propose that DOE guarantee loans for "first of a kind" EOR operations when a firm demonstrates that it cannot otherwise obtain financing. Large Oil companies, having yearly profits of hundreds of millions of dollars, have no need of such guarantees. A company must produce less than 25,000 barrels per day to qualify for a loan guarantee. Under current conditions this means the 33 largest oil companies would not qualify for this provision. Large corporations probably could not use them anyway, since a large corporation would not want to default on loan when it could have adverse financial repercussions on other aspects of its business.

I have opposed Federal loan guarantees in the past because they were proposed as hidden subsidies to giant corporations. In this specific case, small businesses simply will be excluded from a new industry unless they are given assistance for early capital costs with uncertain technologies. I propose this capital assistance in a way which will develop sound business relationships between the small old producers and the banks.

I propose that DOE guarantee a group of loans up to a maximum potential liability of $200 million. In order that the subsidy of this default risk not be hidden, I propose that this legislation authorize a full $200 million to cover potential losses. I do not expect that many loans will default, so I do not really expect that this sum will ever leave the Treasury.

EXPENSING OF INJECTION COSTS

At this time, the Internal Revenue Service allows firms to treat as a current expense the costs of injecting materials into the reservoir. Because these materials may have a useful life of several years, the IRS could conceivably rule that these costs must be amortized over a several year period. If IRS made this change, the effective costs of EOR would be increased several dollars per barrel. Such a shift in accounting procedures would add significant cost to a venture which is of very uncertain profitability already. Until the technology is proven in full-scale operations, it is desirable to keep the firms' costs as low as possible.

I ask unanimous consent that an analysis of the Enhanced Oil Recovery Commercialization Act be printed in the RECORD.

There being no objection, the analysis was ordered to be printed in the RECORD, as follows:

ANALYSIS OF ENHANCED OIL RECOVERY COMMERCIALIZATION ACT

1. What is enhanced oil recovery (EOR)?

Enhanced oil recovery is the use of techniques other than water flooding to push more oil through the porous rock structure of a reservoir to the recovery well. There are three techniques: steam and other heat methods, carbon dioxide, and miscellar polymer. Carbon dioxide dissolves the globs of oil to ease its flow through the reservoir. The micellar polymer process uses detergent-like chemicals to break up the large globs of oil and move them through the reservoir. The steam and other heat methods improve the flow of oil without chemicals.

2. Why is EOR important?

Primary oil recovery brings about 15% to 20% of the original oil in place to the surface. Secondary oil recovery, otherwise known as water flooding, pushes another 15% to 20% of the oil in place to the well where it can be pumped to the surface. Thus, present oil recovery techniques bring only about 30% to 40% of the original oil in the ground to the surface. Enhanced oil recovery techniques are expensive, but can bring another 30% of the original oil in place to the surface. Using enhanced oil recovery, there is a potential to bring to the surface 50 billion barrels of oil from old reservoirs.

3. How does EOR work?

After primary recovery and water flooding, large globs of oil are stuck in the narrow pores of the rock. Enhanced oil recovery uses heat or chemicals to improve the flow of oil through the porous rock of oil reservoirs so it can be pumped out.

4. What does EOR cost?

Injection of materials accounts for the largest component of costs for enhanced oil recovery. Injection costs from $5 to $13 per barrel. After the processes have been proved on a full-scale, some EOR operations can be profitable if the oil sells for $14 per barrel. However, other, more expensive operations will need to sell at $22 to $25 per barrel to make a profit.

5. How much additional oil can be produced by EOR in the late 1980's and 1990's?

If prototype commercial operations are begun in the early 1980's, EOR can produce 1.3 million barrels of oil per day in 1985; 2.8 million per day in 1990; and 8.2 million barrels in the year 2000. Without rapid acceleration of the early commercial phases, production rates will be less than half of these amounts.

6. What is impeding the rapid formation of an EOR industry?

At present there are three impediments to EOR commercialization. The costs of EOR operating in full-field scale are uncertain. The price at which other oil will sell in the early and mid 1980's is also uncertain. And small energy producers cannot get loans from banks to invest the tens of millions of dollars required to inject chemicals.

7. How can these impediments be reduced?

In general, uncertainty over costs can be reduced best by a history of successful full-field operations with each EOR technology, on each major type of oil field geology. Unfortunately, this is a chicken and egg problem. We can't get a successful history because of the lack of successful history. We can only change this by offering very high sale prices for these pioneer operations to compensate for the potentially very high costs and risk.

To provide certainty over the long run, we can deregulate the sale of oil from EOR operations to assure producers that they can get the world oil price.

To help small producers get into operation, we need Federal assistance to encourage banks to back them.

8. What is the Hart proposal?

(a) Deregulate the price of oil produced from all EOR operations and remove EOR oil from the composite price.

(b) Guarantee a $25 per barrel support price for certain high-cost, pioneer EOR operations.

(c) Provide Federally guaranteed loans to small producers for pioneer EOR operations.

(d) Allow companies to treat costs of injecting chemicals as operating costs for tax purposes.

9. Why deregulate the oil from EOR?

The costs of EOR are significantly greater than primary recovery or water flooding. For most EOR techniques the price will need to be at least $14 per barrel to be profitable. Current regulated oil prices average $10. Deregulation now will make a few EOR operations profitable. As the world oil price rises to $25 or so in the mid 1980's, more EOR operations will be economical.

10. Why provide a $25 support price for "first of a kind" operations?

Left to itself, private industry will not initiate EOR operations, which are expected to cost $25 per barrel, until the world oil price is actually $25 per barrel—in the mid 1980's. After the pioneer operations are begun in the mid 1980's, it will take five years or more before second generation EOR operations are begun—expanding the techniques to many other oil reservoirs. This will mean that many EOR operations costing $25 per barrel will not be started until the early 1990's.

Instead of waiting until the price of oil is $25, the U.S. can guarantee a $25 price for selected operations now. With such a guarantee, private industry can begin the pioneer full-scale operation now. Then, in the mid to late 1980's full-scale commercial operations can provide significant amounts of oil at world oil prices.

It is not known for sure whether oil prices will rise to $25 in 1985 (in 1978 dollars). This estimate depends upon reasonable assumptions regarding the growth of world economies, the discovery of new oil reserves, and the degree of energy conservation. Changes in these assumptions change only the date at which world oil prices reach $25, and not whether they will reach these levels. For example, a slow growth of world economic output could postpone the $25 price for a couple of years.

Given our adverse balance of payments situation, it is necessary for the government to assume the risk over future prices to bring on substitutes for imported oil as soon as possible.

11. How much will the price guarantee cost the U.S. Treasury?

Price guarantees will be limited to "first of a kind" operations, for which current deregulated prices are not high enough to promote private investment. Preliminary data indicates that there are approximately 12 types of EOR operations in this category. These 12 types of operations may produce approximately 30 million barrels of oil in the early 1980's.

The cost to the U.S. Treasury of giving price supports to this oil is about $200 million. After this period world prices are expected to be so high that price supports would be unnecessary.

12. How much economic gain will result from the price support?

The price supports will result in prototype (first of a kind) EOR operations for some technologies five to ten years before they would otherwise occur. After successful prototype operations, many more full-field EOR operations will be undertaken in the mid 1980's and early 1990's.

It is difficult to estimate precisely how much oil can be produced five to ten years sooner as a result of this program. However, it is possible that this program could increase EOR production by half a million barrels per day in the mid to late 1980's, and over a million barrels per day in the late 1990's. This would reduce U.S. payments for oil imports by over $5 billion per year.

13. Why should the deregulated price be excluded from the composite price?

Current regulations set maximum levels for the average of the three oil prices (old oil, new oil, and deregulated oil), which is called the composite price. In general, when more oil is sold at the highest, deregulated price, the price of old oil must be kept low to prevent a rise in the composite price. If the price of old oil is kept too low, there will be an incentive to curtail production from these wells until so little is produced that it qualifies for the "stripper" (deregulated) price exemption.

In summary, the deregulated price of EOR oil must not inadvertently decrease the price of other old oil, which would reduce the production of old oil by all methods. Hence, this legislation will remove EOR oil from calculations of the composite price.

14. Why are loan guarantees needed for independent oil companies?

EOR requires that up to $50 million in chemicals be injected into a reservoir before substantial amounts of oil begin flowing from recovery wells. Small oil companies do not have tens of millions of dollars in cash, and must borrow to make this investment. Banks will not take extremely high risks. Therefore, banks will not make loans for EOR until the technologies are demonstrated to be successful in several full-field operations.

Since loan guarantees are restricted to companies producing less than 25,000 barrels of oil per day, the 33 largest oil companies will not qualify for this provision.

By guaranteeing that the U.S. Treasury will repay up to 85% of the amount of loans, if the small oil company cannot, the banks will be willing to make the loans. After a few successful EOR operations, the Federal loan guarantee will not be necessary. Because the banks will have been involved during the early phases, their procedures and personnel will be ready to continue the loans on a private commercial basis.

15. How much will the loan guarantees cost the U.S. Treasury?

It is proposed that the Treasury's maximum liability be limited to $200 million, in the event that all of the EOR projects having loan guarantees should fail completely. This would support about six EOR projects with independent operators. If the first few projects go well, perhaps the Federal guarantee could be reduced as a percentage of the total loan, and more operators could be funded.

16. Why should the costs of injection materials be counted as operating costs for tax purposes in the first year?

Under current IRS rules oil companies deduct in the first year (i.e., "expense") all current costs of injection chemicals for EOR pilot projects. Since the oil is not recovered for a few years, IRS may eventually rule that these costs should be amortized over a several-year period. Since costs are subtracted from a company's revenues before calculating profit taxes, a company's profits would be reduced in the early years of a project if the injection costs were not expensed in the first year.

It is debatable whether the costs of injection should be depreciated over several years or expensed in the first year. The impact of depreciating over several years will be to effectively increase the cost of EOR by a few dollars. This in turn may make many early EOR operations uneconomical.

In order to be sure an IRS ruling will not cancel the otherwise accelerating impact of price deregulation and some price supports, a companion bill would continue expensing for at least 8 years.

17. What are the impacts of EOR on air quality?

The steam injection methodology (which may be particularly useful in California) requires gasoline or diesel fuel-driven engines. This equipment could release air pollutants in an area of California which currently exceeds Federal standards. In order for steam-driven EOR to be usable in California, either the pollution from other sources would need prior reduction, or nonpolluting engines would need to be developed.

18. What are the impacts on fresh water availability?

The micellar-polymer technology currently requires fresh water. In the water-short areas of the Rocky Mountain states, this technology may be limited until ways are found to use naturally occurring salt water.

19. What are the impacts on the purity of the fresh ground water?

The micellar-polymer technology injects surfactants, (detergentlike chemicals) into the oil reservoir. It is unlikely that these chemicals would leak from the reservoir since the reservoirs themselves are naturally closed systems. Furthermore, water flooding prior to chemical flooding gives the operator experience working in a particular reservoir to determine if there may be leakages.

Mr. HART. Mr. President, I propose a companion piece of legislation, called the "Enhanced Oil Recovery Tax Act of 1978," prohibiting the IRS from changing current expense-accounting for EOR operations for at least 8 years. Thereafter, EOR operations will be treated for taxes the same way any other business venture is treated.

ENVIRONMENTAL IMPACTS

The environmental impacts of enhanced oil recovery are expected to be small, although environmental considerations may limit some methods of EOR in some places. There are three environmental considerations. First, air pollution can result from the use of gasoline and diesel engines in the steam-injection method. In parts of California, where air pollution is already a problem, steam injection may be restricted.

Second, the micellar-polymer process, which injects detergent-type chemicals to break up oil into smaller droplets, now requires fresh water. Until this method is developed to use the naturally-occurring saline water, this process may be limited in the water-short States of the Rocky Mountain West.

Third, there is a very slight chance that the detergent chemicals could leak into below-ground fresh water systems. Injection techniques must be monitored closely to see that this does not occur.

In light of these potential problems, EOR will need to proceed slowly in some parts of the country. On balance, however, the environmental constraints are not expected to severely limit EOR development.

SUMMARY

In summary, this legislation is designed to speed enhanced oil recovery by reducing the uncertainty over price. It will guarantee high prices for "first of a kind" operations, and second generation operations will receive a deregulated price.

To insure that independent producers are an important part of the new EOR industry, loan guarantees will be available in special circumstances.

I expect that a more rapid formation of a full-scale EOR industry will mean that this country can import 1 or 2 million fewer barrels of oil per day in the late 1980's and early 1990's.●

By Mr. GOLDWATER:

S. 3002. A bill to modify a portion of the south boundary of the Salt River Pima-Maricopa Indian Reservation in Arizona, and for other purposes; to the Select Committee on Indian Affairs.

SALT RIVER PIMA-MARICOPA INDIANS

● Mr. GOLDWATER. Mr. President, it gives me great pleasure today to introduce a bill which would settle a long-standing dispute between the Salt River Pima-Maricopa Indians, in Arizona, and their neighbors regarding the boundary of the tribe's reservation. Specifically, the legislation would modify a portion of the south boundary of the reservation. For the past 2 years, the tribe, the city of Mesa, Ariz., and many concerned and interested parties have worked together to bring about some sort of satisfactory compromise and this bill is the end result.

The Salt River Indian Reservation was created back in 1879, to accommodate the Pima Indians who had migrated to the area in search of greater water supplies. Subsequent Executive orders in 1910 and 1911 enlarged the reservation so that as of 1974, the reservation consisted of over 49,000 acres, equally divided between allotted land and tribally owned land.

When the reservation was created, a portion of the southern boundary was established to follow the course of the Salt River as it flowed then. Later on, the United States issued patents, leaseholds, and other interests in properties adjacent to this intermittent wandering southern boundary and these were issued to residents of the Salt River Valley who were not members of the Indian community. As the course of the Salt River changed, the shift caused confusion with respect to the precise location of the Tribe's southern reservation boundary. I am introducing this bill today so that neither the Indian community, and the interested parties involved have to go through a lengthy and costly litigation to settle this dispute complicated by conflicting decisions made by the U.S. Government over the years. It should be noted that Congressman RHODES introduced a similar bill

in the House this past Tuesday, with the full support of Arizona's Congressmen.●

By Mr. MELCHER:

S. 3003. A bill to amend the Rural Electrification Act of 1936, as amended, to provide for the financing of telecommunication facilities for cable television and other broadband services in small towns and rural areas; to the Committee on Agriculture, Nutrition, and Forestry.

(The remarks of Mr. MELCHER when he introduced the bill appear elsewhere in today's proceedings.)

By Mr. KENNEDY:

S. 3004. A bill to amend section 552 of title 5, United States Code, known as the Freedom of Information Act, to secure to employees of the Government the right to disclose information which is required by law to be disclosed by agencies; to the Committee on the Judiciary.

PROTECTING WHISTLEBLOWERS

● Mr. KENNEDY. Mr. President, all but the most simplistic of sloganeers recognize that the Federal Government is not composed solely of "faceless bureaucrats" who are interested only in leaving promptly at 5 o'clock and are indifferent to any wrongdoing that goes on around them. Instead, our Federal agencies and offices are made up of individuals—the majority of whom are both faithful in their duties and high minded in their responsibilities. The bill that I am introducing, the Federal Employees Disclosure Act, is intended to give the American public full advantage of this tremendous resource of conscientiousness and dedication—by protecting Federal employees who speak out against any waste, inefficiency, incompetence, and corruption that they may see around them.

Hiding wrongdoing is not difficult in our vast Federal bureaucracy if no one generates the courage to blow the whistle. When the Air Force attempted to conceal from the Congress a $2 billion cost overrun on the C–5A transport plane, it had to silence a conscientious cost control analyst named Ernie Fitzgerald.

When the Federal Aviation Agency decided to cover up malpractice by the private charter companies, abuses that subsequently led to the deaths of the Chita State football team on a charter flight, FAA officials had to threaten evaluation chief Phillip I. Ryther with 11 pages of charges to attempt to silence his protests.

When the Navy wanted 50 reports of unsafe welds on its combat ships destroyed, it had to reprimand, transfer, and refuse promotion to an obstinate welding inspector named Oscar Hoffman to do so.

Whenever wrongdoing occurs, there is always the secretary who must type the falsified report, the clerk who must photocopy the juggled books and the researcher commanded to hide his or her findings. It is important to let these people know that their help is needed to uncover Federal abuses, while assuring them that they will not suffer for their actions.

I believe that these individuals, who are outraged by the wrongdoing that they witness, provide a special insurance for a more efficient and honest Government. By blowing the whistle on those who misuse their position as public officials, the conscientious civil servant can both reveal ongoing abuses of the office while effectively helping to prevent future Government corruption and waste.

Why are there relatively few cases of Government employees publicly revealing wrongdoing in their agencies? Because the harassment and retaliation that these whistle blowers have suffered at the hands of their agencies have discouraged all but the most courageous from going public. Little statutory protection is presently available to inhibit agencies from harassing these employees. The only viable avenue of redress available to the whistle blower is to pursue an appeal before the Civil Service Commission. However, only exceedingly narrowly defined retaliatory actions give rise to a wringed employee's right of appeal, and agencies have learned to exact more subtle forms of reprisal from their whistle-blowing employees.

Within the civil service appeal procedure, the only remedies available to the disclosing employee are limited to an order to rescind an agency's action against the employee and an award of back pay where applicable. Even in the rare cases where such reinstatement and award have taken place, the employee still is not compensated for the delay, harassment, expense, and emotional strain that he or she has undergone in the public's interest. These limited remedies are of little consequence in deterring agencies from retaliation against their employees.

The law must be amended to give statutory recognition to the Federal employee's right to reveal, to any person, information that is disclosable under the Freedom of Information Act. And it must also recognize the right of Government employees to provide other information to Congress in response to a legitimate request.

The law must ultimately provide Federal employees with the opportunity to obtain redress for acts of intimidation and retaliation taken against them by their agencies, when those employees exercise their lawful right to disclose public information.

I think that there is a growing awareness of the need to provide protections for whistle blowers. I was pleased that during his campaign President Carter voiced strong support for encouraging Federal employees who stand up for what is right and denounce waste, inefficiency, and illegality in the Government. And I have been studying with interest his proposal to establish a Merit System Protection Board and related safeguards as part of his overall civil service reform proposal, introduced by the chairman of the Committee on Governmental Affairs early in March.

Another indication of progress in this area has been the active concern of the Senator from Vermont. Last December Senator LEAHY made public a 500-page report based on a 7-month study conducted by his staff of more than 70 cases of whistle blowers. The report documented cases in which employees who exposed governmental waste and abuse had been fired, demoted, reassigned, reprimanded, denied promotions, isolated, and ignored. Senator LEAHY's work has done much to bring the harassment of whistle blowers to the attention of the American people, and he is to be commended for it.

A number of possible legislative approaches to protecting whistle blowers are now being discussed. Earlier I mentioned President Carter's civil service reform proposal (S. 2640), which would prohibit retaliation against employees who exercise their appeal rights or lawfully disclose violations of Federal law or regulations. It would hold agency heads and their subordinates responsible for preventing such retaliation. In addition, the special counsel of the new Merit System Protection Board would be authorized to investigate complaints from employees about reprisals, to stop possible reprisals, and to initiate disciplinary action against officials who violated protections of whistle blowers.

Last October Senator LEAHY introduced a similar bill (S. 2232), which would establish a Review Board on Improper Government Actions within the existing Civil Service Commission. The Board would investigate complaints by whistle blowers and enforce protections of such employees. Federal officials would be prohibited from using their authority to interfere with an individual employee's right to disclose improper governmental actions to the Board. Employees who were subjected to adverse personnel actions after providing such information would have the right to judicial review of their cases, regardless of whether administrative remedies had been exhausted.

Another approach would focus on judicial rather than administrative remedies. Senator METZENBAUM has introduced a bill (S. 2559) that would amend the Tort Claims Act to prohibit disciplinary action against a Federal employee for lawful public disclosures about a Federal agency, or for any disclosures to Congress or a court except statements known to be false and violations of individual privacy. The Metzenbaum bill would establish a legal presumption that any official disciplinary actions taken within 18 months against employees making protected disclosure, thus placing the burden of proof on the disciplining officials and the United States jointly liable in a civil action to the aggrieved employee for money, damages, or other appropriate relief including legal fees and other court costs.

Senator ABOUREZK has also introduced legislation with its own unique approach to providing redress for harassed government whistle blowers.

I am pleased that the Congress is actively exploring a variety of possible approaches to protecting whistle blowers. It has become increasingly clear that we

need to act to safeguard the rights of conscientious Federal employees who speak out against wrongdoing. The next step is to analyze and discuss the possible means of providing such protection, and then to pass the most appropriate legislation.

In that spirit, I am introducing a bill to amend the Freedom of Information Act, which I believe would accomplish these purposes. The amendment recognizes the right of Federal employees to provide, to any person, information that is required to be disclosed under the Freedom of Information Act. It also recognizes the right of employees to make disclosures of other information to Congress if the information is given pursuant to a written congressional request.

The bill affords employees the right to bring civil action in Federal district court to obtain redress for any agency actions taken against them in retaliation for the exercise of their right to disclose information. The court is given jurisdiction in such cases to provide complete relief. This could include restraining orders and interlocutory injunctions to prevent the threatened violation. Damages are to be assessed against the United States.

To avoid any conflicts between court and administrative decisions in judgments, an employee who brings an action under this provision is deemed to have waived any right to review before the Civil Service Commission.

To insure that the protections provided by this bill are viable for the average Government employee, provision is made for reasonable attorney's fees and litigation costs to be paid by the United States if the complaint prevails.

Lastly, the bill provides that in all cases that arise under it, the taking of a personnel action against any employee within 1 year after he or she discloses information covered by this amendment would create a rebuttable presumption that the action taken was because of the disclosure of the information. This is intended to alleviate the problems of proof that an employee might encounter in attempting to show that the agency action was retaliation for the disclosures. An employee who has been discharged from a job faces tremendous problems in meeting any burden of proof because the necessary information is ordinarily in the agency's hands. The presumption would in no way protect the employee from personnel actions taken for good cause. It would merely place the burden clearly on the party most able to bear it.

I introduced this bill in the last Congress, and hearings were held on it before the Subcommittee on Administrative Practice and Procedure. Because of administration opposition, however, no action was taken on the bill.

Now that the Carter administration has endorsed protection for whistleblowers, I think that action on such legislation will be facilitated. Alan Campbell, Chairman of the Civil Service Commission, has called the protection of whistle-blowers "essential to the improvement of the public service." We now have a number of thoughtful proposals pending before us.

If we have learned any lesson from the tragic events of the Watergate era, it is that the line between a secret government and a corrupt government is dangerously thin. Time and time again only the selfless acts of disclosure by courageous Government employees have enabled the public to maintain vigilance over their Government. Yet, in return, we have done little to provide these employees with protection against the enormous personal risks they incur when they make these disclosures.

I believe that enactment of legislation to protect whistle-blowers will encourage employees to make disclosures of public information. This should promote public confidence in Government and increase the public's capacity to check the abuses of Government officials, to participate in Government proceedings, and to monitor the activities of their Government.●

By Mr. METZENBAUM (for himself, Mr. KENNEDY, and Mr. RIBICOFF):

S. 3005. A bill to broaden the rights of citizens to sue in Federal courts for unlawful governmental action; to the Committee on the Judiciary and the Committee on Governmental Affairs, jointly, by unanimous consent.

CITIZENS' RIGHT TO STANDING IN FEDERAL COURTS ACT

Mr. METZENBAUM. Mr. President, we offer for the Senate's consideration today a bill to broaden the rights of citizens to sue in Federal courts for unlawful governmental action. I ask for unanimous consent that the bill, entitled "Citizens' Right To Standing In Federal Courts Act," be referred jointly to the Committee on the Judiciary and the Committee on Governmental Affairs. The subject of the bill is "standing," a technical legal concept involving the right of a plaintiff to present a case in court. "Standing" is a threshold question in every law suit. The legislation we propose today seeks to eliminate certain barriers to "standing" that have prevented Federal courts from hearing meritorious citizen complaints against illegal or unconstitutional governmental action.

Specifically, the Citizens Right To Standing In Federal Courts Act provides that a Federal court may not dismiss an action for lack of the plaintiff's standing on any one of three grounds:

First. Because the injury complained of is a "generalized grievance,"

Second. Because the defendant's conduct is not the primary cause of the injury, or

Third. Because a decision for the plaintiff on the merits of the case is not substantially likely to remedy or redress the injury the plaintiff suffered.

I will discuss these three grounds in greater detail in a moment.

Enactment of the proposed legislation will produce two results. First, a broader range of issues involving illegal governmental action could be presented to Federal judges for resolution. Second, the bill's enactment would clarify the existing confusion in the law involving the "standing" concept and eliminate the inordinate amount of energy and resources presently devoted to the litigation of "standing" in the Federal courts.

The proposed Citizens' Right To Standing in Federal Courts Act is the product of a joint effort. For a number of months, members of my staff and the staffs of Senators KENNEDY and RIBICOFF have discussed these matters with the Department of Justice. The Justice Department has carefully reviewed the bill we introduce today, and has contributed very significantly to its present language. The Department has provided a memorandum projecting the impact of this legislation on previous "standing" decisions of Federal courts. In addition, the accompanying letter from Assistant Attorney General Patricia M. Wald indicates the Department of Justice's reaction to the bill:

> [A]s presently drafted, the proposed statute incorporates principles which we are prepared to support in the form of legislation.

This measure also reflects, we believe, the commitment of the President to greater citizen access to the courts. As the President stated in April 1977:

> I support legislation which will give citizens broader standing to initiate suits against the Government, in appropriate cases.

I agree with the President's statement that relaxation of present "standing" barriers will "enhance the consumer's influence with Government without creating another unwieldy bureaucracy."

Therefore, the legislation we introduce today has, in principle, the support of the Department of Justice, and is intended to reflect the President's commitment to greater access to the courts by citizens.

There are two primary elements of the "standing" concept. One element is constitutional and cannot be modified by legislative action. In the landmark case of Baker against Carr the Supreme Court described the constitutional minimum for "standing"; the plaintiff must allege "such a personal stake in the outcome of the controversy so as to assure that concrete adverseness which sharpens the presentation of issues upon which the court so largely depends."

The second element of the "standing" concept involves considerations not required by the Constitution. In order to control both the number and kinds of cases filed in the Federal courts, the Supreme Court has constructed barriers to standing that have great impact on the right of individual citizens to seek redress for violations of Federal constitutional and statutory law. Such rules of standing leave meritorious claims without remedy.

Congress clearly has the authority to remove "standing" barriers that are not required by the Constitution—the so-called "prudential" rules of standing developed by the courts through judicial decision. Moreover, as Mr. Justice Brennan has stated, Congress has a constitutional responsibility "to insure that the attainment of congressionally mandated goals is not frustrated by illegal actions." In an unbroken line of cases the Supreme Court has recognized that rules of stand-

ing not required by the Constitution are subject to modification or elimination by Congress.

In Trafficante against Metropolitan Life Insurance Co., The Supreme Court, in a unanimous decision, recognized and upheld a "congressional intention to define standing as broadly as permitted by the Constitution." more recently, the court declared in the case of Warth against Seldin:

[P]ersons to whom Congress has granted a right of action, either expressly or by clear implication, may have standing to seek relief on the basis of legal rights and interests in support of that claim.

Congress has accepted the Court's invitation to expand "standing" to its constitutional boundaries on numerous occasions—in such legislation as the Toxic Substances Control Act, the Safe Drinking Water Act, the Consumer Product Safety Act, the Clean Air Act, the Federal Water Pollution Control Act, and the Noise Control Act. It is time for Congress to act again so that ordinary citizens, who have been victimized by illegal governmental action, will have a more meaningful right to present their claims in Federal courts.

Let us examine more thoroughly the three barriers to standing that the proposed "Citizens' right to standing in Federal Courts Act" will eliminate.

First, the legislation would prevent Federal courts from denying a plaintiff standing on the ground that the injury complained of is a generalized grievance—that is, one shared equally by all or an identifiable group of citizens. For example, in Schlesinger against Reservists Committee to Stop the War the Supreme Court refused to consider the merits of the plaintiffs' complaint that the participation of Congressmen in military reserve units violates the constitutional prohibition against Members of the House and Senate holding offices in the executive branch. The court reasoned that the Claim represented a generalized grievance. Thus in applying this barrier to standing, the court is in the anomalous position of denying relief to a meritorious claim simply because the injury is shared by many Americans. The legislation we propose today would eliminate such a rationale for refusing our citizens access to their Federal courts.

The second "standing" barrier addressed by the proposed Citizens' Right to Standing in Federal Courts Act involves the concept of causation. In Linda R.S. against Richard D. (1973) the Supreme Court stated that a complaining party must allege "some threatened or actual injury resulting from the putatively illegal action." In that case, the causation barrier prevented litigation on the merits of a mother's contention that a Texas penal statute, making it a crime for a parent to fail to support his child, was being discriminatorily enforced only in favor of legitimate children. The Court reasoned that even if the plaintiff received a ruling requiring enforcement of the statute in favor of her illegitimate child, the father might nevertheless fail to provide the financial support for the child the mother was seeking. In practice, however, the causal link between the enforcement of such statutes and a father's willingness to support his child is not as indirect as the court suggested. Certainly there is no question that the mother's interest in financial help for her child represented a personal stake in the outcome of the case, as the Constitution requires. The bill we offer for your consideration today would change the frequently criticized result in the Linda R.S. case.

The third barrier to "standing" treated by the legislation involves the concept of redressability—that is, whether a court decision can cure all aspects of a plaintiff's injury. According to the Supreme Court in Simon against Eastern Kentucky Welfare Rights Organization, known as EKWRO, a plaintiff must show "an injury that is likely to be redressed by a favorable decision" in order to have sufficient "standing" to litigate the merits of his suit. In EKWRO the Supreme Court refused to hear the challenge of low-income plaintiffs to a revenue ruling by the Internal Revenue Commissioner extending tax exempt status to a hospital that failed to serve indigents at the level of the hospital's financial ability. The Court concluded that the plaintiffs had failed to show that a reversal of the ruling would result in the treatment of indigents by the hospitals. The redressability requirement places an almost insurmountable burden of proof on plaintiffs, under the proposed "Citizens' Right to Standing in Federal Courts Act," a plaintiff need only show some likelihood that his injury will be redressed, or cured, by a favorable ruling.

The bill we propose today, however, does not address the issue of "taxpayer standing."

As I have stated, the purpose of this legislation is to eliminate technical barriers to "standing" in order to permit plaintiffs who can meet constitutional "standing" requirements to litigate their claims in Federal Court. As Mr. Justice Douglas observed:

The American dream teaches that if one reaches high enough and persists there is a forum where justice is dispensed. I would lower the technical barriers and let the courts serve that ancient need.

Also in broadening citizen access to Federal courts this Congress will be recognizing the many benefits to our country from suits brought by private attorneys general, who are ordinary citizens seeking to enforce the requirements of the law. First, such suits augment the enforcement efforts of Federal officials. Second, they allow citizens to assume part of the responsibility for the effective operation of their government. As the Committee on Government Affairs of the U.S. Senate observed in volume III of its study on Federal regulation:

We believe that the restrictive course the Supreme Court has taken on the issue of standing is unfortunate. The ability of members of the public to obtain judicial review of allegedly unlawful agency action is a key element in citizen participation in the regulatory process. It is also, in our opinion, an essential ingredient of a well-functioning democratic process. It is our view that persons with a legitimate and genuine interest in a particular matter should have the opportunity to challenge allegedly illegal or unconstitutional government action in the federal courts. For those wrongs, there should be a judicial remedy available to the public.

The bill we propose today incorporates these vital considerations. The legislation recognizes that citizen access to the Federal courts to redress unlawful governmental action is essential to the democratic process. The bill acknowledges that limited judicial resources are better used to reach prompt resolution of lawsuits on their merits than in the interpretation of technical "standing" issues. The "Citizens' Right to Standing in Federal Courts Act" emphasizes that Congress intends for the Federal courts to settle disputes that have long-term and significant impact on American Consumers.

I ask unanimous consent that the Department of Justice memorandum, the letter from Assistant Attorney General Wald, and the "Citizens' Right to Standing in Federal Courts Act" be printed in the RECORD together with the text of the bill.

There being no objection, the bill and material were ordered to be printed in the RECORD, as follows:

S. 3005

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Citizens' Right to Standing in Federal Courts Act".

FINDINGS AND POLICY

SEC. 2. The Congress finds and declares that—

a. the ability of members of the public to have access to the federal courts to obtain redress for unlawful governmental action is essential to the democratic process, both to enable members of the public to protect their own interests and to allow redress of injuries that affect many members of the public in relatively equal measure;

b. substantial uncertainty surrounds the specific requisites for standing to sue in the federal courts, forcing both the courts and individual litigants to devote inordinate amounts of their resources to this issue;

c. unduly restrictive standing requirements have prevented the prompt resolution of meritorious lawsuits, and have resulted in the dismissal of complaints alleging serious violations of the Constitution and laws of the United States without consideration of their merits, even where plaintiffs have shown injuries sufficient to enable adequate presentation of relevant issues in a concerte and adversary context;

d. it is a more efficient and productive use of limited judicial resources to reach prompt resolution of meritorious lawsuits alleging violations of the Constitution and laws of the United States by officers and agencies of government rather than utilizing those resources for the interpretation of unduly restrictive or complex nonconstitutional standing requirements.

Section 3. Part VI of Title 28, United States Code, is amended by adding, in the appropriate place, the following new sections: "3000. *Standing to Challenge Unlawful Governmental Action.*

"1. A court of the United States shall not dismiss an action brought against the United States or any officer or agency thereof or against any State or local government entity or officer or agency thereof or against the District of Columbia or any officer or agency thereof based in whole or in part upon an act or omission alleged to be in violation of the laws or Constitution of the United States,

on the ground that the plaintiff lacks standing to sue because—

"a. the injury which plaintiff alleges to have suffered as a result of the defendant's conduct is shared by all or a large class of persons; or

"b. the defendant's conduct which forms the basis for the complaint is not or may not be the primary cause of the injury complained of; or

"c. the injury which plaintiff alleges to have suffered as a result of the defendant's conduct is not substantially likely to be remedied or prevented by a determination on the merits in the plaintiff's favor, if such determination may contribute in significant part to remedying or preventing such injury.

"2. This section shall not affect the standing or lack of standing of persons to sue as taxpayers and shall not affect the standing or lack of standing of persons to challenge agency action which affects the liability or status of another person under the revenue laws."

"3001. Challenges to Standing.

"a. unless a plaintiff's lack of standing to sue is raised by a defendant or the court on its own motion prior to entry of judgment in the court of first impression, it may not be raised on appeal or otherwise except as required by Article III of the Constitution.

"b. This section shall apply to all civil actions brought in or removed to courts of the United States."

DEPARTMENT OF JUSTICE,
Washington, D.C.

Hon. HOWARD M. METZENBAUM,
Chairman, Committee on the Judiciary, Subcommittee on Citizens Shareholders Rights and Remedies, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: I am enclosing for your consideration a memorandum, prepared by Department of Justice Staff attorneys in the Office for Improvements in the Administration of Justice and reviewed by the Office of Legal Counsel, which analyzes the potential effect on several recent court decisions of the draft statute on standing which we have discussed with members of your staff. The memorandum has also been reviewed by the Office of Management and Budget, which has no objection to its transmittal to you.

We have appreciated the opportunity to review in advance your standing proposal. Our reading of the legislation indicates to us that the modifications which this Department has recommended have been adopted. Accordingly, as presently drafted, the proposed statute incorporates principles which we are prepared to support in the form of legislation.

We look forward to working with you on this important project.

Sincerely,

PATRICIA M. WALD,
Assistant Attorney General.

Attachment.

STAFF MEMORANDUM ON THE IMPACT OF STANDING LEGISLATION

The draft "Citizens' Right to Standing in Federal Courts Act" identifies three grounds upon which federal courts should not deny standing to sue in federal civil actions. This memorandum compares the results in seven leading cases recently decided on grounds of standing with the results which could be expected had the "Act" been in effect at the time of judgment.[1] In analyzing each case we have identified and considered the grounds upon which the court expressly relied in denying standing to sue. Where the memorandum finds the draft statute to apply, we conclude that the reason given by the court would be removed by the statute as a basis for denying standing. It does not follow that the case would be litigated on its merits. In several cases, other aspects of the doctrine of standing and justiciability may also be relevant, but are not discussed in this memorandum because they are not treated in the court's opinion.

I. THE ACT

The Act has four major features:

1. It applies to civil actions against governments, their agencies, or their officials;

2. for violations of the laws or Constitution of the United States.

3. It provides that standing cannot be denied in those actions on three grounds:

a. that plaintiff's injury is shared by all or a large class of persons ("generalized grievance" or "abstract injury"); or

b. defendant's conduct may not be the primary cause of plaintiff's injury ("causation"); or

c. judgment on the merits for plaintiff is unlikely or uncertain to cure the plaintiff's injury ("remedy").

4. The draft disclaims any effect on the law of taxpayer standing.

Each of the three forbidden grounds has been, or has seemed to be, a developing trend in standing analysis. The Act would prevent dismissals based on those grounds, but would not further structure the court's analysis of standing issues except as they necessarily depend on arguments within the three disfavored grounds.

The Act also provides that in all federal civil cases (not merely those against governments, etc.), objections to standing must be raised prior to judgment in the federal court of first impression. If not raised, prudential objections to standing are lost. The policy behind this provision is that judgment in the court of first impression itself constitutes an interest sufficient to warrant continuance of the action on its merits, rather than on procedural issues.

II. THE CASES

The seven cases will be discussed individually. In each case, standing was denied to one or more named or unnamed plaintiff. Because the cases are familiar to most persons concerned with standing legislation, each discussion will be limited to identification of the parties, claims, results as decided, and projected results under the Act. Where the claims of one or more plaintiffs were dismissed on non-standing grounds, these grounds will also be identified. Where a result under the Act differs from that reached by the court in the reported decision, a brief statement of the reason for projecting that difference will also be set out.

A. Simon v. E.K.W.R.O.

Five organizations and a number of individuals brought suit against the Secretary of the Treasury and the Commissioner of Internal Revenue. Plaintiffs, seeking to represent the interests of low-income persons and welfare recipients in receiving cost-free hospital services, claimed that the Secretary's adoption of a revised revenue regulation violated both the Internal Revenue Code and the Administrative Procedure Act. The regulation arguably reduced the level of charitable (cost-free) services which a hospital might extend and still qualify for tax benefits as a charitable organization under the IRC. Plaintiffs claimed that this reduction, in turn, encouraged hospitals in eastern Kentucky to alter their rules and to reduce the level of services offered the poor.

The Supreme Court held that all plaintiffs lacked standing to raise the issue against the named defendants. Its decision turned on a finding that the injury alleged—deprivation of hospital services—was only speculatively related to the alleged violation by defendants. 426 U.S. at 42–43. It based this conclusion on two grounds: first, that plaintiffs had failed to show the alleged injury was fairly attributable to the challenged action, rather than to other factors. 426 U.S. at 44 (citing *Warth* at 507), note 1 *supra*. Secondly, the Court seemingly measured the degree of injury by looking to the effect of a remedy, 426 U.S. at 43, 45 n. 25. It found that it would be "speculative whether the desired exercise of the court's remedial powers in this suit would result in the availability to respondents of such services." *Id.*, at 43.[2]

Neither ground would be permitted under the draft Act in non-taxpayer cases. The first amounts to a "sole causation" requirement forbidden by proposed section 3000b, while the second "remedial" ground would be prevented by proposed section 3000c. Thus the basis relied on by the majority would be removed under the draft statute. However, a further ground of denial (that plaintiffs sought to challenge the tax liability of a third party) which was not expressly relied on in the Court's opinion might form another ground for denying standing. *See, e.g.*, the concurring opinion of Justice Stewart at 426 U.S. at 46. The draft statute does not affect the present law of standing to challenge agency action which affects the tax liability of third parties.

B. Warth v. Seldin

Warth is a case complicated by a variety of plaintiffs and claims. Plaintiffs sought to prevent enforcement of a zoning ordinance of the town of Penfield, New York. They claimed that the ordinance had the purpose and effect of excluding low-and-moderate-income persons from living in Penfield, because it discouraged or prevented construction of inexpensive housing in the town. There are five groups of plaintiffs. Group 1 consisted of Metro-Act on behalf of its members. Metro-Act was a non-profit corporation with social concerns in the housing field. Group 2 contained several individual taxpayers and residents of Rochester, a nearby city, who argued that Penfield's exclusionary policy resulted in higher Rochester taxes to support low-income housing for persons who might otherwise live in Penfield. Group 3, a subdivision of both Groups 2 and 4, was one Ortiz, a low-income or minority-group taxpayer of Rochester. Group 4 represented low-income or minority-group Rochester residents. Group 5 included Home Builders, an association of construction firms which sought to intervene on the grounds that Penfield prevented them from building low-income projects, and Housing Council, an interest group which sought to join plaintiffs. One member of Housing Council had evidently sought a permit to build low-to-moderate-income housing in Penfield, but the request was no longer active.

The Supreme Court found that all members of Groups 1 through 4, and Home Builders, were without standing to challenge enforcement of the Penfield ordinance. As to Housing Council, the Court found that—because the request of its member was no

---

[1] The cases are: *Simon* v. *Eastern Kentucky Welfare Rights Organizations*, 426 U.S. 26 (1976); *Warth* v. *Seldin*, 422 U.S. 490 (1975); *Schlesinger* v. *Reservists Committee to Stop the War*, 418 U.S. 208 (1974); *United States* v. *Richardson*, 418 U.S. 166 (1974); *Linda R.S.* v. *Richard D.*, 410 U.S. 614 (1973); *Public Citizen, Inc.* v. *Simon*, 539 F.2d 211 (D.C. Cir. 1976); and *Scodari* v. *Alexander*, 69 F.R.D. 652 (E.D.N.Y., 1976).

[2] The detailed "injury" analysis of *E.K.W.R.O.* and *Schlesinger*, part C *infra*, is required only in the absence of a recognized statutory or constitutional injury. Where plaintiff can point to an identifiable statutory protection not drawn from the APA itself, that injury need not be subject to the remedial analysis. *See, e.g., United States* v. *SCRAP*, 412 U.S. 699 (1973); *Trafficante* v. *Metropolitan Life Ins. Co.*, 409 U.S. 205 (1972).

longer active and had not been formally denied—there was no concrete, live, dispute. The Court's decision as to Housing Council, then, was in effect a finding that the controversy was moot. 422 U.S. 490, 517.

Members of Group 3 and Group 4 (low-income/minority resident/taxpayers of Rochester) were denied standing on the grounds that they had alleged no injury. 422 U.S. at 503. The Court measured the absence of injury by noting that plaintiff had failed to allege that the relief requested would be effective in removing the harm alleged—inability to find housing in Penfield. 422 U.S. at 504–508.

Members of Group 2 (Rochester residents/taxpayers) were denied standing on the ground that they sought to represent the rights of third parties, a traditional prudential ground for denial. 422 U.S. at 509–510. Merto-Act was denied standing both on this third-party rule and on the ground that no injury had been alleged to its members. 422 U.S. at 512, 514. Home Builders was denied the right to proceed on both its claim for damages and for prospective relief, for different reasons. The Court reasoned that there was no certainty that an award of the monetary damages claimed would effectively remedy the underlying claims of the Association's members. Based on this "remedial" analysis, it denied standing to the Association to represent its members' monetary interests. On the claim for prospective relief, enjoining enforcement of the ordinance, the Court noted that Home Builders' members had no specific, identified project which would be prevented by enforcement. Evidently, then, the case was "unripe" because of the absence of a controversy. 422 U.S. at 516. (The Court does not cast the analysis in ripeness terms, however.)

Under the draft Act, Groups 3 and 4 (low-income/minority residents/taxpayers of Rochester) could not be denied standing on the grounds set out in the Court's decision. The Court found that plaintiffs had alleged no recognized injury which was fairly traceable to defendants. In so doing, the Court measured the absence of injury by analyzing the effect of a remedy in plaintiff's favor, if granted, using the test which would be forbidden by draft section 3000c. Similarly, the result on Home Builders' monetary claim rests on the same "remedial" analysis, and could not be supported under the Act.

C. Schlesinger v. Reservists Committee to Stop the War

Schlesinger involves both taxpayer and citizen claims to standing. The taxpayer claims were denied, and this result would not be affected by the draft Act. On the citizen claims, an Association of Reservists and five individual members brought a class action on behalf of all U.S. citizens for a declaratory judgment that membership in the Reserves by Members of Congress violates Article I, section 6, cl. 2 of the Constitution, the "incompatibility of officers" clause. They claimed that this violation injured them as citizens by imposing inconsistent duties on those persons holding dual office, thus depriving citizens and members of the Reserves of the objective service due from both Congress and Reserve officers.[3]

The Court characterized this claim as an "abstract injury", a kind of generalized grievance which was shared with all other citizens:

"... standing to sue may not be predicated on an interest of the kind alleged here which is held in common by all members of the public, because of the necessarily abstract nature of the injury all citizens share." 418 U.S. at 220.

It required greater specificity of injury and pleading, and a "particular" rather than general, widespread, or abstract injury. *Id* at 221–223.

This result depends on the Court's decision to deny standing based on an injury which is widely shared in relatively equal measure by all or most members of the public. The arguments made in favor of that decision relate to the Court's need for concrete factual settings in which to decide difficult constitutional issues, and a desire to avoid "unnecessary constitutional adjudication", 418 U.S. 221–223, and are not rooted in the constitutional requirement that a case present an actual "case or controversy." (*But see* Justice Stewart's concurrence at 418 U.S. 228–229, expressing the view that the "generalized grievance" rule is a constitutional element of standing analysis.) As a result, the reasons given by the Court would be removed as a basis for judgment if decided under the draft Act, section 3000a. That section is expressly intended to evidence a Congressional finding that widespread public injuries do not lose their public importance, and that a violation of law or the Constitution is not converted from injury into unreviewable reality because it injures all citizens equally.

D. United States v. Richardson

An individual taxpayer brought suit for a declaratory judgment of the unconstitutionality of the Central Intelligence Agency Act, claiming that those portions of the Act which authorize the Agency to account for expenditures solely on the certificate of the Director violate portions of the Constitution requiring an annual statement and account of public monies. Because plaintiff rested his claim solely on his asserted status as a taxpayer, the Court's finding that he lacked standing to assert a generalized grievance would not be affected by the draft Act. Had the claim been rested on other, non-"taxpayer" grounds of standing, the result would be otherwise. Draft section 3000a.

E. Linda R. S. v. Richard D.

Linda, an unwed mother, had been unsuccessful in urging the child's alleged father to provide financial support. Both resided in Texas, which then had in force a statute making it a criminal violation for a "parent" to refuse support to or to abandon a child. Texas courts had consistently interpreted this statute to apply only to married parents, and to impose no duty on unmarried ones. Linda brought a class action in federal court seeking to enjoin the local district attorney from allegedly discriminatory application of the Texas statute when the D.A. refused to prosecute the alleged father, basing his decision on the judicial interpretation of the Texas statute. The Supreme Court found that Linda lacked standing to sue the D.A. on those grounds, because it saw no relationship between the alleged injury (lack of support for the child) and the alleged discriminatory government action (failure to bring a criminal prosecution against the child's father). 410 U.S. at 618. It reached this conclusion by analyzing the effectiveness of granting the remedy requested: a jail term for the child's father would not necessarily result in payment of child support. *Id*. Therefore, the Court found that Linda had failed to show the father's failure to support was a consequence of the D.A.'s refusal to prosecute him for violation of the Texas statute.

The result would be reversed under the draft Act. The Court's decision rests on a finding that the injury alleged was not substantially likely to be remedied or prevented by a determination on the merits in Linda's favor.[4] This basis for denying standing would be forbidden by draft section 3000c. Consequently, Linda would not be denied standing to sue the D.A. for non-enforcement, on these grounds.

F. Public Citizen, Inc. v. Simon

Plaintiff organization, a body of taxpayers, and an individual named plaintiff brought suit against the Secretary of the Treasury claiming that the Secretary had approved payment of federal salaries to purely political campaign workers on the President's campaign staff during an election for that office, in asserted violation of Article I, section 9, cl. 7 of the Constitution (the appropriations clause), and 31 U.S.C. 628 (1970) (an implementing statute). Plaintiffs rested their standing solely on their status as taxpayers, attempting to extend the test of taxpayer status in *Flast* v. *Cohen*. Because the draft Act does not alter the rules of standing for federal taxpayers, the D.C. Circuit's denial of standing would not be altered by the Act.

G. Scodari v. Alexander

Several revenue agents of the Internal Revenue Service (IRS), and one unnamed informant, sought to enjoin the Commissioner of Internal Revenue from enforcing a new IRS policy requiring agents to identify their confidential informants to internal auditors. The audit was intended to verify the legality of payments to the informants and the propriety of the informants' services in return. The agents claimed standing based on asserted injury to their physical, professional, and mental well-being resulting from the claimed discouraging effect which the new policy would have on their relationship with established informants. The court found that agents had asserted no recognized justifiable injury, only a subjective concern about government action. 69 F.R.D. 652, 657. It is unclear whether this analysis rests on the "generalized grievance" rule which is forbidden by draft section 3000a, but the question would be open if the draft Act were in effect. The court, however, also denied standing to assert the rights of third parties (absent informants), and held that the agents were not within the zone of interests of the regulation in question. *Id*. at 660–661. The draft Act does not remove a court's authority to refuse to find standing based on such "third-party" or "zone-of-interest" rules, and these results would not be altered by adoption of the Act.

The court also refused to allow the unnamed informant to proceed, pointing out that his action—assertedly based on a contract assuring confidentiality for his identity—should have been brought in the Court of Claims. *Id*. at 662. This result, however cast, is not a standing decision, but a jurisdictional one based on statute.

III. Summary

The projected results of decision in these seven cases are mixed. In three cases (*Warth, Schlesinger, Linda R.S.*), it appears that all or part of the particular grounds of decision relied upon in the Court's opinions could not be supported following adoption of the draft Act. While standing would not be assured in these cases under the Act (other grounds for denial might still be put for-

[3] Only one Member of Congress, Senator Tower of Texas, held a noncommissioned post in the Reserves. Several other Members held commissioned rank in various State militias, organized as the National Guard. Officers in the National Guard are not officers of the United States unless and until called to active duty in the federal service. *See* 418 U.S. at 207 n.2.

[4] The Court assumed, evidently, that the only result of a decision to prosecute would be incarceration. Child-support prosecutions are often brought for the express purpose of forcing errant parents to choose between jail aand support (which vitiates the prosecution).

ward), the ground rules for denial would be substantially altered.

In three other cases (*Richardson, Public Citizen, Scodari*), it appears that the court's decision would not be affected. However, the result would have been altered in two of these cases as well, but for that portion of draft section 3000 which disclaims any effect on the rules of taxpayer standing. In one other case (*E.K.W.R.O.*), the Act would prevent reliance on the particular grounds of decision which form the basis for the Court's opinion, but it appears that—because the plaintiffs avowedly sought to challenge the tax liability of third parties not named as defendants—the Court would continue to hold that plaintiffs lack standing to sue in federal court.

Mr. METZENBAUM. Mr. President, I ask unanimous consent that the measure that I am introducing, be jointly referred to the Committee on the Judiciary and the Committee on Governmental Affairs. The matter has been cleared with the respective minority members of both committees.

The PRESIDING OFFICER. Is there objection?

Mr. STEVENS. Mr. President, reserving the right to object, I understand that that statement is correct, that the ranking Republican members of both committees have been consulted. I do not object.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Ohio? Without objection, the bill will be received and jointly referred.

● Mr. KENNEDY. Mr. President, the legislation which Senator METZENBAUM, Senator RIBICOFF, and myself are today proposing addresses one of the most fundamental issues facing the courts of this Nation: The right of citizens to take legal action challenging unlawful activities of their Government.

The bill constitutes a growing recognition on the part of many Members of Congress and of the administration itself that Federal courts—led by the Supreme Court—have been erecting unwarranted judicial barriers to the initiation of important and meritorious lawsuits. These barriers often lack constitutional or statutory foundation, and operate to deny citizens access to the Federal courts for the vindication of their rights.

It has been a fundamental tenet of American jurisprudence since the creation of this Republic that there should be no important right without a corresponding remedy. Legal rights—whether conferred by the Constitution, by statute, or by judicial interpretation—are meaningless without some means of judicial enforcement. Yet, the recent resurgence of standing as a barrier to the maintenance of important litigation has created precisely this anomalous situation: There are indeed rights which the court have effectively said there can be no remedy.

The nonconstitutional aspects of the doctrine of standing—the so-called "prudential" limitations—reflect, we are told, principles of sound management of scarce judicial resources. There are cases which the courts have said they should not hear—cases in which the parties are not sufficiently adverse, or which lack the requisite concreteness necessary for the framing of effective remedies. These are often legitimate considerations; courts should not squander their time on issues which cannot be resolved in a judicial framework.

Yet there is a serious question in my mind whether such issues can or should be resolved under the rubric of standing. Standing is a threshold consideration: Is the plaintiff an appropriate person to maintain the lawsuit? The "prudential" considerations which the courts have been attempting to subsume under the doctrine of standing—whether the causation of the injury complained of is too attenuated, whether the grievance is too "generalized," whether an appropriate remedy can be fashioned, whether the plaintiff is asserting the rights of third parties, whether the plaintiff's injury is in the "zone of interests" sought to be protected by a particular statute, and others yet to be devised—cannot often be determined at the outset of litigation. Indeed, there is the more fundamental question whether the Federal courts ought to be refusing to hear otherwise meritorious claims on these grounds at all.

The need for remedial standing legislation has long been apparent. The courts today appear to be hopelessly divided and confused as to the precise contours of the doctrine of standing, with the result that judges and litigants are forced to devote inordinate time and resources to settling technical issues which ought not be that difficult to resolve. As a former chairman of the Judiciary Committee's Subcommittee on Administrative Practice and Procedure, and the sponsor during the 94th Congress of legislation to clarify the law of standing to bring legal actions seeking judicial review of agency decisions, I am well aware of how complicated the law of standing has become. Indeed, this conclusion has been cogently documented by a recent study unanimously endorsed by the Senate Government Affairs Committee, under the leadership of Senators RIBICOFF and PERCY. The time has come for Congress to restore the doctrine of standing to the fundamental constitutional purposes for which it was intended.

I believe, Mr. President, that the legislation we are proposing establishes a solid framework for consideration of this issue by the Congress. The product of extensive discussions between its Senate sponsors and the Attorney General, it represents an important step in resolving some of the difficult policy questions involved in the standing question. I want especially to commend Patricia Wald, Assistant Attorney General for Legislative Affairs, for the leadership she has provided in facilitating consideration of this issue by the Department of Justice and by other executive and administrative agencies. She has made many invaluable contributions to the formulation of an effective standing bill.

While I am in full accord with the principles embodied in the Citizens' Right to Standing in Federal Courts Act, I would urge that the committee consider the issue of standing in its broadest context. In my judgment, standing should be grounded solely in article 3 of the Constitution, and not in nebulous concepts of judicial expedience. I therefore believe that Congress should act to eliminate all prudential standing tests and to restore the doctrine of standing to its limited constitutional dimension.●

● Mr. RIBICOFF. Mr. President, I am pleased to join with my distinguished colleagues, Senators METZENBAUM and KENNEDY, in introducing the Citizens' Right to Standing in Federal Courts Act.

The principal purpose of this bill is to enhance the ability of citizens to obtain judicial review of allegedly unconstitutional or unlawful government action. The bill does this by eliminating certain technical and nonconstitutional restrictions on the judicial standing. As my colleague, Senator METZENBAUM, has pointed out, Congress has undisputed authority to take this action.

Specifically, the bill provides that standing may not be denied in lawsuits alleging unlawful government action on these three grounds:

That plaintiffs injury is shared by all or a large class of persons; or

Defendants' conduct may not be the primary cause of plaintiff's injury; or

Judgment on the merits for plaintiff is unlikely or uncertain to cure the plaintiff's injury.

It should be noted that this bill has no effect on the constitutional requirement for judicial standing, nor does it alter the present restrictions on taxpayer standing.

This legislation results from a joint effort between the Department of Justice and the sponsors of the bill. The bill, in draft form, was the subject of careful review and revision within the Department of Justice. We have incorporated all of the suggested changes proposed by the Department. The Justice Department has indicated its support of the measure in principle. In April 1977, the President recognized the need for this kind of legislation in his consumer message. At that time, President Carter declared:

> I support legislation which will give citizens broader standing to initiate suits against the government, in appropriate cases. . . . Recent court decisions have greatly restricted their ability to do so.

The same conclusions were reached in the Governmental Affairs Committee's "Study of Federal Regulation." Volume III of our study, which was conducted pursuant to Senate Resolution 71 and published in July 1977, contains a detailed discussion of the law of judicial standing. As a principal finding, the committee study concluded:

> The Supreme Court in recent years has taken an increasingly restrictive view of the standing requirements that make it difficult for citizens to obtain a judicial review of allegedly unlawful government action. At present, some of the Supreme Court's decisions in this area constitute a considerable barrier to citizen participation in the regulatory process.

Recommendation No. 1 of Volume III stated that, "Congress should ease the requirements of standing in order to provide greater public access to the Federal courts for review of regulatory

agency decisions." More specifically, the committee study proposed that Congress should "expressly declare in the statute that standing to sue should not be denied on the basis of nonconstitutional or prudential standing requirements established by the judiciary." Effective citizen participation in the regulatory process, in my opinion, requires formal access to the courts.

The measure we introduce today reflects those recommendations. Thus, it is a further step toward implementation of the recommendations of our study on Federal regulation.

Judicial standing to sue in court is essentially a permission to bring the action. Standing does not concern the merits of the issues to be raised. Rather, it focuses on the persons who wish to have those matters decided by the court. It is a threshold question; namely: Is the plaintiff in a lawsuit entitled to initiate that action against a named defendant?

At present, the law of judicial standing is not as clear as it ought to be. Judicial stand, as the late Mr. Chief Justice Warren observed, is one of the "most amorphous [concepts] in the entire domain of public law." I view the bill we introduce today as a starting point for a full and informed public discussion of the important issues of judicial standing. It is my intention that, in the course of hearings on this measure, significant issues and concerns will be fully developed and addressed. With that in mind, I am pleased to join my colleagues in introducing this bill.●

By Mr. DOLE:

S. 3007. A bill to disregard, for purpose of certain taxes imposed by the Internal Revenue Code of 1954 with respect to employees, certain changes since 1975 in the treatment of individuals as employers; to the Committee on Finance.

● Mr. DOLE. Mr. President, the classification of persons as employees or independent contractors for Federal tax purposes has for many years been determined by the common law. Because of an increase in Internal Revenue Service attacks on these long established rules, the Tax Reform Act of 1976 directed that a study on the subject should be conducted by the staff of the Joint Committee on Taxation. However, since that time Internal Revenue Service has been changing—by fiat—the status of the law.

LEGISLATIVE MORATORIUM

Mr. President, I am introducing legislation today which would direct the Internal Revenue Service not to apply any change position or duly stated position which is inconsistent with a general audit position in effect prior to January 1, 1976, or which is inconsistent with the regulation or ruling in effect on December 31, 1975. Mr. President, the Internal Revenue Service frequently determines that persons have been misclassified as self-employed and should, instead, be considered employees. Such determination by the Internal Revenue Service are generally retroactive. This determination can be devastating upon a small or a large businessman. Employers can be retroactively assessed employment tax for 3 current tax years. Double taxation can occur when the employer and employee pay income and social security tax on the same income. Self-employment retirement plans established by individual taxpayers can be declared invalid with all prior tax contributions and income earned becoming taxable for the current year. Steps are being taken by Congress to provide a prospective solution to the problem of establishing a clear definition of an independent contractor. Earlier this year the General Accounting Office submitted a report to Congress on this subject. The joint committee has requested comments on the GAO report and the subject in general from the public and from the Department of Treasury. The Senator from Kansas hopes that a staff recommendation may be prepared on the subject based on these comments.

CONGRESSIONAL SOLUTION

I believe that this issue should be settled in a prospective way. However, because this issue is so complicated and there are so many factors to consider it is unlikely that there will be a quick congressional solution to this problem. There is a need for legislative action that will reaffirm the ability of Congress—not the Internal Revenue Service—to decide this issue.

Mr. President, I ask unanimous consent that the text of my bill be printed in the RECORD at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3007

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. Until enactment of any law amending the definition of an employee for purposes of any section of the Internal Revenue Code of 1954, in determining whether an individual is an employee for purposes of sections 3121, 3306, and 3401 of the Internal Revenue Code of 1954, the Internal Revenue Service shall not apply any changed position or any newly stated position which is inconsistent with a general audit position in effect prior to January 1, 1976, or which is inconsistent with a regulation or ruling in effect on December 31, 1975.●

By Mr. GARN (for himself, Mr. HATCH, Mr. DECONCINI, Mr. MCCLURE, Mr. DOMENICI, Mr. LAXALT, Mr. HANSEN, Mr. WALLOP, and Mr. SCHMITT):

S. 3008. A bill entitled the "Uranium Mill Site Restoration Act of 1978"; to the Committee on Energy and Natural Resources.

● Mr. GARN. Mr. President, I am today introducing legislation to take care of a serious problem with potential public health implications.

Some years ago, a number of private companies milled uranium under contract with the Federal Government. Since the only legal consumer of uranium was the Atomic Energy Commission, these companies complied with the regulations established by that agency, and in fact their entire operation was directed by the Government.

These companies have now completed their contracts, in some cases have gone out of business, leaving behind a serious problem in the form of uranium mill tailings, which emit a low-level radiation. There has been no finding that these orphan piles pose an acute threat to public health, but the fact is we do not know what the effects might be over a period of time. It is characteristic of radiation damage that it is not always apparent at the time of occurrence.

The Energy Research and Development Administration carried out a comprehensive study of the problem, and originally identified 21 orphan sites. There are certainly more, but I would like to list those that are known right now, by State:

Arizona: Monument Valley and Tuba City;
Colorado: Durango, Maybelle, Naturita, Rifle, Slick Rock, and Grand Junction;
Idaho: Lowan;
New Mexico: Ambrosia Lake and Shiprock;
Oregon: Lakeview;
Pennsylvania: Cannonsburg;
Texas: Falls City and Ray Pointe;
Utah: Salt Lake City (Vitro), Mexican Hat, and Green River; and
Wyoming: Riverton and Spook.

Since completing its study, ERDA (and now the Department of Energy) has promised comprehensive remedial legislation, but has so far not been able to get an acceptable draft to the Congress. In my opinion, Mr. President, there is no point in waiting longer. The problem is pressing, and can only get worse. Two of the sites are in urban areas, and emit radon gas, among the most dangerous of radioactive byproducts. In addition to the helath problem, the presence of the tailings piles depresses property values, contributes to urban decay, and unsettles the community. There is also a very real danger that dirt from the sites will be taken for use as landfill. Indeed, that has already happened; in some cases the dirt has been used as fill around schools.

Since the presence of these piles is largely the responsibility of the Federal agencies under whom the work was carried out, it is my opinion that the primary responsibility for removal should be that of Washington, and my legislation would so provide. In brief, my bill divides the task of removal into direct and indirect costs. Indirect costs include such things as purchase of the sites where necessary, personnel and administrative costs, and the rehabilitation of the sites following removal of the tailings. Direct costs include the actual removal and disposal of the tailings. Under the bill, 100 percent of direct costs would be paid by the Department of Energy; 75 percent of the indirect costs would also be paid by DOE, and the States would pick up the remaining 25 percent of the indirect expenses.

This formula is consistent with the action already taken at Grand Junction, Colo. The site there has been stabilized, and the material which had been taken away from the primary site has been returned to it. The costs for the action would have been called indirect costs shared by the State and Washington on a 25- to 75-percent basis, as was in fact

done at Grand Junction. However, the primary site itself may yet have to be dealt with, and those "direct costs" would be borne 100 percent by the Federal Government.

Under this legislation, a State where an orphan pile is located would have 3 years to apply to the Secretary of Energy for the funds to carry out the cleanup under a plan devised by the State. Regulations for the protection of public health and safety would be the responsibility of the Nuclear Regulatory Commission, and would have to be issued within 120 days. If a State does not want to accept the responsibility for devising a plan, the Secretary of Energy can be invited to take action immediately. At any rate, he would be empowered to act if a State does not act within 3 years.

The bill provides safeguards against windfall profits for private or public landowners, and provides for separate treatment of land owned by Indian tribes. Briefly, the Secretary of Energy would deal directly with the tribe, and would pay 100 percent of all costs.

Finally, Mr. President, my bill provides for a pilot study of the long-term effects on population and structures of low-level radiation such as is emitted by sources like tailings piles. Since the Salt Lake City site is the largest in an urban area, the study would be carried out on the Vitro pile. The cost of this study is expected to be minimal.

Mr. President, nuclear wastes remain the most critical element of nuclear energy. I am not implying that these orphan piles are the equivalent of spent fuel rods or military wastes at Hannaford. They are not, but it is especially important that the Federal Government deal promptly with minor problems like these if it is to build the credibility needed to develop trust in its ability to handle higher level wastes. I hope my legislation will receive early and positive action.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3008

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as "Uranium Mill Site Restoration Act of 1978."

SEC. 2. (a) The Secretary may make grants to the States of Arizona, Colorado, Idaho, New Mexico, Oregon, Pennsylvania, Texas, Utah, Wyoming, and any other State determined to be in a similar situation to carry out a site restoration plan for abandoned uranium mill sites in those States. Such plan must meet the requirements of Sec. 4 of this Act.

(b)(1) No grant may be made under this section unless an application thereof has been submitted to and approved by the Secretary. The Secretary may not approve an application unless—

(A) the application contains a site restoration plan which meets the requirements of Sec. 4 of this Act;

(B) the application is submitted within three years after the date of the enactment of this Act; and

(C) the application is submitted in such form, and in accordance with such procedures, as the Secretary may require, including compliance with regulations set forth in Sec. 10(a).

SEC. 3. (a) The Secretary shall approve or disapprove any application for a grant under this section within one hundred and twenty days after the submission of such application to the Secretary, and shall notify the applicant in writing of the decision. The Secretary shall provide the applicant with a detailed written statement of the reasons for the rejection of any application.

(b) If the Secretary has rejected an application, the applicant may submit a revised application. The Secretary shall consider such a revised application in accordance with Sec. 2(b)(1) of this Act.

(c) Subject to the availability of funds, the Secretary shall award to any applicant whose application has been approved under this section a grant in an amount equal to the costs of carrying out such applicant's site restoration plan, as estimated in such plan pursuant to Sec. 4(g) of this Act.

Sec. 4. The site restoration plan required under Sec. 2(b)(1) shall—

(a) designate the abandoned uranium mill sites (including sites on Federal property) which the applicant intends to restore;

(b) describe the method by which the applicant shall restore the background radiation level at any site designated under subsection (a) of this section to a level which is no more than twice the background level which existed before milling operations began at such site in order to eliminate any health hazard to residents of the area;

(c) describe the method by which the applicant shall restore off-site uranium mill tailings to the original mill site.

(d) specify the sites which the applicant shall use for the disposal of the uranium mill tailings removed from the abandoned sites designated under subsection (a) of this section;

(e) indicate the manner in which the applicant shall dispose of the tailings so as to prevent any further exposure of individuals to radiation emanating from the tailings; and

(f) describe the manner in which the applicant, during the fifteen-year period following such disposal, shall monitor the radiation levels at the sites specified under subsection (d) of this section; and

(g) contain an estimate of the grant required to carry out the plan.

(1) Such grant shall include:

(A) 100 per centum of the cost of contracting services for engineering, removal and stabilization at selected sites, monitoring of remedial action to determine that radiation levels specified in section 4(b) of this Act have been achieved, and any other direct costs associated with the site restoration; and

(B) An amount not to exceed 75 per centum of the cost of offsite restoration referred to in section 4.

(2) Such grant shall not include:

(A) costs associated with development of the site restoration plan, personnel and other administrative costs in administering the plan, or any other indirect costs associated with the site restoration plan.

(B) Cost of property acquisition referred to in section 5 of this Act.

SEC. 5. (a) The Secretary shall require any State submitting a grant application to acquire the land upon which the tailings and abandoned mill site are located prior to the release of any grant funds to the applicant. However, the State shall not be required to acquire ownership of lands which require remedial action as a result of the incidental, offsite spread of the uranium mill tailings, or where such tailings were used as offsite construction materials.

(b) Within three years after the completion of site restoration the States shall:

(1) sell the site and remit to the Secretary proceeds from the sale in excess of the State's acquisition costs; or

(2) transfer title for the site to the Secretary; or

(3) pay to the Secretary the difference between the State's acquisition cost and the market value at the time of completion of site restoration.

SEC. 6. (a) No grant recipient shall make any change in an approved site restoration plan without the approval of the Secretary, or use a grant awarded under Sec. 3(c) of this Act for any purpose other than carrying out such plan.

(b) If the Secretary determines that any funds awarded to any grant recipient under Sec. 3(c) of this Act have been used for purposes other than those specified in subsection (a) of this section, such grant recipient shall be liable for the repayment of such funds to the Federal Government. The United States may bring a civil action to recover such funds from such grant recipient. The Secretary shall determine whether any additional funds awarded under such subsection shall be paid to such grant recipient.

SEC. 7. (a) The abandoned uranium mill sites referred to in Sec. 2(a) of this Act include, but shall not be limited to, the following areas: Monument Valley, Arizona; Tuba City, Arizona; Durango, Colorado; Grand Junction, Colorado; Maybelle, Colorado; Naturita, Colorado; Rifle, Colorado; Slick Rock, Colorado; Lowman, Idaho; Ambrosia Lake, New Mexico; Shiprock, New Mexico; Lakeview, Oregon; Cannonsburg, Pennsylvania; Falls City, Texas; Ray Pointe, Texas; Green River, Utah; Mexican Hat, Utah; Salt Lake City, Utah; Riverton, Wyoming; Spook, Wyoming.

(b) The Secretary, upon request, shall provide the States specified in Sec. 2(a) of this Act with such technical assistance as the States may require to prepare a site restoration plan satisfactory to the Secretary.

(c) There are authorized to be appropriated no more than $140,000,000 to carry out the purposes of this Act.

(d) Any funds which are made available for obligation in any year to carry out this Act and which have not been obligated during that year shall be available for obligation by the Secretary until September 30, 1982.

SEC. 8. (a) The provision of sections 2 through 7 of this Act shall not apply to the assessment and performance of restoration of abandoned uranium mill sites on lands (1) held in trust by the United States for any Indian, or for any Indian tribe, band, group, pueblo or community (hereinafter referred to as "Indian tribe"), or (2) owned by any Indian tribe subject to a restriction against alienation imposed by the United States. With respect to the uranium mill tailings, the Secretary is hereby authorized and directed to enter into cooperative arrangements with the Secretary of the Interior and with the Indian tribes residing on such lands, under which the Secretary will provide 100 per centum of all direct and indirect costs in developing and implementing the site restoration plan.

(b) The cooperative arrangements referred to in subsection (a) shall include terms providing that:

(1) appropriate site restoration shall be determined by the Secretary, with the concurrence of the Secretary of the Interior, and upon consultation with the Indian tribe, as appropriate and shall be submitted to the Nuclear Regulatory Commission for review and comment;

(2) any site restoration shall be performed by the Department of Energy or its authorized contractor and shall be paid for by the Department of Energy;

(c) unless otherwise determined by the Secretary, the Secretary of the Interior shall have the responsibility for the continued

custody of uranium mill tailings involved in any remedial action effort;

(d) With respect to Indian lands referred to in subsection (a) of this section, the United States shall be released from any radioactive materials related liability claim thereof from the date of enactment of this Act through and including the completion of any remedial action authorized by this Act; however, this provision does not apply to other sections of this Act nor affect the trust responsibilities of the Secretary of the Interior as described in subsection (a) of this section.

SEC. 9. (a)(1) Where a State specifically requests the Secretary to act; or

(2) Where a State fails to act within the three-year application period established by section 2 of this Act, the Secretary shall take such action as may be appropriate to provide for the restoration of any abandoned uranium mill site which is located in a State specified in Section 2(a) of this Act and which is not being restored under a grant awarded under such a section.

(b) The Secretary shall be responsible under subsection (a) of this section for—

(1) restoring background radiation levels at the sites referred to in subsection (a) of this section to a level which is no more than twice background level which existed before milling operations began at such sites in order to eliminate any health hazard to residents of the area;

(2) disposing of the uranium mill tailings removed from the abandoned sites restored under paragraph (1) of this subsection in a manner which prevents any further exposure of individuals to radiation emanating from the tailings; and

(3) monitoring the radiation levels at the sites used to dispose of the uranium mill tailings under paragraph (2) of this subsection.

SEC. 10. (a) The Nuclear Regulatory Commission shall within one hundred and twenty days after enactment of this Act establish regulations and standards to assure that the public safety and health and the environment are not impaired by the remedial action undertaken pursuant to the terms of this Act.

(b) Notwithstanding any other Federal law relating to protection of public safety, health, and environment; other than the National Environmental Policy Act of 1969, as amended, the regulations and standards set forth by the Nuclear Regulatory Commission shall be the sole requirement regulating remedial action under this Act.

SEC. 11. (a) The Secretary shall conduct a pilot study in the city of Salt Lake City, Utah, to—

(1) determine to what extent, if any, radiation from uranium mill tailings at abandoned uranium mill sites contaminates structures located within a ten mile radius of such sites;

(2) determine whether the radiation referred to in paragraph (1) of this subsection poses a health hazard to individuals living or working in the area described in such paragraph, and examine the types of remedial actions which might be undertaken to limit the exposure of individuals to such radiation.

(b) Within one year after the date of the enactment of this Act, the Secretary shall issue a report containing the findings respecting each of the items studied under subsection (a) of this section, together with such recommendations as the Secretary considers appropriate. The Secretary shall submit the report to the President and to appropriate committees of the Congress.

SEC. 12. For purposes of this Act—

(a) the term "applicant" means any State which submits an application under section 2 of this Act;

(b) the term "grant recipient" means any applicant which receives a grant under section 3(c) of this Act;

(c) the term "Secretary" means the Secretary of Energy;

(d) the term "abandoned uranium mill site" means a site on which uranium ore was processed but shall not include a site;

(1) where the site was owned on January 1, 1978 by the United States Government or any agency or department thereof; or

(2) where a license issued by the U.S. Nuclear Regulatory Commission, the Atomic Energy Commission or a State under Section 274 of the Atomic Energy Act of 1954, as amended, was in effect on or was issued after January 1, 1978, and the production of a uranium product derived from ores other than on-site uranium tailings occurred since February 1, 1973, as hereinafter defined;

(e) the term "uranium mill trailings" shall mean the accumulated tailings resulting from processing of ores for extraction of uranium and other valuable constituents, and also other radioactive materials such as residual stock of unprocessed ores or low grade materials, and ground in the vicinity of the mill or processing site which has become contaminated with radionuclides, including radium-226, derived from the site.●

● Mr. HATCH. Mr. President, as has been reported by the media in my home State, the Vitro uranium tailings pile has been studied over and over. The pile is located in the very heart of the Salt Lake Valley. There seems to be no question that over a long period of time the radon gas and other radioactive byproducts of the pile pose a hazard to human life. In spite of the millions of dollars that have been spent in studying the pile, no definitive declaration by any of the research groups has been advanced to tell us just what kind of a hazard the tailings really are. No guidelines from the former Atomic Energy Commission —no rulings by the Environmental Protection Agency—no plan for disposal as promised by the Energy Research and Development Administration.

Over 2 years ago now, a Utah company studied the Vitro uranium tailings pile and handed the then Gov. Calvin L. Rampton, a comprehensive set of alternatives for disposal of this deadly waste. Ford, Bacon, and Davis later was contracted to study and make recommendations on uranium tailings, not only in Utah, but throughout the Nation. It is my understanding that they have completed that study, and it is now in the hands of the Energy Research and Development Administration. ERDA was to have a final report and legislative recommendation to Congress last July. Still there is no report, recommendation, or legislation. I think I can speak for the entire Utah Delegationon when I say we have badgered, cajoled, begged and even threatened ERDA in attempts to get that plan before Congress. Senator GARN and I have run out of patience with the bureaucracy and we will now pursue the problem from a new approach. A bill to restore the Vitro tailings pile along with 21 other sites in eight States where uranium mill tailings pose a potential threat to human life.

For the safety of Salt Lake City's population, Dr. Harry Gibbons, in cooperation with the State Department of Health, has put a moratorium on development for one-quarter of a mile around the pile. That act itself was a courageous thing for him to do considering the value of this property, and were it not for the hazard of the pile itself, the value of the land where the tailings rest would be enormous.

This whole problem has become just another program developed by the Federal Government, in this case through lack of action, to lockup the valuable lands in the State of Utah. The feds have succeeded in closing off the development of the rural sections of Utah which are rich in natural resources. Now through delay the bureaucrats have succeeded in locking up some of the most valuable property in the entire State.

I will continue to push for the release of the ERDA plan of disposal and in the meantime this legislation will be in the hopper so Congress can take some action to remove this mistake from the heart of the Salt Lake Valley.●

By Mr. METZENBAUM:

S. 3009. A bill to prohibit the denial of a professional or occupational license by a State or local Government agency, and employment, or access to employment, by a Federal Government Agency on grounds of conviction of a Federal offense; to the Committee on Governmental Affairs.

EMPLOYMENT, PROFESSIONAL AND OCCUPATIONAL DISABILITIES ACT

● Mr. METZENBAUM. Mr. President, on January 27, 1978, Senator BIDEN introduced an amendment to S. 1437, the bill revising the Criminal Code, which prohibits disqualification from Federal employment solely because of prior criminal convictions. I cosponsored the Biden amendment.

At that time, Senator BIDEN and the supporters of his amendment favored extension of its provisions to include licensing regulations at State and local levels. However, in view of the fact that the Biden amendment was offered on the floor, without previous full consideration in the course of hearings, it was felt preferable to limit his amendment to the Federal level of employment and treat the State and local problem in a separate bill.

That is the bill which we offer for Senate consideration today. It provides for employment protection for former Federal offenders on the State and local levels who were not covered by the Biden amendment to S. 1437.

In recent years, a growing interest in correctional reform has begun to focus on such employment problems of exoffenders, those who have been released after completing sentences for criminal convictions. Studies indicate that the higher the employment rate of exoffenders, the lower the rate of criminal recidivism. If this relationship between jobs and rehabilitation is valid, employment of previously convicted persons should be a fundamental element of the correctional process.

From this perspective, it is dismaying to discover that the unemployment rate of former offenders far exceeds that of

other persons in the labor market. Among the factors which account for this high level of unemployment are poor work experience, little education, little or no skill training, and State licensing laws and municipal ordinances which categorically exclude exoffenders from a broad range of employment opportunities.

The statute books abound with State laws and local ordinances which deny licenses and employment to former offenders exclusively on the basis of earlier convictions. A 1972 study of State licensing laws disclosed that some "1,948 separate statutory provisions * * * affect licensing of persons with an arrest or conviction record." At that time, 46 States had licensing provisions precluding exoffenders from becoming barbers; 47 States had enacted similar restrictions on beauticians, and 24, as cosmetologists. In addition, 10 jurisdictions, including the heavily populated States of California, New Jersey, and Pennsylvania, had enacted licensing laws which restricted the employment of former offenders on premises where liquor is sold for immediate consumption. In those States, exoffenders could not work as manager, cooks, bartenders, waiters or waitresses, checkroom personnel, dishwashers, or maintenance crew in a wide variety of establishments.

Although some States have adopted remedial legislation to alleviate the devastating effects of such provisions, the Federal exoffenders are not aided by such State legislation, as it generally offers relief only to persons convicted within the State jurisdiction. A Federal statute is, therefore, needed which prohibits State and local agencies from denying licenses and employment to Federal exoffenders exclusively on the basis of their previous convictions.

The bill I am proposing today serves this purpose. It provides that a person who has been convicted of a Federal offense cannot be denied a State or local occupational license after serving his sentence unless there is a reasonable relationship between the crime committed and the job for which certification is sought. If there is such a rational justification but three years have passed since the exoffender was returned to society, the State or local agency may deny the license only on a showing of bad character or behavior.

The bill's provisions do not extend to admission to the State bar nor to employment by a State of local law enforcement agency.

It will be noted that the bill includes the provisions regarding Federal employment, already adopted as the amendment to S. 1437, because S. 1437 as passed by the Senate may not likewise be passed by the House.

I believe that this bill, while modest in scope, represents an important step toward providing rehabilitated former offenders with some relief and hope. It is not only within our constitutional powers to preclude State and local governments from arbitrarily denying occupational licenses, but it is right and proper that we do so. This principle is endorsed by the Department of Justice, which assisted in the drafting of this bill.

The constitutional guarantees of due process and equal protection of the laws would appear to require that the States be precluded from inflicting further punishment on a Federal exoffender, who has served his sentence for the prior conviction, by excluding him from employment opportunities in the State of his residence.

Finally, I want to stress that this bill relieves but one of the burdens resulting from a Federal conviction. Other disabilities such as the loss of the right to vote and hold public office are not addressed. However, the impact of lifting State and local licensing restrictions cannot be minimized. While recognizing that some restrictions must be preserved in order to protect society from dangerous persons, I hope that this bill will insure that irrational or unreasonable limits on licensing and employment do not serve to destroy the chances of law-abiding former Federal offenders from fulfilling their potential as free and productive persons.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3009

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Employment, Professional and Occupational Disabilities Act".

RESTRICTION ON EMPLOYMENT, PROFESSIONAL OR OCCUPATIONAL DISABILITIES

SEC. 2. (a) Notwithstanding any other Federal, State, or local law, a State or local government agency may not consider that a person has been convicted of a Federal offense in determining whether to issue or grant the person a professional or occupational license, and a Federal Government agency may not consider such conviction in connection with the person's employment or access to employment unless—

(1) there is a reasonable relationship between the conduct constituting the offense that was the subject of the conviction and the employment, profession, or occupation; and

(2) in any case in which three years have expired since either the date of the person's sentencing or the date of his release from imprisonment, whichever is later, the agency determines that, notwithstanding such three-year period, the nature of the criminal offense, and the behavior and character of such person since such sentencing or release, render the person unsuitable to engage in the employment, profession or occupation.

(b) Whenever a State or local government agency denies a professional or occupational license to a person, or a Federal agency denies employment, or access to employment, based in whole or in substantial part on his conviction for a Federal offense, such agency shall provide the person with a statement of the reasons for the denial.

(c) This section does not apply to:

(1) an applicant for admission to the bar of a Federal or State court, or for employment as a law enforcement officer with a Federal, State, or local government agency;

(2) a candidate for appointment by the President to a Federal office; or

(3) an applicant for any Federal position which requires a security clearance.

ATTORNEY GENERAL REGULATIONS

SEC. 3. The Attorney General shall promulgate regulations to carry out the provisions of this Act.●

By Mr. LUGAR (for himself and Mr. BAYH):

S. 3010. A bill to establish the Highway of Flags National Servicemen's Memorial; to the Committee on Energy and Natural Resources.

● Mr. LUGAR. Mr. President, it is a rare and welcome opportunity when the Congress can pause from the business of spending the taxpayer's money in order to receive a gift to the Nation. Through the generosity of the National Council for the Encouragement of Patriotism, today we have such an opportunity.

Today, along with my colleague from Indiana, Mr. BAYH, I am honored to introduce a bill to accept in the name of the United States the donation of the Highway of Flags Servicemen's Memorial and to establish it as a national monument. A similar bill has been introduced in the House of Representatives by the Honorable ADAM BENJAMIN, JR., who represents the First Congressional District of Indiana, and is cosponsored by 21 other Congressmen.

The Highway of Flags Servicemen's Memorial was built in 1976 and is presently owned by the National Council for the Encouragement of Patriotism. It is located at the intersection of U.S. Highway 41 and Route 6 in Highland, Ind., and is dedicated to our Nation's flag and the servicemen and women who have valiantly defended the flag throughout the world. The building of the monument was funded entirely through private donations, totaling over $52,000. No State or Federal funding was used for the project. The majority of labor to build the structure was provided by the Northwest Indiana Building and Construction Trades Council.

The members of the National Council for the Encouragement of Patriotism are dedicated to instilling a stronger sense of patriotism among all our citizens. Special recognition is appropriate here for the founder of the Council, Mrs. Mary Lou Keiswetter of Munster, Ind., for her personal and untiring work toward the building and maintenance of this memorial.

Throughout 1970 and 1971, the national council worked diligently to have U.S. Highway 41 proclaimed the national "Highway of Flags." Highway 41 traverses the length of our Nation—from Copper Harbor, Mich. to Miami Beach, Fla. By August of 1971, the Governors of every State containing a section of Highway 41—Michigan, Wisconsin, Illinois, Indiana, Kentucky, Tennessee, Georgia, and Florida—had proclaimed their section of Route 41 as the "Highway of Flags." As a lasting monument to the Highway of Flags, the Servicemen's Memorial has been built on U.S. 41 in Lake Counyt, Ind., and remains dedicated to our Nation's flag and her servicemen and women.

The base of the memorial is 12 feet high and 80 feet wide, semicircular, and white in color. On the front of the base

are displayed the official emblems of our Nation's five major armed forces. On the back of the base there is a document case, 7 feet long, holding 28 major documents of our Nation. The document case also displays the eight official proclamations by each participating State's Governor, as well as two 8- by 12-foot American flags which were hand carried by citizens the length of Route 41 and delivered to the memorial on July 3, 1976, as the council's Bicentennial project. The case is made of bulletproof glass and is lighted.

Atop the base are nine flagpoles made of spun aluminum. The center pole is 50 feet high and displays an 8- by 12-foot American flag. On either side of the center pole are four poles, each 40 feet in height, and flying a 5- by 8-foot American flag and a 4- by 6-foot flag from each of the States which have declared Highway 41 as the Highway of Flags. Each flagpole at its base has a plaque with the name of the Governor and the date on which his State's proclamation was made. Attached to the base in the rear is a large bronze plaque which relates the Highway of Flags story. In addition, the names of all donors of $100 or more are inscribed in cast bronze.

In front of the monument are trees of the eight participating States, and a Lost Tree of China in honor of our Nation's 1,300 servicemen who have been declared missing in action. Directly in front and in the center of the memorial is a memorial wreath square which is surrounded by an iron railing and flowers of the season. Wreaths are placed here on all legal holidays.

Let me also take this opportunity to point out that the total annual maintenance cost for the monument has been estimated to be $742 per year. This figure is, of course, incomprehensively low by congressional standards, but I hope the fact that this bill is virtually cost-free will not deter Senators from supporting it and thereby recognizing this patriotic and magnanimous gift.

On behalf of all my colleagues, and all Americans, let me express deep appreciation to the National Council for the Encouragement of Patriotism for their gift to the Nation, honoring our Nation's flag and those gallant men and women who have served the United States.

I respectfully urge my colleagues to join Senator BAYH and myself in cosponsorship of this bill.●

● Mr. BAYH. Mr. President, it is with a sense of pride that I am joining with my colleague from Indiana, Senator LUGAR, to introduce today legislation which will accept in the name of the United States the donation of the Highway of Flags Servicemen's Memorial and designate it as a national monument. On the House side, our able colleague, Congressman ADAM BENJAMIN has introduced a similar measure and it now enjoys the support of 21 other House Members. The memorial is located in Highland, Ind. at the intersection of U.S. Highway 41 and Route 6 and is dedicated to our Nation's flag and the men and women who have courageously defended it around the globe.

At a time when we are accustomed to reading about appropriations of taxpayer's money for public purposes often surrounded in controversy, it is truly refreshing to learn of this remarkable gesture of generosity on the part of the National Council for the Encouragement of Patriotism. The Highway of Flags Servicemen's Memorial was completed in 1976 and funded entirely through private contributions totaling over $52,000. No Government funds—Federal, State or local—were used for the project. The Northwest Indiana Building and Trade Council supplied the necessary labor.

In addition to the cost of $52,000, yearly maintenance of the monument requires only $742, an infinitesimal figure when we realize this year's Federal budget totals over one-half trillion dollars. Again, this cost is borne by the National Council for the Encouragement of Patriotism. I think even the most frugal of our colleagues here in the Senate will be able to support the legislation we are proposing today even though the Department of the Interior through the National Park Service will administer it as a national monument.

However, the real reason for taking this action today is not, that it is a rather inexpensive thing to do. We are offering this legislation because it reflects the indisputable fact that though the United States is passing through troubled times, the commitment and conviction of her people to basic values remain firm. And the Congress ought to recognize and reward the effort made by the citizens comprising the National Council for the Encouragement of Patriotism for their gracious gesture of generosity. A special mention in this connection should be made of Mrs. Mary Lou Keiswetter of Munster for her efforts in building and maintaining of the memorial and getting us where we are today.

The memorial is white in color and semicircular in shape, 12 feet high and 80 feet wide. The emblems of the U.S. Army, Air Force, Coast Guard, Navy, and Marines are displayed and on the back of the base there is a document case, 7 feet long, containing 28 major documents of our Nation.

As my colleagues recall, Highway 41 has been proclaimed the National "Highway of Flags" traversing the length of our Nation from Copper Harbor, Mich., to Miami Beach, Fla. By August of 1971, the Governors of Michigan, Wisconsin, Illinois, Indiana, Kentucky, Tennessee, Georgia, and Florida had issued such proclamations declaring their States portions of U.S. 41 as the "Highway of Flags"

Today, nine flag poles are mounted atop the base of the memorial, eight of which display the banner of the States who have so proclaimed Highway 41. In the center is a pole from which is displayed an 8- by 12-foot American flag. Bronze plaques with inscriptions tell the story of the memorial and contain a roster of those patriotic men and women who contributed substantially to its construction.

In front of the monument are trees of the eight participating States and a Lost Tree of China in honor of our Nation's 1,300 servicemen who have been declared missing in action. Also in the front and center of the memorial is a memorial wreath around which is an iron railing and flowers of the season.

Mr. President, I want to again state the profound sense of pride and privilege I feel in acknowledging the tremendous contribution made by citizens of Indiana and elsewhere which has resulted in a tangible symbol that patriotism is alive and well in the "land of the free and the home of the brave."●

By Mr. STEVENSON:

S. 3011. A bill to authorize the Commodity Credit Corporation to extend intermediate term agricultural credits in support of the export of agricultural commodities and the development of long-term agricultural export markets abroad; to the Committee on Agriculture, Nutrition, and Forestry.

AGRICULTURAL EXPORT CREDIT ACT OF 1978

● Mr. STEVENSON. Mr. President, today I am introducing a bill that will expand agricultural exports by authorizing the Commodity Credit Corporation to extend intermediate term agricultural credits in support of the export of agricultural commodities and the development of long-term agricultural export markets abroad.

I was privileged to appear this morning before the Subcommittee on Foreign Agricultural Policy which is chaired by our distinguished colleague from Florida (Mr. STONE), to explain the purpose of this bill and to urge the Congress to act quickly to enact legislation to expand agricultural exports. I ask unanimous consent that my statement this morning before the Subcommittee on Foreign Agriculture Policy and the text of my bill be printed in the RECORD at this point.

There being no objection, the bill and statement were ordered to be printed in the RECORD, as follows:

S. 3011

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Agricultural Export Credit Act of 1978".

SEC. 2. Section 4 of the Food for Peace Act of 1966 (80 Stat. 1538; 7 U.S.C. 1707a) is amended to read as follows:

"SEC. 4. (a) Commercial sales of agricultural commodities out of private stocks on credit terms of not to exceed three years may be financed by the Commodity Credit Corporation under its export credit sales program.

"(b) Export sales of agricultural commodities, whether from private stocks or stocks owned by the Commodity Credit Corporation, or related services or facilities may be financed by the Commodity Credit Corporation on credit terms in excess of three years, but not more than ten years: *Provided,* However, that for each financing provided under this subsection, the Secretary of Agriculture must determine that there is a reasonable assurance of repayment. The provisions of Public Law 664, Eighty-third Congress, as amended (68 Stat. 832, 46 U.S.C. 1241(b)), shall not apply to sales financed pursuant to this subsection.

"(c) There are hereby authorized to be appropriated such sums as may be necessary to reimburse the Commodity Credit Corpora-

tion annually for its actual costs incurred or to be incurred under programs undertaken under this section.".

STATEMENT BY SENATOR STEVENSON

I am grateful to the distinguished Chairman of this Subcommittee for the opportunity to testify on the need to expand U.S. agricultural exports. I also commend the Chairman for scheduling these hearings. Action to increase farm exports is urgently needed to reduce the alarming dimensions of the farm crisis and the trade deficit.

The U.S. trade imbalance was $27 billion last year, and a staggering $4.5 billion in February. The dollar is depreciating erratically and causing inflation in the U.S. and uncertainty in the money markets which in turn reduces levels of trade and investment in the world. The farm crisis is in some ways unparalled since the Great Depression. Pressures are mounting to protect U.S. industry from foreign competition and decrease U.S. food production. Those directions produce inflation, economic stagnation and global political instability. To decrease food production when much of the world is already hungry and its population is likely to double in the next 25 years would cause more inflation and human distress on a broad scale.

A more promising policy than to decrease imports, is to increase exports. Such a policy would maintain food production, let food prices find their market level, and use subsidies, if necessary, to help sell surpluses abroad. Instead of protecting itself from foreign competition the U.S. would go out to beat the foreign competition. We need increased world trade, free and fair, to continue economic growth and put people to work. We need maximum agricultural production to reward the efficient farmer and feed a starving world. Our authority in the world as well as our economic well-being requires no less.

The importance of exports to our farm economy cannot be overestimated. The U.S. is the world's largest exporter of agricultural products. In dollar value, farm exports over the past four years have ranged between $22 and $24 billion. The U.S. ships about one-sixth of the world's total agricultural products. About 100 million acres, almost one in three of harvested cropland, are devoted to production for export. Foreign markets absorb almost two-thirds of U.S. rice and wheat production, almost one-half of our soybean production, nearly two-fifths of our cattle hides, and about one-fourth of our feed grains.

The importance of farm exports to the economy of my home state of Illinois is even greater than for the nation as a whole. In fiscal year 1977, Illinois was the number one agricultural exporter, exporting agricultural commodities worth $2.5 billion; $1 billion of the total was feed grains, $823 million soybeans, $179 million in soybean meal, and $100 million in soybean oil. In percentage terms, Illinois exports over fifty percent of its soybeans and over one-third of its corn. This is especially significant when one considers that Illinois has been the number one producer of corn in each of the last three years, and is always number one in soybean production.

It would be a mistake, however, to focus on agricultural exports as strictly a regional or Illinois concern. It is a national concern because farm exports produce jobs throughout all levels of our economy and all areas of our country. The USDA estimates that in 1974 each dollar of agricultural exports stimulated an additional 96 cents of output in the national economy. In 1974, an estimated 1.2 million full-time civilian jobs were related to agricultural exports. Of these, slightly more than half were non-farm jobs directly or indirectly related to the assembling, processing, and distribution of agricultural goods for export. About 50,000 of these jobs were in food processing, 300,000 in trade and transportation, 100,000 in other manufacturing sectors, and 200,000 in other services.

Given the crucial significance of agricultural exports to the national economy and to reducing our trade deficit, it is disturbing to note that even though U.S. farm exports will increase this year to a record 110 million tons, the export value of these commodities may be only $22.5 billion—$1.5 billion below the $24 billion of agricultural commodities exported in FY 1977. This level of exports is simply not high enough to absorb the crops that American farmers produce. It will not help the farmers currently caught in a tragic cost-price squeeze.

If we are to create growing export markets for America's farmers, we cannot do so by relying on Mother Nature's willingness to create drought and disaster abroad. Aside from being cynical, such a non-policy abandons planning in favor of the vagaries of climate and weather. We cannot rely on floating exchange rates which have little effect on the competitiveness of our agricultural commodities. We cannot rely on any perceived monopolistic position; Canada, Australia and increasingly the developing nations, most notably Argentina and Brazil, have beaten us to the punch in developing new markets, such as the Peoples Republic of China, and in competing for established customers by offering better credit terms. Finally, we cannot naively rely on a free market, for trade barriers, as in the European community, can erode large markets.

What we can do is take a hard look at U.S. agricultural export policy and remove the roadblocks to increased agricultural exports. The Senate Subcommittee on International Finance, which I chair, is presently conducting a review of overall U.S. export policy and, within this review, we have examined the competitiveness and future prospects of our agricultural exports. Some of the impediments we have identified—such as import barriers within Europe and Japan—cannot be breached by legislation. I would urge this Subcommittee, however, to impress upon Ambassador Strauss the importance of reducing foreign barriers to U.S. agricultural exports, especially meat exports. Much of the present controversy surrounding meat imports might be diluted if, instead of exporting grains to feed hogs and cattle abroad which result in greater meat imports back into the U.S., we exported more meat. This may well require more funds for agricultural research to develop improved means for processing, packaging, transporting and storing meat, as well as agreement on international standards for meat quality.

There are, however, major barriers to U.S. farm exports which we have constructed ourselves, and I am here today to urge this Subcommittee to report legislation that helps dissolve those barriers. The principal roadblocks that have come to the attention of the Subcommittee on International Finance are the absence of intermediate credit terms under the CCC export credit sales program and the special requirements for participation in CCC programs imposed on non-market economy countries under Title IV of the Trade Act of 1974.

Several of the bills that are the subject of today's hearing would permit the CCC to extend intermediate term commercial credits to support farm exports.

My own proposal in this regard, which I will introduce today as a separate bill, would amend the law to permit the Commodity Credit Corporation to extend commercial export credits for up to ten years. In this regard, it is similar to S. 2385, S. 2405, and S. 2968. Presently, the CCC is limited to three-year maturities. Our principal competitors in Canada, Australia and Argentina are not similarly handicapped. This limitation not only serves to put our exports at an unnecessary competitive disadvantage but also prevents U.S. sales of farm exports to countries facing severe bunchings of international debt in the next several years. In hearings on international debt in the Subcommittee on International Finance, and in my meetings earlier this year with officials in Eastern Europe, it has become clear to me that the CCC must have authority to issue intermediate credits if we are to expand markets for our agricultural exports in the developing nations and the non-market economy countries.

Poland and other of our best agricultural customers have reached the limit of their short-term hard currency borrowing ability and will not be able to participate further in the CCC program unless we can offer them intermediate credit terms. They will turn to our competitors who, in the past, have shown a willingness to extend longer-term credits when necessary to make a sale.

In this regard, I offer for your record a letter from USDA's Foreign Agricultural Service which discusses the practices of our competitors in this regard. The ability to offer intermediate credits will put us on an equal par with competitors and will also expand long-term agricultural trade prospects, since under my bill such credits could be used to construct storage and port facilities and accumulate grain reserves.

This will have the benefit of assuring more constant agricultural markets, thus avoiding the sharp downward price pressures that have occurred in recent years.

My proposal differs from S. 2405 and S. 2968 by not limiting intermediate term credits to support only long-term agriculture trade. As I pointed out earlier, the immediate and near-term debt problems facing many of the Eastern European and developing nations make it imperative that we be willing to extend longer repayment terms.

Such terms would not be concessional; they would merely fill a gap in the credit market for agricultural commodities, a gap which the Export-Import Bank currently fills for our other exports by extending longer repayment terms than customarily provided by commercial banks. However, following the pattern of the Export-Import Bank, my proposal provides that, in making any intermediate credit available, the Secretary of Agriculture must determine that there is reasonable assurance of repayment. This will insure the commercial nature of the program.

In addition, my proposal would exempt CCC commercial agricultural shipments financed under the new intermediate credit program from the U.S. flag ocean vessel requirements of the Cargo Preference Act. Short-term CCC credits are not subject to this requirement now, and the mandatory use of high cost U.S. flag ocean vessels would severely limit, if not destroy, the value of the intermediate credit program as a means for expanding U.S. agricultural exports because it would price our commodities out of world markets.

This conclusion was strongly supported by private witnesses at a recent hearing on U.S. agricultural export policy held in Chicago by the Subcommittee on International Finance. Clearly, such special interest legislation, which does not even now benefit those interests, should not be used at the expense of the U.S. farmer, nor should it be used at the expense of the U.S. taxpayer, which would be the result of S. 2405.

The importance of fully opening up the non-market economies to our agricultural exports has been stressed by every farm witness before the Subcommittee on International Finance and I would like to submit for the record several recent analyses of this market potential, including one by the USDA's Foreign Agriculture Service. The Peoples Republic of China is expected to import nearly

10 billion tons of grain from Canada, Australia and Argentina in 1977–78. So far, the United States has been unable to penetrate that market on a regular basis.

The Soviet Union and Eastern Europe are chronic grain deficit areas with ambitious plans to expand livestock and poultry production. The potential for strong soybean, feed grain and wheat markets in these countries is large. But the availability and terms of credit to finance their purchases of agricultural commodities has become increasingly important due to their continuing hard currency balance of trade deficits.

If we don't participate in these markets now, we may never be able to participate as other nations—Canada, Argentina, Australia and developing nations—take our place. And as we fail to develop commercial relations with the Eastern European nations we also leave them dependent on the U.S.S.R.

Yet, we should not throw open the floodgates of commerce with the U.S.S.R. and other non-market countries with nothing more than a hope for trade and its economic benefits. Our economic relations with the Soviet Union and every other country must be subordinated to matters of higher national interest. I thus do not support measures to open up all the non-market countries to CCC credits without qualification.

I have developed a formula which I intend to propose for Eximbank credits in the Banking Committee. This formula may also prove useful to this Subcommittee in its deliberations on CCC credits. It is not a part of the CCC bill I am introducing today, which relates solely to intermediate term credits.

The proposed amendment to the Eximbank Act would supersede the provisions of the Trade Act of 1974 with respect to Eximbank credits for exports to non-market countries other than the Soviet Union, but would not supersede provisions concerning most-favored-nation treatment or CCC credit. The conduct of the Soviet Union in Africa at the moment is not one to warrant apparent trade concessions and certainly not a suggestion that its policy on emigration is acceptable.

We should not, however, let Soviet conduct frustrate better trade relations with other countries that pose no threat to U.S. interests. By doing so, we merely force their continued dependence on the Soviet Union and punish ourselves. Under my proposed amendment to the Eximbank Act, a new procedure would be established for determining the eligibility of countries to receive exports supported by the Eximbank.

Under this procedure, the President would submit to Congress a list of those countries for which he has determined that eligibility to receive Eximbank supported-exports is in the national interest, taking into consideration each country's relationship to the United States and to countries friendly or hostile to the United States, its internal stability and creditworthiness, and its policies and actions with respect to the peaceful settlement of international and internal disputes, human rights, including specifically the right to emigrate, and such other factors as he chooses.

During the 60 days following submission of the list, Congress would have the opportunity to review the list, and could, if necessary, disapprove the list by concurrent resolution of both Houses under expedited procedures. If the list were disapproved, all countries previously eligible would remain eligible until a new list became effective.

The President could propose a revised list at any time, and such revised lists would be subject to the same Congressional review procedure as the initial list. He could remove a country from the list at any time. The eligibility list procedure provided by the amendment would replace provisions in the current statute which require national interest determinations for Communist countries before the Bank can support exports destined for such countries and separate determinations for each such loan over $50 million.

I believe such a formula deserves serious consideration because it preserves Jackson-Vanik with respect to the Soviet Union, where there are many persons who wish to emigrate; it ends the anachronistic Communist/non-Communist formula which is a by-product of the cold-war already supplanted by Congress in the Export Administration Act; and it should produce benefits for the U.S. economy by creating more exports and more jobs.

I urge the Subcommittee to act expeditiously on the bills before it and to give urgent consideration to the promotion of increased farm exports.●

By Mr. PROXMIRE:

S. 3012. A bill for the relief of Nick Masonich; to the Committee on the Judiciary.

NICK MASONICH

Mr. PROXMIRE. Mr. President, I introduce a bill for the relief of Mr. Nick Masonich who lost his sight in 1921 while working for the Government, and it eminently deserves action. I hope from the heart that the Judiciary Committee can report this bill and the Senate can enact it.

By Mr. PROXMIRE:

S. 3013. A bill to authorize the Secretary of Housing and Urban Development to establish an urban park and recreation recovery program, and for other purpose; to the Committee on Banking Housing, and Urban Affairs.

URBAN PARK AND RECREATION RECOVERY ACT OF 1978

Mr. PROXMIRE. Mr. President, I am introducing, at the request of the administration, the Urban Park and Recreation Recovery Act of 1978. This bill would authorize HUD to make grants to local governments for the purpose of expanding and improving urban recreation facilities. This bill is part of the President's recently announced urban program, and is designed to improve the quality of life in the Nation's urban areas.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3013

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SEC. 1. This Act may be cited as the "Urban Park and Recreation Recovery Act of 1978".

FINDINGS AND PURPOSE

SEC. 2. (a) The Congress finds that the quality of life in urban areas is closely related to the availability of fully functional park and recreation systems, including land, facilities and service programs. The Congress further finds that many local governments have recreation systems which are seriously deficient or deteriorated, that inadequate local resources are available to expand or improve them, and that no existing Federal assistance program fully addresses the need for physical rehabilitation of these systems. Improvement of park and recreation systems would have a direct and positive effect on the liveability of the nation's cities, would provide employment opportunities, and would engender a renewed sense of pride among the residents of areas affected by such improvements.

(b) It is accordingly the purpose of this Act to encourage and assist local governments in the development and rehabilitation of park and recreation areas, as a means of beautifying and revitalizing cities and neighborhoods, providing improved facilities for the recreational needs of residents, and increasing employment opportunities, especially for low- and moderate-income residents of areas benefited by this program.

URBAN PARK AND RECREATION RECOVERY PROGRAM

SEC. 3. The Secretary of Housing and Urban Development (hereinafter referred to as the "Secretary") is authorized to establish an Urban Park and Recreation Recovery Program to provide financial assistance for rehabilitation of recreation areas and facilities in the form of challenge grants to local governments. Such assistance shall be in such amounts and subject to such terms and conditions as the Secretary considers appropriate to carry out the purpose of this Act.

DEFINITIONS

SEC. 4. As used in this Act—

(a) "recreation facilities" means indoor or outdoor facilities which are intended to serve, or to be converted to serve, the recreation needs of local residents, including multi-use community centers which have recreation as one of their primary purposes, but excluding major sports arenas, exhibition areas and conference halls used primarily for commercial sports, spectator or display activities.

(b) "recreation areas" means existing parks or building sites dedicated to recreation purposes, including land not previously used for such purposes but suitable for development.

(c) "grants" means capital grants to local governments for the purpose of rebuilding or developing areas, or rebuilding, remodeling or expanding facilities, including improvement or restoration of park landscapes, buildings and support facilities, but excluding routine maintenance and upkeep activities.

(d) "local government" means any city, county, town, township, parish, village, or other general purpose political subdivision of a State or of the Commonwealth of Puerto Rico; Guam, the Virgin Islands, and American Samoa, or a general purpose political subdivision thereof; a combination of such political subdivisions recognized by the Secretary; the District of Columbia; the Trust Territory of the Pacific Islands; and Indian tribes, bands, groups, and nations, including Alaska Indians, Aleuts, and Eskimos, of the United States.

NATURE OF GRANT ASSISTANCE AVAILABLE

SEC. 5. (a) Grants approved under this Act may be in amounts up to the total eligible project costs proposed by a local government. The Secretary may prescribe regulations under which the amount of grant assistance provided under this Act is reduced, or a proportionate share of local funding of project costs is required, based upon such factors as relative need for financial assistance, the nature and scope of a proposed project, and the Secretary's assessment of the effectiveness of a proposed project in fulfilling the purpose of this Act.

(b) Payments may be made only for development or rehabilitation activities which have been approved by the Secretary. Such payments may be made from time to time in keeping with the rate of progress toward the satisfactory completion of a project.

(c) The Secretary may authorize modification of an approved project only when a grantee has adequately demonstrated that such modification is necessary because of cir-

cumstances not foreseeable at the time a project was proposed. No modification involving increased project costs shall be approved if such modification would involve activities which, if included in a local government's original proposal, would have affected the proposal's eligibility or reduced the project's funding priority under regulations adopted by the Secretary.

AUTHORIZATION OF APPROPRIATIONS

SEC. 6. There are authorized to be appropriated for the grants authorized by this Act not to exceed $150 million for each of the fiscal years 1979 through 1983. Any sums appropriated pursuant to this section shall remain available until expended and any amounts authorized but not appropriated may be appropriated for any succeeding fiscal year.

REQUIREMENTS FOR ELIGIBILITY

SEC. 7. (a) The Secretary shall, by regulation, prescribe eligibility requirements for grant assistance under this Act. Such requirement shall include, but not necessarily be limited to, satisfactory demonstration by a local government of:

(1) adequate planning for the development or rehabilitation of specifically identified recreation areas and facilities, including accurate projections of the cost of any proposed project;

(2) capacity and commitment to assure that facilities provided or improved under this Act shall thereafter continue to be adequately maintained, protected, staffed and supervised; and

(3) intention to maintain total local public outlays for park and recreation purposes at levels at least equal to such expenditures in the year preceding that in which grant assistance is sought.

(b) Local governments shall provide such information as the Secretary may require to demonstrate that user fees, if any, charged or intended to be charged for the use of facilities to be developed or rehabilitated under this Act shall not have the effect of denying access to such facilities to low- and moderate-income persons.

FUNDING PRIORITIES

SEC. 8. (a) The Secretary shall, by regulation, establish funding priorities for the processing and approval of eligible grant proposals under this Act which shall include the use of objective data to measure the comparative degree of need among local governments for assistance. The Secretary shall consider such factors as the extent of poverty and the extent of housing overcrowding within a community or neighborhood for which assistance is sought, the comparative degree of physical deterioration of recreation areas and facilities, and the adequacy of existing facilities for the present population of the area to be benefited by a proposal, in terms of the size and number of facilities, the appropriateness of their locations and the quality of services available.

(b) The Secretary shall include in such regulations additional criteria to evaluate the extent to which the local government has demonstrated results in providing equal opportunity in housing for persons of low- and moderate-income and for members of minority groups, and the extent to which a grant proposal—

(1) supports or complements target activities undertaken under the local government's Community Development Program;

(2) demonstrates that it would remove existing disparities in the quality and quantity of facilities accessible to minority and low-income persons and those accessible to non-minority and higher-income persons;

(3) would provide employment opportunities for low- and moderate-income persons residing in the area of the proposed project;

(4) would directly benefit elderly, handicapped or low- and moderate-income persons; or

(5) features participation of neighborhood, non-profit or tenant organizations in project planning, in proposed rehabilitation activity, or in subsequent maintenance, staffing or supervision of recreation areas and facilities.

(c) The Secretary may give funding priority to proposals from local governments which are receiving significant State financial assistance for park and recreational purposes, or to proposals involving development or rehabilitation of recreation areas and facilities owned by neighborhood or local non-profit organizations but available for use of the general public.

STATE LIMITS

SEC. 9. Grants made under this Act for projects in any one State shall not exceed in the aggregate 15 percent of the aggregate amount of funds authorized to be appropriated under secton 6.

CONVERSION OF RECREATION PROPERTY

SEC. 10. No property developed or rehabilitated with assistance under this Act shall, without the approval of the Secretary, be converted to other than public recreation uses. The Secretary shall approve such conversion only upon such conditions as the Secretary deems necessary to assure the substitution of adequate recreation properties and opportunities of reasonably equivalent location and usefulness.

COORDINATION OF PROGRAM

SEC. 11. The Secretary shall coordinate the Urban Bank and Recreation Recovery Program to the fullest extent possible with the Department of the Interior, and with other Federal and State departments and agencies which administer programs affecting urban areas, including but not limited to programs in housing, urban development, natural resources management, employment, transportation, community services and voluntary action.

ENVIRONMENTAL PROTECTION

SEC. 12. In lieu of the environmental protection procedures otherwise applicable under the National Environmental Policy Act of 1969, the Secretary may under regulations provide for procedures identical to those authorized pursuant to section 104(h) of the Housing and Community Development Act of 1974, as amended.

AUDIT REQUIREMENTS

SEC. 13. Each recipient of assistance under this Act shall keep such records as the Secretary shall prescribe, including records which fully disclose the amount and disposition of project undertakings in connection with which assistance under this Act is given or used, and the amount and nature of that portion of the cost of the project or undertaking supplied by other sources, and such other records as will facilitate an effective audit. The Secretary, and the Comptroller General of the United States, or any of their duly authorized representatives, shall have access for the purpose of audit and examination to any books, documents, papers and records of the recipient that are pertinent to assistance received under this Act.

By Mr. GRIFFIN:

S. 3014. A bill to amend titles 18 and 28 of the United States Code to eliminate, and provide an alternative to, the exclusionary rule in Federal criminal proceedings; to the Committee on the Judiciary.

THE EXCLUSIONARY RULE: A LOOPHOLE FOR CRIMINALS

Mr. GRIFFIN. Mr. President, today I am introducing a bill which is long overdue. This bill abolishes and provides an alternative to the fourth amendment exclusionary rule. Simply put, the exclusionary rule provides that evidence obtained through an illegal search and seizure cannot be used against the defendant at his trial.

Over 50 years ago, one of the Nation's greatest jurists, Mr. Justice Cardozo, referred to the doctrine in the following terms:

> The criminal is to go free because the constable has blundered. . . . A room is searched against the law, and the body of a murdered man is found. . . . The privacy of the home has been infringed, and the murderer goes free.[1]

In spite of Mr. Justice Cardozo's displeasure with the illogical and unfair results of the exclusionary rule, the doctrine still persists. Indeed, Supreme Court decisions of the past decade show all too poignantly that the rule is very much alive. Perhaps the most notorious of these cases is Coolidge against New Hampshire [2] where a 14-year-old girl was kidnapped. Her frozen body was found 8 days later with her throat slashed and a bullet in her head. In another case, the defendant broke into the victim's home and raped her in such a savage manner that she required hospitalization.[3] In yet another case, the accused raped his victim twice at gunpoint, tied the woman and her friend to a tree, and shot them, leaving them for dead.[4] In all of these cases, the defendant's conviction was reversed because evidence, although clearly trustworthy and reliable, had been obtained without observing procedural safeguards and was admitted against the accused at his trial.[5]

In light of decisions such as these, Chief Justice Burger in a 1971 Supreme Court decision urged that the exclusionary rule be abolished and replaced with an adequate alternative.[6] I wholeheartedly agree with the Chief Justice. It is time to change the exclusionary rule, and that is precisely what the bill which I am introducing today seeks to do.

In urging repeal of the judicially imposed exclusionary rule, I wish to emphasize that I am by no means denigrating fourth amendment values. In a famous dissent in Olmstead against United States,[7] Mr. Justice Brandeis declared that "the right to be let alone," as guaranteed by the fourth amendment and other provisions of the Bill of Rights, is "the most comprehensive of rights and the right most valued by civilized men." [8]

But though we can all agree on the importance of this guarantee as necessary to preserve our right to be free from unwarranted government intrusion, the remedy devised by the courts to enforce this guarantee—namely the exclusionary rule—is highly questionable. Unfortunately, in actual practice, this arbitrary rule provides no remedy at all.

Only the guilty benefit by this rule. As the highly respected legal authority Prof. Charles Alan Wright has noted, although "real" evidence is found against these criminals, they are released because law enforcement officers blundered.

Footnotes at end of article.

Unlike involuntary confessions and other evidence of that type, the murder weapon, the package of narcotics, and the gambling slips all speak for themselves. In most cases, their reliability and trustworthiness as evidence are beyond dispute.[9] Despite this fact, even though clearly guilty, the defendant is permitted to go free. The result, of course, is that the criminal returns to the community and commits additional crimes.

In the words of the famous legal authority, Dean Wigmore, the exclusionary rules—

> Serve neither to protect the victim nor to punish the offender but rather to compensate the guilty by acquittal and to punish the public by unloosing the criminal in their midst. . . .[10]

Further, the exclusionary rule provides no remedy for innocent citizens who are subjected to unconstitutional searches and seizures. For example, if the police conduct an illegal search of a law-abiding citizen's home and find nothing, the doctrine never comes into play. The rule applies only when the police obtain evidence and want to introduce that evidence at the defendant's trial.

As a result, the law-abiding citizen is left, for all practical purposes, without an adequate forum to redress his grievances[11] while the criminal goes free. Also, the anguish which victims of crime must feel when they see the criminals who victimized them released on the basis of technicalities must not be underestimated. Moreover, such a situation tends to breed contempt and disrepect for our legal system. As Mr. Justice Stewart astutely observed in Furman against Georgia:[12]

> When people begin to believe that organized society is unwilling or unable to impose upon criminal offenders the punishment they "deserve," then there are sown the seeds of anarchy—of self-help, vigilante justice, and lynch law.[13]

In light of the fact that the exclusionary rule seemingly benefits only the guilty, provides no remedy for innocent victims, and affronts the American public's sense of justice, its existence should be continued only for the most compelling reasons. Supporters of this rule contend that it is necessary to deter police misconduct. Without such a doctrine, they argue, police officers would habitually violate the fourth amendment against helpless citizens. Supporters contend that by excluding evidence seized in violation of the fourth amendment police officers are deterred from seizing evidence illegally, and that serves a beneficial social objective.

However appealing this argument may appear in theory, in practice it doesn't work that way. Despite the fact that the exclusionary rule has been applied in the Federal courts since 1914[14] and in the State courts since 1961,[15] its supporters can point to no empirical evidence which supports the claim that the rule actually deters illegal police conduct. In perhaps the most thorough study on this issue, Professor Oaks, then of the University of Chicago Law School, concluded that there existed no empirical evidence to substantiate the deterrent effect of the exclusionary rule.[16] In his own estimation, Professor Oaks concluded that—

> [A]s a device for directly deterring illegal searches and seizures by the police, the exclusionary rule is a failure. . . . The use of the exclusionary rule imposes excessive costs on the criminal justice system. It provides no recompense for the innocent and it frees the guilty. . . .[17]

Further, the exclusionary rule rests on other unfounded principles. First, it assumes that the police officer will know that his contemplated search and seizure is illegal. To expect the law enforcement officer, at the scene of the crime or acting under other emergency, to know the complexities of the fourth amendment is often to ask the impossible. On the whole, police officers try their best to obey procedural requirements. But mistakes do occur, and, of course, hindsight is something the police officer cannot enjoy.

Second, the exclusionary rule assumes that the police officer who conducted the search will keep in close contact with the prosecutor. But this assumption ignores the fact that prosecution is the business of the U.S. attorney, not the man on the beat. Indeed, there often is little communication between prosecutors and law enforcement officers about rulings that are made on defendants' motions to exclude evidence that has been obtained illegally.[18] This point was well made by Chief Justice Burger, while he was still a circuit judge, when he inquired:

> [H]ow can we think that a policeman will be deterred by a judicial ruling on suppression of evidence which never affects him personally, and of which he learns, if at all, long after he has forgotten the details of the particular episode which occassioned suppression?[19]

The conclusion to be drawn is clear. Despite its purported justifications, the exclusionary rule has failed to act as an effective deterrent against police misconduct. At the same time, the rule benefits only the guilty and breeds disrespect for our criminal justice system.

Further, this doctrine is unique to American jurisprudence. Other countries which guarantee defendants fundamental safeguards—including England and Canada—have declined to adopt the exclusionary rule.[20] It is easy to understand why: The rule simply does not work. As Chief Justice Burger recognizes, the rule is a failure which must be replaced by an adequate alternative.[21] I call upon my colleagues to recognize that the exclusionary rule was a great experiment which failed. Let us not prolong this futile experiment. It is time to devise an alternative to the exclusionary rule which will abandon the doctrine but yet achieve the noble purposes for which the rule was designed.

Hopefully, the bill I am introducing today will achieve these goals. The bill eliminates the application of the exclusionary rule in criminal cases. At the same time, it provides for a civil remedy based on the Federal Torts Claims Act.

Under this legislation, if enacted, individuals subjected to illegal searches and seizures would be able to sue the United States for actual damages incurred as a result of the police misconduct. If the violation is particularly offensive, the court would be able to award the claimant punitive damages. However, in no case would the judgment, including actual and punitive damages, exceed $25,000.

Under the bill, a person who has been convicted as a result of evidence seized during an illegal search and seizure, would be limited to damages representing his actual physical personal injury and to actual property damage.

In addition, the bill contains provisions designed to deter police from committing illegal searches and seizures. First, the legislation emphasizes discretionary power on the part of the court to award punitive damages whenever it determines that such an award would tend to deter similar violations in the future. Second, the bill underscores the discretionary power of the police officer's supervising agency to impose appropriate discipline whenever the agency determines, after notice and hearing, that a police officer has conducted a search and seizure without a good faith belief that his actions were constitutional. Such discipline could include such sanctions as suspending the officer without pay for a certain length of time or even dismissing him from his employment. This section of the bill aims at protecting the officer who makes an innocent mistake or otherwise acts in good faith. At the same time, it offers better assurances than does the exclusionary rule that officers will be deterred from committing intentional violations of the fourth amendment.[22]

Accordingly in lieu of the exclusionary rule. This bill would establish a genuine remedy for innocent victims of illegal searches and seizures. It would provide for punitive as well as compensatory damages, where appropriate. And, importantly, it would allow a prevailing plaintiff to recover reasonable attorney fees and costs. This provision will assure that an injured plaintiff will have the financial resources required to redress grievances.[23]

Thus, the bill which I am introducing today provides victims of illegal searches and seizures with an equitable remedy, and, at the same time, does not permit criminals to go free on the basis of technicalities. Such a bill, if enacted, would foster respect for our criminal justice system. And it will send a powerful signal that our Federal Government is tired of "coddling" criminals.

The exclusionary rule simply does not work. It is time to abandon the rule and put in place an alternative that does work. I believe my bill provides such a solution, and, accordingly, I urge my colleagues to support it.

[11] It is true that in Bivens v. Six Unknown Named Agents of the Federal Bureau of Narcotics, 403 U.S. 388 (1971), the Supreme Court ruled that a civil lawsuit could be brought against the individual law enforcement officer where there has been a Fourth Amendment violation. Regarding this remedy, Professor Wright has stated:

An illegal search is also a civil wrong and the victim in theory can bring an action for damages against the officer. This, too, is almost wholly theoretical. In most cases the money damages to the victim are so insignificant that they would not justify bringing a suit, juries are reluctant to give judgment against a police officer for what they may regard as merely overzealousness on his part, and even if a substantial judgment were recovered against the officer he commonly would not be able to pay it." Wright, note 4 *supra,* at 738.

With respect to the Exclusionary Rule, Professor Wright has concluded: "Its benefit to society is dubious and uncertain. Its cost to society is great and real." Wright, note 4 *supra,* at 741.

[18] *See* Wright, note 4 *supra,* at 740.

[19] Burger, *Who Will Watch The Watchman?* 14 American University Law Review 1, 11 (1964).

[20] *See* Martin, *The Exclusionary Rule Under Foreign Law—Canada,* 52 Journal Of Criminal Law, Criminology and Police Science 271 (1961); Williams, *The Exclusionary Rule Under Foreign Law—England,* 52 Journal Of Criminal Law, Criminology and Police Science 272 (1961).

[21] *Bivens* v. *Six Unknown Named Agents of the Federal Bureau of Narcotics,* 403 U.S. 388, 415–24 (1971) (Burger, C. J., dissenting). As astutely recognized by The Chief Justice:

"In a country that prides itself on innovation, inventive genius, and willingness to experiment, it is a paradox that we should cling for more than a half century to a legal mechanism that was poorly designed and never really worked. I can only hope now that the Congress will manifest a willingness to view realistically the hard evidence of the half-century history of the suppression doctrine revealing thousands of cases in which the criminal was set free because the constable blundered and virtually no evidence that innocent victims of police error . . . have been afforded meaningful redress." *Id.* at 424.

[22] The issue of how to best deter law enforcement officers from deliberately committing illegal searches and seizures has been a subject of intensive legal commentary. *See, e.g.,* Kaplan, *Limits of the Exclusionary Rule,* 26 Stanford Law Review 1027 (1974); Wilson & Alprin, *Controlling Police Conduct: Alternatives to the Exclusionary Rule,* 36 Law & Contemporary Problems 488 (1971); Note, *Government Misconduct: Limiting Qualified Immunity and the Good Faith Defense,* 49 Temple Law Quarterly 938 (1976).

By Mr. GRIFFIN:

S. 3015. A bill to amend the Internal Revenue Code of 1954 to disregard, in the valuation for estate tax purposes of certain items created by the decedent during his life, any amount which would not have been capital gain if such item had been sold by the decedent at its fair market value; to the Committee on Finance.

ESTATE TAX EQUITY FOR ARTISTS

Mr. GRIFFIN. Mr. President, today I am introducing a bill designed to correct an inequity in the estate tax laws affecting artists and their families.

Under the current law, when an artist dies, all of his unsold works are included in his gross estate and valued at fair market value.

Unfortunately, this often means that the estate of a deceased artist—and thus the tax liability of his estate—is unrealistically swollen. As a result, the surviving spouse and family members of the artist are often forced to sell off the unsold works in order to pay the estate taxes. In many cases, even those art pieces that the family might have wished to keep as mementos and reminders of the deceased have to be sold to satisfy the tax collector's appetite.

There is a real irony in this situation. Under so-called tax reforms enacted nearly 10 years ago, artists are forbidden from claiming fair market value deductions on their income taxes if they donate works of art to nonprofit organizations. For example, if an artist gives a painting—perhaps worth hundreds or thousands of dollars—to a charity auction, the only tax deduction he can claim is for the cost of his materials, perhaps $25 for canvas and paints.

But when an artist dies, the IRS rules change drastically—so that an unsold work is no longer worth just the cost of materials, but many times that amount in fair market value subject to Federal estate taxes of up to 50 percent.

Perhaps one of the saddest cases concerns the widow of cartoonist Walter Kelly, creator of the well-known and much-enjoyed "Pogo" cartoon strip. At Mr. Kelly's death, his wife was left with a great many of her husband's sketches—and an astronomical bill for estate taxes. In attempting to meet these tax obligations, Mrs. Kelly lost the entire estate and had to declare bankruptcy.

One unhappy solution, which some artists have found is simply to destroy their works before they die—thereby sparing their family and heirs from the heavy estate tax burden.

Such destruction, of course, results not only in a net revenue loss to the Government from potential future sales of these works, but also is an incalculable cultural loss to this and future generations.

I understand that Arizona painter Ted DeGrazia has burned hundreds of his works to protest this capricious discrimination against artists—and that a group of Michigan artists plan a public "burn-in" of their works in the middle of Kennedy Square in downtown Detroit this week. One of the paintings slated for the flames is a portrait of former Michigan Governor and HUD Secretary George Romney, valued at $5,000.

If our national policy is to foster pride in artistic and cultural achievements and to encourage such endeavors in the future, the estate tax law clearly is counterproductive.

The bill I am introducing provides a less sensational, but certainly more appealing, remedy than wholesale destruction of works of art. This bill—a companion measure to legislation (H.R. 7896) pending in the House of Representatives—would simply change the estate tax laws so that unsold art works would be valued in an artist's estate on a "cost of materials" basis—just as unsold works are valued now for deductible income tax purposes during an artist's lifetime.

This would allow an artist's survivors to decide for themselves whether to keep or sell inherited works—rather than forcing them, as is now too often the case, to pay a heavy penalty.

The bill would apply equally to copyrights and to literary and musical manuscripts as well as to the visual arts.

It should be emphasized that this bill would not allow the survivors to slip through a tax loophole. If the works were later sold, any income realized from the sale would then be fully taxable as personal income. The bill simply allows the heirs to be taxed when—and if—the income is actually realized.

Of course, the estate tax problem facing artists is only part of a much larger complex problem facing most taxpayers.

To be sure, this is a small step toward equity and reform. But it would be a very significant step for artists, and it would go a long way toward encouraging creative activity in the arts.

I urge adoption of this bill as a small but significant step for a number of people—meaningful contribution to keeping the IRS tax wolf at bay.

By Mr. ANDERSON (for himself, Mr. BAYH, Mr. BENTSEN, Mr. CHILES, Mr. CRANSTON, Mr. DANFORTH, Mr. DECONCINI, Mr. DURKIN, Mr. HASKELL, Mr. PAUL G. HATFIELD, Mrs. HUMPHREY, Mr. METZENBAUM, Mr. PELL, Mr. RIEGLE, Mr. SASSER, Mr. KENNEDY, Mr. RIBICOFF, Mr. MCCLURE, Mr. PERCY, and Mr. CASE):

S.J. Res. 132. A joint resolution to establish a Presidential Commission to develop plans for a memorial to the victims

of the holocaust; to the Committee on the Judiciary.

U.S. NATIONAL HOLOCAUST MEMORIAL

● Mr. ANDERSON. Mr. President, I have the honor today of introducing legislation which I hope will lead to the establishment of a U.S. National Memorial to victims of the Nazi holocaust.

Although an estimated 120 million Americans were deeply moved by the recent network television dramatization of the "Holocaust," the lessons of the Nazi atrocities are too important to be left to the intermittent reminders of the mass media. Rather a permanent memorial is needed to remind our future generations of the terrible toll that can result from ignorance, prejudice, and blind obedience.

Senate Joint Resolution 132, which I introduce with the support of 19 original cosponsors, will establish the President's Commission on the Victims of the Holocaust. The Commission's members are to be appointed by the President and will be responsible for holding a national design competition to determine the most suitable site and design for the national memorial. Within 18 months of the effective date of the joint resolution, the Commission will report back to the President and to Congress so that we may act upon its recommendations.

Mr. President, it is ironic that the United States of America, which serves as a refuge to thousands of survivors of the Holocaust is one of the few countries in the free world which does not already have a permanent memorial to the victims of Nazi savagery. Enactment of Senate Joint Resolution 132 will assure that the memory of these 11 million innocent victims, of all faiths, will live on and that the lessons of their deaths will not be lost or ignored by future generations.

Mr. President, I ask unanimous consent that the text of Senate Joint Resolution 132 be printed in the RECORD.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 132

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) there is established a Commission, to be known as the "President's Commission on the Victims of the Holocaust", for the purpose of considering and developing plans for the design, construction, and location of a permanent memorial in the United States to the victims of the Holocaust.

(b) The Commission shall be composed of eleven commissioners, to be appointed by the President, and shall include individuals who are representative of the following groups:

(1) survivors of the Holocaust;
(2) historians;
(3) religious leaders;
(4) artists;
(5) architectural designers;
(6) American military personnel who were involved in the liberation of the concentration camps during World War II; and
(7) the National Park Service.

(c) The President shall appoint one of the members of the Commission to be Chairman.

(d) Each commissioner who is not otherwise employed by the United States Government shall receive an amount equal to the daily rate paid a GS–18 under the General Schedule contained in section 5332 of title 5, United States Code, including travel time, for each day he is engaged in the actual performance of his duties as a member of the Commission. A commissioner who is an officer or employee of the United States Government shall serve without additional compensation. All members of the Commission shall be reimbursed for travel, subsistence, and other necessary expenses incurred by them in the performance of their duties.

(e) Six members of the Commission shall constitute a quorum. Any vacancy in the Commission shall not affect its powers to function.

SEC. 2. Within eighteen months of the effective date of this joint resolution, the Commission shall transmit to the President and the Congress a report containing recommendations for the design, location, and construction of a memorial to the victims of the Holocaust. Such recommendations shall be based upon the results of a design competition to be held by the Commission and upon the information and recommendations received by the Commission through studies and hearings. The Commission shall afford groups concerned with the victims and survivors of the Holocaust an opportunity to provide recommendations concerning the memorial. The Commission shall consider the feasibility of administering such memorial as a unit of the National Park System.

SEC. 3. (a) The Commission is authorized to—

(1) appoint and fix the compensation of such personnel as may be necessary, without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, and without regard to the provisions of chapter 51 and subchapter III of chapter 53 of such title relating to classification and General Schedule pay rates;

(2) make such expenditures for the purpose of carrying out the provisions of this joint resolution as may be necessary from funds appropriated or received as gifts for such purpose;

(3) (A) solicit and accept gifts, bequests or devises of money, securities or other property from public or private sources to be used in carrying out the provisions of this joint resolution or in connection with the construction or other expenses of the memorial;

(B) sell, exchange, invest, or reinvest, the moneys, securities, or other property given, bequeathed, or devised pursuant to subparagraph (A); and

(C) use or hold such moneys, securities, or property for the purposes of this joint resolution or the construction or other expenses of such memorial:

(4) obtain the services of experts and consultants in accordance with the provisions of section 3109 of title 5, United States Code;

(5) accept and utilize the services of voluntary and uncompensated personnel and reimburse them for travel expenses, including per diem, as authorized by section 5703 of title 5, United States Code;

(6) hold hearings, organize contests, enter into contracts for personal services and otherwise, and do such other things as may be necessary to carry out the provisions of this joint resolution;

(7) obtain the assistance and advice of the Chairman of the Commission of Fine Arts, the Chairman of the National Council on the Arts, and the Archivist of the United States, and such Chairmen and Archivist are authorized, upon the request of the Commission, to render such assistance and advice;

(8) request the assistance and advice of, and to cooperate with, organizations concerned with the victims and the survivors of the Holocaust;

(9) procure supplies, services, and property, and make contracts, without regard to the laws and procedures applicable to Federal agencies; and

(10) request the cooperation and assistance of such Federal departments and agencies as may be appropriate.

SEC. 4. The Commission shall cease to exist within one year after the submission of its final report and shall transfer to any body which may hereafter be created to construct the memorial designed by the Commission, all funds and property, and income therefrom, remaining in the possession of the Commission immediately prior to its termination.

SEC. 5. There are hereby authorized to be appropriated $750,000 to carry out the provisions of this joint resolution.●

ADDITIONAL COSPONSORS

S. 224

At the request of Mr. INOUYE, the Senator from Montana (Mr. MELCHER) and the Senator from Pennsylvania (Mr. HEINZ) were added as cosponsors of S. 224, a bill to amend title 5, United States Code, to allow credit for civil service retirement purposes for time spent by Japanese-Americans in World War II internment camps.

S. 311

At the request of Mr. LEAHY, his name was removed as a cosponsor of S. 311, a bill entitled the "College Tuition Tax Relief Act of 1977."

S. 1874

At the request of Mr. KENNEDY, the Senator from Montana (Mr. PAUL G. HATFIELD) was added as a cosponsor of S. 1874, the Antitrust Enforcement Act of 1978.

S. 2128

At the request of Mr. INOUYE, the Senator from New Mexico (Mr. SCHMITT) was added as a cosponsor of S. 2128, a bill to amend the Internal Revenue Code of 1954 to eliminate the adjusted gross income limitation on the credit for the elderly, to increase the amount of such credit, and for other purposes.

S. 2142

At the request of Mr. LEAHY, his name was removed as a cosponsor of S. 2142, a bill to amend the Internal Revenue Code of 1954 to permit a taxpayer to claim a credit for amounts paid as tuition to provide education for himself, for his spouse, or for his dependents, and to provide that such credit is refundable.

S. 2348

At the request of Mr. INOUYE, the Senator from Alaska (Mr. STEVENS) was added as a cosponsor of S. 2348, a bill to amend the Merchant Marine Act, 1920, by establishing a program of development grants for those seaports located in the domestic offshore States, territories, and possessions of the United States.

S. 2373

At the request of Mr. INOUYE, the Senator from New Jersey (Mr. WILLIAMS) was added as a cosponsor of S. 2373, to provide for the establishment of a Division of Minority Mental Health Programs.

S. 2378

At the request of Mr. INOUYE, the Senator from Nebraska (Mr. ZORINSKY), the

Senator from Arizona (Mr. DECONCINI), and the Senator from Oregon (Mr. MARK O. HATFIELD) were added as cosponsors of S. 2378, a bill to increase the amount of funds available for native American employment and training programs.

S. 2505

At the request of Mr. JAVITS, the Senator from South Dakota (Mr. ABOUREZK), the Senator from Pennsylvania (Mr. HEINZ), the Senator from Minnesota (Mrs. HUMPHREY), and the Senator from Indiana (Mr. LUGAR) were added as cosponsors of S. 2505, a bill to amend title XIX of the Social Security Act to provide that certain handicapped individuals shall be eligible for medical assistance.

S. 2867

At the request of Mr. GOLDWATER, the Senators from Utah (Mr. GARN and Mr. HATCH) were added as cosponsors of S. 2867, a bill to remove residency requirements and acreage limitations applicable to land subject to reclamation law.

S. 2956

At the request of Mr. JAVITS, the Senator from New Jersey (Mr. WILLIAMS) was added as a cosponsor of S. 2956, a bill to strike the State match requirement from the acceleration provisions of the GI bill.

SENATE JOINT RESOLUTION 21

At the request of Mr. WILLIAMS, the Senator from New Hampshire (Mr. MCINTYRE) was added as a cosponsor of Senate Joint Resolution 21, a joint resolution to authorize the President to proclaim annually the last Friday of April as National Arbor Day.

SENATE RESOLUTION 443—ORIGINAL RESOLUTION REPORTED WAIVING CONGRESSIONAL BUDGET ACT

Mr. TALMADGE, from the Committee on Agriculture, Nutrition, and Forestry, reported the following original resolution, which was referred to the Committee on the Budget:

S. RES. 443

Resolved, That pursuant to section 303(c) of the Congressional Budget Act of 1974, the provisions of section 303(a) of such Act are waived with respect to the consideration of the Conference Report on H.R. 6782, a bill to permit marketing orders to include provisions concerning marketing promotion, including paid advertisement, of raisins and distribution among handlers of the pro rata costs of such promotion. Such waiver is necessary to permit consideration of statutory authority that would increase the minimum loan rate for upland cotton to 48 cents per pound to become effective in a fiscal year for which the first concurrent resolution on the budget has not been agreed to.

AMENDMENTS SUBMITTED FOR PRINTING

EXPORT-IMPORT BANK ACT—S. 2520

AMENDMENT NO. 1820

(Ordered to be printed and referred to the Committee on Banking, Housing, and Urban Affairs.)

Mr. STEVENSON (for himself and Mr. PROXMIRE) submitted an amendment intended to be proposed by them, jointly, to the bill (S. 2520) to amend and extend the Export-Bank Act of 1945, as amended.

● Mr. STEVENSON. Mr. President, I am introducing today an amendment to S. 2520, a bill to amend and extend the Export-Import Bank Act of 1945. The administration has requested in S. 2520 a 5-year extension of the life of the Bank and an increase in the limitation on the aggregate of loans, guarantees, and insurance which the Bank may have outstanding at any one time from $25 billion to $40 billion. The amendment would provide a 3-year extension of the Bank and raise the aggregate limit on Bank commitments to $32.5 billion. That level exceeds the Bank's projected requirements during the 3-year period.

The purpose of our amendment is to provide an early opportunity to reexamine the Bank's charter. A 3-year extension will enable the Bank to support U.S. exports adequately. The President has appointed a Cabinet-level task force to formulate a new U.S. export policy. The Subcommittee on International Finance of the Senate Banking Committee is holding hearings on U.S. export competitiveness and export policy. These efforts could lead to a substantial redirection of U.S. Government policies related to exports.

In addition, there are likely to be new international efforts to limit official export credit competition—efforts we applaud. The outcome of international negotiations on trade issues could significantly alter Eximbank's role in U.S. export policy. An extension of the Eximbank charter for 5 years could bias U.S. policy unnecessarily toward continuation of the Bank in its present form and established patterns of activity. A 3-year extension would strike a better balance between the need to reassure U.S. exporters and others that official Government financing will be available where private financing does not suffice. and the need to keep the options open while seeking more efficient and effective means to improve U.S. export competitiveness.●

AMENDMENT NO. 1821

(Ordered to be printed and referred to the Committee on Banking, Housing, and Urban Affairs.)

Mr. STEVENSON submitted an amendment intended to be proposed by him to the bill (S. 2520), supra.

● Mr. STEVENSON. Mr. President, I am submitting today an amendment to S. 2520, a bill to amend and extend the Export-Import Bank Act of 1945. The amendment would prevent the application of the National Environmental Protection Act (NEPA) to actions of the Export-Import Bank which have no environmental impact upon the United States, until such time as Congress adopts legislation specifying the degree to which NEPA should apply to such actions.

The question of extraterritorial application of NEPA is currently tied up in bureaucratic wrangling within the administration. There are no signs that the controversy will soon be resolved or, that if resolved, the result will be a clear and workable solution which takes into proper account U.S. interests and objectives in foreign policy, trade and the environment. Indeed, draft regulations issued by the Council on Environmental Quality indicate that interbureaucratic bargaining would be perpetuated, not resolved, by the draft regulations CEQ has drawn up:

> Affected agencies shall consult with the Council which shall assist the agency in fitting the Act's requirements to the practical considerations of operating in the international context.

The issue is not whether NEPA applies in a narrow legal sense to Eximbank, but whether fundamental choices between conflicting policy objectives should be made by closed door horse trading within the executive branch. Congress is the proper body to make public policy, and one fact is indisputable: Congress has never faced the issue squarely. Whatever lawyers and judges might ultimately determine about the extraterritorial application of NEPA, and the confusion on that point promises full employment for lawyers for many years, the indisputable fact is that unless Congress addresses itself explicitly to the conflicting imperatives involved in this issue, Congress will have abdicated its constitutional responsibility to speak plainly on fundamental policy questions.

My amendment does not take sides on the merits of the arguments advanced by the various contending parties. The amendment merely returns the controversy to Congress where it belongs. I ask my colleagues to join in accepting our congressional responsibility to grapple with this complex and difficult question.

Mr. President, I ask unanimous consent that my amendment and two documents, the first prepared by CEQ and entitled "Application of the National Environmental Policy Act (NEPA) to United States Activities Abroad," the second prepared by Mr. Charles N. Brower and entitled "The Legal Parameters of NEPA—Does the CEQ's Grasp Exceed Its Reach?" be printed in the RECORD.

There being no objection, the amendment and material were ordered to be printed in the RECORD, as follows:

> At the end of the bill, add the following:
>
> (d) Section 2 of such Act is amended by adding at the end thereof the following:
>
> "(d) Except as otherwise provided by law enacted after the date of enactment of this subsection, no rule, regulation, or interpretation pursuant to the National Environmental Policy Act of 1969 applies to an activity of the Bank which does not have an environmental impact within the United States.".

APPLICATION OF THE NATIONAL ENVIRONMENTAL POLICY ACT (NEPA) TO UNITED STATES ACTIVITIES ABROAD

PRELIMINARY DRAFT REGULATIONS FOR APPLICATION OF THE NATIONAL ENVIRONMENTAL POLICY ACT TO FEDERAL ACTIVITIES ABROAD

Section 1508.13. Human Environment.

"Human environment" shall be interpreted comprehensively to include the natural and physical environment and the interaction of people with that environment. The human environment is not confined to the geographical borders of the United States.

Section 1506.13. Application of NEPA to

Significant Environmental Effects Not Confined to the United States.

(a) Agencies shall fully comply with these regulations insofar as their major Federal actions significantly affect the environment of:

(1) The United States and its trust territories.

(2) The global commons, which consists of areas outside the jurisdiction of any nation (e.g., the oceans).

(3) Antarctica.

(b) Agencies shall comply with the provisions of these regulations pertaining to foreign environmental statements (sec. 1508.——) insofar as their major Federal actions significantly affect the environment only of one or more foreign nations.

Section 1508.—. Foreign Environmental Statement.

(a) "Foreign environmental statement" is the statement required by sec. 102(2)(C) of the Act when a major Federal action significantly affects the environment only of one or more foreign nations. Such statements need only contain the information called for in sections 1502.13–15.

(b) In developing their implementing procedures for such statements under section 1507.3, affected agencies shall consult with the Council which shall assist the agency in fitting the Act's requirements to the practical considerations of operating in the international context. Among other things these procedures shall:

(1) Establish criteria by which the agency can determine that a foreign environmental statement or portions thereof will not be subject to public comment when such review would be inconsistent with the accomplishment of the agency's statutory objectives.

(2) Take into account special factors which would limit the review period or the required detail of the statement such as:

(i) Diplomatic considerations or the relative unavailability of information;

(ii) Whether the Federal agency role is one limited to passing on proposals developed elsewhere (as opposed to situations where the agency is involved in early planning or joint sponsorship); and

(iii) International commercial competition and confidentiality.

(3) Ensure consideration in foreign environmental statements of:

(i) Activities which are unlawful or strictly regulated in the United States in order to protect public health or safety;

(ii) Activities which threaten natural, ecological or environmental resources of global importance; and

(iii) Activities which may have inadvertent adverse effects on other foreign countries.

COUNCIL ON ENVIRONMENTAL QUALITY,
Washington, D.C., January 19, 1978.

MEMORANDUM TO HEADS OF AGENCIES

Subject Application of the National Environmental Policy Act to Federal Activities Abroad.

Since the January 6 meeting to discuss the application to federal agency international activities of the National Environmental Policy Act (NEPA), several comments and concerns have been expressed which indicate that further explanation might lead to a better understanding and resolution of the issue.

Incidentally, no date has been set for your comments on this specific issue although we would appreciate your earliest reasoned response. The date for comments on our proposed general regulations circulated December 13, 1977 is January 23, 1978 but on request may be extended to February 6, 1978.

WHY THIS ISSUE AT THIS TIME?

In order to make the process of preparing environmental impact statements more efficient, economical and relevant, on May 23, 1977 President Carter issued an Executive Order directing CEQ to reform NEPA procedures. In the course of its work, CEQ identified two concededly difficult and controversial issues of which the subject issue is one. Consequently, we determined it to be advisable to direct agency attention to the problem and obtain assistance and advice before proceeding to the task of drafting applicable regulations on the issue. In short, CEQ is responding to a present duty to consider regulatory reform of NEPA and all its related aspects.

REQUIREMENTS OF NEPA

Concerning this issue the operative language of NEPA is:

"The Congress . . . directs that to the fullest extent possible . . . all agencies of the Federal government shall . . . include in . . . . . major Federal actions significantly affecting the quality of the human environment, a detailed statement by the responsible official on—(i) The environmental impact of the proposed action," etc. Section 102(2)(C).

Therefore, the statutory mandate is to (1) all Federal agencies who undertake (2) major Federal actions which (3) significantly affect the quality of the human environment.

The Act does not define or limit the geographical region of the "human environment" the quality of which is to be considered, and it does require that "all agencies of the Federal Government shall . . . recognize the worldwide and long-range character of the environmental problems". Section 102(2)(F).

JUDICIAL CONSTRUCTION

The extent to which NEPA has international application has been addressed by the courts on several occasions.

In *Wilderness Society* v. *Morton*, 463 F.2d 1261 (D.C. Cir. (1972)), the Court of Appeals for the District of Columbia granted standing to Canadian environmentalists in the Trans Alaska oil pipeline case where alternative routes went through Canada. The court did so because the Canadians' interests in the environmental impact in Canada were within the zone of interest protected by NEPA.

In *Sierra Club* v. *AEC*, 4 ELR 20885 (D.D.C. 1974), AEC and Eximbank were sued to make them comply with NEPA. The AEC prepared an EIS on its overall nuclear export process, essentially settling the case, since AEC was the lead agency. The court assumed that governmental actions abroad were covered by the Act.

Sierra Club v. *Coleman*, 405 F. Supp. 53 (D.D.C. 1975) and 421 F. Supp. 63 (D.D.C. 1976). The Court ordered the Department of Transportation to consider the environmental impacts involved in the construction of a segment of the Pan-American Highway in Colombia and Panama, both as they affected the United States (migration of hoof and mouth disease) and as confined to Panama (effects on Indian culture).

EDF v. *AID*, ELR 20121 (D.D.C. 1975), involves a suit against AID to make it prepare an EIS on its pest management program. AID settled on terms which were approved by the Court. The settlement specifically contemplated covering local impacts within individual foreign countries.

PRIOR CEQ OPINIONS

CEQ, as the designated agency responsible for implementing agency compliance with NEPA, has been consistent in its interpretation of the Act since 1971. The most recent precedent is a September, 1976 CEQ memorandum opinion from Chairman Russell Peterson (Appendix A) advising all agencies that:

"[W]e advise that NEPA requires analysis and disclosure in environmental statements of significant impacts of federal actions on the human environment—in the United States, and other countries, and in areas outside the jurisdiction of any country."

The proposed draft regulations the Council has prepared and submited to you recognize there are unusual and exceptional circumstances which may be recognized in the application of NEPA to governmental agency actions in other countries.

AGENCY EXPERIENCE

Some agencies for some actions have administratively determined to conform with NEPA requirements for their activities abroad. Examples are:

The State Department's recent EIS on the Panama Canal Treaties;

The Department of Interior's and Federal Power Commission's EISs on natural gas pipelines and alternatives from Alaska across Canada to the lower 48 states;

NOAA's on its hurricane seeding program, and

AID's on its worldwide pesticide program.

Of those agencies with a history of implementing NEPA in their activities in foreign countries, the one with the greatest experience is AID. At the request of OMB, the Administrator of AID prepared an analysis of its experience (Appendix B) which concluded:

"[O]ur overall experience is a positive one. We have discovered that developing countries themselves have come increasingly to recognize the inter-related nature of environment and development and to seek to ensure that environmental considerations are adequately addressed in development projects. Further, the practical experience of AID had been that it is possible to undertake detailed environmental analyses of U.S. supported projects abroad and that the results obtained are useful to us, as well as to host country planners, in making project decisions."

AID's analysis rebutted each of four recited "potential negative impacts hypothetically associated with the conduct of environmental analyses."

1. AID has been able to undertake environmental analyses "without strain" on foreign relations.

2. Achievement of the Agency's mandate has not been impaired by the conduct of environmental analyses.

3. U.S. jobs have not been lost due to environmental analyses.

4. Costs have not been excessive.

WHAT IS PROPOSED?

Earlier, reference was made to the fact CEQ's present proposals recognize and make allowance for unusual and exceptional circumstances involved in federal agencies' activities in foreign countries. CEQ does so by limiting the applicability of the standard EIS procedure only to those major activities abroad whose significant environmental impact affect (1) the United States and its trust territories; (2) the global commons, such as the oceans; (3) Antarctica.

For all other major activities having a significant environmental impact outside the United States, the federal agency may, in consultation with CEQ, provide for abbreviated "Foreign Environment Statements" whose preparation can take into account such special factors as:

1. Diplomatic considerations.
2. Availability of information.
3. Commercial competition.
4. Commercial confidentiality.
5. Extent of agency role in the proposed activity.

U.S. STANDARDS ARE NOT BEING IMPOSED ON FOREIGN COUNTRIES

The preparation of a Foreign Environmental Statement would not impose U.S. environmental standards on any other country. Even if the federal activity abroad is unlawful in the United States, NEPA does not prevent its being undertaken abroad.

What a Foreign Environmental Statement would do is make clear that what the governmental agency proposes to do in another country is unlawful in the United States.

CONCLUSION

Our concern over the environmental effects of U.S. government actions abroad are expressed in the last section of our proposed draft. Summarized they are:

1. We want to insure that if a product is banned or strictly regulated in the United States on health grounds the U.S. agency and other officials are at least aware of this before providing the product to a foreign country.

2. We want at minimum full disclosure before an American decisonmaker takes an action which threatens natural resources of global importance.

3. We want to be sure that the American decisionmaker is aware of what he is doing if his actions, however, beneficial to one country, cause a significant adverse effect in another country.

If you have any questions, please bring them to our attention. We look forward to receiving your comments.

CHARLES WARREN,
Chairman.

A LOOK BEFORE WE LEAP—APPLYING NEPA TO U.S. ACTIONS ABROAD

(Remarks by Charles Warren, Chairman, Council on Environmental Quality)

When your President, Charles Zirzow, invited me some time ago to speak to you, I thought this would be an excellent forum for me to discuss CEQ's new regulations on the National Environmental Policy Act. In large part, those regulations—and the key word there is "regulations", not "guidelines"—involve the preparation of environmental impact statements.

However, two considerations have intervened to change my mind. The first was my review of your program for this meeting. The speakers listed and the topics to be covered indicate to me that the National Association of Environmental Professionals has matured rapidly in the three years since its founding. My impression, whether accurate or not, was that at its founding, the NAEP was an organization for and of EIS-writers. Though the daily work of many of you continues to involve the preparation of environmental impact statements, your program makes it clear that you are increasingly involved in broader issues of environmental policy and scientific inquiry. As examples I can mention papers to be presented to you on "Risk Assessment in Basic Research," and "Synergistic Effects of Pollutants as Carcinogens," and "World Carbon Dioxide Problems."

None of this is to minimize the importance of environmental impact statements and their careful preparation. Whatever the wider ecological concerns of citizens, scientists and politicians today, the EIS remains our basic tool for translating those concerns into practical actions. But your program does suggest that both CEQ and the NAEP have undergone a parallel evolution to arrive at the same perspective; that is, the purpose of NEPA and its EIS requirement is not to produce better pieces of paper, but wiser federal actions.

The second consideration that altered my choice of topic today was a meeting that CEQ held on January 6. Our guests were 81 officials from 30 federal agencies including, among others, the Army, the Navy, the Air Force, the Departments of Agriculture, Commerce, Interior, Justice, and State, the Nuclear Regulatory Commission, the Federal Highway Administration, the Export-Import Bank . . . even the CIA showed up. Our purpose in inviting these people was to discuss a draft set of proposals requiring them to comply with NEPA in their actions overseas.

Well, there was very little discussion, but plenty of reaction. Our draft regulations were criticized on several grounds: that there is no legal justification for extending NEPA to U.S. actions abroad; that NEPA-caused delays would hold up U.S. exports and send foreign buyers elsewhere; and that our regulations would impose U.S. environmental standards on other, sovereign nations. Columnists Evans and Novak decided that the proposed regulations would make "Uncle Sam the environmental policeman of the world." The Arizona Republic denounced CEQ for its arrogant "hunger for power".

These criticisms, if true, are important. They are practical ones. Perhaps most to the credit of our governmental colleagues, the questions they ask are those that private citizens—from board rooms to production lines—would ask: Does any agency of the U.S government have the right to tell other countries what environmental standards to impose? Would the CEQ regulations cost sales and jobs? Do these proposals have any justification in law . . . or are they, indeed, an arrogant and unfounded reach for power?

Ultimately, beyond all these issues is an even more important one for the great majority of our citizens: do the CEQ proposals make any sense? If the law is foolish, or if we are reading more into it than Congress intended, most Americans would agree that the law ought to be changed.

I would like to discuss these questions with you today. To some degree, the answers involve your own interests. Beyond your professional stake in the matter, however, I believe such an international application of NEPA not only is required by law, but it also practically and politically in the best interests of the United States.

First, let's look at what Congress said when it wrote the National Environmental Policy Act. In NEPA, Congress speaks of "national policy" and "national heritage", but its references to the environment do not imply any geographical limitation. Instead we find references to "man and his environment"; the "human environment"; the "natural environment"; the importance of . . . maintaining environmental quality to the overall welfare and development of man"; and the global term "biosphere". In one section of the Act, Congress directs all federal agencies to recognize "the worldwide and long-range character of environmental problems. . . ." Nowhere does the Act specify or suggest that it is only the U.S. environment whose quality is to be guarded by U.S. agencies.

This legislative language is, I concede, indicative rather than definitive. As in similar problems of interpretation the legislative history may help determine whether the law was written to be as all embracing as it appears.

The legislative history indicates that Congress indeed addressed the question of NEPA's application beyond our borders. On October 8, 1969, during floor debate on NEPA, Senator Henry Jackson inserted into the Congressional Record this summary of an earlier House-Senate colloquium on national environmental policy: "(A)lthough the influence of the U.S. policy will be limited outside its own borders, the global character of ecological relationships must be the guide for domestic activities."

More explicitly, during oversight hearings held in 1971—the year after NEPA was passed—the House Merchant Marine and Fisheries Committee specifically rejected the argument that NEPA should not be applied to U.S. actions within the jurisdiction of another nation. Its statement reads as follows:

"Stated most charitably, the committee disagrees with this interpretation of NEPA. The history of the Act makes it quite clear that the global effects of environmental decisions are inevitably a part of the decisionmaking process, and must be considered in that context."

Thus, the legislative history of NEPA supports the view that Congress *did* intend the Act to apply to U.S. government actions beyond our borders.

More importantly, the courts—the ultimate arbiter of what the law says and means—have addressed the international application of NEPA on several occasions:

In *Wilderness Society* v. *Morton*,[1] the D.C. Court of Appeals ruled that Canadian environmentalists had a substantial interest in the choice of route for the Trans Alaska oil pipeline, and that this interest was protected by NEPA.

In *Sierra Club* v. *Atomic Energy Commission*,[2] the AEC and the Export-Import Bank were sued to force their compliance with NEPA on nuclear exports. In this case, the court assumed that government actions abroad were covered by the Act.

In *Environmental Defense Fund* v. *Agency for International Development*,[3] AID agreed to prepare an environmental impact statement on its pest management program. The court-approved settlement specifically required that the EIS cover impacts within individual foreign countries.

Finally, some agencies have already applied NEPA to some of their actions abroad. Examples include the State Department, with its recent EIS on the Panama Canal Treaties; the Interior Department and the Federal Power Commission, with EISs on the Trans Alaska natural gas pipeline through Canada; the National Oceanic and Atmospheric Administration, with an EIS on its hurricane-seeding program; and AID, on its worldwide pesticide program.

Last October, the Office of Management and Budget asked several federal agencies with foreign affairs responsibilities about their experience with NEPA on projects abroad. John J. Gilligan, Administrator of AID, replied in this way:

"(O)ur overall experience is a positive one. We have discovered that *developing countries themselves* have come increasingly to recognize the interrelated nature of environment and development, and to seek to ensure that *environmental considerations are adequately addressed* in development projects." (emphasis added)

AID, Gilligan continued, has been able "to undertake environmental analyses without strain" on foreign relations. Pertinent to the complaint that NEPA would delay imports and cost us sales, Gilligan wrote: "No project has fallen through because of environmental analyses. . . ."

At this point, let me summarize my argument so far. The language of NEPA strongly implies a Congressional concern with the environmental impact of U.S. projects abroad; the legislative history of NEPA is explicit on this point; the courts have ruled, in specific cases, that NEPA governs the actions of U.S. agencies abroad; and several agencies have implicitly recognized that governance by voluntarily filing EISs.

I believe, in sum, that CEQ's position on the international reach of NEPA is solidly based in U.S. law. Now let me address perhaps the most important question: Would not the application of NEPA to U.S. projects abroad violate foreign sovereignty?

In discussing this question, it is crucial to realize that NEPA imposes no environmental regulatory standards on anybody, not even on U.S. agencies. Other laws, such as the Clean Air Act do that. NEPA, by contrast, creates a process. Its emphasis is on "full disclosure" with two parts: One, it requires each federal agency to analyze the environmental impacts of its proposed actions; two, it requires the agency to publish its analysis, so that other government agencies can in-

---

[1] 463 F.2d 1261 (D.C. Cir. 1972).
[2] 4 ELR 20885 (D.D.C. 1974).
[3] 6 ELR 20121 (D.D.C. 1975).

spect the analysis for accuracy and thoroughness.

In the international context, NEPA would give foreign governments the same access to analytical data on a proposed U.S. action. The foreign government would make its own decision on the project, regardless of U.S. environmental standards. CEQ's proposed draft regulations require an agency to point out any activities that are "unlawful or strictly regulated" in the U.S.; however, should another nation choose to proceed with such an activity—illegal by U.S. standards—it would be perfectly free to do so.

In addition, CEQ's proposals recognize "special factors" that may limit the scope of a foreign environmental statement, the length of time for public review of it, or even whether it is made public at all. The regulations specifically provide modifications of the NEPA process to accommodate "diplomatic considerations or the relative unavailability of information . . . international competition and confidentiality."

Given these "special factors" that limit the applicability of our proposed rules, is it worth applying NEPA to foreign actions at all?

The answer lies not in our regulations nor in U.S. law, but in the common experience of mankind as we have tried to shape natural systems to human convenience. Heaven knows we have succeeded. The citizens of the advanced nations lead better, healthier, longer lives than any other humans since the Garden of Eden closed; it is to our credit that we are attempting to extend the fruits of our development to other nations less fortunate in natural and human resources.

But within our borders and beyond, we have seen, again and again, the direct and indirect environmental impacts of well-tended projects create havoc with a nation's food supplies and its people's health.

In the Ryukyu Islands following World War II, a U.S. attempt to improve sanitary and dietary standards in the schools led, indirectly, to the spread of trachoma, an eye disease, among children. In untreated cases, this disease can cause blindness. Also in the Ryukyus, the U.S. introduction of piped water led to an extensive outbreak of dysentery.

In Indonesia, the farmers used an imported pesticide—a chlorinated hydrocarbon similar to DDT—to control a destructive insect known as the rice borer. The highly toxic pesticide also killed fish in the rice paddies. Not only had the fish provided the farmers with a cash crop, fertilized the rice, and helped control many caterpillars of insect pests, but they had also given the farmers a vital source of protein.

In Brazil's Sao Francisco Valley, a hydroelectric project was built with financial aid from two international agencies, two U.S. agencies, and private banks in Canada, France, and the U.S. Unanticipated environmental impacts from this project forced the expenditure of more than $150 millions to resettle farmers and control floods.

In Egypt—perhaps the best known case of development gone wrong—the Aswan High Dam financed by the Soviet Union has sharply increased the incidence of a blood disease caused by a water-borne parasite. The last estimate I saw was that infection had jumped from 5 percent of farmers living along the Upper Nile to 65 percent. The disease, which is difficult and expensive to cure, is usually debilitating and sometimes fatal.

The moral is not that developing areas should be left without running water, that pesticides should be prohibited, or that dams should not be built. The moral, rather, is that the transfer of modern technologies into underdeveloped lands can trigger social and natural mechanisms that lead to trouble. Before advanced nations undertake such transfers, therefore, they should try to anticipate the unwanted, potentially damaging side effects of their actions.

Because of the relatively embryonic state of our ecological science, not even the advanced nations can always predict such side effects. But our knowledge, our experience, and our resources vastly exceed those of underdeveloped nations—and through NEPA the United States can provide access to the considerable ecological expertise it does possess.

Let me discuss a current project that has recently been questioned by Congressman Long of Maryland. I think it will buttress my argument that the international application of NEPA is in the best interest of our country as well as that of foreign nations.

On January, 1971, the government of the Philippine Islands expressed interest in purchasing a nuclear power plant. The U.S. State Department instructed our embassy in Manila to "give all possible encouragement" to the purchase.

In January, 1976, the U.S. Export-Import Bank authorized a loan of $277 million plus loan guarantees of $367 million to permit the Philippines to buy a power reactor . . . the first to be located there. Under the terms of CEQ's proposed regulations, the Ex-Im authorization would be a "significant federal action" with a possible impact on the environment. In addition, under the requirements of the Atomic Energy Act, an export license for the reactor would have to be granted by the Nuclear Regulatory Commission . . . a related "significant federal action". These and other agencies involved in the project would be required, under our draft rules, to file a joint foreign environmental statement prior to granting the loan and export license.

No such statement has been filed. If such a statement, adequate by U.S. standards, had been filed, it would have revealed the following information:

The Philippine Islands are located in an earthquake belt—one of two such belts in the world.

The Philippines are also in a volcanic belt, and have no stable salt formations; hence they cannot dispose of their own radioactive wastes, and must ship them to the United States or to some other international burial site.

The proposed site of the reactor on Luzon is about 14 miles from Mount Natib—a volcano which, based on information supplied by a U.S. consultant to the Philippine National Power Corporation, would likely be considered "active" under current NRC criteria.

In a review of alternate energy sources, the Philippine Energy Development Board computed the cost of hydropower at $1,000 per kilowatt, of geothermal at $900 per kilowatt, and coal at $800 per kilowatt, it estimates the cost of nuclear at $1,500 per kilowatt.

The Government of the Philippines has by no means been apathetic about this information. President Ferdinard Marcos has displayed a lively concern about environmental matters. In July, 1976, he established a Presidential Council for the management of forest ecosystems and, last year, an Environmental Protection Council. In August, 1976, following an earthquake in Mindanao, he asked the manufacturer of the reactor, for written assurance that the plant would be earthquake-proof.

Other Philippine officials have expressed concern. Because his agency lacked the technical expertise and breadth of experience to evaluate the reactor site, the chairman of the Philippine Atomic Energy Commission asked the U.S. Nuclear Regulatory Commission for help. The NRC did its best with the information supplied it—but when asked to contribute an expert for a two week safety review of the project, an NRC official pointed out that review of a nuclear license application in the U.S. requires the equivalent of six man-years of effort.

It seems to me that the facts in this case speak for themselves; I will not comment on them. I wish, rather, to emphasize two matters:

First, had a foreign environmental statement been prepared on this export proposal, none of the information developed would prevent the government of the Philippines from buying the reactor. It could ignore the facts and environmental impacts, and go ahead with the purchase.

Second, many developing nations do not have experts qualified to develop such information concerning complex and sophisticated technology. In the absence of rules that require U.S. agencies to provide environmental information, such governments are forced to request help from our experts—or to rely on that supplied by consultants who may have a stake in making a sale.

Health and safety issues and environmental impacts should not have to be uncovered little by little. On major governmental actions affecting the environment, we should fully and openly reveal such impacts so that another government can make its own decisions. Applying NEPA to the actions of U.S. agencies abroad is in no sense a violation of foreign sovereignty; indeed, it represents a respect for foreign sovereignty. Foreign policy considerations may warrant our supporting dubious projects abroad; at an absolute minimum, however, the underdeveloped nations to whom the bulk of our non-military assistance goes have a right to know when a project we support might get them into serious health, safety, and environmental trouble.

Most developing nations cannot duplicate our environmental expertise; we should not force them to duplicate our environmental misfortunes. Our own pragmatic self-interest dictates that, when our government engages in activities abroad, we should help other nations look before they—or we—leap.

CEQ believes that NEPA requires such a look too—not only as a matter of law, but as a matter of prudence and judgment.

Thank you.

WASHINGTON, D.C., *February 2, 1978.*

Mr. STUART EIZENSTAT,
Assistant to the President for Domestic Affairs and Policy, The White House, Washington, D.C.

DEAR STU: On October 11, 1972, I wrote to Russell E. Train, Chairman of the Council on Environmental Quality, regarding the need for compliance with the National Environmental Policy Act by the Agency for International Development, the Export-Import Bank and the Overseas Private Investment Corporation. Some progress was made during the previous Administration to assure compliance with NEPA by other agencies. Now, the Council has proposed regulations which contemplate the preparation of an environmental impact statement—as required by the statute—in all cases where a major federal action would significantly affect the quality of the human environment, including instances where the federal action and its impacts might occur outside the United States.

Recent press reports quote the representatives of some government agencies as stating that NEPA does not apply to actions and impacts abroad and that such application would be seen as "unwarranted intrusion" into matters subject to the "sovereign authority of other governments." These views are based on an obvious misapprehension of the National Environmental Policy Act generally and the environmental impact statement requirements.

First, as to the coverage of NEPA: the language of the statute indicates clearly the intent of Congress that environmental im-

pact statements are to be prepared in all situations covered by section 102(2)(C), regardless of the site of the federal action or the location of its impacts. The legislative history of NEPA is along the same lines. For example, Senator Jackson, who sponsored the legislation, said in the Senate debate just before passage:

"What is involved is a Congressional declaration that we do not intend, as a government or as a people, to initiate actions which endanger the continued existence or the health of mankind. That we will not intentionally initiate actions which will do irreparable damage to the air, land, and water which supports life on earth."

Virtually all government agencies have now begun to apply the statute to cases where the federal activities and their impacts are located outside the United States. Agencies having international programs, such as the Departments of State and Defense and the Agency for International Development, have reflected this in their regulations, and a number of government agencies have prepared environmental impact statements on activities carried out abroad or which have impacts abroad. The few court cases that have considered the question likewise have held that NEPA applies to major federal actions and their impacts regardless of location.

This is not a question of the U.S. imposing its environmental laws and standards on other countries. Rather, the requirement of section 102(2)(C) of NEPA is for the preparation of an analysis that will illuminate the environmental consequences of a particular action before the decision is made to go ahead. The statute does not determine what decision will be made. In the case of an action to be undertaken abroad or having impacts abroad, the function of an environmental impact statement is to furnish the U.S. government agency, and other governments affected, with the best available environmental information and evaluation before decisions are made.

I hope the Administration will support vigorously the protection of the global environment through assuring that the relevant factors are brought to light and made available in the decision-making process under NEPA. The Council on Environmental Quality deserves support and encouragement as it proceeds with steps to give effect to the mandate of Congress.

Sincerely,

EDMUND S. MUSKIE,
Subcommittee on Environmental Pollution.

WASHINGTON, D.C., *February 21, 1978.*

Hon. JIMMY CARTER,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: The Council on Environmental Quality (CEQ) has recently proposed draft regulations for applying the National Environmental Policy Act (NEPA) to the Federal Government's actions abroad. According to press accounts, representatives of some agencies are opposed to the Council's proposals, contending that NEPA does not apply to American actions with environmental effects located in the jurisdiction of another country. They apparently view this as "unwarranted intrusion" into matters that fall under foreign sovereignty.

As Chairman of the House Subcommittee charged with overseeing NEPA's implementation, I must strongly disagree with these agencies' interpretation of the law. It is contrary to Congress' intent. NEPA itself makes clear that Congress' concern for the environment does not end at American borders. In section 101, we recognized "the profound impacts of man's activity on the interrelations of all components of the natural environment," and in section 102, we directed Federal agencies "to recognize the worldwide and long-range character of environmental problems."

Section 102(2)(C), that portion of NEPA which requires environmental impact statements, similarly sets no national boundaries. The environmental impact statement is an analysis of the environmental consequences of a proposed Federal action. It imposes no environmental standards on anyone. When an environmental impact statement is prepared for a U.S.-suported project abroad, the statement simply provides our Government with information which is appropriate to guide sound decisions.

Several Federal agencies have already prepared environmental statements on their activities abroad. The Agency for International Development has routinely prepared more than 30 environmental assessments of major development projects, and it reports that its assessment program has been welcomed by host nations.

Faced with these same questions during NEPA oversight hearings over seven years ago, my Committee emphatically rejected the State Department's assertion that NEPA's impact statement requirement should not apply to our overseas projects. Let me state once again the conclusion we reached then. "[T]he global effects of environmental decisions are inevitably a part of the decision-making process and must be considered in that context."

CEQ has assured me of its willingness to work with the agencies in developing regulations that are sensitive to foreign policy and other considerations. Indeed, the Council has taken a much more flexible approach as to the mechanics of applying NEPA to effects abroad than did the previous Council under the Ford Administration. Former CEQ Chairman Petersen, in his 1976 memorandum to heads of agencies, required full preparation of EIS's on effects in individual foreign countries. Chairman Warren has shown a flexibility in devising a statement that accounts for special factors abroad. It is time for other agencies to cooperate.

I hope CEQ's efforts to see that Congress' directives are carried out receive your full support and assistance.

Sincerely,

ROBERT L. LEGGETT,
Chairman, Subcommittee on Fisheries and Wildlife Conservation and the Environment.

QUESTIONS AND ANSWERS

GENERAL

Q. What is the status of CEQ's international NEPA regulations?

A. In January CEQ sent proposed draft regulations on the application of NEPA to U.S. agency activities abroad to all federal agencies for review and comment. CEQ has placed no deadline on agency comments and, as of April 1, 1978, most agencies had not responded. However, CEQ and the agencies principally affected are working together informally, and are making progress toward resolution of the issue.

Q. How does NEPA mandate environmental impact statements for federal activities in foreign countries?

A. NEPA requires statements for all "major federal actions significantly affecting the quality of the human environment." It does not make an exception for effects that occur abroad.

Q. Why hasn't such a mandate been recognized before?

A. It has. Since 1971 CEQ has consistently maintained that NEPA applies abroad. Many agencies believe NEPA applies in some way. Only a few have asserted that it does not. The real question is how it applies. CEQ is securing the views of all agencies on how to apply it.

Q. Can federal agencies comply with NEPA responsibilities with respect to environmental impacts that occur within a foreign country without preparing a complete EIS as the EIS is defined in CEQ's Guidelines or draft regulations?

A. This is what CEQ is aiming for. In cooperation with affected agencies CEQ is trying to devise a means of NEPA compliance regarding environmental impacts that occur within a foreign country that does not require preparation of a complete EIS.

Q. Could CEQ establish that an EIS is not necessary for U.S. activities abroad?

A. No. CEQ cannot repeal a law passed by Congress. What we can do and propose to do is devise regulations that will comply with the law but allow federal agencies enough flexibility to accomplish their statutory missions and objectives abroad.

Q. Should NEPA be amended to exclude U.S. agency activities abroad?

A. No.

Q. Why not?

A. U.S. agencies and foreign countries will benefit by being fully informed of the environmental effects of their actions. U.S. agencies have a responsibility to avoid inflicting careless or inadvertent environmental damage as a result of their activities abroad.

Q. Are there other examples of U.S. laws that apply to U.S. activities abroad?

A. Yes. One is the Civil Rights Act and related nondiscrimination laws which apply to all federal agencies and their activities, wherever they take place. Another is the Foreign Assistance Act, which specifically requires AID to consider the degree to which a foreign country has integrated women into the economy before approving a development project. The same law also requires AID to consider environmental consequences of its development projects abroad.

Q. What are CEQ's principal concerns in developing regulations regarding NEPA's application to U.S. activities abroad?

A. CEQ has three major concerns:

We want to insure that if a product is banned or strictly regulated in the United States on health grounds the U.S. agency and other officials are at least aware of this before providing the product to a foreign country.

We want a minimum full disclosure before a U.S. decisionmaker takes an action which threatens natural resources of global importance.

We want to be sure that the U.S. decisionmaker is aware of what she or he is doing if the actions, however beneficial to one country, cause a significant adverse effect in another country.

EFFECT ON U.S. EXPORTS

Q. How will NEPA affect the "average" U.S. exporter?

A. The "average" exporter will not be affected by NEPA because most exports do not require specific federal agency approvals.

Most exports financed by Ex-Im Bank, for example, do not involve significant environmental effects and therefore would be exempt from the environmental statement process. Where there is doubt, brief (2-3 page) environmental assessments would be prepared, and CEQ anticipates that generally no further environmental analysis would be required.

Q. Can you give more examples of exports financed by Ex-Im Bank that would require a foreign environmental statement?

A. Exports that significantly affect the environment where Ex-Im Bank finances the export are the kinds of actions for which foreign environmental statements would be prepared. Examples are a nuclear power plant, a toxic pesticide, or a petro chemical complex. Most export items financed by Ex-Im Bank such as sewing machines, commercial aircraft, machine tools, are likely either

to be exempt from NEPA or to require only a brief 2 or 3 page environmental assessment.

Q. How can the Export-Import Bank protect the international competitive position of U.S. exporters who get Ex-Im financing if Ex-Im prepares foreign environmental statements that discuss highly guarded details of the item to be exported?

A. Under CEQ's proposal the foreign environmental statement may be exempted from public review and comment if Ex-Im determines that public disclosure would compromise necessary commercial confidentiality and would thereby frustrate Ex-Im Bank's statutory objective to promote exports.

JUDICIAL REVIEW

Q. Won't CEQ's regulations make it possible to bring lawsuits that will cause delays and hurt the U.S. balance of trade?

A. Regardless of what CEQ does, someone can file a lawsuit claiming a NEPA violation. For example, Ex-Im Bank was sued in January 1977 for non-compliance with NEPA long before CEQ developed its proposal. CEQ hopes its regulations will minimize litigation and delays. The regulations would provide a practical, expeditious way of complying with NEPA.

Q. Are there any court decisions dealing with NEPA's application to U.S. activities abroad?

A. Yes. Recently the D.C. Circuit Court of Appeals held in the case of *Sierra Club* v. *Adams* that the Department of Transportation's EIS on its Darien Gap highway project in Panama was legally adequate. The Court assumed an EIS was required in such circumstances and therefore did not decide that issue. Other cases are outlined in the attached memorandum by CEQ Chairman Charles Warren to Heads of Agencies dated January 19, 1978.

TIME REQUIRED FOR PREPARATION AND AGENCY REVIEW

Q. What is the minimum delay involved in preparing a foreign EIS?

A. CEQ believes that the preparation of a foreign environmental statement will not cause delays because the statement can—and should—be prepared at the same time that the agency is making its decision on whether to approve the project.

Q. Why should a foreign EIS be reviewed by other agencies?

A. NEPA specifies that statements be reviewed by agencies with special expertise or jurisdiction by law. The idea is to give federal agency carrying out the action the benefit of the views of the federal agencies that are best informed on the subject. For instance, if an agency proposes to distribute a particularly toxic pesticide in another country, it should have the comments of Agriculture and EPA—the agencies which know most about the subject.

SPECIAL CONSIDERATIONS

Q. What if a proposed U.S. federal action is expected to deal with an emergency?

A. CEQ's NEPA regulations allow waivers for emergencies and the provisions which deal with the application of NEPA to U.S. agency activities abroad will be part of CEQ's NEPA regulations.

Q. How can a federal agency prepare a foreign environmental statement for its activity in a foreign country if environmental impact information is not available?

A. Under CEQ's proposal agencies are required to make a good faith effort to obtain information. If it is unavailable the statement should note that fact.

NATIONAL SOVEREIGNTY

Q. Does environmental analysis by U.S. agencies of their activities abroad violate a foreign country's sovereignty?

A. No. It represents a respect for foreign sovereignty. Other countries have a right to know whether U.S. activities in their countries might get them into serious health, safety, and environmental problems.

Q. When a U.S. agency prepares a foreign environmental statement on a proposed activity in a foreign country, aren't we imposing our own environmental standards and values on that country?

A. No. The agency is first informing itself of potential environmental consequences of its own actions. The foreign country can use the environmental analysis as it sees fit and both the U.S. agency and the country can decide to proceed with environmentally damaging activities if they see fit.

THE LEGAL PARAMETERS OF NEPA—DOES THE CEQ'S GRASP EXCEED ITS REACH?

(By Charles N. Brower)

Since its initiation in the early 1970's, the building of the TransGabon Railroad has been seen by the Government of the Republic of Gabon as the backbone of that country's future economic development. Running over 700 kilometers across the heart of Gabon, the railroad passes through hitherto impassable rain forests, swamps and savannah, thus tying together for the first time the mineral rich areas of the interior with the coast. Its final projected cost is over $1 billion.

The TransGabon Railroad is not a project of American foreign aid. In collaboration with their former French colonial advisers, the Gabonese themselves have planned, initiated, and carried the project forward on their own initiative. They have entered into numerous individual contracts with foreign firms, and each such contract was the product of keen international competition. Only one small part of the project was initially provided to a firm from the United States. A New York engineering firm was engaged to share with a French firm and an Italian firm the duties of providing consultative quality control services for the continuing construction of the railway. Since provision of financing was a prerequisite to securing any part of the contract at all, the United States firm solicited and received a $4.6 million preliminary commitment from the Export-Import Bank of the United States.

Modest though the American involvement may be, it has now become the basis of an attempt to extend the procedural provisions of the United States National Environmental Policy Act into the heart of Gabon. Noting that the construction of the railroad may jeopardize the habitats of such endangered species as the gorilla, crocodile, forest buffalo and African elephant, the Natural Resources Defense Council and the National Audubon Society have alleged, in a lawsuit against the Export-Import Bank, that the Eximbank support of exports for the project constitutes a "major Federal action significantly affecting the quality of the human environment." They say that the National Environmental Policy Act requires the preparation, consideration, and circulation of a "detailed environmental impact statement" concerning the environmental cost of the TransGabon railway and its alternatives.

Several questions are presented by such an extraordinary application of United States environmental law. Was the National Environmental Policy Act ever intended to be applied in favor of the protection of foreign environments? Would such an application of NEPA amount to a practical infringement upon the sovereignty of Gabon?

Is the railway a "major Federal action" merely because it is partly financed by Eximbank credits? Would the requirement that an environmental impact statement be issued conflict with Eximbank's primary statutory duty to provide competitive support for United States exports?

I raise these questions not only because I happen to represent a group of exporters and manufacturers associations who have intervened in the lawsuit involving the TransGabon Railroad. I raise them not because plaintiffs in that case (represented by one of the panelists here this morning, Mr. Stoel) seek declaratory and injunctive relief with respect to a few projects in Gabon, in Indonesia, in Trinidad and Tobago, and in Zaire. I raise them because I am concerned about the practical impact of granting the relief plaintiffs seek and about the attitude of the Council on Environmental Quality on similar issues. Plaintiffs seek a declaratory judgment that NEPA applies "with full force and effect to Eximbank" and an injunction requiring the Eximbank to comply with Section 102(2)(C) of NEPA by preparing "detailed environmental impact statements" with respect to the export of "all . . . environmentally significant equipment and services." And, as we have heard this morning from the General Counsel of the Council on Environmental Quality, the CEQ has issued draft regulations concerning the extraterritorial application of NEPA which presumably would require environmental assessments of most, if not all, United States actions abroad, including Eximbank financing of United States goods and services to other countries.

These facts are most disturbing not only from a strictly legal point of view but from an economic one as well. To condition the offer of a United States export upon performance of an environmental analysis could only lead to one predictable result: that the foreign country would choose to avoid the delays, expense, and insult to its sovereignty of such gratuitous, unilateral environmental second-guessing by Uncle Sam by merely electing to take its business elsewhere. The winner would be the foreign competitor; the loser would be the United States exporter. The application of the NEPA environmental impact statement requirement over the impact of United States exports abroad would thus be not only extraordinary legally but disastrous economically. It should be squarely rejected for at least three reasons: (1) there is a conflict between NEPA and the primary statutory mandate of the Export-Import Bank to promote United States exports; (2) the foreign projects which are the recipients of Eximbank-supported exports of United States equipment and services are not "major Federal actions" within the meaning of NEPA: and (3) NEPA does not apply over even "Federal" actions where both the actions and their environmental effects are confined to the jurisdiction of a foreign sovereign state. I shall briefly discuss each of these three points this morning.

The question posed by the pending lawsuit and, to a large extent, by CEQ's draft regulations is whether the Export-Import Bank of the United States should issue environmental impact statements as a precondition to its credit support for the sale of specific items of goods and services abroad. The most immediate answer, I believe, is that such an application of NEPA would directly conflict with the primary statutory responsibility of the Eximbank, which, under the Export-Import Bank Act, is to provide "guarantees, insurance and extensions of credit at rates and on terms and conditions which are competitive with the Government-supported rates and terms and other conditions available for the financing of exports from the principal countries whose exporters compete with United States exporters." 12 U.S.C. § 635(b)(1)(A).

The preparation of an environmental impact statement or its equivalent would involve too much time, too much money, too much uncertainty, and too much plain and simple arrogance to be favorably received by foreign purchasers of American products. The requirement that such a statement be prepared would thus be in "clear and irreconcilable conflict" with the primary statu-

tory duties of Eximbank, and, under the case law, it is therefore not required under NEPA. Similar statutory conflicts have led the courts to preempt the requirement of an environmental impact statement in favor of the primary statutory mandates of no less than eleven federal statutes and affected agencies.

In the case of the Export-Import Bank, the conflict of statutes is clear. The Eximbank is specifically directed by statute to provide competitive terms of finance for American exports in order to maintain their parity with financial terms offered by the financial institutions of the governments of virtually all of the United States' major industrial competitors. Whenever the Congress has wished to make exception to the pure commercial criteria of Eximbank support, it has done so by express enactment. It has, for example, required the Bank to consider such factors as human rights and domestic employment effects in granting loans. But it has only done so by express enactment. Congress has made no such express provision for Eximbank to consider environmental factors, and none should be implied.

The second argument against extension of NEPA over United States exports is related to the first. Because United States exports are merely purchases of specific items of goods and equipment for use in foreign projects, these projects are not "major Federal actions" for which an environmental impact statement was ever intended to be prepared. Indeed, the CEQ's own current regulations recognize that federal presence in an otherwise private or local project will not "federalize" the entire enterprise for purposes of NEPA unless there is sufficient "Federal control and responsibility" over the project to give the United States decisionmaker some real authority and power.

Such Federal responsibility simply does not exist in regard to the use of United States exports, even when they are purchased with direct Eximbank support. There is a general presumption in domestic projects that federal financing or licensing may give the government effective control. However, these same factors do not hold true in the case of licenses or finance for American exports, where the recipient of Eximbank credit, for example, has been offered and accepted such credit only as an inducement to purchase American goods or services in preference to similar goods or services offered by foreign firms. The mere fact that Eximbank financed a few million dollars in professional engineering services for the billion dollar plus Gabon railway, for example, does not mean that that project was "ours." The only action affecting the environment whatsoever—the decision to build the railroad—was an exclusively Gabonese decision. It should not demand a United States environmental impact statement merely because there was some Federal presence.

The final point is that the Congress never intended to export the particularly rigorous and exactly procedural requirements of NEPA environmental impact statements to regulate events taking place exclusively within the sovereign territory of a foreign country.

First, I should make clear that I am concerned only with the preparation of United States environmental impact statements for exclusively foreign actions, be they assisted by exports or otherwise. I am not now questioning whether Federal agencies should apply environmental factors when considering regional foreign aid programs or major actions which may have a significant effect on the territory of the high seas or other "global commons." Indeed, as the CEQ has pointed out, both the Agency for International Development and several other federal agencies involved in the international sphere have already adopted environmental procedures and have on occasion issued full impact statements when such projects were involved.

What I am concerned with are actions having exclusively foreign effects. To take the substantial leap into evaluating the affairs of such foreign countries would be an extraordinary measure indeed. It is an established rule of statutory construction that United States law will be applied "only to conduct occurring within, or having effect within, the territory of the United States, unless the contrary is clearly indicated by statute." Our domestic statutory requirements are simply not appropriate for application overseas, lest our misdirected good intentions be allowed to rise to the level of "unwarranted encroachment upon the sovereignty of [a foreign] state."

It is for this reason that the Fair Labor Standards Act, the National Labor Relations Act and numerous other acts of Congress have been held not to be applicable overseas even to United States citizens working for United States companies. In such cases, it has been held that the regulation of local labor conditions rests solely with the foreign sovereign state. Certainly the prerogative of deciding the appropriate level of environmental protection for its citizens should also lie exclusively with the host state, unless under the rule of statutory construction I have mentioned, Congress has clearly expressed a contrary intention.

But there is nothing in either the language or the legislative history of NEPA to counteract this strong presumption. Although the text of NEPA does make broad reference to the protection of "man's" and the "human" environment, there is equal reference throughout the statute to purposes of preserving the environment of "the Nation" on behalf of future generations of "Americans." In both cases, this broad language serves only as a declaration of environmental policy concerns and does not govern the quite specific directives and duties which were imposed by NEPA upon Federal agencies. For these specific directives, one must look to the so-called "action-forcing" provisions of NEPA. And there is only one point where the statute makes express reference to global concerns among its "action-forcing" provisions. In one subsection, NEPA directs agencies to institute general programs "designed to maximize international cooperation" on environmental matters, with the important proviso that all such measures must be "consistent with the foreign policy of the United States." It is apparent however, from every other "action-forcing" provision of the statute, that Congress did not envision the application of its environmental directives where foreign countries would be exclusively affected. While Congress certainly was concerned with protection of the international environment, it intended that such protection be achieved only through cooperative and negotiated efforts, and not through the inflexible statutory procedure for formal, detailed environmental impact statements required domestically by other provisions of NEPA.

A flexible, cooperative approach to international environmental responsibilities—not the unilateral imposition of rigid statutory procedures—has been consistently adopted by both Congress and agencies of the Federal Government since the passage of NEPA. For example, when Congress sought to provide environmental responsibilities for the Government's foreign private investment insurance company, the Overseas Private Investment Corporation, it did not rely upon the terms of NEPA. but rather acted directly and expressly to insure that OPIC would consider environmental effects, but only in an informal, cooperative way.

Finally, contrary to the repeated representations of the CEQ and of CEQ Chairman Charles Warren, no court has ever ruled that environmental impact statements should be prepared for actions entirely within the jurisdiction of a foreign sovereign state. Two of the cases which the CEQ is fond of citing—the NRDC pesticide suit against AID and an earlier suit brought by the Sierra Club against several agencies involved with nuclear exports—were settled, and the courts thus never reached the issue. Although the CEQ states that the court in the Sierra Club litigation "assumed" that governmental actions abroad were covered by the Act, this interpretation is particularly peculiar in light of the fact that the programmatic impact statement by the Atomic Energy Commission which in fact settled the case expressly disavowed any application to foreign environmental impacts and limited itself only to activities and impacts in "the U.S. and [on] the high seas."

The other two cases cited by the CEQ—the Trans-Alaskan-Canadian pipeline case and the Darien Gap Highway case—both involved impacts within the United States as well as without. The issue of NEPA's independent foreign reach was never before the courts. As we stated only last month by the United States Court of Appeals for the District of Columbia Circuit—the jurisdiction in which all four of these cases were decided—"We leave resolution of this important issue to another day."

I should like to conclude by noting that just as the CEQ has been somewhat cavalier in its approach to the legal authority for the unilateral extension of NEPA to cover certain Federal actions abroad, so also has it obfuscated or misunderstood the true nature and effects which its proposals will have. The imposition of unilateral United States environmental impact statements for actions in foreign countries most certainly would involve the direct application of American public procedural standards in a highly offensive manner. This is particularly true in regard to exports. The preparation of a foreign environmental impact statement would require United States agencies to gather extensive foreign environmental information, "detailed statements" concerning localized impacts, and to subject this entire process to the scrutiny and second-guessing of American public comment. Such is the very essence of the environmental impact statement process.

The paternalistic assessment of foreign environmental factors through unilateral impact statements is simply in no way a cooperative "gift" which foreign governments may be expected to welcome and encourage. Rather, the very attempt to extend American environmental values in such a manner will ultimately lead only to the rejection of American exports, with no real effect upon the improvement of the foreign environment whatsoever.●

AMENDMENT NO. 1822

(Ordered to be printed and referred to the Committee on Banking. Housing, and Urban Affairs.)

Mr. HEINZ (for himself and Mr. STEVENSON) submitted an amendment intended to be proposed by them, jointly, to the bill (S. 2520), supra.

● Mr. HEINZ. Mr. President, on behalf of Senator STEVENSON and myself, I am submitting an amendment to S. 2520, a bill to extend and amend the Export-Import Bank Act of 1945, which will be marked up in the Banking Committee on Tuesday, May 2.

The amendment would add two new sections to the bill. One section would direct the President to begin negotiations at the ministerial level with other major exporting countries to end pred-

atory export financing programs and other forms of export subsidies.

At the present, the bank is directed in the act "to seek to minimize competition in government-supported export financing" and "to reach international agreements to reduce government subsidized export financing" in cooperation with other appropriate U.S. Government agencies.

The new international arrangement on officially supported export credits, agreed to last February, points out the need to renew and elevate the level of our efforts in this area. The new arrangement is only a voluntary understanding among the OECD countries and the Commission of the European Community and excludes certain credit practices and does not cover the financing of certain goods such as aircraft, nuclear power plants, and agricultural commodities. In addition to being inadequate, the agreement has been violated on numerous occasions and predatory export credit practices by other nations are expanding.

The other section would authorize the bank to provide guarantees, insurance and extensions of credit at rates, terms, and other conditions which are competitive with those provided by government-supported export credit instrumentalities of other nations. This amendment will signal the bank and other nations that the Congress, while advocating the elimination of predatory export credit practices, will support and encourage the bank to meet the competition where necessary and offer U.S. exporters competitive financing.

Mr. President, I ask unanimous consent that the amendment be printed in the RECORD.

There being no objection, the amendment was ordered to be printed in the RECORD, as follows:

Add the following new sections:

Sec. 2. The President is authorized and requested to begin negotiations at the ministerial level with other major exporting countries to end predatory export financing programs and other forms of export subsidies, including mixed credits, in third country markets as well as within the United States. The President shall report to the Congress prior to January 15, 1979, on progress toward meeting the goals of this section.

Sec. 3. Notwithstanding any other provision of law, the Export-Import Bank of the United States is authorized to provide guarantees, insurance, and extensions of credit at rates and terms and other conditions which are, in the opinion of the Board of Directors of the Bank, competitive with those provided by the government-supported export credit instrumentalities of other nations.●

LABOR LAW REFORM ACT—S. 2467

AMENDMENT NO. 1823

(Ordered to be printed and to lie on the table.)

Mr. KENNEDY (for himself and Mr. FORD) submitted an amendment intended to be proposed by them to the bill (S. 2467) to amend the National Labor Relations Act to strengthen the remedies and expedite the procedures under such Act.

● Mr. KENNEDY. Mr. President, I am today, along with Senator FORD, proposing an amendment to S. 2467, the Labor Law Reform Act of 1978.

I am a strong supporter of labor law reform and believe this bill provides a framework for restoring labor-management relations to the balance which has historically existed, but which has changed as the National Labor Relations Board became inundated in the last 10 years. I voted for this bill when it was considered in the Human Resources Committee and I expect to support it on the Senate floor.

But, I believe the bill could be made fairer for small businesses through an amendment to section 9 of the proposed act. Section 9 provides that when there has been an unlawful refusal to bargain prior to the entry of the first collective bargaining agreement, the NLRB may award compensation caused by the delay. Under the bill which comes before us the measure of compensation would equal the wages and other benefits employees were receiving at the time of the unfair labor practice, increased by a percentage equal to the average change in such wages and benefits. This would be determined by the Labor Department's quarterly report of major collective bargaining settlements.

This report measures the raises in wages and benefits for settlements involving 5,000 or more employees.

There is some evidence that this measure may not accurately reflect the real wages and benefits paid by smaller employers. If this measure is applied to them, they may pay a penalty for the interim period rather than merely making recompense.

A memorandum done in the Department of Labor, Bureau of Labor Statistics, dated January 16, 1978, by Diane C. Bayless, a labor economist, notes:

It is difficult to make any definitive statements pertaining to the size of wage changes for units with fewer than 1,000 workers because of the limited amount of data available. Some observations can be made however using data pertaining to small (fewer than 1,000 workers) unionized establishments from the Wage Developments in Manufacturing survey. First-year wage decisions in 1976 generally increased as the size of the establishment increased: Union establishments with fewer than 100 workers had an average wage change of 7.6 percent; units with 100 to 499 workers, 7.4 percent; 500–999 workers, 8.4 percent; and establishments with 1,000 workers or more, 8.9 percent. Other data from this survey indicate that during the past 8 years first-year wage changes for union situations with fewer than 1,000 workers have generally lagged behind those of the major collective bargaining units by an average of 1.4 percentage points, although in 1973, increases for the smaller units were $\frac{2}{10}$ of a percentage point higher than those of the major units.

There is thus a basis for having the Department of Labor consider in some detail whether smaller employers pay less in wages and benefits. If so, the Department should develop a factor to take this into account.

This is fair because the back pay provision is meant to compensate employees and not to penalize employers. Since it is a make whole remedy we should refine the procedure for determining what the real deprivation has been.

Moreover, there is not necessarily the same degree of culpability in this unfair labor practice as there is in some others. The new procedure in the labor reform bill calls for a certification and election if the unit is determined by regulation to be a properly constituted collective-bargaining unit. It is, of course, necessary that we have rules for the expedition of elections, and I fully expect that these rules will be applied fairly. But this means that employer challenges must be left until after the vote. Employers may first be able to raise their legal questions and present factual issues to the Board during that period. If they think that they have a good case they might not want to negotiate before the Board has reached a decision for fear of institutionalizing that which they are challenging.

So, Mr. President, we propose an amendment which would mandate that the Department of Labor conduct a study of the extent to which the quarterly report appropriately reflects the collective-bargaining settlements of employers employing various numbers of people, including those employing less than 1,000. If the Secretary finds that the quarterly report of major collective-bargaining agreements does not accurately reflect the collective-bargaining settlements of smaller employers then he is mandated to employ a factor to the quarterly report to best effectuate the purposes of this section.

An important aspect of this provision is that the Department need only develop a factor through one survey and need not develop new indices to measure fair differentials for pay back awards. The Department of Labor estimates that a survey of smaller employers would cost about $700,000 a year. Any index which included subcategories, such as manufacturing and nonmanufacturing, would cost much more. And, if smaller employers are more resistant to filling out still another Government form, costs will also increase.

The Department may have less than 200 cases of this sort each year. It should not be forced to incur this cost for those cases. Most importantly, the small employer should not be required to fill out a report of the terms of a collective-bargaining agreement each time he enters one. Reporting burdens should not be lightly added to his shoulders. Yet, a separate index for small employers would require this.

Mr. President, I think that this is a fair modification in section 9. I hope that it is adopted when the Senate considers S. 2467.●

INTERNATIONAL SECURITY ASSISTANCE—S. 2846

AMENDMENT NO. 1824

(Ordered to be printed and referred to the Committee on Foreign Relations.)

Mr. KENNEDY (for himself, Mr. SAR-

BANES, and Mr. PELL) submitted an amendment intended to be proposed to the bill (S. 2846) to amend the Foreign Assistance Act of 1961 and the Arms Export Control Act, and for other purposes.

ASSISTANCE TO CYPRUS

● Mr. KENNEDY. Mr. President, I am submitting today, for myself and the Senator from Rhode Island (Mr. PELL) and the Senator from Maryland (Mr. SARBANES), an amendment to S. 2846, the pending International Security Assistance bill, to provide $15 million in humanitarian assistance to the people of Cyprus next fiscal year.

The purpose of this amendment is simply to continue American humanitarian concern and assistance to Cyprus at a level equal to that offered this year. For little has changed for the refugees on Cyprus. In the nearly 4 years since the massive Turkish invasion and military occupation of close to half the island, none have been able to return to their lands or homes. Special refugee related programs continue to burden the Government of Cyprus—their proposed program for next year amounts to over $100 million.

Thanks to the generous support of the international community, the work of the United Nations High Commissioner for Refugees, and the effective programs of the Cyprus Government, the basic needs of the refugees have been met. But lingering rehabilitation and social welfare problems continue, and the impact of the refugees is still strongly felt. Until an equitable solution is found to the human and political tragedy of Cyprus, the refugees and other needy people on Cyprus will continue to need our help and our concern.

Mr. President, the United States has contributed generously to the international programs for relief on Cyprus—some $85 million to date. But this sum pales in comparison to the total amount the displacement of nearly 200,000 people has cost the Government of Cyprus, and the disruption to the land and economy of the island caused by the Turkish army of occupation.

Next year the Government of Cyprus has identified over $100 million in special projects relative to helping the refugees normalize their lives, and helping local communities to cope with the burdens imposed by their presence. Cyprus has asked for continued international assistance, and the office of the United Nations High Commissioner for Refugees remains as a focal point for international contributions—with programs for both Cypriot-Greeks and Cypriot-Turks.

Yet, despite these continuing needs, the administration has submitted a request that reduces the modest American contribution of this year by two-thirds—from $15 million to only $5 million. At the same time they have requested additional military assistance for Turkey.

I believe it is unacceptable to shortchange the humanitarian assistance program for Cyprus for additional military aid to Turkey—even as Turkey's military occupation of Cyprus remains the root cause of the humanitarian problems on Cyprus.

Mr. President, there is no magical figure that represents a fair American contribution to the Cyprus relief effort—given the $100 million program proposed for next year. But clearly it should not be less than what we contributed to a similar program this year.

The purpose of the amendment we are introducing today is to sustain America's contribution to Cyprus next year at the same level authorized for this year. There is no valid reason to cut it. The refugees are still displaced. Humanitarian needs still exist. Justifiable programs under international auspices have been proposed. Assistance has been requested. And there is no question that the funds can and will be used effectively for humanitarian purposes by the United Nations High Commissioner for Refugees and the Government of Cyprus.

For all these reasons—as well as the symbolic concern that America should not, at this critical juncture, signal a reduced concern for the people of Cyprus—I believe this amendment is essential, and I am hopeful that it will receive favorable consideration by the Foreign Relations Committee during its markup of the security-supporting assistance bill.

Finally, Mr. President, for the record, I would like to insert background documentation on how humanitarian funds have been expended to date on Cyprus, and the program proposed for next year. Again, it is important to recognize that international contributions to the program on Cyprus serve to benefit both communities—with 80 percent earmarked for Cypriot-Greeks and 20 percent for Cypriot-Turks, reflecting the population of the island.

I ask unanimous consent that these two documents be printed at this point in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

Cyprus has so far received donations amounting to 100 million dollars (41.7 million pounds) for the relief of refugees and other needy people, it was officially stated in Nicosia on April 3.

The contributions were made through the U.N. High Commissioner for Refugees, who was appointed by the U.N. Secretary-General in August 1974 as coordinator of humanitarian aid to Cyprus.

An official statement said donations from August 1974 to the end of December 1977 totalled 35.4 million pounds (85 m. dollars) in cash and in kind. Contributions for 1978 made so far amount to 6.3 million pounds (15 m. dollars).

The statement said out of the total, the United States contributed 83 million dollars (34.6 million pounds). The United States also donated, for humanitarian purposes, a sum of 1.8 million pounds (4.2 m. dollars) to the International Committee of the Red Cross and 83,000 pounds (200,000 dollars) to the humanitarian sector of the U.N. peacekeeping force in Cyprus.

U.S. AID

Thus the total amount contributed by the United States is 36.5 million pounds (87.4 million dollars), the statement added.

In accordance with the wish of the contributors, some 19 per cent of the aid provided has been allocated for the needs of needy Turkish Cypriots.

Therefore, the actual sum provided for refugees through the UN High Commissioner for Refugees during the period 1974–1977 was 28.5 million pounds (68.5 million dollars).

Aid for the relief of refugees has also been received from various organisations and individuals in Greece, Greeks and Greek Cypriots living abroad, foreign humanitarian organisations and friendly countries.

This aid was both in cash (6.1 m. pounds) channelled through the Special Relief Fund and in kind (16.4 million pounds).

The statement also pointed out that foreign aid covered only part of the expenditure for the relief of the 200,000 refugees. The balance was met from the government budget.

SUPERVISION

The statement gave a breakdown of how the money has been spent mainly on construction of houses, purchase of foodstuffs, social welfare, medical supplies and education. It stressed that programmes for the relief of refugees are agreed jointly with the U.N. High Commissioner for Refugees.

The U.N.H.C.R. Mission in Cyprus keeps continuous supervision over the implementation of the projects financed through the High Commissioner for Refugees and the disbursement of funds. The implementation of relevant programmes is also checked, in addition to the Auditor-General of the Republic, by officers of the U.N. Internal Audit Service who have visited Cyprus regularly for this purpose. Moreover, an on-the-spot audit has been carried out by U.N. External Audit Service officers. The audit includes a thorough scrutiny of the manner of implementation of the programme, the cost and progress made. In every case the auditors expressed their full satisfaction, and the Cyprus Refugee Relief Programme is reportedly one of the model operations of the U.N. High Commissioner for Refugees.

REQUIREMENTS FOR HUMANITARIAN AID THORUGH U.N.H.C.R. TO MEET CERTAIN ESSENTIAL BASIC NEEDS OF THE DISPLACED POPULATION OF CYPRUS IN 1979

(Prepared by Special Service for the Care and Rehabilitation of the Displaced)

NICOSIA,
November 1977.

GOVERNMENT OF CYPRUS

Introduction

In the period immediately following the Turkish invasion, when the economic and social dislocation was almost complete, when more than one third of the population became refugees, dependent on the state for their means of survival, when thousands of them were living in the open, when mass unemployment was prevalent, the need for substantial relief and humanitarian aid was unquestionable. The Government of Cyprus is grateful to the international community for the immediate support given without which even the most pressing basic needs could not have been met.

The Government itself, conscious of its responsibilities, drew up a plan to ensure the survival of the displaced and other persons immediately affected by the invasion. Allowances in money and in kind were granted to the refugee population, to provide them with the minimum basic food rations for subsistence, while unemployment and public assistance benefits continued to be paid under a more equitable scheme to the needy non-displaced. Benefits were also given to cover rent payments wherever necessary and basic consumption needs of water and electricity. However, subsistence living is not limited to food. People must be provided with a roof over their heads, with clothing and essential household needs such as a bed and blankets, their health and medical needs must be met, the children must go to

school, the disabled, the handicapped, the orphans, the elderly must be cared for.

Naturally, it was impossible to meet these needs out of domestic resources. Indeed, the substantial humanitarian and relief aid that came into the country was sufficient to meet but a part only of the total immediate requirements, and the state budgets were burdened to the maximum possible degree to cater for the emergency humanitarian priorities.

The philosophy of the Cyprus Government from the start was to render as many refugees as possible self-sufficient as quickly as possible, and not to allow them to become a parasite section of the community or to exploit their plight for political purposes.

Thus, for three years, the Government of Cyprus, with its amputated economy, through its own meagre resources and making the best possible use of the aid received, has struggled to provide that minimum of assistance essential for the survival of the thousands of displaced and unemployed, whilst at the same time embarking on a vigorous reactivation programme. The aid received helped to release resources for reactivation projects, the establishment of essential industrial concerns and the building of the urgently needed infrastructure in airport, ports, telecommunications, roads—to replace some of the losses without which survival was impossible.

A few examples will serve to illustrate the essentiality and immediacy of these needs: the only airport of the island—the Nicosia International Airport—became inaccessible as a result of the invasion and an airport had to be constructed overnight, at Larnaca. The largest port of the island—Famagusta—lies in the Turkish occupied area and the existing ports had therefore to be enlarged and improved as a matter of urgency; 72.5 percent of the existing tourist establishments (85 percent if one includes those under construction) are in the Turkish occupied area. The same situation applies to the mining and quarrying, manufacturing and other sectors—a large percentage of which lie behind the Attila Line.

At this point of time, the areas which cry out urgently for more humanitarian assistance are in the social infrastructural fields; the needs in housing, health, education, training and retraining. Our actual needs are not of course limited to these sectors. They are much larger and wider, as shown in the next Section and Appendix A. These sectors have been chosen as the most urgent in the humanitarian field for overseas assistance. To replace capital stock lost in the occupied areas will take many years since such stock is estimated at about 6 billion American dollars. To put this figure into perspective, it suffices to mention that it represents almost ten times the Gross Domestic Product of the country for 1976 at constant 1973 market prices.

Total needs of the displaced

Although the problem of direct dependency of the displaced on Government assistance is decreasing, the financial burden on the Government is expected to go on rising. The level of expenditure by the Government for this purpose will continue its upward trend (see Appendix A). This is mainly due to the need to improve allowances and schemes, to the increasing recurrent cost of services as a result of inflation, to the differentiation and extension of programmes and services to cover needs not previously catered for and to the increasing capacity of the economy to implement housing projects.

A breakdown of Government expenditures for the displaced can be found in Appendix A. There, an attempt is made to analyze the burden on the Government Budgets of the various services, programmes and schemes and to forecast anticipated developments in the years to come. The Appendix shows clearly that the major part of the financing of these schemes has fallen on the Special Relief Fund. Still, the Ordinary and Development Budgets, as well as the different Social Funds, are estimated to bear a significant proportion of the cost of these services, as they were used as alternative sources of financing allowances and services to the displaced. It should be noted that even these sums do not represent the total picture since there are areas of the Government Budget where it is difficult to make an estimate of the direct cost of services to the displaced.

The figures in Appendix A are indicative of expected developments in the years to come. Direct allowances from the Special Relief Fund are anticipated to decline as more and more people become gainfully employed and self-sufficient. Nevertheless, the Government will continue supporting many of them either because they are unemployable, old or handicapped, or because their incomes do not reach the minimum acceptable standard of living, or yet as part of the scheme to provide incentives.

Appendix A also shows the rising importance of the housing programme which will be commanding increasingly higher proportions of the total expenditures for the displaced. Similarly social welfare components and other social services costs will be increasing as new institutions specially set up for the displaced become operative.

Thus, it can be seen that the Government in 1976 spent U$105 mln. on meeting refugee needs and is expected to spend as much as U$110 mln. in 1977.

Humanitarian aid requested through U.N.H.C.R. for 1979

The information provided above on the actual and forecast levels of expenditures to meet the basic needs of the displaced gives a clear picture of the changing emphasis adopted by the Government in its effort to alleviate the sufferings of the displaced. The request for assistance in a limited number of fields is an expression of this change in emphasis.

The request for humanitarian aid through the U.N.H.C.R. for 1979 will be under the following headings:

1. Housing

Housing needs continue to be pressing and beyond the economy's capacity. The number of displaced households is estimated at around 50,000.

Up to the end of 1976 the planned number of housing units to be used for the needs of the displaced was 17,400 including the use of abandoned Turkish Cypriot houses (7,500), newly built low-cost housing projects (about 5,000), and self-help housing schemes. Most of the 5,000 low-cost housing units will be ready in late 1977. There are further plans for additional low-cost housing estates with a capacity of 4,500 units (2,500 in 1977 and 2,000 for 1978) and another 1,500–2,000 units in self-help housing projects as well as for the repair of more abandoned Turkish Cypriot houses.

In all, it is estimated that by mid-1979 a total of about 24,000–25,000 households will have been accommodated in newly erected or available vacant housing units, although it must be stressed that many of these vacant houses will need additional repairs and installation of sanitary and other facilities to reach acceptable hygienic standards. Thus, even by 1979, only about half of the displaced will have been accommodated and the deficit in housing will be of the order of about 25,000 units without taking into account the expected natural increase of the population as well as the deficiencies in low-cost housing existing prior to the invasion and anticipated under normal circumstances irrespective of the invasion.

These needs were also ascertained by a U.N. expert on housing who visited Cyprus to make a study on housing in 1972.

The current housing programme envisages the construction of another 2,000 units in 1979 at an estimated cost of C£14 mln. or about U$33.6 min. In addition, there are plans for more self-help housing units whose estimated cost for 1979 is approximately U$10 mln..

2. Education

About one third of the schools and educational facilities of the public and private educational systems were situated in the occupied areas. It was clearly impossible to accommodate in the remaining schools all the children of elementary and secondary school age that had to be provided with school places, in addition to meeting the natural annual increase of the school population. What made matters worse was the influx of the displaced into urban areas where shortages of school places were already acute even before the invasion.

The use of school buildings on a double shift basis, the renting of premises adjacent to school buildings and the erection of temporary structures and tents helped to ease some of the pressure. Eventually, a programme for new school construction was adopted, since temporary structures and tents were entirely unsuitable for the purpose.

By the end of 1976, it was possible to replace only about 6% of the elementary school buildings lost in the Turkish occupied area, while in public secondary general and technical education about 15% of the schools situated in the Turkish occupied area had been replaced.

Special education for the handicapped (deaf, mentally retarded, crippled, etc.) also suffered severe losses: almost 60% of such schools lay in the Turkish occupied area, with their valuable facilities and equipment. Current programmes provide for the replacement of about a quarter of these.

Existing programmes envisage the construction of a number of new school buildings for all levels of education, particularly in, or adjacent to, housing estates for the displaced, while a limited number of abandoned Turkish Cypriot school buildings have been suitably repaired and have been put to use by the educational services. Parallel to the need to provide school buildings and equipment, the Government also had to shoulder the additional burden of providing free education to displaced and needy children.

However, serious shortages persist and only an intensive long-term programme providing for the construction of more elementary, secondary and other school buildings will be able to provide the necessary infrastructure and relieve school building shortages. The programme under preparation for 1979 is expected to include a number of school buildings for the displaced. Indeed, it is expected to make provision for 5 elementary school buildings (£120,000 each, including land costs) and 2 secondary school buildings (£170,000 each, including land costs) for a total of about C£940,000 or US$2,256,000. All such schools will be built in or near the new housing estates.

3. Health

The dislocation caused to the health services has been great. Two of the six public district hospitals were in the occupied territories, representing about 16% of total bed capacity of this type, while more than 34% of the bed capacity of Rural Health Centres also fell within the area under the control of the Turkish army. At the same time, some 8% of capacity of specialised hospitals was either lost or destroyed by aerial bombardment, whilst the private health sector lost about 24% of its capacity.

The importance of these losses is much more significant than the relative proportions betray, due to the fact that existing hospital capacity and facilities in the areas under Government control were already outmoded and inadequate to meet pre-invasion needs. It is indicative of the pre-invasion situation that the Government was in the process of signing a contract with a team of Health Systems Consultants for the preparation of a feasibility study for a new Nicosia General Hospital as well as for individual studies for the replacement of the Larnaca District Hospital and the proper expansion of the other District Hospitals which were already proving to be inadequate.

Furthermore, the number of persons entitled to free medical treatment and medicines increased, as it became necessary to provide these services to the displaced and those who became needy as a result of the economic distress brought about by the invasion. This multiplied the annual costs and the pressure on already grossly insufficient resources. In order to meet the increased demand, the Government resorted to emergency measures such as the renting of private clinics, the expansion of capacity by the erection of prefabricated patient wards or even the use of corridors and every vacant corner of the Hospitals.

The concentration of the displaced in the urban centres of Nicosia, Limassol and Larnaca completely upset the already delicate balance between supply and demand of health services in these areas.

The situation is most critical in Larnaca where a pre-second world war building, badly organised and inadequately equipped with all sorts of insufficiencies and crammed in a most restricted space, had to be almost doubled in capacity with the construction of prefabricated wards and the use of every available corner as patient accommodation. Its capacity reached 150 beds as compared to 86 in the pre-invasion days.

The Government of Cyprus is proceeding with the preparation of a feasibility study for a new Larnaca Hospital, as a matter of priority. It has already allocated the required land and foreign aid is required in order to finance the building of the new Larnaca District General Hospital over the next few years. It is anticipated that this Hospital will be of a capacity of 250 beds. The cost of each bed, until final completion, is estimated at around C£10,000. The total required outlay will be approximately C£2.5 mln. or U$6.0 mln.

4. Training and retraining needs

The direct effects of the war, the displacement of such a large proportion of the population, the resettlement pattern in the Government controlled areas, the relative scarcity of natural resources, the loss of accumulated stock of capital, the new directions of economic policy, and the need for the restructuring and diversification of the economy have meant that the country had to rely to a far greater extent on its human resources. But to rely on this source also implies continuous training, retraining and upgrading of the available labour in all its aspects. The need for this approach can be seen in the following paragraphs:

(1) The impact of the war on the availability of manpower was indeed substantial:

(a) The loss of human life (dead and missing) is estimated at about 1 percent of the population, a very high proportion indeed.

(b) The temporary employment of workers abroad, most of whom are construction workers, coupled with the increased needs of workers at home for the intensive housing programmes, the industrial investment programmes and the infrastructural works programmes in roads, ports and dams, make demand for construction workers disproportionately higher than it would otherwise have been, since it is necessary to meet both external and domestic obligations.

(c) The number of war disabled and handicapped who had to drop out of active employment was quite considerable, estimated at about 0.2 percent of the population.

These losses have created the following needs:

(i) the need for heavier reliance upon the female force, which needs to be trained before it can become actively productive;

(ii) the need to train and retrain people for temporary employment in the construction sector;

(iii) the need to provide special training facilities for war disabled and handicapped to fill some of the gaps appearing in the supply of skilled labour.

(2) The loss of natural resources such as agriculturally fertile land, mining and quarrying resulted in the further shrinking of the employment significance of these sectors. Due to the small size of the country, the fact that the non-occupied area consists largely of mountains and the great scarcity of water from which Cyprus has always suffered, it was impossible to satisfy, with adequate fertile land or land suitable for animal grazing, the thousands of displaced farmers.

Figures on the gainfully employed population reveal a telling picture: the percentage of the population gainfully engaged in agriculture shrank from 37 percent in 1973 to 30 percent in 1976. It must be emphasized that overall gainful employment was almost 40 percent lower in 1976 as compared to 1973. A similar picture has developed in the tourist sector as tourist activity fell by more than 50 percent (not counting the Lebanese who are not normal tourists) compared to preinvasion levels, due to the loss of such a high proportion of the tourist establishments and the general prevailing situation. Many of the people previously engaged in primary activities cannot be absorbed in other sectors since they do not possess the necessary skills. Without retraining programmes, their industrial and occupational mobility would remain low and would aggravate skilled shortages.

(4) With the export orientation of manufacturing activity and the desire to improve the export of other more sophisticated goods and services a pressing need for upgrading training constantly arises. People in all grades have to be trained to be able to face the highly competitive situation of external trade.

(5) In general, the heavier reliance upon the human factor after the loss of both natural resources and accumulated capital stock, demands a more flexible, adaptable and dynamic labour force. All these ingredients cannot be met without constant training, retraining and upgrading.

For the above reasons, the Government of Cyprus deems essential the provisions of aid to facilitate the creation of the infrastructure for training and retraining of war disabled and other labour. The programme for 1979 envisages the erection of a new complex of workshops to train displaced workers at an estimated cost of about £120,000 (U$288,000).

Conclusion

By application and sheer hard work, by good planning and the careful use made of the aid received, the Cyprus people and Government have managed to survive, and the progress made is indeed creditable. But this must not be allowed to create false impressions as to the real position and the needs still to be met.

No country in the world could have suffered the catastrophe which Cyprus has suffered and be expected to have recovered in three years or to have replaced to any adequate degree the immense losses sustained. Three years after the invasion the emergency pressing needs of survival of the displaced, such as food, may have been met but the destructiveness of the war lingers. Indeed, the consequences of the invasion will continue for many years to come. The magnitude of the problem facing the Cyprus Government can only be appreciated if one remembers that the displaced population corresponds, in U.S.A. terms, to 83 million people, and that some 40 percent of the area of the Republic, representing the richest part and accounting for 70 percent of the total productive capacity of the island, came under Turkish occupation. The massive burdens created by the invasion has therefore to be borne by only 30 percent of the economic wealth of the country. It would be impossible to conceive that such a high proportion of the population, deprived of all its possessions and thrown onto 30 percent of the economic resources of the island, could be absorbed, fed, clothed, given employment, provided with the necessary houses, schools, hospitals, roads, factories, etc., in three years.

In meeting the basic humanitarian needs of the displaced population the Government has, where possible, endeavored to utilize relief assistance in such a way that it may be turned to good use, and not be wasted, when a political solution is found and the displaced persons return to their homes. An illustration of this is the construction of housing so that it may serve the low income sections of the population when no longer required for the accommodation of the displaced persons.

Foreign aid should continue in order to cover the shortages that appear from the losses in accumulated capital stock, and the need to retrain the labour force to meet the new challenges and new directions of policy. Capital stock in particular cannot be replaced over a short term. The process is long and it requires vast amounts of scarce investible funds. Hence the new request of the Government of Cyprus to channel foreign aid received through U.N.H.C.R. into the fields of housing, education, health and labour training. The attached Appendix B gives a tentative picture of the projects in these fields that are being prepared for implementation in 1979.

APPENDIX A

EXPENDITURES[1] ON THE DISPLACED FROM ALL SOURCES

[In thousands of dollars]

APPENDIX B

SUMMARY TABLE OF GOVERNMENT OF CYPRUS PROGRAMMES FOR 1979 IN THE FIELDS OF HOUSING, HEALTH, EDUCATION AND TRAINING

[In thousands]

	Cyprus pounds	U.S. dollars
Housing:		
Low cost housing estates (providing for 2,000 units)	14,000	33,600
Self-help housing projects	4,200	10,000
Education:		
5 elementary school buildings	600	1,440
2 secondary school buildings	340	816
Health: Larnaca Hospital (250 hospital bed capacity at a cost of about £10,000 (each bed)	[1] 2,500	6,000
Training, retraining and upgrading: A complex of workshops	120	288
Total	21,760	52,144

[1] To be spread over a number of years.●

NOTICES OF HEARINGS

SUBCOMMITTEE ON AGRICULTURAL PRODUCTION, MARKETING, AND STABILIZATION OF PRICES

● Mr. HUDDLESTON. Mr. President, I wish to announce that the Subcommittee on Agricultural Production, Marketing and Stabilization of Prices will meet Tuesday, May 2, to hear Secretary of Agriculture Bob Bergland present the administration's plan for a comprehensive crop insurance and disaster assistance program. The hearing will begin at 10 a.m. in room 324. Secretary Bergland will be the only witness, but public hearings will be scheduled at a later date. Anyone wishing further information should contact the committee staff at 224–2035.●

SUBCOMMITTEE ON CITIZENS AND SHAREHOLDERS RIGHTS AND REMEDIES

● Mr. METZENBAUM. Mr. President, the Subcommittee on Citizens and Shareholders Rights and Remedies of the Committee on the Judiciary, will hold a hearing on Wednesday, May 10, 1978, on the "Rights and Remedies of Insurance Policyholders, Part Two: Mutual Insurance Companies." The hearing will commence at 9:30 a.m., in room 5110 Dirksen Senate Office Building.

Anyone wishing to submit testimony for the record, contact Mrs. Ricki R. Tigert, counsel of the subcommittee, 4A Russell Senate Office Building, Washington, D.C. 20510, phone (202) 224–4703.●

CONTINUATION OF HEARINGS ON S. 35

● Mr. BAYH. Mr. President, the Subcommittee on the Constitution has scheduled two additional days of hearings on S. 35, proposing legislation to amend section 1979 of the revised statutes, for Tuesday, May 2, 1978, beginning at 10 a.m. in room 6226, Dirksen Senate Office Building, and Wednesday, May 3, 1978, beginning at 9 a.m. in room 1202, Dirksen Senate Office Building.

Any persons wishing to submit written statements for the hearing record should send them to the Subcommittee on the Constitution, suite 102–B, Russell Senate Office Building, Washington, D.C. 20510.●

SUBCOMMITTEE ON ADMINISTRATIVE PRACTICE AND PROCEDURE

● Mr. ABOUREZK. Mr. President, I wish to announce that the Subcommittee on Administrative Practice and Procedure of the Committee on the Judiciary, will have a meeting for markup of pending legislation. The meeting will be on May 3, 1978, at 10 a.m., S–126, the Capitol.●

SUBCOMMITTEE ON PARKS AND RECREATION

● Mr. ABOUREZK. Mr. President, yesterday I submitted for the RECORD announcement of a public hearing to be held by the Subcommittee on Parks and Recreation on Friday, May 5, 1978, and inadvertently, one bill was omitted from the list of bills to be heard at that hearing.

The bill which should be added to the list of bills to be heard on May 5 is S. 1234, a bill to amend the Wild and Scenic Rivers Act.●

ADDITIONAL STATEMENTS

NATIONAL DEFENSE

● Mr. GOLDWATER. Mr. President, the question of just where we stand militarily in comparison with the Soviet Union is becoming more and more important to the American people. We can no longer afford to listen to the antidefense lobby and its repeated arguments that overall U.S. military strength remains at least equal to that of Russia. The facts are becoming clearer every day. As Gen. Alexander M. Haig, Jr., Supreme Allied Commander in Europe, stated recently, and I quote him—

Today the greatest single threat to stability and peace continues to reside . . . in the immediate presence of massive Soviet military power . . . The greatest peacetime aggregation of military power the world has ever seen.

Mr. President, a frightening picture of just where we stand was presented recently at the South Carolina Department Convention in Greenville by the American Security Council's Coalition for Peace Strength Program. This report was prepared by Philip C. Clarke and presented to the convention by Maj. Gen. J. Milnor Roberts. It was entitled "National Defense: While There Is Yet Time."

The speech follows:

NATIONAL DEFENSE: "WHILE THERE IS YET TIME"

Suddenly and without warning, hundreds of Soviet-bloc divisions spearheaded by 15,000 assault tanks and amphibious armor, spin from Warsaw Pact maneuvers and lunge westward. Their target: the English Channel.

Swarms of Soviet warplanes, armed with missiles, bombs and cannisters of death-dealing chemicals, strike NATO bases and stockpiles of U.S. tactical nuclear weapons.

Outnumbered and outgunned allied forces retreat before the massive Communist blitzkrieg. At sea, Soviet submarines, prepositioned hours before, intercept and attack U.S. convoys attempting to rush reinforcements. Behind the lines, Communist saboteurs emerge in Western Europe's cities and industrial centers, creating widespread havoc.

With Western Europe about to be overrun, the President of the United States is faced with a life-or-death decision: To accept the Soviet conquest of all Europe or to unleash America's nuclear counterforce, thereby risking a world-wide holocaust.

This "worst-case" scenario may never happen. But the possibility that it could occur gives allied leaders nightmares.

"Today," says General Alexander M. Haig, Jr., Supreme Allied Commander Europe, "the greatest single threat to stability and peace continues to reside—as it has for 29 years—in the immediate presence of massive Soviet

military power . . . the greatest peacetime aggregation of military power the world has ever seen."

In attempts to reduce this massive threat to world peace, successive U.S. Presidents over the postwar years have initiated talks aimed at controlling arms and reducing nuclear weapons stockpiles.

In contrast to U.S. good faith, Soviet leaders have used the arms talks to camouflage Russia's continuing all-out military buildup while seeking to stall ours.

Rather than acting fully to meet the growing Soviet danger, U.S. Administrations have adopted the more politically expedient course of reassuring the nation—and themselves—that overall U.S. Military strength remains at least equal to that of Russia.

President Kennedy, in his 1963 State of the Union Address, said: "The cost of freedom is always high, but Americans have always paid it . . ."

In January, 1978, President Carter told the NATO Council in Brussels that "our defense must always be strong enough to deter any thoughts of aggression . . . We must be prepared for combat we always hope to avoid."

Words, however brave and reassuring, are not enough. Soviet leaders are fully aware of our actual military strength and weaknesses. They are quite capable of calculating the risks of further aggression and their chances of exacting more tribute with nuclear blackmail.

What Americans desperately need are not simple reassurances from Washington, but the hard facts—however shocking—on the true state of our defenses.

In the 1962 Cuban missile crisis, U.S. military power was such that Nikita Khrushchev was forced to back down and pull his missiles out of Cuba. From that point on, the Soviets embarked on an all-out drive to wrest strategic superiority from the U.S.

In the 1973 Arab-Israeli war, Russia's power was such that the threat of Soviet intervention forced America's ally, Israel, to halt its drive against Egypt. And had there been a U.S.-Soviet confrontation in the eastern Mediterranean, Admiral Elmo Zumwalt, then U.S. Chief of Naval Operations, says "we would have lost."

In March, 1978, Russia's deputy defense minister, Nickolai Vasilyavich Ogarkov, told visiting U.S. Congressman John Breckinridge: "You once had military superiority and felt secure. You no longer have that superiority and you will never have it again. And now you will know what it means to feel threatened."

Teddy Roosevelt is remembered for his policy of keeping the peace: "Talk softly and carry a big stick." In a speech at Wake Forest University, President Carter warned the Soviets to restrain their massive arms buildup and quit their military meddling in Africa and elsewhere, or, the President said, we would have to increase our defenses. But some critics contend that the President, while talking tough, is carrying only a relatively small stick.

The Soviets appeared singularly unimpressed by Mr. Carter's words. They quickly responded with some blunt talk of their own, accusing the President of "gross blackmail . . . impermissible in international relations" and warning of a "sharp increase in the danger of a nuclear missile catastrophe."

In so many words, the Kremlin demanded that the U.S. quit bluffing and accept without further delay Soviet terms for a new strategic arms limitation treaty—a treaty that would assure Russia's superiority over the U.S. for the foreseeable future. And the Soviets gave the brush-off to President Carter's admonition against Russia's "excessive" arms buildup and intervention in local conflicts.

Instead, the Soviets are speeding development of eight new missile systems, some powerful and accurate enough to destroy our aging ICBM's in a surprise first-strike before they could retaliate. They also are building a nuclear super-submarine comparable to our yet-to-be completed Trident, and are testing a wide range of exotic new space weapons including a "killer satellite" capable of shooting down our vital reconnaissance and communications satellites.

What seems clear is that the U.S. has waited about a dozen years too long before attempting to overcome the Soviet drive for world supremacy. The plain fact is that in raw military power, the U.S.S.R. already has surpassed the U.S. in most major areas. And knowing this to be so, the Soviet leaders feel they are now in a position to call the tune.

The latest statistics spell out clearly just how the U.S., mesmerized by detente, has fallen behind.

Since 1964, Russia has increased its strategic nuclear capabilities by roughly 500 percent. It now has just under 4,000 strategic offensive weapons—missiles and bombers—compared to our 2,125. That's a Soviet advantage of nearly 2 to 1. According to Dr. Eugene Wigner, Princeton University's Nobel award winning physicist, the Soviet lead in total explosive power is 6 to 1 over the U.S.

The new Soviet navy is now the world's largest. In surface ships and submarines, it outnumbers the U.S. Navy by 1,400 to 453. And our once proud Navy may soon be reduced to the status of a convoy escorting force.

In strategic defensive weapons—surface-to-air missiles and jet fighters—the Soviets boast an overwhelming advantage—14,664 to only 324 for the U.S. It has 2,600 interceptor planes to just 324 for the U.S. It also possesses 12,000 SAM's (surface-to-air missiles) to our none, and 64 ABM's (anti-ballistic missiles) to our none.

In ground forces, the Soviets have expanded from 140 divisions in 1964 to more than 170 divisions today. One half of this huge force is positioned for war in Europe. In military manpower, the U.S.S.R. leads the U.S. by 4.8 million to 2.1 million. All major combat units in the Red army are trained and equipped for chemical (i.e. poison gas) warfare. Our armed forces have virtually no CW capabilities or defenses.

In conventional weapons, the disparity is even more alarming: 50,000 Soviet tanks to 10,000 for the U.S.; 55,000 Soviet armored vehicles to our 22,000; 20,000 Soviet artillery pieces to our 5,000 and 7,000 heavy mortars to our 3,000.

In virtually every major arms component except helicopters, the U.S.S.R. possesses overwhelming superiority over the U.S., in numbers, firepower and, to a growing degree, technical quality.

Soviet military spending, in real terms, now exceeds that of the U.S. by some 50 percent—by 75 percent in military hardware alone. All told, close to 20 percent of Russia's GNP (gross national product) goes into arms, compared to less than 6 percent in the U.S.

Clearly, it will take more than tough words to reverse America's decline toward second-rate status. And unless and until the U.S. rebuilds its defenses, we can expect more Soviet demands and blackmail—or worse.

At the conference table, the Soviets already are dictating the terms.

President Carter says he'll never sign an agreement that makes the U.S. weaker than Russia. But the strategic arms limitation treaty as drafted in Geneva appears to do just that.

An examination of major provisions of SALT–2, as the treaty is called, indicates that Soviet advantages from the 1972 SALT–1 accord will be enlarged and extended for at least another three to eight years.

According to the newly-organized "Coalition for Peace Through Strength," sponsored by the American Security Council, SALT–2 "will legalize and perpetuate Soviet strategic military superiority." It says the claim that SALT–2 provides for parity because both sides are limited to 2,400 strategic weapons is "an incredible misrepresentation."

To support its charge, the Coalition cites several specific weaknesses and loopholes in SALT–2. Soviet bombers which can hit the U.S. are not counted in the 2,400 strategic weapon ceiling while all U.S. long-range bombers are counted.

Soviet ICBM's on average carry six times more explosive power than U.S. ICBM's. Yet, SALT–2 will not permit the U.S. to build "heavy" missiles as the U.S.S.R. has done.

Ground and sea-launched "cruise missiles" of over 600-kilometer range are prohibited by SALT–2. This means the Soviets could strike 50 percent of the U.S. population with submarine-launched cruise missiles while the U.S. could reach less than 10 percent of the more widely dispersed Soviet population.

SALT–2 will restrict or prohibit the development of new strategic missile systems. But this will only prevent the U.S. from matching the eight new Soviet ICBM's which are in testing or production, compared to none for the U.S.

SALT–2 carries no provisions for on-site inspection. Thus, the Soviets can cheat on SALT–2 as they have on SALT–1. For example, the SALT-treaties expressly prohibit any testing aimed at upgrading an anti-aircraft missile system into an anti-ballistic missile, or ABM, system. Yet, on at least five occasions, the Russians have fired SAM–5 anti-aircraft missiles to test their capability as ABM's.

As another example, in SALT–1 the U.S. said it would regard the deployment of mobile ICBM's as "inconsistent with objectives of the agreement." But U.S. intelligence has revealed that the Soviets are now busy deploying a mobile intermediate-range ballistic missile, the SS–20, which can easily be converted into a 6,000-mile range weapon capable of hitting all U.S. targets.

Despite President Carter's unilateral scrapping of the B–1 bomber which was to have replaced our aging and vulnerable B–52, the Soviet Union has refused to limit production of its supersonic "Backfire" bomber or to include it in SALT's limitation of strategic weapons.

What this means is that Soviet leaders see the SALT agreements in quite a different light than do U.S. leaders. While the U.S. has frozen its strategic missile strength at 1967 levels and cut back on its Air Force, Navy and other conventional forces, the Soviets have continued the greatest arms buildup in history behind the mask of detente and SALT.

Rather than rushing into another self-defeating SALT deal, the Administration would do well to look first to its defenses. Negotiating with the Soviets from a position of relative U.S. weakness can only increase the danger to our national security.

A decade ago, there was no question that the United States possessed military superiority over the Soviet Union. Today, there can be little doubt that the tables are turned and Russia is No. 1 in overall military power.

The reason for this dramatic and alarming turn-about is clear: Successive U.S. Administrations have been hoondwinked into cutting back on our defenses in the hope the Soviet Union would settle for parity or what the arms controllers now call "essential equivalence."

Unfortunately, it hasn't worked out that way. Instead of being satisfied with merely catching up, the Soviets have continued their

massive arms buildup faster than ever. And instead of settling for the U.S. policy of "mutual assured destruction," or MAD, Soviet strategists have adopted a war-winning philosophy.

Of course, the Kremlin has been careful to cloak its aggressive designs in words of peace. Americans, yearning for peace after the Vietnam debacle, have eagerly embraced such illusions as "detente," and entered enthusiastically into Strategic Arms Limitation Talks with the Soviets.

Since the SALT talks began in 1970, Soviet military spending has shot up by more than 50 percent. The Soviets are now out-spending the U.S. in total military capability by $50 billion or more a year. Since 1958, the U.S.S.R. has doubled the military share of its GNP, or gross national product, to nearly 20 percent. By contrast, in the past 24 years the U.S. military's share has been slashed from 12 to 5.2 percent of the GNP. And it's still headed down.

In strategic or nuclear weapons, we're way behind Russia in both numbers and megatonnage, and the Soviets are still outspending us by 3 to 1.

The U.S. Navy has been cut in half in the past ten years, and the Administration's 1979 budget scraps several new shipbuilding programs. It's no exaggeration to say that the Red navy, whose ships outnumber those of the U.S. by better than 2 to 1, now rules whatever waves it wants.

Our Air Force has been cut back from 935 strategic bombers 12 years ago to just 415 aging B–52's today. And despite Soviet deployment of more than 100 new, supersonic "Backfire" bombers with intercontinental range, the Administration and Congress have scrapped our planned B–1 bomber altogether.

Other unilateral disarmament moves by the U.S. include dismantling of our one and only ABM or anti-ballistic missile defense system; slowdowns or stretchouts in modernization of our outmoded ICBM force and Trident submarine fleet, and an apparent agreement at the SALT talks in Geneva to limit the range of our yet-to-be deployed airborne cruise missiles to an ineffective range of 1,500 miles.

One of the most striking disparities involves civil defense. The Soviets have poured at least $1 billion a year into elaborate civil defense and industrial programs for the past twenty years. U.S. civil defense gets less than one-tenth as much to maintain a pathetic bare-bones program. As a consequence, experts estimate that in any all-out nuclear exchange, more than 120 million Americans would be killed while Soviet losses would be under 15 million—fewer than died in World War II.

Nowhere is the U.S. defense posture more seriously crippled than in the vital area of research and development. Although the Soviet R and D effort is far greater than ours, the Administration has refused to increase U.S. spending on new defense improvements above the current $12.5 billion level.

Warning that the Soviets have overcome the U.S. lead in certain areas of technology, Anthony Battista, a staff expert with the House Armed Services Committee, told a Congressional hearing: "The Russians are not coming: they're here!"

In a recent nationwide poll by the Opinion Research Corporation, 90 percent of the people questioned said the U.S. should be equal or superior to Russia in military strength—with most favoring superiority. And 63 percent said they would be willing to spend an additional 10 billion dollars in taxes to keep the U.S. from falling behind the Soviets.

The question that naturally follows is: Why hasn't the Administration and Congress carried out the wishes of the majority of the American people and kept our defenses from falling behind the Soviets?

The answer can only lie in the persuasion of influential advisers and policymakers in Washington who somehow believe that unilateral disarmament leads to peace and that more defense dollars should be diverted to domestic social needs.

General George C. Marshall, architect of the allied victory in World War II and postwar Secretary of State, summed up the illusions that have characterized U.S. policy: "We have tried since the birth of our nation to promote our love of peace by a display of weakness. This course has failed us utterly."

And yet, a new generation of Americans has ignored the warning of George Marshall. Despite clear evidence that the Soviets are amassing the most formidable and threatening military force since Hitler's Germany, Senator George McGovern has called for a $5 to $10 billion cut in the defense budget and transfer of the money to domestic programs.

The so-called "Coalition for a New Foreign and Military Policy," composed of 36 pacifist and ultra-leftist organizations, has mounted a nationwide campaign to lobby Congress for still deeper defense cutbacks. Led by veterans of the anti-Vietnam campaign that helped deliver Indochina to the Communists, the new coalition claims credit for shooting down the B–1 bomber and for pressuring Congress to deny World Bank loans to several anti-Communist allies.

The Coalition's latest bulletin to supporters begins: "We all know that Parren Mitchell is right: 'It is hard, dirty, gut work, turning the attitudes of the nation around.'" The liberal Congressman and Senator McGovern are leading the latest fight to cut military spending and divert funds to so-called "human needs" programs.

The Coalition is now attempting to block U.S. development of the "neutron bomb," claiming, as do Soviet propagandists, that it is a monstrously inhumane weapon designed to kill people while protecting property. Actually, it is an enhanced radiation warhead designed to penetrate Soviet tanks and defend Western Europe against the threat of a massive Warsaw Pact blitzkrieg without destroying the surrounding countryside.

By contrast, the Soviets' newly-deployed SS–20 mobile intermediate-range ballistic missile, targeted on Western Europe, is 2,000 times more devastating than the neutron weapon which President Carter is being pressured into banning. Yet, no one hears of demonstrations against the Soviet SS–20.

The fear of public protest has also deterred the U.S. from equipping its forces to combat Soviet-led chemical warfare weapons. U.S. military intelligence reports that Warsaw Pact forces are receiving intensive training in chemical, biological and radiological warfare and most front-line army units are fully equipped for it. U.S. and NATO forces have nothing by comparison. And Washington's attempts to get Moscow to agree to outlaw such indiscriminate and deadly weapons have gone unanswered.

Again, one listens in vain for the protests of the Jane Fondas.

It is, rather, high time to heed the words of James Schlesinger, who, as Secretary of Defense, said: "The underlying reality is that at no point since the 1930's has the Western World faced so formidable a threat to its survival."

Going back to those dark days of the 1930's, it was Winston Churchill who warned an appeasement-minded England that: "Virtuous motives, trammelled by inertia and timidity, are no match for armed and resolute wickedness. A sincere love of peace is no excuse for muddling hundreds of millions of humble folk into total war."

Churchill's warning applies with infinitely greater urgency to the free world of today. If we ignore it, there could be no tomorrow.

And yet, Walter Cronkite has observed: "There are always groups in Washington expressing views of alarm over the state of our defenses. We don't carry those stories. The story is that there are those who want to cut defense spending."

Cronkite's remark to a Gannett News Service reporter in November 1974, however offhand and inadvertant, appears to reflect the built-in bias of much, if not most, of the major news media. It persists despite the threat posed by Russia's relentless arms buildup—a threat that is well-concealed from most Americans.

In this, opinionmakers in the media are joined by policymakers in Washington. Anxious to shore up the crumbling facade of detente, they assure the American people and Congress that U.S. defenses are "essentially equivalent" to Russia's and that more billions of dollars can be safely diverted to domestic social programs where, incidentally, the votes are.

Active duty military officers who dare publicly to disagree are rebuked, removed or prematurely retired. Retired officers and private military experts who warn the nation's lagging defenses are labelled "cold warriors," "alarmists," "extremists."

Thus, relatively few Americans are aware, for example, that our one and only ABM—anti-ballistic missile—system was dismantled a month after becoming operational by a 52–47 vote of the Senate and that our nation is now defenseless against a surprise enemy missile or bomber attack.

The Administration's planned withdrawal of U.S. forces from South Korea is obscured by the headlines of Korean bribery scandals. The onrushing debacle in Africa is cloaked in pious pontifications about human rights violations in the remaining non-Marxist countries. The Soviet and Cuban-backed drive to conquer the "Horn" of Africa commanding vital sealanes from the Middle East oilfields is met by pro forma protests and helpless hand-wringing in Washington.

The anti-Communist governments of South Africa, South Korea, Brazil, Chile, Nicaragua and Taiwan are scorned or excoriated by the liberal establishment while monstrous human rights violations in the Iron Curtain countries, Cuba, Indochina, and the Marxist dictatorships of Libya and black Africa are barely noted or brushed off. Meantime, the liberal establishment continues to promote trade, aid and the export of vital U.S. technology to Communist regimes dedicated to our own destruction.

The diplomatic frenzy for a new strategic arms limitation agreement with Moscow takes precedence over the anguished pleas of Soviet dissidents for the observance of the Helsinki agreement on East-West relations.

Soviet threats to reintroduce missiles into Cuba are shrugged off, as are Fidel Castro's close ties with Panamanian dictator Omar Torrijos. This while the White House twists arms to force Senate ratification of the Panama Canal treaty surrendering control of that inter-ocean lifeline.

At home, U.S. ports are opened to Soviet seamen and visas granted to foreign Communist leaders and propagandists, while critics of the FBI and CIA applaud crippling new restrictions against our already demoralized intelligence and security services.

In Hollywood, Jane Fonda stars in a post-Vietnam movie heaping fresh abuse and derision on America's abandoned attempt to defend freedom in Indochina. Public opinion polls suggest that Americans would fight Communist aggression abroad only if Canada were attacked.

Hanoi withholds information about hundreds of Americans still listed as MIA's while Washington talks of "normalizing" relations with that Communist regime. Members of Congress, businessmen and tourists flock to Cuba for carefully-conducted tours, while Castro ships more troops to Africa and continued to hold tens of thousands of political prisoners, including several Americans. Officials in Washington make frantic efforts to

suppress the horror story of Frank Emmick, an American businessman released after serving more than 14 years in the Cuban "Gulag" on false charges of spying for the CIA. Liberal-oriented newspapers and TV networks black out Emmick's first-person account of outrageous cruelty suffered in Castro's dungeons.

Viewed objectively, Americans might be excused for wondering if Pogo, the comic-strip character, was not right when he said: "We met the enemy and he was us."

But Pogo may have been overly pessimistic.

There are signs the pendulum may be shifting a bit. Stung by a two-year American Security Council study confirming blatant anti-defense bias by CBS' Evening TV News Show, that network and others appear at last to be giving fairer treatment to the beleagured Pentagon. The tireless and dedicated efforts of a small band of private ombudsmen called Accuracy in Media, or AIM, are beginning to pay off in greater attention to objectivity on the part of the liberal-dominated press and networks. Says AIM's Chairman Reed Irvine: "Our objective is to encourage truthfulness, fairness and responsibility in the news media."

A two-volume study by ex-Washington Post reporter, Peter Braestrup, recounting in stark detail how the media misreported the 1968 Tet offensive in Vietnam as a Communist rather than an allied victory, has provided journalism students with some revealing new evidence and left not a few ex-war correspondents with red faces.

As General William C. Westmoreland, former U.S. Commander in Vietnam, has said: "We must be alert as a nation to the vulnerability of our political system and open society to manipulation by an adversary."

Indeed, only by insisting on the full truth fairly told can the American people make the judgments necessary to keep our nation strong, free and in peace. There is no other way.●

PROGRESS ON ALCOHOL FUELS URGED

● Mr. BAYH. Mr. President, on March 16 I sent Secretary Schlesinger a letter expressing my keen disappointment with the Department of Energy's lack of progress on alcohol fuels since its Alcohol Fuels Task Force was formed last fall. I also sought his earliest reassurance that DOE would move to meet its responsibilities in this area, given the administration's warnings that we face a likely liquid fuels crunch sometime in the 1980's.

Yesterday I received the Department's response in a letter from Under Secretary Myers, which, while conciliatory in tone, reinforces my belief that DOE, for whatever reason, is still spinning its wheels over this issue and wasting precious time when we know that time is running out.

Secretary Schlesinger, and the President himself, have warned that we will face a petroleum shortage in the 1980's. Alcohol fuels represent the only near-term option for supplementing these supplies. Yet, despite this undisputed fact, DOE is searching for excuses not to get on with the job.

Mr. President, this departmental posture continues to perplex me. Within the next week, the Congress will be receiving what has been dubbed "National Energy Plan II," an advance peek at DOE's preferred list of new fuels. This package, from what we have heard so far, will contain various forms of Federal assistance for coal gasification, coal liquefaction and oil shale development, in order to stimulate industry efforts to develop these energy supplies and lower market place prices for these energy sources. Yet, the package will contain nothing to stimulate development of alcohol fuels. Instead, according to the Department's revised alcohol fuels program plan, which Under Secretary Myers also forwarded to me, the Department is planning, over the next year, to once again rehash the questions the alcohol fuels task force has been looking at since its formation. Current program plans for the fuels from biomass program anticipate a decision on large scale use of alcohol in 1990. Why is this true, Mr. President? DOE's response is that alcohol fuels are currently too expensive.

Mr. President, I submit that what is sauce for the goose is sauce for the gander too. Currently no alternative fuels—whether biofuels or syntheitc fuels—are competitive with crude oil and natural gas. However, the rationale behind "NEP II" is that we must develop alternatives to oil and gas because they are going to run out, and because continued reliance on them places us at the mercy of those nations from which we import petroleum and liquified natural gas. This logic applies to alcohol fuels with equal, if not greater, force. The Federal Government and oil companies have poured billions into the capital intensive, environmentally problematical technologies favored by NEP II. Comparative Federal investment to date in harnessing our renewable resources has been insignificant, despite their obvious attractions.

Alcohol fuels are renewable, clean and versatile. They offer the hope of boosting local economies all over the country, supplementing farm incomes and relieving the drain on urban budgets caused by waste disposal problems, while helping to solve the Nation's energy problems.

As I stated in my letter to Dr. Schlesinger, I think it is clear that as we look toward the future there is not going to be one answer to our energy problems, but many. Future supplies will come from a number of diverse sources. Those of us with responsibility for shaping Government policy owe it to the Nation to explore every option available to us. I will, therefore, continue to press the Department to move ahead imaginatively on the alcohol fuel front.

In the weeks to come, I will also question Secretary Schlesinger about the Department's seeming inability to take alcohol fuels seriously. In particular, I will want to know how DOE has arrived at the cost estimates they cite for ethanol production. From everything I know DOE has persisted in using worst possible case estimates, ignoring much of what we know about the possibilities of bringing these costs down.

Mr. President, I am convinced that alcohol fuels can become efficient and economical energy supplements with a relatively small investment if we apply our best technology to this effort. This country did not get where it is today by approaching problems timidly. Instead, we have always set our goals and then looked at existing obstacles as challenges and not insurmountable barriers. This is the kind of effort we must make if we are to harness our abundant renewable resources to meet our Nation's energy needs. I will continue to press DOE for this kind of response as we all work together toward energy independence.

Mr. President, I submit for the RECORD that my March 16 letter to Secretary Schlesinger, as well as Under Secretary Myers' response.

The letters follow:

U.S. SENATE,
Washington, D.C., March 16, 1978.

Hon. JAMES SCHLESINGER,
Department of Energy,
Washington, D.C.

DEAR MR. SECRETARY: I know that you and I share a mutual concern about the very real possibility of a liquid fuels shortage sometime in the 1980's. Last spring when the President unveiled the National Energy Plan, he emphasized the importance of an effective national energy policy and compared the effort needed to meet this challenge with the "normal equivalent of war." I have been encouraged by the high priority placed by the President on resolving our energy problems and have strongly supported most of his efforts over the past year.

One crucial ingredient missing from the National Energy Plan was an accelerated program for introducing a mix of alternative energy sources—especially liquid fuels—into our energy budget in a timely fashion. In light of this earlier omission, I have welcomed the Department's efforts this year to fashion a near-term program to assure development of substitutes for our diminishing fossil fuels.

As we look toward the future, I think it is clear to most of us there is not going to be one answer to our energy problems, but that future supplies will come from a number of diverse sources. Those of us with responsibility for shaping government policy owe it to the Nation to explore every option available to us as thoroughly as possible.

As you know, I believe the utilization of alcohol fuels in a variety of settings is a near-term option that has not received the attention it merits. I have no doubt that alcohol fuels can become efficient and economical energy supplements with a relatively small federal investment if we apply our best technology to this effort.

In light of this conviction, I am quite disappointed with the Department's efforts to date to explore the potential of this alternative fuel. I have just received the Alcohol Fuel Task Force Position Paper on Alcohol Fuels. The Position Paper contains no information beyond what the Department submitted in response to the alcohol fuels Appropriations Committee oversight hearings which I chaired on January 31. Moreover, it was not accompanied by the revised program plan and budget information associated with it that the Committee requested at that time. It does reflect a lack of effort, commitment, and foresight with respect to this energy source on the part of the Department, which I find disturbing. It also indicates that DOE has made no discernible progress on alcohol fuels since last fall when the Task Force was formed.

I would hope that the Department will, in fact, take a fresh look at this area, as your witnesses in our January hearings indicated. I reiterate my request that DOE move imaginatively and aggressively to tap the energy potential of our most abundant and renewable resources.

I look forward to receiving the remainder of the Task Force Report, which I understand

contains a revised alcohol fuels program plan and indicates what resources the Department would need to meet the Task Force goals.

I seek your earliest possible reassurance that the Department will move to meet its responsibilities in this area. I hope that you will construe these comments in the constructive manner in which they are offered. I will do whatever I can on this end to help you out and would like to proceed as allies and not adversaries.

Sincerely,

BIRCH BAYH,
U.S. Senator.

DEPARTMENT OF ENERGY,
Washington, D.C., April 26, 1978.

Hon. BIRCH BAYH,
U.S. Senate,
Washington, D.C.

DEAR SENATOR BAYH: Secretary Schlesinger has asked me to thank you for your letter of March 16, 1978, concerning the Department of Energy's efforts in the alcohol fuels area.

As you know, in response to rising Congressional concern, a special Department-wide Alcohol Fuels Task Force was established in early December at my direction to thoroughly reexamine the alcohol fuels question and to evaluate its potential as a part of our national energy supply strategy. We are highly interested in the potential of alcohol fuels to become an important element of our national energy strategy. Preliminary findings of the Task Force indicate that alcohols are suitable fuels not only for internal combustion engines, but also for gas turbine peaking units, utility boilers, industrial heating, and fuel cells. While several problems have been identified with the use of alcohol fuels in motor vehicles, they are considered to be solvable through available engineering techniques.

Despite its suitability as a fuel, the major obstacle to the widespread use of alcohol fuels appears to be the economics of high volume production. Currently, alcohols cannot be made at costs which are competitive with petroleum-based products. On a technical basis, ethanol can be considered to be somewhat better than methanol because of its higher energy content, and its better phase stability and volatility in gasoline blends. Ethanol will be more expensive than methanol. We estimate ethanol costs will be in the range of $13–17 per million Btu compared to $5–9 per million Btu for methanol, and compared to a current pre-tax cost of $3.50 per million Btu for gasoline.

I assure you that the Department of Energy is firmly committed to resolving as quickly as possible cost and other other issues such as supply potential, most appropriate applications, commercialization applications, and the need for Federal incentives.

The Alcohol Fuels Program is designed to address these issues and includes two basic parts:

1. Immediate Action Elements: A series of special studies to examine and help resolve key technological, environmental, and institutional issues that obstruct or cloud commercialization decisions. Planning for early end use demonstration is included.

2. Alcohol Fuels R&D Elements: An expanded and integrated continuation of current Department of Energy alcohol-related R&D activities in the conservation, fossil energy, and solar energy areas.

The studies conducted as part of the Immediate Action Elements will provide key input into the Department of Energy's overall Supply Strategy Study, so that a decision on the commercialization of alcohol fuels can be made.

I am enclosing for your information, a copy of the Alcohol Fuels Program Plan. This plan sets out the Department of Energy's goals in the alcohol fuels area, and the resources envisioned to meet those goals.

I welcome your continued interest in this area, and look forward to working closely with you and your staff in a concerted effort to meet our national energy responsibilities and to pursue actions designed to aggressively tap the energy potential of our Nation's renewable resource.

Sincerely,

DALE D. MYERS,
Under Secretary.●

SOUTH AFRICA AND THE ARMS EMBARGO

● Mr. GOLDWATER. Mr. President, we often hear speculation about how disastrous the United Nations' arms embargo of South Africa would prove to be if that country became involved in a serious military conflict. Having returned from a trip to South Africa several weeks ago, I should like to state that the arms embargo is far less important than the people who voted it seem to think. In fact, there is a spirit of self-sufficiency in South Africa that is not generally understood in this country. The South Africans actually do not need much in the way of military assistance from beyond its borders. And the leaders there are definite in stating that despite the arms embargo, there is no African power or combination of powers that could defeat South Africa.

Mr. President, we have heard a lot of misinformation about South Africa and it is my continuing purpose here to try and shed a little truth about the situation in that nation. Consequently, I submit for the RECORD a very informative report from South Africa which was printed in the April issue of Government Executive.

The article follows:

WILL THE ARMS EMBARGO LEAVE SOUTH AFRICA DEFENSELESS?

HIGHLIGHTS

In spite of the United Nations arms embargo, South Africa "doesn't see any African power or combination of powers that could defeat us."

What could/would be a direct Soviet invasion, using the same tumpted up reasons they used in Angola and Ethiopia.

Western failure to stop the trend toward that end could be disastrous.

In describing revolution-advocate Donald Woods' flight from South Africa, Time magazine last month said he "forded a crocodile-infested river to escape . . ."

Snorted one South African, "There are about as many crocodiles in the Thele river as there are elephants running loose in New York City's Central Park."

Though a Time editor in South Africa apologized to that country for the fiction, it is typical of the loosely researched, high-decibel emotion that has afflicted editorial coverage of South African events for at least the past three years.

American long-shoreman-turned-author Eric Hoffer wrote recently, it has been shocking for this "proudly materialistic, rationalistic and scientific" Nation to discover "the most important facts about a human entity are its illusions, its fictions, its unfounded convictions."

Nowhere are those fictions and unfounded convictions more evident than in the cacophony which surrounds present and developing U.S. policies toward southern Africa—buoyed along as they are by extremist politics and "Black Power" racism. And terrorists masquerading successfully as "moderates fighting for liberation." And Marxists deftly building the illusion they are native-grown patriots.

Not Quite Vietnam—In many respects, e.g. the killing of tribal headmen, the abduction of whole villages of school children, guerrilla forays to burn the homes of "uncooperative" natives, today's "hot war" in southern Africa is very much like the early stages of the Vietnam war 15–20 years ago. That should be no surprise since the marauders are working from the same Marxist/Mao textbooks in most cases.

But, for the United States, there are two vital differences:

If U.S. policy could be recaptured by common sense, her potential South African ally is, at the moment, much better equipped and trained than anything it faces.

Southern Africa, and especially South Africa, are vastly more vital to U.S. and European economic, and thus military, interests than South Vietnam ever was.

More than 24,000 ships a year sail around the Cape of Good Hope, carrying, among other things, 80% of Western Europe's oil supplies, and nearly half those of the U.S. plus 70% of the strategic materials necessary to keep Western Europe's industry running. Indeed, the southern end of Africa, itself, is a major, and in many cases the giant, provider of such essential materials as chrome, platinum, molybdenum, uranium and a host of others. Cut off from those vital ores would havoc Western economies as surely as a lack of oil.

Yet, charges Martin Duyzings in To the Point magazine (citing French top-level government sources) American White House strategists have adopted a "cynical, selfish, totally isolationist" scheme ("Carter's pet secret," Paris reportedly calls it) that the only thing worth saving in Africa is its oil; that U.S. energy needs can be met by acquiring the total oil output of Venezuela and Nigeria while developing alternate U.S. sources of her own.

Thus, says that reasoning, the Cape sea route is unimportant. Though at least one Navy admiral calls that reasoning "sophistic and sophomoric," it is buttressed, as South Africans see it, by an official White House attitude that those who think U.S. relations with the Soviets must be adversarial "are out-dated."

The result is a developing perception in black and even-white-run Africa that Soviet political will and military commitment on the African continent far exceeds that of the U.S. Further, U.S. support with words (notably from U.S. Ambassador to the U.N., Andrew Young) of militant, communist-trained radicals in Rhodesia, Namibia and even South Africa underscores that perception.

Summed up Copley Press (in San Diego) international news analyst Robert Letts Jones, after a trip to southern Africa, "The West is losing control of that part of the world to the cleverly-disguised thrust of Soviet Russia."

Repeating the Act—The downslide for the West began picking up momentum as far back as 1975 when Soviet-armed Cubans were rushed into Angola to help an Angola communist faction in the still-continuing civil war for control of the country. A small South African Defence Force column had advanced to within sight of Angola's capital, Luanda—with the "full encouragement of the United States," says South African Defence Minister P. W. Botha.

"We bumped into Cubans in Angola," says Defence Force Strategic Planning Director General, Maj. Gen. Ralston, succinctly, "And

we have no respect for them." But when the U.S. Congress refused to vote funds to help the non-communists keep the Russians out, the South Africans pulled back to their own border.

That "fateful decision," as then-President Gerald Ford called it, appears close to happening again on the Horn of Africa in the Ethiopia-Somalia war. Again, while the U.S. postures with words, the Soviets are shipping mountains of military equipment and thousands of Soviet and Cuban "technical advisors" to Ethiopia. "If American will is found wanting there," asked one Mid-East watcher, "where will the next-higher escalation be?"

As South Africa sees it, says Maj. Gen. N. N. Webster, Director General for Resources in the Defence Forces. "If the Soviets are successful in controlling southern African mineral resources, they will have struck a massive, possibly devastating blow against the West. And these resources, together with the very substantial resources of Rhodesia and South West Africa, would give the Soviet totalitarian order a bigger boost than any other in its history."

Helping the Soviets on their way, says he, is a United Nations that, since 1960, "has been greatly influenced by an impoverished assortment of economic, political and military nondescripts. With these inexperienced nations setting themselves up as keepers of the peace, the world has experienced nothing but one war after another."

Soviet Access—On African matters, the most influential in that group have been the more than 40 member States of the Organization for African Unity (OAU)—and three-fourths of them, reports Nigeria's Daily Times, operate under military and socialist governmental systems which "are progressively becoming monarchial in nature."

Where they are left-leaning, which means most everywhere, Soviet merchant ships and trawlers—hatched vessels capable of hiding amphibious vehicles as well as troops—are visiting a steadily increasing number of "friendly" African ports each year. In the past five years alone, Soviet merchant marine Africa fleet has gone up by five million tons and stepped up services.

One uncorroborated report claims a full brigade of Soviet troops are now in Mozambique "to protect their ship's stores" there. Soviet maritime reconnaissance aircraft, using Luanda as a base, now range along the Namibia coast and have been reported as far south as the waters off East London—virtually in the center of South Africa's Atlantic/Indian Ocean coastline.

And in countries which lean to the West, the Soviets are helping organize, finance, arm and train revolutionary cells, and propagandize their "wars of liberation." (So are some U.S. organizations, many under the misguided idea that they are helping end apartheid and colonialism. In fact, if these revolutions go in southern Africa the way they have everywhere else on the Continent, the people will simply trade one form of oppression for a worse one.) To the extent these zealots can stir a fire, they create the stage, as in Angola and Ethiopia, for the Soviets to move in under the guise of "restoring order and protecting oppressed peoples from capitalistic domination." And, "If present downtrends in U.S. Navy funding continue, not to mention the weakening Congressional will," says one U.S war veteran, "who will be able to stop them? Not the United Nations, certainly."

South Africa's military "is quite confident," says Ralston, it can "contain the terrorist threat." Adds Webster, "We don't see any African power or combination of powers that could defeat us. They just don't have the training, expertise or technology." Even the figurative OAU Leader, Nigeria, "doesn't have the people or the training. They are similar to the Egyptians who, even after six years, still couldn't operate their Soviet-supplied SAMS (Surface-to-Air Missiles.)"

In short, South Africa's Defence forces have been called "colossal" compared to those in other African states, though the numbers aren't all that awesome on the face of it. With an annual expenditure of about $2.3 billion (5.1% of South Africa's gross national product), she supports an Army of 41,000 persons, a Navy of 5,500 and an Air Force of 8,500.

Total Strength—But, in fact, that constitutes only about six per cent of what South Africa could put, armed and trained, into the field. Behind those 55,000 people, is a Citizen Force, their version of the U.S. National Guard, totalling more than 165,000 persons. Their primary role is to come in if the police can't handle a problem.

And the active-duty military and Citizen Force units serve, in turn, as developing ground for one of the most important, and least publicized, elements of South African military preparedness: the Commando units. They are, says Webster, "an umbrella of security;" farmers and industrial workers posted, after two years national service, to commando units of five of more; armed with modern weapons; and given at least 30 days of up-date training a year.

Their job in an emergency: provide security where they live. Born of the Boer-British war at the turn of the century (when the Afrikaner was inventing the Commando while the British invented the concentration camp), their effectiveness is the reason no more than 40,000 Boers were able to hold off more than 350,000 British regulars.

And beyond all that is the 35,000-man South African Police, a mixed group—ethnically with 19,500 whites and 16,000 non-whites. (South Africans like to point out to critics of their "police State" that it has fewer police than there are in New York City where the population is only one-third that of South Africa.) Upshot of it all is, South Africa, which put 250,000 trained troops in the field in just a few months after the start of World War II could have more than 400,000 ready for battle within weeks of a call-up.

Blunting Infiltration.—Already, the police are so confident of their ability (and the reliability of their informers) to control riots, firebombings, and other mayhem that they don't, for instance, bother to X-ray luggage at airports. One example of their efficiency: some 200 would-be terrorists were captured recently—a crowd that entered South Africa in late 1977 under orders from the ANC (African National Congress) to "wreak indiscriminate violence to achieve publicity."

They managed "five incidents and three bomb explosions" but not a single casualty. Most of the terrorists were picked up before they could plant a bomb. Still, the police and the military are the first to point out that, with thousands of kilometers of border and hundreds of radicals at work in-country, they can't prevent a tragedy every time.

"We can't stop infiltration," says Ralston, "but we can blunt it." They have shown they can mop it up pretty good, too. Just before Christmas, three terrorists slipped across the border from Mozambique with what was described as "a huge cache of communist manufactured arms and explosives." In a fire-fight around a shack on the South African side of that wilderness boundary, two were killed, the other wounded before they could even get most of the arms unpacked.

But, as Soviet-backed pressure mounts, South Africa expects that incidents of street violence, assassinations, burnings will increase.

The arms embargo doesn't bother them particularly—except for the all-encompassing way the U.S. Commerce Department is going about it. If Commerce implements their broad, sweeping regulations as written, they will reach far beyond military-only activities to hurt private citizens in their private lives, black as well as white.

USSR Target—Still, especially in the more limited area of military arms, themselves, "Over the last 10 years," says Webster, (since about the time of the last embargo threat) "we have built up a pretty good arms industry. We had to do it. Necessity is the mother of invention." Besides, he claims, "Nobody as yet has ever, in history, found a way to apply sanctions effectively."

In sum, "South Africa has proven over the years that she can do anything she needs to do." Thus, says Ralston, "The only major problem will be if one of the major powers became directly involved." Using techniques pioneered by the U.S. Navy during the past 40 years, the Soviets already have demonstrated they can project power over long ranges from home.

With air and naval bases in Angola, Nigeria, Guinea, Mozambique, Ethiopia and the likelihood of obtaining even more elsewhere, the Soviets' ultimate African target, South Africans are convinced, is the richest, most strategically located site on the Continent. "South Africa is as important to the U.S. as the Panama Canal," says Webster.

"Already what have you got for bases in Africa? South Africa (especially at Simonstown) is the only place where your country can be guaranteed a base with the infrastructure to support it and the people to defend it."

Sums up he, "In the event of South Africa falling to the Commies, that's the beginning of the end for the West." Whether the U.S. will recognize that or not—or even consider it in counterbalance to the naive U.S. view of what "human rights" ought to be there—is a highly questionable matter.

What Was Steve Biko . . . And Is Donald Woods, Really?

South Africa's Foreign Affairs Association director, Cas de Villiers, thinks it's deplorable that the Government in Pretoria spends on its public information activity only a tiny fraction of what it spends on its military and police security forces.

His reason: virulent attacks on "apartheid" occur at least as often in pamphlet and press release internationally as they do in-country with guns and fire bombs.

South Africa openly stating its side of some action, including its own arrests and bannings of people and organizations, is hampered by another problem. To tell all they know would expose their currently very effective underground network of informers. Just last January in Durban, within less than an hour of each other, two men, Stephen Mtshali and Dr. Richard Turner, were gunned down.

An anonymous caller gave credit for the Turner killing to the African National Congress (ANC), a nonbanned Marxist group which also put Mtshali on its "death list" after he gave evidence for the State at terrorist trials last year. (Mtshali was a one-time terrorist, himself, and member of the ANC's military arm.)

Turner had been an outspoken critic of Government racial policies until his banning (a kind of house arrest) in 1973. The banning order was due to expire last month and, reportedly, Turner was "showing a more reasonable attitude toward the White man's situation in southern Africa." Speculation is, the ANC and the outlawed South African Communist Party learned that and decided to get rid of him.

Said Connie Mulder, now South Africa Deputy Minister for Bantu (black) Develop-

ment, "It is very difficult to demolish one's own organization (of informers) every time (you need) to get (trial) evidence, particularly when one finds that the fish is such small fry one has to throw it back into the pond in any case."

(South African residents of Kenya 20 years ago estimate as many as 70,000 Mau Mau terrorists were jailed and/or executed back then without benefit of public trial. Reason the hearings were private: magistrates discovered very quickly that public testimony was the same as signing death warrants for their own State witnesses.)

Thus, the Government was in a poor position to tell all it knew when it launched last October what Time magazine called its "most draconian wave of repression in almost two decades"—the arrest of more than 50 of the best-publicized black agitators in the country, many without charge; and the banning of 18 black and inter-racial organizations, including the Christian Institute and The World, largest black-circulation newspaper in South Africa.

The Government could not reveal, for instance, evidence to support its conviction that the Christian Institute had been taken over by radicals who liked the idea of using a religious front for laundering funds coming from outside the country to finance terrorist groups inside. And an outsider would have to travel to Soweto, talk to local citizens, to hear that arrested World editor Percy Qoboza was using his columns to help organize uprisings in the township.

Adding to South Africa's problems is an apparently gullible world Press, in general, willing to believe on the face of it whatever these extremists say—and challenge sharply even the most likely Government claims. Yet, less impassioned coverage, especially by reporters who have been on-the-scene even a few times, could raise considerable doubt about the validity of what some of these anti-government disciples claim.

Two prime examples surround two of the most publicized: the death of Steve Biko in a South African jail; and the banning and subsequent escape from South Africa of East London *Daily Dispatch* Editor Donald Woods.

When he reached the "freedom" of Lesotho, Woods says he "thought of the blacks who had helped me, who had got out of their beds in the middle of the night to guide me onward. One had thrown his arms around me and said, 'God has sent you to me to care for you to repay you what you have done for our people.'"

But Woods' elaborate description of his escape—crouched on the floor of the car as his wife drove him out of town, hitch-hiking three rides, a long walk through "difficult terrain" of the Thele river valley (buoyed along by the words of ANC leader Nelson Mandela, "There is no easy walk to freedom") and swimming "some 30 to 40 yards to the other (Thele river) bank"—raises baskets of questions.

The Thele river barely qualifies as a creek and is so shallow it can be waded anytime. And many blacks still close to tribal customs don't go near rivers at night because, says supersition, that's when evil spirits rise up from the bottom, looking for victims. Snorts Dirk Brink, a Hong Kong banker who owns a farm in South Africa:

"Woods did not cross the Thele River other than over the Thele bridge (and) he was taken by a car with diplomatic license plates straight to Maseru (the capitol of Lesotho.)" The escape, Brink charges, was not pulled together just two days before it happened, as Woods says, but carefully planned to coincide with renewed United Nations talks of further sanctions against South Africa.

And officials there are convinced, privately, it was pulled off by the African American Institute, another promoter of civil unrest and revolution in South Africa; financed by the U.S. with help from the British. Arguing in their favor: among the first people he saw when he arrived in the United States were President Jimmy Carter and Vice President Walter Mondale, State Secretary Cyrus Vance, and U.S. Ambassador to the United Nations Andrew Young.

"That's a better deal than Solzhenitsyn got during your Ford Administration," notes one South African.

Further, the escape scheme may have included another standard ploy revolutionary groups use to try to gain popular political support in the world: the planting of fake evidence that "some right-wing racist" had tried to kill or harm one of them. Woods says one thing that decided him on escape was Security Police intercepting a bag of T-shirts sent Woods' daughter by a friend, soaking them in acid, then sending them on.

Colonel J. H. Fourie of the Security Police says the chemicals could have been put on the garments after delivery to the Woods' home. But, "We have conclusive proof (the T-shirt package) was never opened" between the time it was posted and the time it was delivered—"And we have technical proof the bag was not at any time handled by the Security Police."

Woods admits he could have left the country on an exit permit rather than the way he did though he doubts he would have been given one. Brink, for one, disagrees. "After all, a martyr who becomes an exile has only a very short shelf-life, as the ideas and opinions of an exile become less and less important with the passage of time."

Obviously, however, for the editor of a small (about 13,500 circulation) regional newspaper who, by his own words, "never attended any editorial conferences" nor "wrote editorials," the way he left South Africa was far better for the cause of what South African Information Counsellor Carl Noffke calls "radical black circles" in which he moved.

One of those was that of Steve Biko who died last September of uremic (kidney) failure brought on by a head injury sustained while in police custody. Biko was promptly eulogized in the world Press as "a leader of the 'black consciousness' movement in South Africa . . . a major voice for a moderate solution of South Africa's racial situation."

The U.S., for one, sent a high-level delegation to the funeral. With rare exceptions the Western Press called him a moderate; a few even comparing his "struggle" to the late Martin Luther King's in the United States. On a massive wreath, signed "Andrew Young, U.S. ambassador to the United Nations," a card read, "No nation can afford to lose its most dedicated and creative leadership."

But for all those laudatory adjectives, Bika's record suggests he was much more than "moderate." In the midst of Soweto rioting two years ago, the leaders of it demanded the Government negotiate the country's future with three blacks: Biko, the ANC's Nelson Mandela, and Robert Sobukwe, leader of another militant (and now also banned) group, the Pan-African Congress.

Biko was honorary president of another militant organization, the Black People's Convention. He also was leader of the South African Students Organization (SASO), a nonwhites only outfit, whose charter reads like the "Black Power" instructions of H. Rap Brown, Stokely Carmichael, Eldridge Cleaver and Mario Savio.

Indeed, the clenched, raised fist was a frequent gesture throughout Biko's nearly day-long funeral; and the two most common cries were amandia (he Zulu word for "power"—though Biko was a Khosa) and Azania, the black name for a "liberated" South Africa. Extremely sensitive to attempts, and successes, among its African neighbors by communist-financed bands of radicals to take over countries at the point of a gun and mindful of the rioting that broke out in the U.S. after King's death could account, all by themselves, for the Government clamp-down a month later on people and groups advocating violent resistance to Government policies.

Moreover, when Biko was arrested, he had on him a one-page pamphlet calling for "all Black people to show solidarity with the exiled and the jailed." Said it, in part:

"Wherever you are, organize yourselves into groups to deal with those who do not heed this appeal. Beat them (his emphasis); burn their books, burn their cars and shops. Show no mercy to informers and other collaborators—they must all be killed!

"There must be cries, burning houses, people with clenched fists, bodies lying on streets, bruised and bleeding people—then there will be freedom—yes freedom". . . .

When confronted with the statement of Biko's secretary that she had typed the stencil for that pamphlet and with other "very serious charges of insurrection" by "his close associates," the 6-ft., 2-in., 200-lb. Biko exploded, according to police. He threw a chair at one officer and charged after another.

According to the subsequent inquest into his death, says Retief Van Rooyen, a lawyer who represented the police, one of the five policemen it took to subdue him charged into Biko with a football-style tackle, driving him into the wall. Until then, because there had been two jail suicides the month before Biko's death, police, claims Van Rooyen "were treating him with kid gloves."

Biko hit his left front forehead against the wall. Though Biko did not lose consciousness and there were no signs of the blow, such as bleeding, fracture or even a lump, Biko had "periods of irrationality, slurred speech and other symptoms" over the next few days. Prison hospital tests showed negative results and police suspected he was faking these conditions to avoid questioning.

In releasing most of this in a report to his constituents, Congressman Bill Dickinson (R-Ala.) said, "I am not in a position to pass judgment on Mr. Van Rooyen's story; but I can not see a common-sensed motive for the South African government to kill Biko or even to cover the negligence of any who might have purposely done so (considering) the predictable anti-government civil disorder and international condemnation which would follow such an incident.

"As a matter of fact, that government would have faired better in the international court of public opinion had they produced a scapegoat."

Based on evidence relating to the scuffle, evidence not disputed by lawyers for the family, the inquest Magistrate said he had no alternative but to find that "he" could not exclude the scuffle as a possible cause of the head injury of the deceased." Noted one observer, "The apparent police harshness received the widest publicity, of course, but there was a great deal more brought out concerning management of the prisoner that never got printed."

Some of the testimony on Biko the family has asked, and the Government has agreed, will not be released. Thus, it is unlikely they will file a civil suit for fear of having it come out, anyway. But that hardly ends the matter. The South African Medical Council has been given appropriate extracts from the inquest; and the betting is currently "about 50–50" that the doctors who tended Biko after his injury "behaved in an improper or disgraceful manner."

If that is the finding, they could lose their South African licenses to practice medicine. South Africa's Attorney General is looking into possible criminal prosecution against the police.

Probably the best long-distance view of

what happened was summed up by William Raspberry, a level-headed columnist—who happens to be black—with the Washington Post. It becomes clear with distance, he wrote sarcastically, that if South Africa wanted to "discover and punish Steve Biko's murderers, it could easily do so." But similar incidents in the U.S. are often written up as "merely the work of a few rotten apples in the law-enforcement barrel."

It "is interesting," he notes, "that we can see distant forests with such unerring accuracy while, at home, we are so easily distracted by trees." ●

S. 1874—ANTITRUST ENFORCEMENT ACT OF 1978

● Mr. PAUL G. HATFIELD. Mr. President, since coming to the Senate and becoming a member of this committee 3 months ago, I have had the opportunity to witness, with maximum effect, the sublime pulling and hauling that is the substance of the legislative process. I am reminded of the admonition of a Montanan in a letter to my predecessor, who said, "I hope that the Congress will continue to forge ahead in its efforts to turn the country back on a better course."

S. 1874, the bill upon which this committee concludes its hearings today, is perhaps the classic case of "forging ahead to turn back on a better course." On June 9, 1977, the Supreme Court, in deciding Illinois Brick Company against State of Illinois, and others, effectively blunted the power of the indirect purchaser or seller—the individual small businessman or ultimate consumer—to protect himself from price-fixers and monopolizers. No longer, the Court said, may any but direct purchasers or sellers, either as individuals or through State attorneys general, enforce their right to be compensated for injury suffered at the hands of antitrust violators. No longer, the Court said, may any but direct purchasers fulfill the clearly expressed intent of Congress that buyers and sellers act as private protectors of the marketplace by punishing and determining violators through collection of triple damages—a remedy that the Congress gave to the Federal Government and every person in 1914 and to the State attorneys general in 1976, all to be exercised on behalf of the consuming public. The Court said:

> Should Congress disagree with this result, it may, of course, amend (§ 4 of the Clayton Act) to change it.

We find ourselves in the unfortunate position of having to do what we thought was done as long as 64 and as recently as 2 years ago. Disagreeing with the majority, Mr. Justice Brennan, joined by Mr. Justice Marshall and Mr. Justice Blackmun, observed, "It is difficult to see how Congress could have expressed itself more clearly." Evidently, we were not clear enough; so, we must forge ahead to turn back.

Why was the Court unwilling to give the antitrust laws the meaning we intended? The majority's opinion is shot through with negative reasons:

> . . . Unwillingness to *complicate* treble-damage actions . . .; substantially increases the *possibility* of multiple liability . . .; . . *uncertainties* and *difficulties* in analyzing price and output decisions "in the real economic world rather than an economists' hypothetical model"; . . . would add whole new dimensions of complexity to treble damage suits. . . .

Reduced to its simplest terms, the Court said this: Judicial economy and management of the litigative process, with all its speculative variables, are more important than broadening antitrust remedies to include the ultimate seller or consumer, who ultimately foots the bill for antitrust violations through higher prices and increased taxes.

Over the last month, these hearings have taken on the surrealistic appearance described by Dickens in "Bleak House" a century ago—a beleaguered client watching a knot of solicitors, barristers and judges bargaining for his fortune and fate in totally incomprehensible fashion. Go slowly, we are told, this bill may overburden the Federal courts; overall antitrust enforcement might suffer, because direct purchasers might lose the will to sue; hungry plaintiffs' lawyers, says the defense bar—and vice versa—will probably gobble up all the gains to be made, anyway; it is too soon to tell whether and how bad Illinois Brick really is, in the grander scheme of things.

The day before yesterday, a witness opposed to S. 1874 declared:

> But I could talk principles all day without expressing the real hurt in this situation. Lawsuits involve people—and their *lives*!

Then he went on to talk about a client company.

Let us talk about lawsuits, people and their lives. Let us talk about hundreds of independent beef growers who saw an opportunity to do for themselves what the Government either cannot or will not—to take their case alleging price-fixing in the beef industry to court. They took the Congress up on its invitation to let the courts decide. Let us talk about men and women willing to put their own mortgaged resources and risk their livelihoods against their own purchasers, without Government interference, to try to break the chronic cycle of higher production costs meeting lower market prices.

Let us talk about "indirect sellers" of beef who, in Montana last year, lost $80 on every calf they sent to market. These individual sellers, who—as Representative Siverton's statement indicates—are silently supported by numbers far greater than their own, had the courthouse door slammed in their faces after Illinois Brick. Let us talk about 14,700 out of 15,000 wheat growers in four Southwestern States who, due to the accident of being indirect sellers, are on the verge of suffering the same fate. Let us talk about disabled consumers, forced to depend more than most of us upon machines, who are in the same situation. Let us talk about State attorneys general now virtually unable to protect their taxpayer-consumers, institutional and private, from price-fixing conspiracies. Let us talk about consumers in general who will bear the brunt of passed-on overcharges and underpayments, whose only direct purchasers or sellers retain the the right to profit from the triple-damage remedy.

After 17 years on the bench, no one is more sensitive to the issue of wise use of judicial resources than I. Frankly, I am disturbed by the apparent lack of faith all these lawyers have in the strength and discretion of the Federal judiciary. The Court's attitude in Illinois Brick is faintly reminiscent of the position taken by the Government in the Keith case several years ago, to which it so strongly and properly reacted. I have faith that the lower Federal courts will continue to find themselves capable of confronting the difficult issues in indirect-purchaser-seller suits. If they need additional resources, we must give them, and willingly, since we long ago fashioned the remedy and so recently expanded it.

I do not suggest that we abandon caution—far from it, there are complex issues presented by this bill. But, just as I have confidence in the courts, I am confident that this committee and the Congress can meet them. I do suggest, however, that we keep the "real hurt" uppermost in our minds. Congress has made a contract with the people of this country to keep the marketplace open by pledging their own resources to punish and deter antitrust violators. That contract has been broken and it is up to us to rewrite it. S. 1874, in the context of a hard decision already made, does nothing radical. It puts the law where it was before Illinois Brick and its progenitors. The Congress has already concluded that private and State antitrust enforcement is more rational and cost-effective than Federal enforcement. Let us make the remedy live "in the real economic world."

I am privileged to cosponsor S. 1874 and will do whatever I can to assure its swift enactment. ●

VIOLATORS OF "HUMAN RIGHTS"

● Mr. GOLDWATER. Mr. President, in past months, I have repeatedly addressed myself to the selective application by the administration of President Carter's human rights policy in foreign affairs. I have been amazed at how quick the administration is to level charges of human rights violations against countries who have long been friendly to the United States but are governed by anti-Communists.

In a recent column, retired Air Force General Ira C. Eaker addressed this question in a very profound manner.

The column follows:

VIOLATORS OF "HUMAN RIGHTS"

A policy of President Carter's which generally has been applauded world wide has been his vigorous espousal of "human rights."

He had the courage to suggest early in his administration that Russia was a prime offender in this regard.

More recently, spearheaded by Ambassador Andrew Young, the human rights crusade has moved to Africa, with vigorous campaigning against Rhodesia and South Africa. The President's recent African tour emphasized this foreign policy objective.

Strangely, there has been scarcely a mention by the Carter administration of the

recent major violators of human rights. The leading candidates in this field internationally clearly are Idi Amin of Uganda, Castro of Cuba and Pol Pot of Cambodia, in that order, moving to a grisly climax.

The revelations of murder and tribal genocide committed by Amin in Uganda make the human rights offenses of Brazil and Chile pale into insignificance.

Fidel Castro has been by long odds the principal violator of human rights in this hemisphere for two decades. He has forced more than a million Cubans to flee the country and confiscated more than a billion dollars worth of property. He has also confiscated, without compensation, more than three billion dollars worth of property of U.S. corporations. He has jailed, without semblance of trial or justice, more than 100,000 Cubans and other nationals.

More recently, Castro has provided mercenaries, at the behest and control of Moscow, to conquer Angola and intercede in Somalia and Ethiopia.

However, by far the most flagrant of recent violations of human rights has occurred in Indochina, principally in Cambodia. Here, probably three million people have been murdered or starved to death since the Khmer Rouge takeover three years ago. Here, when its magnitude is ultimately revealed, will undoubtedly be the greatest genocide in this century. Lenin and Stalin killed 10 million in their cruel introduction of the Soviet Communist state. Mao tse Tung probably eliminated more than 50 million Chinese, all told, during his periodic "cultural revolutions." Hitler exterminated five million Jews and caused the death of 10 million other Germans in his senseless wars.

Percentage-wise nationally, however, those tyrannies did not compare with what has occurred in Cambodia, where more than three million people out of a total population of less than 10 million have been exterminated in the last three years.

Pol Pot, the shadowy, murderous Cambodian despot, makes pikers of Stalin, Mao tse Tung, Hitler and all other genocide perpetrators of this century. For example, Phnom Penh, Cambodia's capital, has been reduced from a city of more than two million people to less than 20 thousand inhabitants, all Red military.

Yugoslav journalists, recently permitted to visit Phnom Penh, reported among other grisly details, "There is no money, no post, no television, no public transportation, no telephone exchange, no university, no newspapers. The national bank of Cambodia is a heap of ruins. Its safety deposit boxes lie untouched beneath piles of rubble. Nobody seems to care whether they contain money or not."

The U.S. bears a heavy responsibility for the tragedy in Cambodia, Laos and Vietnam. We failed to enforce the Paris Peace Treaty which Secretary Henry Kissinger negotiated without South Vietnamese concurrence. Our present government should protest with every resource at our command the present inhumane, diabolical treatment of our former allies.●

NEEDED: A NATIONAL EXPORT POLICY FOR A MATURING U.S. ECONOMY

● Mr. STEVENSON. Mr. President, I was pleased to see that in his speech before the American Society of Newspaper Editors on April 11, President Carter included among his anti-inflation initiatives the appointment of a Cabinet-level task force, headed by the Secretary of Commerce, to develop additional measures to promote the export of more agricultural products and other goods and services to pay for our purchases from abroad. I understand that the task force is to report back to the President within 60 days of his announcement. The Subcommittee on International Finance, which has been conducting a comprehensive review of U.S. export policy, will be analyzing these proposals in light of the extensive record we have been developing on this subject. I encourage the administration to develop fresh ideas and not be afraid to tackle politically sensitive issues or challenge economic orthodoxy. I hope, as well, that the task force will examine other administration recommendations or actions, as on DISC, and be willing to reconsider the wisdom of such actions in light of our present trade imbalance.

Mr. President, I submit for the RECORD a recent address by Mr. Robert H. Malott, chairman and chief executive officer, of FMC Corp., Chicago, Ill. This address, which was delivered at the Chicago World Trade Conference on April 5, focuses on the need for a national export policy and touches upon concerns that are being examined by the Subcommittee on International Finance in its export policy hearings.

The address follows:

NEEDED: A NATIONAL EXPORT POLICY FOR A MATURING U.S. ECONOMY

I am especially pleased to have the opportunity to address you today.

This 41st Chicago World Trade Conference could not be more timely, from the standpoint of our own country. Consider, for example, these recent news bulletins:

The precipitous and continuing decline of the dollar against virtually all major currencies continues to create worldwide uncertainty and fuel domestic inflation, or . . .

America's trade gap in February tops $4.5 billion, higher than all but four yearly U.S. deficits and the 21st straight month of red ink, or . . .

The preliminary U.S. GNP figure, after stripping away inflation, shows little or no economic growth in the first quarter of 1978, or this . . .

America's worldwide competitive position continues to deteriorate, as 1977 trade balance for U.S. manufactured goods drops nearly 75 percent.

Against that backdrop, world trade itself is suddenly at a perilous crossroads, the spectre of self-defeating protectionism is again in the air. Increasingly we hear talk of a coming trade war. The focus of this morning's session is, in fact, can the U.S. withstand global economic Armageddon. My answer, in short, is "no," although I suspect that this country would emerge less scarred than any other major trading nation if these conditions should come to pass, I do believe, however, that an all out trade war would be potentially catastrophic—an unacceptable option, to be avoided if humanly possible. Like nuclear war, it would be a no win proposition.

But let's look at the reality of the current situation. Economically speaking, we've been engaged in an international guerrilla conflict for some time, although our Government has steadfastly refused to recognize or admit the fact. Possessed by a laudable if unrealistic commitment to "free trade", our policy planners in Washington have not at the same time insisted on "fair trade." And so for years our trading partners, in response to their own national political interests, have been busy erecting a Byzantine array of direct and indirect barriers to the free trade that is our goal (and the free trade that I'm afraid some of our Washington decision makers mistakenly feel already exists.)

Consider, for example, that Italy offers 10 tax and non-tax incentives to its exporting industries. Japan and Germany each provide 13 such incentives to their exporting companies. The United Kingdom offers 14 and France grants a total of 18 incentives—that is, subsidies—to stimulate its exports. Here are just some of the benefits offered by foreign governments:

Sales tax and value added tax refunds on exports;

Forgiveness of income taxes on export sales and foreign source income;

Special subsidies for export-related research and development;

Special deductions for export-related expenses, including accelerated depreciation schedules for export-producing assets;

Competitive export credit and insurance;

Offsets for currenty fluctuations; and

A myriad of trading company tax shelters and artificial non-tariff barriers.

By contrast, the U.S. extends its exporters only one export tax incentive: The Domestic International Sales Corporation, or DISC. International investment banker Donald M. Blinken, who chairs the executive committee for E. M. Warburg, Pincus and Company, put it well in a recent bylined New York Times article (quote): "West Germany and Japan 'collaborate' by providing to industry low-interest long-term loans and attractive export credit and insurance, (and by) granting handsome latitude in depreciation schedules and the timing of tax payments . . . (in contrast), the U.S. Government 'collaborates' by imposing new restraints . . ." (unquote)

One administration official who clearly does understand the country's export problems is Assistant Secretary of Commerce Frank A. Weil, whom you'll be hearing from at lunch. Secretary Weil characterized our export dilemma succinctly in an interview last December (quote): "The U.S. faces today a deteriorating trade position (and) a declining trade balance in manufactured products. For the first nine months of 1977, U.S. trade in manufactured goods was in surplus at an annual rate of only $4.2 billion. This (was) in contrast to a $12.5 billion surplus in 1976. There is some concern that (this) can be attributed in part to a decline in our overall competitive position." (unquote)

Unfortunately, in our key manufacturing sector especially, this country's worsening export posture has largely been obscured by the administration's fixation with the so-called "oil caused trade deficit." The fact is, oil is not the primary culprit. In 1977, U.S. oil imports rose less than $10 billion while the trade deficit increased $21 billion. Or put differently, more than half of last year's unprecedented trade deficit increase can be directly attributed to the decline in U.S. manufacturing and agricultural trade.

Moreover, the oil import problem is here to stay and, despite energy conservation, it's likely to get worse before it gets better. What the U.S. must do is accept substantial oil imports as an unpleasant reality, much as Japan and Germany have—and most successfully, I might add. They import nearly all their oil, but somehow manage to post trade surpluses year in and year out. In fact, the worldwide commercial success of these two countries seriously undermines arguments of U.S. policy makers who blame our $26.7 billion 1977 trade deficit on increased oil imports.

Yet in the face of this record trade deficit, and the $11 billion drop last year in the country's non-oil trade position, the administration proposes phasing out DISC. To almost all segments of the international business community, the proposal is as bewildering as it would surely be counterproductive and dangerous to the U.S. economy.

Contrary to the President's tax message, DISC has clearly increased U.S. exports. Analysis by the Special Committee for U.S. Exports of the Treasury Department's public report shows that DISC accounted for as much as $9 billion of additional U.S. exports since 1971. As a result, U.S. gross national product has increased nearly $22 billion. And although the Treasury Department in its 1977 report to the President ultimately opposed DISC, Assistant Treasury Secretary S. Fred Bergsten recently pointed out that:

One out of very eight manufacturing jobs in the country exists because of exports;

Exports account for 40% of total U.S. production of construction machinery and 30% of our aerospace output;

One out of every three acres of American farm land produces for export, with over *half* of our wheat, soybeans and rice sold abroad;

Almost one out of every three dollars of U.S. corporate profits is derived from international activities of U.S. firms.

Given America's stake in exports, and the recent deterioration in our manufacturing trade position, now hardly seems the time to unilaterally jettison our country's only export tax stimulant. If anything, DISC should be strengthened and the whole role of U.S. exports re-examined in the light of new international economic realities.

Consider, for example, how small a portion of our gross national product this country actually exports. In 1976, America exported only 7.6% of its GNP. This compares to 21.7% for Germany. Excluding the agricultural portion of GNP, the U.S. exported approximately 12% of its manufactured goods in 1976, compared to about 30% for Japan; and in that same year, German exports from the manufacturing sector actually accounted for more than 50% of that country's total manufactured goods.

The significance of these figures is most apparent when one realizes that this country's trade deficit could be overcome by increasing our exports as a percentage of GNP by only 1½%—in other words from 7.6% to slightly over 9%—a goal that would certainly seem attainable in light of our trading partners' performance.

It is significant that the U.S. is the only major industrialized country without a cabinet-level department responsible for international trade; the only nation where vital international economic policies must be tediously debated among a dozen or more government agencies, each with its own self-interest to protect. While other countries aggressively promote exports by a coordinated industry/government effort, we have handicapped our export potential by creating an atmosphere of industry-government confrontation, and establishing a complex, diffuse and often conflicting bureaucracy to deal with our overseas commercial affairs.

There is no focal point. No single top official charged with maximizing this country's international trade. There is no one charged with the mandate to marshall this country's fantastic resources and to counter the promotion mounted by our aggressive competitors.

The blunt truth is this: America's economy is becoming progressively mature in many industrial sectors and the emerging world economy is an increasingly integrated, highly competitive marketplace. Fred Bergsten conceded as much on March 20th in testimony before the Senate Subcommittee on International Finance. (Quote): "In times past, exports didn't matter much—either to the individual (American) firm or the country as a whole . . . (now) the U.S. must become much more export oriented . . . our future prosperity at home is closely tied to our success in boosting sales abroad . . . (and) a healthy, expanding export sector is essential for the long run stability of our external accounts and thus the dollar . . . (therefore) we must avoid protectionist trade policies and provide full government support for the export efforts of American firms . . ." (unquote)

These are welcome words indeed from an administration which is asking Congress to phase out DISC.

However, more than statements of good intentions, we must have action. The U.S. must in fact "join" the international world, in order to ensure competitive participation in new markets, to assure access to raw materials and, when appropriate, to protect our home markets from further encroachment by lower-cost foreign competitors. That the U.S. has been able to get along until now, virtually ignoring export efforts, is testimony to this country's huge domestic market and once great natural resources. However, as Secretary Bergsten suggests, future U.S. business and job growth will depend to an ever greater extent on healthy and expanding exports.

More than ever, therefore, we need a national U.S. export policy, with clearly defined goals and an organization structured and staffed to implement export strategy aggressively and successfully. I propose for your consideration four specific objectives of such a policy, followed by the major policy recommendations which I believe the U.S. must—at a minimum—adopt.

SPECIFIC OBJECTIVES

I believe the specific objective of a comprehensive U.S. export policy should be:

First, to achieve at least a balance of trade, as a key item in maintaining the value of the dollar;

Second, to expand U.S. export-related jobs substantially and continuously.

Third, to gain wide acceptance of the beneficial relationship between international investment and U.S. exports; and

Fourth, to build economic and technological relationships that strengthen diplomatic and defense interests with key countries.

POLICY RECOMMENDATIONS

Given those objectives, let me offer some concrete recommendations which I believe are fundamental to a successful national export policy.

First, America must aim for tax parity with foreign competitors. The U.S. Government must take every action necessary to assure that American companies are not unfairly penalized by other nations' export subsidies. For example, Congress should expand the DISC program as a partial offset to patently obvious tax advantages enjoyed by foreign competitors. When DISC is discussed in GATT, the U.S. should raise the whole issue of discriminatory trade practices, and at the very least retain DISC as a bargaining chip in any such negotiations.

We must also oppose legislation designed to repeal foreign tax credits (which incidentally merely prevent double taxation) and oppose any efforts to impose U.S. tax on income from foreign subsidiaries before it is remitted to the U.S. This requires educating Congress to the benefits of overseas U.S. operations, including their important role of "pulling" exports from this country. We must convince our lawmakers that unilateral changing of these tax practices only discourages U.S. exports and throws a huge extra cost burden on American companies battling for world markets.

It is time Congress began to see international taxation in international terms, and recognize that in the long run domestic jobs are increased and tax revenues enlarged by expanding America's global export activity.

Second, America must aim for credit parity with foreign competitors. The U.S. should strive, through our GATT negotiators, to reduce the excessive credit competition that characterizes international trade. This means taking firm retaliatory action if our foreign competitors persist in offering their exporters covert credit subsidies such as inflation insurance.

Additionally, our export credit policy must provide for a substantial increase in the export-import bank's lending power and the focusing of exim loans on the more difficult credit risks as opposed to those that can be financed through normal banking channels.

Third, America must achieve a reduction of non-tariff barriers to U.S. exports. The major trading nations must begin to press ahead seriously with GATT negotiations and reduce the non-tariff barriers by which other industrialized nations "load the dice" in favor of their exporting industries and against imports of U.S. products. In addition to the subsidies cited earlier, such devices include border taxes, reciprocity agreements, special trade pacts, exclusionary government purchasing policies, and restrictive standards and specifications.

But the U.S. must also recognize the effect of our own "home-grown" barriers to American exporters; specifically, those regulatory constraints, designed to achieve domestic goals but which have had an adverse impact on our competitiveness abroad. Consider the cost effect of OSHA, EPA, the Toxic Substances Control Act and ERISA, for example; the restrictive effect of FDA on our pharmaceutical industry; and the impact of the anti-Arab boycott legislation; what Frank Weil calls "The unintended consequences of well-intended acts."

It is essential, therefore, that Congress take a hard look at laws and regulations—both on the book and proposed—in the light of the new trade realities. No matter how well meaning some of these measures may once have seemed, and however valid others still may be, all must be scrutinized to determine which are absolutely necessary and which are merely hampering our export growth. In addition, we must oppose all attempts to "export" American laws instead of goods, as with the proposal to require environmental impact statements on operations abroad as a condition for obtaining Exim financing.

Fourth, America must build positive economic relations with other nations. As a matter of policy and pragmatism, we should give special attention to less developed countries, not only because they offer excellent, fast-growing market opportunities for U.S. exports, but because LDC's supply us with vitally needed fuel and raw materials to run our industry.

Remember too, that the presence of U.S. affiliates in these countries—helping them build viable economies, creating a preference for U.S. technology, and expanding their natural resource industries—is essential to building mutually trusting and profitable relationships over the long term.

Nor can this fact be ignored: if we stifle U.S. business operations in these countries, they will veer toward and perhaps become dependent on Japanese, European or even Soviet technology—and their political and military loyalties will likely shift in the same direction.

Fifth, America must negotiate non-discriminatory treatment of international investment. This requires establishing well understood and equitable international rules on investment, as in the new OECD guidelines for corporations and governments. It also requires developing guidelines with less developed countries, to ensure that multinational corporations are not subject to unreasonable discrimination or arbitrary violation of agreements.

Sixth, and last, America must expand U.S. Government export promotion programs, and view associated costs, not as expenditures, but as a national investment—in U.S. jobs, increased tax revenues, and in faster GNP growth.

This then is our challenge. If we were to actually implement these recommendations, then I submit that the U.S. would be able to compete effectively with other nations and in time assume the rightful place this country should enjoy in international commerce.

However, to realize our export potential requires two basic changes: one dealing with national attitude; the other with government organization.

We must begin by "selling" the American public on the absolute necessity of increasing America's export capabilities. We must demonstrate how exports help strengthen the U.S. dollar, reduce domestic inflation and create American jobs. In other words, we must show public and politicians alike that exports and foreign investment serve the country's best interest. Specifically, any such public education effort would involve:

Developing authoritative, publicly understandable statistics on the impact of exports and foreign investment on jobs and tax revenues in the U.S.;

Building much greater awareness of the realities of an increasingly interdependent world, and the economic and defense reasons to accelerate growth in the developing countries;

Calling for an end to "the war against multinationals"—the U.S. companies that provide most of our export business and strengthen our economic, political, and military relations in an increasingly dangerous world;

And lastly, developing new understanding with segments of American society with which business has too long been at odds. We should inform the media, communicate with the academic community and establish a dialogue with organized labor in an effort to gain their understanding of how export promotion generates jobs for U.S. workers.

As for Government organization the scattered U.S. bureaucracy now charged with export responsibility must be unified. This means ultimately establishing a Cabinet Department of International Trade. In the interim, a high level coordinating body, comprised of top officials from Commerce, Treasury, State, Exim, and the special trade representative's office, should be convened to oversee and shape a more aggressive export and trade policy.

To sum up, American exporters are hamstrung by both U.S. Government actions and failures to act. And we are hamstrung by foreign government action. The situation is unacceptable and the consequences are becoming increasingly apparent. In light of our severely devalued dollar and the increasing need for U.S. industry to compete effectively worldwide, the time has come for a positive, consistent, determined U.S. export policy. The need for such a national policy has never been greater or clearer—to me and I expect to each of you.

Let me concur with our conference chairman, therefore, about putting our words into action. Although it breaks with this annual conference's traditions, I would like to propose to our conference chairman that before we adjourn tomorrow there be a resolution of this body directed to our Government leaders expressing the critical need for a comprehensive policy on U.S. export. The gravity of our country's export posture demands prompt action—from us and from our Nation's leaders, as well.●

INCOME TAXES

● Mr. GOLDWATER. Mr. President, the American people were reminded again this month of just how much the extravagance of Government is costing them personally in the form of taxes. This is particularly true of the middle class, middle-income people who bear the brunt of our enormous tax bill. As a consequence, more and more people are beginning to ask whether they are getting their money's worth for their tax dollars and just what their representatives in Congress are doing to cut costs of Federal spending.

Recently, the distinguished columnist, Nick Thimmesch, put this whole problem into proper and somewhat frightening perspective in an article written for the Los Angeles Times Syndicate.

The article follows:

DID WE GET OUR MONEY'S WORTH FROM THE INCOME TAXES WE PAID?

WASHINGTON.—This past week must be remembered for the passage of the conclusive Panama Canal treaties and for the culmination of one of the most wrenching income tax seasons on record. We can put the soul-searing canal questions behind us, but not that enormous tax bill we just paid.

Americans are becoming painfully aware that the tax bite from federal, state and local governments is getting so big that, whatever our politics, we sense that something fundamentally wrong is going on in our society.

For decades, comedians, our friends, even the IRS man himself went through the spring rites of making jokes about that poor soul, the taxpayer. But the seasonal jokes always passed after April 15.

This year it is different. Never before has the majority of Americans, the working middle-class, been hit so hard and convincingly.

The myth that lower income people are victimized by our income tax system is dispelled. The Tax Foundation study shows that 25 percent of the taxpayers—those making upwards of $16,000, and therefore the middle-class and beyond—pay 75 percent of the taxes.

Moreover, middle-income people, accustomed to paying 10 or 12 percent of total income to the federal government, now find themselves paying 15 and 20 percent, because inflation has moved them into higher tax brackets. Many an American got raises to compensate for inflation, but actually lost income in terms of real dollars due to higher tax rates.

Income taxes don't end with the feds. States now hit taxpayers with anywhere from 5 to 18 percent income taxes, and many cities dig in for another 3 or 4 percent. Add Social Security tax, and many middle-income Americans wind up paying nearly one-third of their gross to governments. This doesn't even include sales and other taxes.

For years, certain liberal senators have cried "alarm" over how some super-rich pay no taxes at all. Actually, an infinitesimal percentage of taxpayers use legal loopholes to escape taxes. But conventional wisdom leads the non-rich to miss the mark, and vent their anger at this tiny group.

The facts are that the poor pay little or no income tax these days. The rich pay high taxes, but can afford it. It is the middle-class which bears the brunt, and has the right if not the duty to ask: Did we get our money's worth from the tax we pay?

The answer is "no." With the federal budget reaching $500 billion, the national debt approaching $550 billion, and a smaller percentage of people paying in money which in turn goes out to nonworkers, the answer is absolutely "no."

Every aggrieved taxpayer-voter must ask this fall's crop of political candidates two questions: 1—What did you do in 1977-78 to bring federal spending into line with federal income? 2—What did you do to help stop the binge of outright frauds on the federal government which experts reckon cost taxpayers upwards of $12 billion last year?

In the past 15 years, the enactment of "liberal" federal programs has produced a whole population of people receiving federal checks, and also provided billions for a variety of projects designed to improve the lot and abilities of Americans.

The goals of helping the truly unfortunate and of giving certain disadvantaged people a hand on the way up are commendable and worthy of our tax dollars—if they are honestly implemented, and work.

But we have painfully learned that: While billions were spent on federal aid to education, our children's ability to perform basic skills declined; urban renewal and public housing programs worsened cities; the welfare and minority-aid programs actually made people more dependent on Uncle Sam and less able to cope with life; a bigger and bigger share of our huge defense budget went to keep military and civilian "personnel" happy, and didn't improve defense.

And it hurts, also, to learn that billions have been ripped off Uncle Sam by people and firms involved in food stamps, housing programs, health care, job training, and aid of those aforementioned disadvantaged.

Students borrow thousands from the feds and won't pay it back. Doctors learn how to cheat the government on Medicaid (one collected for performing seven tonsillectomies on the same patient). Consultants, lawyers, CETA applicants, grain dealers, vendors of every sort learn how to play the game of filling out government forms and getting undeserved checks in return.

Those who waste or steal federal money wouldn't dare do the same in the private sector. But it's easy to do it to Uncle Sam, because he is us, and we are him.

Who votes to fund questionable programs? Who fails to provide the oversight to ensure that any program is not exploited? Often it is the rich senator or congressman, fretting over the poor and disadvantaged, who salves his conscience by voting the working middle-class' tax payments for federal programs. Nice irony, eh?

The unfortunate consequence is that people lose faith in government, in programs which could help people, and indeed in our income tax system itself. It is proper to ask ourselves: Did we get our money's worth from the income taxes we just paid? Ask the candidate in November.●

THE OLDER AMERICANS ACT

● Mr. WILLIAMS. Mr. President, I recently received a very thoughtful and sensitive letter from one of my elderly constituents, who wanted to express her pleasure in having "a place to go—in this case, the nutrition program in her community. As we conclude hearings on the reauthorization and extension of programs under the Older Americans Act, I feel that it is especially appropriate to stress the considerable benefits that this act has given to so many of our senior citizens.

Only a few days ago, I conducted a field hearing on the Older Americans Act in my home State of New Jersey. My purpose in holding this hearing was to determine from the senior citizens themselves how effective Older Americans Act programs are in meeting their needs. While strengthening of existing services and establishment of necessary projects, particularly in the areas of housing, nutrition, and legal assistance, were major concerns, I was greatly encouraged to view the widespread participation in the present programs, especially the title VII nutrition programs.

The title VII nutrition program for the elderly was added to the Older Americans Act in the 1972 amendments. The intent of the program is to foster better nutrition for older adults, many of whom lack the money, skills, mobility, or incentive to prepare nutritionally adequate meals for themselves. In addition, a very important corollary of the program is the promotion of a social environment for seniors, in an effort to combat the feelings of isolation and loneliness which many of them experience. This aspect of title VII is often as vital to participants as the meals themselves.

I believe title VII has made great strides in meeting both goals. And I would like to cite as evidence the following letter, which most concisely and effectively expresses the feelings of my many constituents who have written to praise this program:

DEAR SENATOR WILLIAMS: Since I've been going to the Nutrition Program I feel so good because before I was all alone and had nothing to do.

I'm going to be 80 years old and I thank God that I have a place to go.

Mr. President, I feel we can be justifiably proud of the achievements of Older Americans Act programs, and I hope we can improve and extend their benefits to even greater numbers of elderly Americans.●

RHODESIA AND SOVIET INTERVENTION

● Mr. GOLDWATER. Mr. President, instead of wasting its time trying to force an agreement in Rhodesia which would include guerrilla terrorists in a majority government, the Carter administration would do much better to start figuring out what it would do if the Russians and Cubans turned their attention from Ethiopia to Ian Smith's country.

This is a very real possibility and a very dangerous possibility so far as American foreign policy is concerned. The whole pattern of Soviet operations in Africa strongly indicates that Rhodesia will eventually become a target of Russian and Cuban military aggression. Already, the Russians are supplying guerrilla forces who are attempting to overthrow the modern government of Rhodesia. And this is in keeping with past action by the Soviets. First there was a testing of the waters by the Kremlin in Angola; ther. there was a bolder venture in Ethiopia. These were carried out without interference from the West, most particularly the United States. And this makes it reasonable to assume that Rhodesia may be next.

The article follows:

IS RHODESIA NEXT IN LINE FOR SOVIET INTERVENTION?

(By Victor Zorza)

The new danger in Africa, just when the Russians and the Cubans should be beginning their withdrawal from Ethiopia, is that instead of going back home they will turn around and go to the aid of the Rhodesian guerrillas. What will the West do then? Its threats have done nothing to get them out of Ethiopia. It was only when the provocation that brought them there in the first place was removed, and the Somali regular forces that had invaded Ethiopia retired in disorder to their own borders, that the prospect of a Soviet-Cuban withdrawal became at all real. There is a lesson here for the West that we will ignore only at our peril.

Somalia was the aggressor in Ethiopia, and the West found itself on the wrong side. That gave the Kremlin the opportunity to introduce its expenditionary force into Ethiopia, with the approval of most African leaders. Now a similar chain of events may be beginning in Rhodesia.

The new Rhodesian settlement negotiated by Ian Smith and the three African leaders inside the country is rejected by the guerrilla leaders now outside Rhodesia, and by most of the black African countries. The West would again find itself on the wrong side if it gave support to the Smith formula, because the "internal settlement" is a transparent device to ensure that the real decisions in Rhodesia will continue to be made by the whites.

That is what Moscow Radio has been telling the Africans, and the analysis cannot be easily controverted. It has also said, more ominously, that the new situation creates "a serious threat to peace" that could be made an excuse for the introduction of Cuban and Soviet military forces. "The leaders of the Patriotic Front." Moscow said, "have stated that they will step up their armed struggle against the illegal Smith regime and its puppets, and will struggle to a victorious conclusion." That is one threat to peace.

The other, which is really the obverse of the first, is that Rhodesian security forces will seek to preempt the stepped-up attacks by Patriotic Front guerrillas based in neighboring Mozambique and Zambia. To do so, the Rhodesian forces would have to cross international borders, as they have done repeatedly in the past, and thus give both Zambia and Mozambique a reason for requesting Soviet-Cuban military aid.

Once again, as in the case of Ethiopia, the Kremlin would be in a position to say that a communist expeditionary force had gone to Africa at the request of a legitimate government to help it against invaders—though this time the invaders would be white.

Ian Smith thinks he knows what he is doing. He believes that the West in general, and the United States in particular, cannot easily afford to allow yet another communist military intrusion into Africa. The United States has tried to prevent the communist intrusion into Angola with little more than angry words, but when those failed it warned the Kremlin that any repeat performances would have grave consequences. But when the Kremlin did repeat the performance, in Somalia, the United States was not in a position to do anything about it—until it was too late. By the time the Somalis agreed to withdraw—partly under prompting from Washington, but also under blows from the communist expeditionary force—there were more than 10,000 Cubans in Ethiopia, a thousand Russians, two Soviet generals, and large stocks of Soviet arms.

The pattern that had so often been anticipated by students of Soviet policy in Africa was assuming an increasingly clear shape. First a testing of the waters by the Kremlin in Angola, and then a bolder venture into Ethiopia, which could become a stepping stone to Rhodesia, so that ultimately Soviet forces could intervene in South Africa when that unhappy land explodes.

The terms of the "internal settlement" and the world reaction to it would make it difficult to keep the Kremlin out if it decided to intervene again. Although the Foreign Office in London and the State Department in Washington have taken refuge in ambiguity, while they try to agree on the next step, the condemnation of the Salisbury deal by Andrew Young, the U.S. ambassador to the United Nations, makes one thing clear. The Western powers will not be able to support Ian Smith in imposing on the Rhodesian blacks a settlement that ignores the Patriotic Front and its guerrillas.

The pictures of happy blacks dancing and chanting their approval of the "internal settlement" do nothing to alter the realities of the situation. True, the camera does not lie—but it is not much help in determining where the political loyalties of the population lie. Those are measured by the ballot box.

Andrew Young takes a different view of Soviet adventures in Africa from that held by Zbigniew Brzezinski, President Carter's national security adviser. Young believes that the Kremlin will not be able to build a permanent Soviet presence in Africa, that sooner or later its own blunders, and African pride, will lead to the expulsion of Soviet influence, as has happened so frequently in the past. Brzezinski, who is more concerned with the global strategic picture than with what happens just in Africa, is sometimes accused of taking unthinkingly the alarmist view of Soviet actions, which is said to come automatically to a man with his Polish American background.

But there is one important element in that background that should put him on Young's side. Anyone steeped in Polish history as he is will remember the "internal settlements" imposed by Russia on Poland during an occupation that lasted more than 100 years—and the refusal of the great majority of the population to acquiesce in them, even though the Russians usually managed to find a few Polish leaders who were prepared to act as their puppets.

The parallels with the black leaders who accepted Ian Smith's "internal settlement" may not be exact, but they are sufficiently suggestive to give pause to a man with Brzezinski's background. He certainly wants to stop Soviet incursions into Africa once and for all—but he may find that the way to do it is to give greater U.S. support to those African leaders, in Rhodesia and elsewhere, who cannot be accused of being quislings by their compatriots.

If the West allows itself to be maneuvered once again into the position of supporting the wrong side, then it will also find itself on the losing side—and the Kremlin will have made another gain in the steady unfolding of its African strategy.●

DEFENSE POLICY COMMENTARY

● Mr. INOUYE. Mr. President, the Honorable Clare Boothe Luce, whose distinguished career has included service as a Member of Congress and as Ambassadress to Italy, recently shared with me a copy of a letter written by Gen. Edwin Black, a retired brigadier general who headed the Army support command in Thailand from 1967 to 1968 and is now director of industrial development of American Samoa.

The letter, which appeared in the Honolulu Advertiser on Monday, February 27, 1978, raises fundamental questions about our present defense policies. General Black's comments are interesting and thought provoking. I believe they are worthy of our study and concern. I therefore ask that General Black's letter be printed in the RECORD immediately following my remarks.

The letter follows:

[From the Honolulu Advertiser, Feb. 27, 1978]

LETTER TO DEFENSE SECRETARY BROWN

(By Edwin F. Black)

Dear Mr. Secretary,

Last month you justified your $126 billion defense budget request to Congress on the basis of the Carter administration's position that in terms of strategic nuclear power "a rough equilibrium exists" today between the United States and the Soviet Union.

Now just what the hell does that mean, Dr. Brown?

Does it mean that we can go to bed at night confident that our children will have a better chance to grow up enjoying the benefits of freedom and peace than they did back in 1962 during the Cuban missile crisis when, in Kissinger's own words, we held "a 5–1 superiority in strategic missiles, a 3–1 superiority in strategic bombers, total naval superiority everywhere, and rough equality on the ground in Europe"?

Or does it mean that America stands today on the edge of a precipice, in imminent danger of falling into a position of strategic inferiority from which we may never recover?

Please give it to us straight, Dr. Brown. We may not be privy to your classified defense studies, but we have a gut feeling that you can't have it both ways.

We understand that the quantitative and qualitative comparison of U.S. and Soviet nuclear arsenals is a complicated process. But we know how to read a corporate annual report and we're just not satisfied when you say the strategic forces of the two great powers are roughly equivalent. Are you acting as some nuclear-weapons Price Waterhouse, certifying the administration's balance sheet on national security by some arcane set of "generally accepted accounting principles?"

If so, we are entitled to know what's in the fine print.

Are you changing depreciation from accelerated to straight line? The B–52's are more than 20 years old. Are you deferring costs in expectation of future revenues by delaying the Mobile MX ICBM? Are you changing the value of inventories by revising MIRV accuracies? All these are old tricks in the CPA trade. But the figures in the defense budget represent not "supermoney" billions, but lives. Lives of the American people.

Skip the doublespeak, please. The annual Defense Posture Statements are public documents. Since 1960 they spell out the shift in America's relative strategic position with respect to the Soviet Union from one of clear superiority to one of numerical inferiority—an inferiority legalized for the world to see in the SALT I accords.

We are not totally uninformed. We have read the recent papers of the Committee on the Present Danger, a committee made up of responsible citizens who have served our country in senior national security positions in the past. We know the picture is far from rosy so let's not beat around the bush.

Suppose a "rough equilibrium" exists today. What does that mean in terms of tomorrow? We know enough about lead times to understand that it takes roughly a decade for a new weapons system to become operational and in the hands of troops. This being the case, we realize we must act on the basis of U.S. and Soviet defense trends. And with lead times being as long as they are, we realize these trends have a momentum of their own which, if allowed to go on unchecked, could become irreversible.

Although you tell us that the Russian defense effort is now some 20–40 percent greater than ours, you make no call in your current budget for significant additions to the U.S. strategic forces. Is this any way to deal with the problem of relative defense trends? Surely you must be familiar with your predecessor Defense Secretary Rumsfeld's warning of March, 1976, that:

"The secretary of defense and the president in the mid-1980s will have little basis for confidence in the adequacy of U.S. military capabilities if the adverse trends we have observed in the past 5 to 10 years are allowed to continue."

If you missed that, you may have read Rumsfeld's predecessor's warning in the February 1976 Fortune magazine. Here former Defense Secretary Schlesinger emphasized that "No one, however, can challenge the overall trends or their long-term implications. A continuation of such trends over a period of years would leave the United States markedly inferior to the Soviet Union in gross military power. . . .

"Power remains the ultimate sanction in dealing with potential conflict . . . The United States today still represents the only potential counterweight to the military and political power of the Soviet Union. There is no one else waiting in the wings. There will be no deus ex machina.

"That the United States alone has the power to serve as counterweight to the Soviet Union continues to be an ineluctable fact—just as it has in the entire period since 1945. We may resent that fate or accept it soberly, but it remains the fundamental reality of global politics."

As far as we are concerned it is this reality which explains why in the 1962 when we had an acknowledged strategic superiority we could make the Russians pull their missiles out of Cuba. And it also explains why, now that we are roughly equivalent in strategic power, our vapid protests against the Soviet deployment of Cuban troops to Angola and Ethiopia remain ignored.

Only a few nights ago the TV news broadcast announced that Soviet pilots were flying MIG–23s from Cuban air bases. The official explanation, passed on to us listeners, was that since all the Cuban pilots were already fighting in Angola and Ethiopia there was no one left but the Russian instructors to fly the regular air patrol missions for the Cuban government.

What the devil is going on, Mr. Defense Secretary? Should we prepare ourselves for some future announcement that Cuban soldiers have joined an anti-U.S. wet-back guerrilla force operating back and forth across the Mexican border?

Getting back to the more important matter of maintaining the present "rough equilibrium" of U.S.-Soviet strategic forces when present defense trends continue to be as adverse as your last two predecessors have reported, we can only surmise that you are under instructions from the president not to strengthen our strategic forces as this might interfere with the ongoing SALT II negotiations.

In this regard we assume you are familiar with Public Law 92–448 which specifies guidelines for these negotiations. Specifically it says that any future arms control treaty should "not limit the United States to levels of intercontinental strategic forces inferior to the limits provided for the Soviet Union."

Reaching such an agreement on paper is one thing. But maintaining our present tenuous strategic parity is a national responsibility involving such hard realities as lead times and your current defense budget.

What we would like to know, Dr. Brown, is how can we get there from here when your budget:

Defers funding for the mobile intercontinental ballistic missile.

Closes the production line for the Minuteman missile.

Ends the B–1 supersonic manned bomber program.

Provides for only one Trident ballistic missile submarine when you had authority to opt for two this fiscal year.

Provides no money for the Navy's planned aircraft carrier.●

POISON IN THE WIND

● Mr. HART. Mr. President, as my colleagues know, Denver, Colo., used to be known for its blue skies and clean air. Today it is one of the "dirty dozen"—one of the most polluted cities in the country.

Our problem is primarily the automobile, which contributes 95 percent of the carbon monoxide in our air and 85 percent of the hydrocarbons. As a result, health standards were violated on 1 day out of 3 in 1975, and on some days levels of these pollutants were as much as three times higher than health standards permit. We are working to solve this problem at every level of government, and I will be seeking Federal funds to help the State in its efforts.

Today, I would like to share some important information on air pollution and the health effects of carbon monoxide in high altitude environments like ours. This information was presented recently in a television documentary entitled "Poison in the Wind," which was produced by KMGH–TV in Denver. I have paraphrased some of the important points the program made:

At high altitudes, where there is less oxygen, the dangers of carbon monoxide pollution are greater than those at sea level. Not only do cities at high altitudes have less oxygen, they also have more carbon monoxide because cars emit more at higher elevations.

A 1973 study shows that, among nonsmokers nationwide, the people in the Denver metropolitan area have the Nation's highest levels of carbon monoxide poisoning in their blood. Even Los Angeles was lower. This high amount of carbon monoxide in the blood indicates a chronic state of poison that damages enzymes and cellular tissue.

Air pollution can cause the same damage to an individual's coronary and pulmonary system as smoking. Research cited in the documentary indicates a possible connection between carbon monoxide and atherosclerosis as well.

Tests on pregnant women in Los Angeles have shown that the fetus takes in more carbon monoxide than the mother. It is already known that women who smoke have smaller babies. Now it appears that birth size might be affected by air pollution as well. Other problems such as congenital defects and slight mental retardation might also result from exposure to high levels of carbon monoxide during pregnancy.

Because people in Denver like to jog both outdoors and in gymnasiums, the producers of "Poison in the Wind" compared carbon monoxide levels inside a downtown gym with the outside air. Dr. Thomas Kurt of the University of Colorado Medical Center's emergency room conducted this study and offered the following observation:

Above me in the track of the central YMCA are runners who are running presumably to induce physical fitness and to reduce their incidence of coronary heart disease. It's rather ironic that low levels of carbon monoxide such as this (19 parts per million) have been shown in laboratory animals such as rabbits and chimpanzees to produce atherosclerosis. So in a way we have a counterproductive situation. Carbon monoxide levels that might be producing atherosclerosis and runners above us who are trying to prevent atherosclerosis.

After investigating carbon monoxide levels during rush hour in the downtown area, the program examined carbon monoxide levels in suburban communities—where many people believe there is little or no air pollution problem. To test suburban carbon monoxide levels the Environmental Protection Agency placed a carbon monoxide monitor in a home located 15 miles from downtown Denver. The test results showed that even in this location Federal clean air standards are being violated.

There is, of course, much more information about the adverse health effects of air pollution. In one sense, however, Colorado is fortunate. Citizens are becoming aware of the problem and trying to reduce their driving, the health consequences are finally being discussed, and TV stations like KMGH are shedding light on the problem and what can be done about it. I would be happy to provide the full script of this excellent program, "Poison in the Wind," to anyone wishing to read it.●

A SERMON BY THE REVEREND HENRY L. CHENNAULT, APRIL 17, 1978

● Mr. THURMOND. Mr. President, on Easter Sunday, March 26, I had the pleasure of hearing a sermon by the Reverend Henry L. Chennault, pastor of the First Baptist Church in my hometown of Aiken, S.C. In the sermon, Reverend Chennault discussed the meaning of the Resurrection of Jesus. It was not a dry, academic discussion, the all too familiar kind of sermon that sets a congregation to coughing, shuffling feet, and taking frequent, furtive glances at their watches. Rather, this was an original, forceful, dramatic presentation full of learning, wisdom, and human sympathy. It riveted the attention of everyone in the church.

After the services, I asked Mr. Chennault if he would favor me with a copy of his remarks, and he was kind enough to agree. Even though cold print cannot give the impression of the effect of the sermon, so skillful was the delivery, I feel that my colleagues would enjoy reading it. To enable them to do so, I ask that it may be printed in the RECORD.

The sermon follows:

THE AWFUL HOURS

(By Rev. Henry L. Chennault)

All of us had some bad moments in the course of our space exploits; I remember especially those minutes of sound "blackouts." It was during these times we could receive no voice communications from the astronauts.

I recall how anxiously we awaited John Glenn's re-entry into the atmosphere of the earth. For a period of several minutes we did not know whether or not his heat shield had held—whether or not he was securely safe or seared beyond a cinder.

I remember vividly the Apollo 8 Astronauts; when they went beyond the moon on their last scheduled lunar orbit and were out of communication, they fired their rocket in order to escape the moon's gravitational pull. How we waited for those long, awful minutes to pass for them to come out into open space again so we could know if they were on their way back to earth or locked in an eternal lunar orbit.

As awful as those moments were, none can compare with the chilling, haunting hours Humanity spent when Jesus was silent and sealed inside that tomb.

What happened in those awful hours?

First, *The dead were all waiting.* Those who had died with their faith in God waited to see if they had lived in faith or in fantasy and foolishness. If Jesus stayed dead, then Isaiah was a liar, "He shall prolong his days. . . . He shall see the travail of His soul and be satisfied." If Jesus stayed dead, Abraham was a faker, "out of thee shall come forth a great blessing to all people." If Jesus stayed dead, Abraham was not a blessing but a curse. If Jesus stayed, Shadrach, Meshach and Abednego had been victims of hallucinations; they thought he was inside the fiery furnace with them.

If Jesus stayed dead, then every little Hebrew woman who had prayed for her children, every dedicated Hebrew man who had sacrificed to his God, every trustful Hebrew child who had said his prayers at night—all these had no more from their efforts and faith than psychological charge in the face of human fragility and futility.

The ones who had died without having any faith in God also waited because if Jesus stayed dead, then they had lost nothing. In fact they had won! For they had lived unto themselves. It meant Jezebel had won—she had satisfied her lust for land, power, and wealth and had gotten away with it.

It meant Pharaoh had won—the Hebrews left Egypt for a Promised Land—a land which none of them, save two, would ever reach. Pharaoh had lost a battle, but he had won the war—if Jesus stayed dead.

It meant the Serpent had won, his lie to Eve and Adam has borne its fruition. His lie was not the truth if Jesus stayed dead. Because of Satan's interpretation of sin, man now could taste the pleasures of sin for more than a season. There could be no punishment. The grave would be the end. All meaning to living would be in the living. The head of the Serpent would not even be bruised. The head and the heart of the Seed of woman was crushed—so long as Jesus stayed dead.

It meant also that Herod the Great had won. He had tried to kill Jesus by slaying thousands of innocent Hebrew boys. But now he had won. His son had played a part in the execution of Jesus. With Jesus' death all the Herods were victorious.

Secondly, while the dead all waited, the living all waited, too. The scoffers waited—this was their day. They had asked "By what authority do you do these things?" They had cried out in Pilate's palace, "Crucify Him." They had reviled Him on the cross.

With His death these scoffers perhaps were a bit more subdued, but in these awful hours they were still jubilant. Yet in spite of jubilation their fears were shown; they had condemned Him by using His words about destroying the temple and rebuilding it within three days as evidence of political sabotage and saber rattling. In these awful hours they admitted to seeing the truth of his meaning. They feared His resurrection; so they asked Pilate to secure his tomb with a squad of soldiers. This done, they continued in their religious festivities.

Also, the soldiers waited—on guard duty. It was just another dirty detail to pull this duty! Can't you imagine the comments made in the barracks vernacular about how utterly ridiculous it was to guard a dead body and make sure it didn't get up and walk away! This duty made about as much sense to those soldiers as busy work does for any soldier. To them it was like digging a ditch to have something to do and then filling it up again to have something else to do. No doubt the soldiers had much rather have been in the relative comfort and warmth of their barracks and beds than around a damp campfire and cramped cemetery.

And the disciples of Jesus were waiting. Perhaps they were pondering Job's questions "If a man dies, shall he live again?" As they contemplated life, they may well have been saying something akin to Shakespeare's words from Macbeth's mouth: "If (life) is a tale told by an idiot, signifying nothing."

What hope did Jesus' words, spoken just hours before, have for them now: "I go to prepare a place for you . . ."? Was that place a cross and a borrowed tomb?

And, finally while the dead waited and the living waited all of us yet unborn waited.

You see we were there. He died for our sins. "He was wounded for our transgressions. "He was bruised for our iniquities."

He took our place. "The chastisement of our peace was upon Him and with His stripes we are healed.'"

He forgave us for our part. "All we like sheep have gone astray. We have turned every one unto his own way."

Paul dared to look into the abyss of the awful hour. He speaks for us. If Jesus stayed dead, Paul saw for us: The futility of preaching, "If Christ be not risen, then our preaching is in vain;" and he saw the vanity of faith "if Christ be not risen, your faith also is in vain." If Christ stayed dead, he saw the falsehood, the lie of Christian witness, "Yes, we are found liars of God, because we witnessed that He raised up Christ." He saw the eternity of sin, "If Christ is yet dead, you are yet in your sins." And he saw the doom of the dead, "Then they also that are asleep in Christ have perished." Those awful hours were deciding for us about life and death. What happened during those awful hours?

Except for these briefest comments God's word is silent. But let us think about what possibly did happen. Our imagination can fill in the gaps. A friend of mine captured those moments in these words:

And alone, all alone, this Jesus took in His own perfect self
The stinging deathly poison of sin and slowly He laid His head on His breast
And breathed one last breath of life and they laid Him in a lonely grave
And the angels folded their wings and wept like a little sick child.
But the demons of hell danced round the door of that tomb and they danced, and they danced and they danced.
For two days and nights, not a smile, not a song came from the heavenly place of God.
Then early that morning, the great God and Father of all the universe
Turned and commanded that tall angel at His right hand "Call forth the angels,
"Bring forth the choirs of heaven
"Prepare for singing and rejoicing
"For the Son of God is coming home."
And as though His command had been heard in the darkness of that cold grave,
Jesus turned and slowly He rose up to His feet.
And as He stood He took one step toward the door, and with that step the earth shook down to its center.
And with another step a cry came up from the heart of hell
As Satan's power was crushed beneath the might foot of the Son of God.

And reaching the door Jesus turned and standing with his feet back on the earth He had made
He looked down into the bleeding wound He had left in the side of death.
He cried, "Oh Death, where is the mighty sting that has killed my man
Where is the grave that can hold my children?"
And He waited and He waited but no answer came for death had lost His face, and slipped away in shame.
And Jesus on that day gave man a Saviour, a Saviour of the world.●

Mr. ROBERT C. BYRD. Mr. President, I am expecting the minority leader.

Mr. President, I wish to proceed for 5 minutes.

The PRESIDING OFFICER. The Senator from West Virginia is recognized for 5 minutes.

SENATE RESOLUTION 442—COMMENDATION OF LEE WILLIAMS

Mr. ROBERT C. BYRD. Mr. President, I send to the desk a resolution that is offered by me on behalf of myself, Mr. BAKER, and all other Members of the U.S. Senate, and I ask unanimous consent for its immediate consideration.

The PRESIDING OFFICER. The resolution will be stated by title.

The legislative clerk read as follows:

A resolution (S. Res. 442) commending Lee Williams for long, faithful, and exemplary service to the United States Senate.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

Mr. ROBERT C. BYRD. Mr. President, may we have order in the Senate?

The PRESIDING OFFICER. The Senate will be in order.

Mr. ROBERT C. BYRD. Mr. President—

When a man does a deed that you really admire,
Don't leave a kind word unsaid
For fear to do so might make him vain
Or cause him to lose his head,
But reach out your hand and tell him "Well done,"
And see how his gratitude swells.
It is not the flowers that we strew on the grave;
It is the word to the living that tells.

Mr. President, the Senate is losing one of its most valuable resources with the retirement from the policy staff of Lee Williams.

Lee Williams has been a Senate staff member for 23 years, including service since 1975 with the Senate Democratic Policy Committee.

Since I became majority leader in 1977, Lee Williams has served as general counsel to the Policy Committee and he has consistently rendered wise, efficient, and dedicated assistance to me and to the Senate.

A graduate of the University of Arkansas and its school of law, Lee Williams practiced law in Fayetteville, Ark., for 2 years before joining the staff of former Senator J. W. Fulbright in 1955. From 1955 to 1960, he was a legislative assistant to Senator Fulbright, and in 1960 he became Senator Fulbright's administrative assistant. He remained in that capacity through 1974.

Senator Fulbright was a senior Member of the Senate with major responsibilities, and he benefited greatly from the dedicated service of Lee Williams.

In recent years, through his work with the Policy Committee and through his work with Senator Fulbright, more and more Senators have come to know Lee Williams and to recognize his outstanding qualities.

I personally will particularly miss Lee Williams and his helpful advice, and I know that all Members of the Senate regret his departure.

It is fitting that we honor Lee Williams today with this resolution cosponsored by all 100 Members of the U.S. Senate and that we pay tribute to his long, faithful, and exemplary service to the U.S. Senate.

Mr. President, I am trying to think of some lines written by Longfellow.

I am not sure that I can recall, I will try:

I shot an arrow into the air,
It fell to earth, I knew not where;
For, so swiftly it flew, the sight
Could not follow it in its flight.
I breathed a song into the air,
It fell to earth, I knew not where;
For who has sight so keen and strong,
That it can follow the flight of song?
Long, long afterward, in an oak
I found the arrow, still unbroke;
And the song, from beginning to end,
I found again in the heart of a friend.

Mr. President, to the best of my recollection, Lee Williams is the only employee whom I have had in the course now of more than a quarter of a century on Capitol Hill whom I have ever addressed while he was an employee of mine as "my friend." I do that today in referring to Lee Williams. I know that all Members of the Senate join me in expressing our profound appreciation to the old Arkansas Traveler, Lee Williams, and in wishing him the best in the years ahead.

[Applause, Senators rising.]

Mr. BAKER. Mr. President, it is often my opportunity to bring a partisan perspective to proceedings of the Senate. It is less frequently my opportunity to join in unanimous acclaim for a proposal or legislative act. In that regard, I can recall no occasion when it has been such a distinct pleasure to rise to bring total and unanimous bipartisan praise to a deserving and distinguished officer of the Senate.

While Lee Williams has served the Democratic Policy Committee and the majority leader with great distinction, he has also been an active and willing participant in the effort of the bipartisan leadership to conduct the business of this body.

I have never had a single occasion to doubt the sincerity, the honesty, or the candor of Lee Williams. I have never found a single occasion when he was less than totally cooperative, pleasant, cordial, considerate, and always efficient.

I, too, am proud to address Lee as "my friend," as I am sure each Member of the Senate would be on this occasion.

My colleague on this side of the aisle, the distinguished Senator from Alaska, TED STEVENS, the Republican assistant minority leader and whip, is not present on the floor at this moment because it was necessary for him to leave on a trip to the State of Alaska.

But knowing that this matter would be brought to the attention of the Senate in his absence, he asked me especially to convey to Lee Williams his appreciation and congratulations for many favors done so willingly and so well. We all join in wishing Lee the very best in the future.

Mr. RANDOLPH. Mr. President, the words, the heartfelt words, of the able majority leader (Mr. ROBERT C. BYRD) and the equally good appraisal and very honest appraisal of the able minority leader (Mr. BAKER), these two gentlemen representing as they do, and rightly so, the leadership of this body, speak for all of the Members, the 100 Members of the Senate.

But, being in the Chamber at this time, I would want not to speak words or express accolades because I might even lessen the effectiveness of the words they have spoken But I would want the RECORD to indicate that I had lifted my voice because it is a privilege to do so, not so much in recognition of Lee Williams but in the understanding I have had day by day of the constancy of his friendly, his fair, and his knowledgeable service to all the Members of the Senate of the United States.

It is sometimes good to wish a man well, but the future will hold continued success and service for Lee because he has done so well here. His proven years with many of us over a long period of time are the testimony of a good servant not only to us but through us to the American people.

Lee, the very best.

Mr. BUMPERS. Mr. President, when I ran for Governor in 1970 in the great State of Arkansas there were seven other candidates. I remember one candidate in particular. It did not make any difference what part of the State we were in, whether it was the southwest or northeast corner, he would always say, "I was born just 10 miles from here."

I remember one night—it was not me but another one of the candidates said, "You know, I have heard So-and-So say all over the State that he was born 10 miles from wherever we are." He said, "His mother either had the longest labor or his father had the fastest covered wagon I ever heard about." [Laughter.]

In 1974 when I started running for the Senate against Lee Williams' former employer, the distinguished Senator Fulbright, everywhere I went people would say, "Dale, I would like to help you, but Lee and I went to school together."

Before the campaign was over I became convinced that Lee had not tried to convince everybody that he went to school with them. It was just that everybody wanted his friendship so badly they enjoyed telling people they went to school with him.

I remember, incidentally, one big political rally in 1974 up at the University of Arkansas, and a gentleman, who was a

surrogate there, speaking for Senator Fulbright, made what I thought was probably the most damaging point that could be made in that campaign. He said, "if Senator Fulbright is defeated, Lee Williams will be without a job."

It frightened me to death because I knew all those people in the audience did not want to see Lee without a job, and I promised them, if I were elected, I would see that he was taken care of. Of course, fortunately, I did not have to fulfil that promise.

I say those things facetiously and in partial truth. But when I first came here Lee and I had just a little bit of a standoff relationship with each other. It began to warm, and I felt that there was going to develop a genuine feeling of friendly rapport.

I can tell you, Mr. President and my colleagues, that what started as a standoffish relationship has developed into one of the warmest friendships I have ever had with any man. I consider Lee Williams not only an able person in every endeavor he has ever undertaken, but he has been a stalwart for the Democratic Policy Committee. I do not believe anybody in this body has ever felt that Lee Williams put him off, did not give him a totally candid assessment, or answer whatever question he had.

He is going to be difficult to replace. I consider him my friend, and I am pleased to stand in this body and say before the world that I think he is one of the finest men, one of the ablest public servants, I have ever known.

I thank the Chair.

Mr. SARBANES. Mr. President, it would be difficult to add to what my colleagues have said about Lee Williams, and I hesitate therefore to take the floor. But as one who has been here now for just under 16 months, I did want to express my own deep sense of gratitude to Lee for the wise counsel and the sage advice, one might almost say the tutorship, that he has provided, at least to this new addition to the Senate of the United States.

I do not know of anyone who brings to the work at hand a greater commitment, a sharper intelligence, a greater sense of integrity and, above all, just plain human decency than Lee Williams.

He has been a strong and positive influence in this body. I think the fact that we are here today speaking with such respect about his service is a reflection of that. As others have stated, he has truly indeed become a friend, and we are all grateful to him for how he has helped us and, hopefuly, through helping us, served the country in a very fine and positive way.

Mr. HODGES. Mr. President, I shall only speak briefly.

On a Friday at noon, December 9, 1977, I was practicing law in my office in a town of 8,000 in Arkansas. The following Monday I was sworn in as U.S. Senator. I do not have to tell anyone this is a fast track.

Lee Williams had been a friend of my father, and he was one of the first people to whom I turned for help. Not only has he never turned me down, but he has been of benefit far beyond my ability to tell here.

There may be those who will look at me and say, "Well, that's not one of his better accomplishments, and he hasn't done much," but you should have seen me before Lee polished me up.

He is a great friend. Arkansas is not only proud that he is from there, but we count him as one of our own. He does not belong to Washington, he does not belong to our great majority leader, and he does not belong to the Senate. Lee Williams belongs to the State of Arkansas, and I am here to reclaim him for that State. He is only on loan to you here, to this city, and to this great Nation.

I am proud of you, Lee Williams, and thank you for all the things you have done for me through the years, and for our great State of Arkansas.

The PRESIDING OFFICER (Mr. PELL). The Chair wishes to join with other Senators in stating his affection, regard, and respect for Lee Williams. The question is on agreeing to the resolution.

The resolution was agreed to.

The preamble was agreed to.

The resolution, with its preamble, is as follows:

Whereas, upon the retirement of Lee Williams, the Senate wishes to express its appreciation for his twenty-three years of service as an employee of the Senate and his over three years as Counsel to the Democratic Policy Committee; and

Whereas the said Lee Williams at all times has served the Senate with high efficiency and abiding devotion; and

Whereas his unsurpassed service and his unfailing dedication to duty have earned for him our affection and our esteem: Now, therefore, be it

Resolved, That Lee Williams be hereby commended for his long, faithful, and exemplary service.

SEC. 2. The Secretary of the Senate is directed to transmit a copy of this resolution to Lee Williams.

CONSIDERATION OF CERTAIN MEASURES ON THE CALENDAR

Mr. ROBERT C. BYRD. Mr. President, there are certain measures on the calendar which, if we can pass them today, will relieve the Senate of being in session on tomorrow, because there will be nothing that I could call up for tomorrow.

I ask unanimous consent that the Senate proceed to the consideration of the following calendar numbers in order: 688, 689, 690, 691, 692, 693, 694, 695, 697, 699, 700, 701, and 702.

Mr. BAKER. Mr. President, reserving the right to object, and I will not object, the majority leader has identified the measures that appear as cleared on our calendar, and we have no objection to their consideration at this time.

FEDERAL DIVERSION ACT OF 1978

The Senate proceeded to consider the bill (S. 1819) to reduce the cost of operating the Federal criminal justice system, reduce the criminal caseload of the Federal courts, and establish alternatives to criminal prosecution for certain persons charged with nonviolent and, in selected instances, violent offenses against the United States, and for other purposes, which had been reported from the Committee on the Judiciary with an amendment to strike all after the enacting clause and insert the following:

That this Act may be cited as the "Federal Diversion Act of 1978".

SEC. 2. The Congress finds and declares that (a) the interests of operating the Federal criminal justice system efficiently, protecting society, and deterring individuals charged with violating criminal laws from future criminal acts can be served by creating alternatives to prosecution; and (b) such alternatives can be accomplished in appropriate cases without losing the general deterrent effect of the criminal justice system.

SEC. 3. (a) Title 18, United States Code, is amended by adding immediately after chapter 209, a new chapter 210, as follows:

"Chapter 210—DIVERSION

"Sec.
"3201. Definitions.
"3202. Admission to diversion program.
"3203. Voluntariness of waiver of rights.
"3204. Inadmissibility of diversion information.
"3205. Continuation and dismissal of charges.
"3206. Termination; review; completion; withdrawal.
"3207. District planning group.
"3208. Authority of the Attorney General.

"§ 3201. Definitions

"As used in this chapter, the term—

"(1) 'eligible individual' means any person against whom a prosecutable case exists for an offense against the United States where—

"(A) the alleged offense did not involve the threat or infliction of serious bodily injury to other persons;

"(B) it is reasonably foreseeable that the person will not commit violent acts if admitted to a diversion program;

"(C) the person has not exhibited a continuing pattern of criminal behavior;

"(D) the person meets the criteria established by regulations issued by the Attorney General and guidelines established by the attorney for the Government in the district where the indictment, information, or complaint is filed; and

"(E) the person is admitted to participation in a diversion program by the attorney for the Government in the district in which the indictment, information, or complaint is filed;

"(2) 'diversion program' may include, but is not limited to, medical, educational, vocational, social, and psychological services; corrective and preventive guidance, training, and counseling; provision for residence in a halfway house or other suitable place; other services designed to protect the public and benefit the individual; restitution to victim of the offense or offenses charged; and uncompensated service to the community;

"(3) 'diversion plan' means a written agreement, signed by the eligible individual, defense counsel, diversion administrator, and the attorney for the Government, that states those elements of a diversion program in which the eligible individual will participate to assure that he will lead a lawful life, and states the length of time required to complete the plan; but, in no event shall a diversion plan exceed twelve months except to allow the person admitted sufficient time to make restitution; and

"(4) 'diversion administrator' means a person designated by the Attorney General, after consultation with the district planning group, as administrator of the diversion program.

"§ 3202. Admission to diversion program

"(a) The diversion administrator or his assistants shall, to the extent possible, upon arrest or the issuance of a summons or as soon thereafter as possible, review the allegation against each person charged with a criminal offense against the United States and interview each person who he believes may be eligible for diversion. The diversion administrator shall then make a report to the attorney for the Government on the eligibility of each person charged. A person who has not had the allegations against him reviewed may request to be considered for admission by application to the diversion administrator. The attorney for the Government may require further investigation by the diversion administrator of a person being considered for admission with the consent of that person. If the attorney for the Government determines that a person is suitable, the diversion administrator shall prepare a diversion plan. Upon agreement of the attorney for the Government, diversion administrator, eligible person, and defense counsel about the elements of the plan, the attorney for the Government shall assign supervision of the plan to the diversion administrator. A determination of eligibility or suitability by the attorney for the Government shall not be subject to review except as otherwise provided by law.

"(b) The diversion administrator shall report to the attorney for the Government on the progress of the person in carrying out his plan in a manner and at times the attorney for the Government and diversion administrator deem appropriate and shall at the same time provide a copy of each such report to the person and defense counsel.

"§ 3203. Voluntariness of waiver rights

"No person shall be admitted to a diversion program unless he has voluntarily agreed to participate and has received a copy of his diversion plan, and has voluntarily waived, in the presence of a judge or magistrate and with the advice of counsel (except in a case where counsel has been voluntarily waived), all applicable statutes of limitations and his right to speedy trial for the period of diversion.

"§ 3204. Inadmissibility of diversion of information

"Whenever a person is admitted to a diversion program and his diversion plan is later terminated or the person withdraws and prosecution is resumed, any statement made or other information given by the person in connection with the determination of his eligibility or suitability for the program, any statement made by the person while participating in the program, and any statement, report, or other information concerning his participation in the program shall not be admissible against the person on the issue of his guilt of the offense that was the basis for diversion in any judicial proceeding in which he is accused of the offense. This section shall not be construed to limit the admissibility of any information for purposes of impeachment.

"§ 3205. Continuation and dismissal of charges

"In each case involving a person who is admitted to a diversion program under this chapter, this criminal charges against the person shall be continued without final disposition for the period agreed upon in the diversion plan, unless the admission is terminated, completed earlier, or the person withdraws pursuant to section 3206 of this chapter. Upon the expiration of the diversion period, the attorney for the Government shall file a dismissal with prejudice as provided in section 3206(c). Nothing in this paragraph shall be construed to limit further investigation of the offense charged or presentation of evidence to a grand jury during the diversion period.

"§ 3206. Termination; review; completion; withdrawal

"(a) If the attorney for the Government finds the person is not fulfilling his obligations under the plan, or has discovered facts previously unknown to him demonstrating that the person is not suitable for diversion the attorney for the Government may resume prosecution. The attorney for the Government shall make a written statement of the factual basis for his determination to resume prosecution and transmit copies to the person and to defense counsel. The person and defense counsel shall thereafter be notified of their opportunity to appear before the attorney for the Government and the diversion administrator to contest the determination within a reasonable time as established by the Attorney General.

"(b) If the person fails to contest the determination of the attorney for the Government within the time specified, no further review of the determination shall be granted. If, on the appearance of the person and defense counsel before the attorney for the Government and the diversion administrator, the attorney for the Government determines that prosecution shall be resumed, the person may petition the court for review. If the court finds that no fact exists upon which the attorney for the Government could base a determination to resume prosecution, the court shall order that the person be allowed to fulfill his obligations under the plan or shall dismiss the charges if the court finds that all such obligations have been fulfilled. In a proceeding under the provisions of this subsection, evidence shall be admissible regardless of its admissibility in a trial on the offense.

"(c) If the diversion administrator certifies to the attorney for the Government at any time during the period of diversion that the person has fulfilled his obligations and successfully completed the plan, and if the attorney for the Government shall file, by leave of court, a dismissal with prejudice of the indictment, information, or complaint against the person.

"(d) A person participating in a diversion plan may withdraw at any time, and the attorney for the Government may resume prosecution.

"(e) Whenever a diversion plan is terminated or the person withdraws before completion of the plan and the prosecution is resumed resulting in a conviction, the court shall consider the length and nature of the defendant's participation in the plan and may credit such participation as time served toward any sentence of probation or incarceration.

"§ 3207. District planning group

"(a) The district planning group established by section 3168(a) of this title, together with other individuals as the chief judge may appoint, shall constitute a diversion advisory committee. The chief judge may appoint individuals representing agencies to which persons are referred under a diversion program pursuant to this chapter. The group shall plan the implementation of the diversion program for the district and review on a regular basis the administration and progress of such program. The committee shall report to the Attorney General at times and in a manner as the Attorney General shall prescribe.

"(b) Members of the committee shall not be compensated, but may be reimbursed pursuant to section 3208 for reasonable expenses incurred by them in carrying out their duties as members of the committee.

"§ 3208. Authority of the Attorney General

"(a) In carrying out the provisions of this chapter, the Attorney General shall—

"(1) reimburse agencies of the judicial branch of the Government for the cost of services of United States probation officers, pretrial service officers, and employees other than judges, magistrates, or Federal public defenders, necessary to carry out the purposes of this chapter;

"(2) employ and fix the compensation of such persons as he determines necessary to carry out the purposes of this chapter, without regard to the provisions of title 5, United States Code, relating to appointments in the competitive services and the provisions of chapter 51 and subchapter III of chapter 53 of such title relating to classification and General S Schedule pay rates:

"(3) acquires such facilities, services, and materials as he determines necessary to carry out the purposes of this chapter; and

"(4) enter into contracts and other agreements without regard to advertising requirements for the acquisition of such personnel, facilities, services and materials which he determines necessary to carry out the purposes of this chapter.

"(b) In addition to the responsibilities described in subsection (a), the Attorney General shall—

"(1) issue, within one hundred and eighty days after the effective date of this section, regulations for use by United States attorneys governing recommendations of persons to diversion programs;

"(2) conduct research and prepare concise annual reports for the President, the Congress and the Judicial Conference showing the progress of all diversion programs in fulfilling the purposes set forth in this chapter;

"(3) provide for the audit of any funds expended under the provisions of this chapter other than funds expended to provide for defense counsel;

"(4) be authorized to accept voluntary and uncompensated services; and

"(5) promote the cooperation of the Department of Justice, local diversion programs, and all agencies which provide education, training, counseling, legal, employment, or other social services under any Act of Congress to assure that eligible individuals admitted to diversion programs can benefit to the extent possible.".

(b) The table of chapters for title 18, United States Code, and for part II of title 18, United States Code, are each amended by inserting immediately after the item relating to chapter 209 the following:

"210. Diversion ..... 3201."

SEC. 4. (a) Section 3169(a) of title 18, United States Code, is amended by inserting after "Chief United States Probation Officer for the district," the words "the diversion administrator for the district if other than the chief probation officer,".

(b) Section 3168(b) of title 18, United States Code, is amended by striking the word "pretrial".

SEC. 5. For the purposes of carrying out the provisions of this Act, there is authorized to be appropriated for the fiscal years ending September 30, 1980, 1981, 1982, and 1983, the sum of $3,000,000.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read:

A bill to establish alternatives to criminal prosecution for certain persons charged with offenses against the United States, and for other purposes.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 93–753), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE OF THE BILL AS AMENDED

Briefly, diversion operates in the following manner:

(1) At the time of arrest or the issuance of a summons, or soon thereafter, persons would be screened by diversion personnel for eligibility under the criteria of the act, regulations issued by the Attorney General, and guidelines issued by the U.S. attorney. Those persons meeting eligibility criteria would be reported to the U.S. attorney, who would make a preliminary determination of suitability. If additional investigation of the accused is required by the U.S. attorney, the diversion personnel would conduct a background check with the consent of the accused and make a final report to the U.S. attorney, who would then select persons for admission into the program. The diversion personnel would draft a diversion plan which would list conditions the person would fulfill, such as counseling, attending school, medical treatment, or reimbursing victims, etc. The plan would state a time period for completion of the program.

(2) When the plan is agreed upon by the U.S. attorney, the Diversion Administrator, eligible individual, the defense attorney, and the accused has received a copy of his diversion plan, the parties would go before the court where the defendant would waive his right to speedy trial and statute of limitations. The U.S. attorney would then move to continue the indictment, information or complaint for the period of diversion, pursuant to 18 U.S.C. 3161(h)(2), the Speedy Trial Act.

(3) The diversion personnel would supervise the person's performance under the plan and report to the U.S. attorney and defense counsel. If the plan is successfully completed, the indictment, information or complaint will be dismissed with prejudice on motion of the U.S. attorney by leave of court under F.R. Crim. P. 48(a).

(4) If the person fails to complete the plan, voluntarily withdraws, or if the U.S. attorney later discovers facts demonstrating that the person is not suitable for diversion, the U.S. attorney may resume prosecution. The person and his defense counsel are notified in writing of the factual basis for the resumption of prosecution and are provided the right to contest the facts before the U.S. attorney and to then appeal to the court. These hearings are brief and closely tailored to comport with due process.

OFFICE OF RAIL PUBLIC COUNSEL AUTHORIZATIONS

The Senate proceeded to consider the bill (S. 2789) to provide authorization for appropriations for the Office of Rail Public Counsel, and for other purposes, which had been reported from the Committee on Commerce, Science, and Transportation with an amendment on page 1, line 9, to strike "$800,000" and insert "$1,600,000", so as to make the bill read:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 27(6) of the Interstate Commerce Act (49 U.S.C. 26(6)) is amended—

(a) by striking out "and" immediately after ", 1977,"; and

(b) by inserting immediately before the period at the end thereof the following ", and not to exceed $1,600,000 for the fiscal year ending September 30, 1979".

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95–754), explaining the purposes of the measure.

There being no objection, excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE AND SUMMARY

The reported bill amends section 27(6) of the Interstate Commerce Act (49 U.S.C. 26b(6)) to authorize an appropriation of $1,600,000 for the Office of Rail Public Counsel for fiscal year 1979.

BACKGROUND AND NEED FOR THE LEGISLATION

The predecessor to the Office of Rail Public Counsel was the Section of Public Counsel, established under the authority of section 205 of the Regional Rail Reorganization Act of 1973 within the Interstate Commerce Commission's Rail Services Planning Office. This office contributed significantly to the restructuring of the Penn Central and six other bankrupt railroads in the Northeast region by assisting and representing the communities and users of rail service who would not otherwise have been represented in the reorganization process.

The Railroad Revitalization and Regulatory Reform Act of 1976 (4R Act), following as it did the largest railroad reorganization of the 20th century, initiated an intense examination of the rail industry and its problems. In addition to implementing the final system plan and the Northeast Corridor project, the 4R Act dealt with rates, regulatory reform, mergers and consolidation, railroad rehabilitation and improvement financing, and rail service continuation. To assure public participation and representation in the governmental decision making process effecting rail service in normal agency proceedings, and the new set of activities instituted by the 4R Act, Congress provided in section 304(a) of the 4R Act for the establishment of the Office of Rail Public Counsel.

The Office is authorized to initiate, and participate in as a party, proceedings before the Interstate Commerce Commission and other Federal agencies for the purpose of protecting the public interest and the interest of users and providers of rail services. When such action would be in accordance with applicable law, the Office is empowered to seek judicial review of Agency proceedings where such administrative determinations involve a common carrier by railroad subject to part I of the Interstate Commerce Act. The Office is also directed to solicit data and information on questions of importance in the field of rail transportation and to evaluate, represent, and assist the representation of the public interest in achieving safe, efficient, reliable, and economical rail transportation services and otherwise assure effective public participation in the formulation of rail transportation policies and decisions before the Interstate Commerce Commission and other Federal agencies.

FEES FOR SERVICES PERFORMED BY U.S. MARSHALS

The Senate proceeded to consider the bill (S. 2016) to establish fees for services performed by U.S. marshals, which has been reported from the Committee on the Judiciary with an amendment to strike all after the enacting clause and insert the following:

That section 1921 of title 28, United States Code, is amended to read as follows:

"§ 1921. United States marshals' fees

"(a) Except as otherwise provided, the United States marshals shall collect and a court may tax as costs the fees for the following:

"(1) Serving a writ of possession, partition, execution, attachment in rem, or libel in admiralty, warrant, attachment, summons, capias, or any other writ, order, or process in any case or proceeding;

"(2) Serving a subpena or summons for a witness or appraiser;

"(3) Forwarding any writ, order, or process to another judicial district for service;

"(4) The preparation of any notice of sale, proclamation in admiralty, or other public notice or bill of sale;

"(5) The keeping of property attached (including boats, vessels, or other property attached or libeled), actual expenses incurred, such as storage, moving, boat hire, or other special transportation, watchmen's or keepers' fees, insurance, and an hourly rate for each deputy marshal required for special services, such as guarding, inventorying, moving, and so forth. The marshals shall collect, in advance, a deposit to cover the initial expenses for such services and periodically thereafter such amounts as may be necessary to pay such expenses until the litigation is concluded. This provision shall apply to all private litigants including seamen proceeding pursuant to section 1916 of this title;

"(6) Copies of writs or other papers furnished at the request of any party; and

"(7) Necessary travel in serving or endeavoring to serve any process, writ, or order, except in the District of Columbia, with mileage to be computed from the place where service is returnable to the place of service or endeavor. Where two or more services or endeavors, or where an endeavor and a service, are made in behalf of the same party in the same case on the same trip, mileage shall be computed to the place of service or endeavor which is most remote from the place where service is returnable, adding thereto any additional mileage traveled in serving or endeavoring to serve in behalf of that party. When two or more writs of any kind, required to be served in behalf of the same party, on the same person, in the same case or proceeding, may be served at the same time, mileage on only one such writ shall be collected.

"(b) The fees to be collected and taxed under subsection (a) shall be prescribed from time to time by regulation of the Attorney General.

"(c) For seizing or levying on property (including seizures in admiralty), disposing of the same by sale, setoff, or otherwise and receiving and paying over money, the United States marshals shall collect commissions of 3 per centum on the first $1,000 collected and 1½ per centum on the excess of any sum over $1,000 but not to exceed an amount prescribed from time to time by regulation of the Attorney General. If not disposed of by marshal's sale, the commission shall be in such amount as may be allowed by the court. In all cases in which the vessel or other property is sold by a public auctioneer, or by some party other than the marshal or his deputy, the commission herein authorized to be paid to the marshal shall be reduced by the amount paid to said auctioneer or other party.

"(d) For all services in a criminal case except for the summoning of witnesses, the United States marshals shall collect a sum to be fixed by the court.

"(e) The marshal may require a deposit to cover all fees and expenses herein prescribed.".

SEC. 2. The amendments made by this Act shall take effect on October 1, 1978.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95–755), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE OF THE BILL AS AMENDED

The proposed legislation as amended: (1) allows the Attorney General to modify fees now set by law for the service of process by the U.S. Marshals Service (USMS), including writs, orders, and other related services; (2) requires all private litigants including seamen pursuant to 28 U.S.C. § 1916 to prepay the marshal a sufficient amount to cover the initial expenses for certain services and periodically pay, when necessary, such expenses as are necessary; and (3) allows the Attorney General to modify the maximum fee chargeable as the marshal's statutory commission in a marshal's sale.

FEES AND PER DIEM AND MILEAGE EXPENSES FOR WITNESSES BEFORE U.S. COURTS

The Senate proceeded to consider the bill (S. 2049) to establish fees and allow per diem and mileage expenses for witnesses before U.S. courts, which had been reported from the Committee on the Judiciary with an amendment to strike all after the enacting clause and insert the following:

That section 1821 of title 28, United States Code, is amended to read as follows:

"§ 1821. Per diem and mileage generally; subsistence

"(a) A witness in attendance at any court of the United States, or before a United States magistrate, or before any person authorized to take his deposition pursuant to any rule or order of a court of the United States, shall receive the fees and allowances which this section provides, except as otherwise provided by law. The phrase 'any court of the United States' shall include, in addition to the courts of the United States listed in section 451, any court created by Act of Congress in a territory which is invested with any jurisdiction of a district court of the United States. An alien who has been paroled into the United States for prosecution, pursuant to section 212(d)(5) of the Immigration and Nationality Act (8 U.S.C. 1182(d)(5)), or an alien who either has admitted belonging to a class of aliens who are deportable or has been determined pursuant to section 242(b) of the Act (8 U.S.C. 1252(b)) to be deportable shall be ineligible to receive the fees or allowances which this section provides.

"(b) Witnesses shall receive $30 for each day's attendance, which includes time necessarily occupied in going to and returning from the place of attendance.

"(c) Witnesses shall receive compensation for the actual expenses of travel on the basis of the means of transportation reasonably utilized and the distances actually and necessarily traveled. Witnesses who travel by common carrier shall receive the costs of transportation at the most economical rate available. A receipt or other evidence of actual cost shall be furnished. Witnesses who travel by privately owned vehicle (automobile, airplane, or motorcycle) shall receive a travel allowance equal to the mileage allowance which the Administrator of General Services prescribes pursuant to section 5704 of title 5, United States Code, for official travel by employees of the Government. Computation of mileage under this section shall be made on the basis of a uniform table of distances adopted by the Administrator. Witnesses shall also receive reimbursement for incidental travel expenses, such as toll roads, bridges, tunnels, and ferries; taxicab fares between places of lodging and carrier terminals; and parking fees, upon presentation of a valid parking receipt. In the district of Alaska, whenever the use of a snowmobile, dog-team, or boat is approved by the court, a United States magistrate, the United States attorney, or an assistant United States attorney, witnesses shall be paid the actual rental cost or reasonable estimate of necessary expenses. All normal travel expenses within and outside the judicial district shall be taxable as costs pursuant to section 1920 of this title.

"(d) Witnesses, other than those who are incarcerated, who attend at points so far removed from their respective residences as to prohibit return thereto from day to day shall receive an additional allowance for subsistence expenses for each night they must spend away from their residences. Such witnesses who attend in areas which the Administrator of General Services has designated as high-cost areas under section 5702(c)(B), title 5, United States Code, shall receive an allowance equal to the maximum actual subsistence allowance which the Administrator prescribes for that area for official travel by employees of the Government. Such witnesses who attend in other areas shall receive an allowance equal to the maximum per diem allowance which the Administrator of General Services prescribes pursuant to section 5702(a) of title 5, United States Code, for official travel by employees of the Government in that area.

"(e) When a witness is detained for want of security for his appearance pursuant to section 3149 of title 18, United States Code, he shall be entitled for each day of detention when not in attendance at court, in addition to his subsistence, to the daily attendance fee which subsection (b) of this section provides.".

SEC. 2. The amendments made by this Act shall take effect on October 1, 1978.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95–756), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE OF THE BILL AS AMENDED

The proposed legislation would revise fees and travel and subsistence allowances established in 28 U.S.C. § 1821. Witness fees and allowances now provided pursuant to section 1821 no longer compensate the average witness for the actual costs which witness service entails, nor does section 1821 permit compensation for a variety of incidental travel expenses which witnesses routinely incur. The proposed legislation would alleviate these difficulties by increasing attendance fees and changing the method of computation for travel allowances and subsistence.

JURY FEE AND JUROR EMPLOYMENT ACT OF 1978

The Senate proceeded to consider the bill (S. 2075) to amend the Jury Selection and Service Act of 1968, as amended, by revising the section on fees of jurors and by providing for a civil penalty and injunctive relief in the event of a discharge or threatened discharge of an employee by reason of such employee's Federal jury service, which had been reported from the Committee on the Judiciary with an amendment to strike all after the enacting clause and insert the following:

That this Act may be cited as the "Jury Fee and Juror Employment Act of 1978".

SEC. 2. Section 1871 of title 28, United States Code, is amended in its entirety to read as follows:

"§ 1871. Fees.

"(a) GENERAL AUTHORITY.—Grand and petit jurors in district courts appearing pursuant to this chapter shall be paid the fees and allowances provided by this section. The requisite fees and allowances shall be disbursed on the certificate of the clerk of court in accordance with the procedure established by the Director of the Administrative Office of the United States Courts.

"(b) ATTENDANCE FEE.—A juror shall be paid an attendance fee of $30 per day for actual attendance at the place of trial or hearing. A juror shall also be paid the attendance fee for the time necessarily occupied in going to and returning from such place at the beginning and end of such service or at any time during the same.

"A petit juror required to attend more than thirty days in hearing one case shall be paid an additional attendance fee of $5 per day for each day in excess of thirty days in which he is required to hear such case.

"A grand juror required to attend for more than forty-five days of actual service shall be paid an additional attendance fee of $5 per day for each day in excess of forty-five days of actual service.

"(c) TRAVEL ALLOWANCES; TOLL CHARGES; PARKING FEES; TRAVEL IN AREAS OTHER THAN THE CONTIGUOUS STATES OF THE UNITED STATES.—A travel allowance equal to the maximum rate per mile that the Director of the Administrative Office of the United States Courts has prescribed pursuant to section 604(a)(7) of this title for payment to supporting court personnel in travel status using privately owned automobiles shall be paid to each juror, regardless of the mode of transportation actually employed. The prescribed rate shall be paid for the distance necessarily traveled to and from a juror's residence by the shortest practical route in going to and returning from the place of service. Actual mileage in full at the prescribed rate is payable at the beginning and at the end of a juror's term of service.

"The Director shall promulgate rules regulating interim travel allowances to jurors. Distances traveled to and from court should coincide with the shortest practical route.

"Toll charges for toll roads, bridges, tunnels, and ferries shall be paid in full to the juror incurring these charges. In the discretion of the court, reasonable parking fees may be paid to the juror incurring such charges upon presentation of a valid parking receipt. Parking charges shall not be included in any tabulation of mileage cost allowances.

"Any juror who travels to district court pursuant to summons in an area outside of the contiguous forty-eight States of the United States shall be paid the travel expenses provided under this section, or actual reasonable transportation expenses subject to the discretion of the district judge or clerk of court as circumstances indicate, exercising due regard for the mode of transportation, the availability of alternative modes, and the shortest practical route from residence to court.

"(d) SUBSISTENCE ALLOWANCES; SUBSISTENCE IN AREAS OUTSIDE OF THE CONTIGUOUS UNITED STATES.—A subsistence allowance

covering meals and lodging shall be established from time to time by the Director of the Administrative Office of the United States Courts pursuant to section 604(a)(7) of this title, except that such allowance shall not exceed the allowance for supporting court personnel in travel status in the same geographical area, and such claims shall not require itemization.

"Such subsistence allowance shall be paid to a juror when an overnight stay is required at the place of holding court, and for the time necessarily spent in traveling to and from the place of attendance if an overnight stay is required.

"A subsistence allowance for jurors serving in district courts outside of the contiguous forty-eight States of the United States shall be allowed at a rate equal to that per diem allowance which is paid to supporting court personnel in travel status in those areas where the Director of the Administrative Office of the United States Courts has prescribed an increased per diem fee pursuant to section 604(a)(7) of this title.

"(e) SEQUESTERED JURORS.—Whenever in any situation a jury is ordered to be kept together and not to separate, the actual cost of subsistence during such period shall be paid upon the order of the court in lieu of the subsistence allowances payable under subsection (d). Such allowance for the jurors ordered to be kept separate or sequestered shall include the cost of meals, lodging, and other expenditures ordered in the discretion of the court for their convenience and comfort.

"(f) PUBLIC TRANSPORTATION; TRANSPORTATION AFTER HOURS.—A juror who uses public transportation in traveling to and from the court, the reasonable cost of which is not met by the transportation expenses allowable under subsection (c) of this section on account of the short distance traveled in miles, may be paid in the discretion of the court the actual reasonable expense of such public transportation, pursuant to the methods of payment provided by this section. Jurors who are required to remain at the court beyond the normal business closing hour for deliberation or for any other reason may be transported to their homes, or to temporary lodgings where such lodgings are ordered by the court, in a manner directed by the clerk and paid from funds authorized under this section.

"(g) REGULATIONS.—The Director of the Administrative Office of the United States Courts shall promulgate such regulations as may be necessary to carry out his authority under this section.".

SEC. 3. (a) Chapter 121 of title 28, United States Code, is amended by adding at the end thereof the following new section:

"§ 1875. Employment rights

"(a) In the case of any individual who is absent from a position (other than a temporary position as defined by the Director of the Administrative Office of the United States Courts) in the employ of any employer to perform jury service, and who receives a certificate from the court verifying such service, and makes application, promptly after he is relieved from such service, to return to such position—

"(1) if such position was in the employ of a private employer, such individual shall—

"(A) If still qualified to perform the duties of such position, be restored by such employer or his successor in interest to such position or to a position of like seniority, status, and pay; or

"(B) if not qualified to perform the duties of such position by reason of disability sustained during the period of such service but qualified to perform the duties of any other position in the employ of such employer or his successor in interest, be restored by such employer or his successor in interest to such other position the duties of which he is qualified to perform as will provide him like seniority, status, and pay, or the nearest approximation thereof consistent with the circumstances in his case;
unless the employer's circumstances have so changed as to make it impossible or unreasonable to do so; or

"(2) if such position was in the employ of any State or political subdivision thereof, it is declared to be the sense of the Congress that such individual should—

"(B) if not qualified to perform the duties of such position, be restored to such position or to a position of like seniority, status, and pay; or

"(B) if not qualified to perform the duties of such position by reason of disability sustained during the period of such service but qualified to perform the duties of any other position in the employ of the employer, be restored to such other position the duties of which he is qualified to perform as will provide him like seniority, status, and pay, or the nearest approximation thereof consistent with the circumstances in his case.

"(b)(1) Any individual who is restored to a position in accordance with the provisions of paragraph (1) of subsection (a) of this section shall be considered as having been on furlough or leave of absence during his period of jury service, shall be so restored without loss of seniority, and shall be entitled to participate in insurance or other benefits offered by the employer pursuant to established rules and practices relating to employees on furlough or leave of absence in effect with the employer at the time such individual entered upon jury service.

"(2) It is declared to be the sense of the Congress that any individual who is restored to a position in accordance with the provisions of paragraph (2) of subsection (a) of this section should be so restored as to give the individual such status in his employment continuously from the time of his entering upon jury service until the time of his restoration to such employment.

"(c) In any case in which two or more individuals who are entitled to be restored to a position under the provisions of this section, or any other law relating to similar reemployment benefits, left the same position in order to enter upon jury service, the individual who left such position first shall have the prior right to be restored thereto, without prejudice to the reemployment rights of any other individual to be restored.

"(d)(1) An individual claiming entitlement to the benefits of section 1875 of this title may make application to the district court for the district in which the employer alleged to have violated such section maintains a place of business and the court shall, upon finding probable merit in such claim, appoint counsel to represent such individual in any action in the district court necessary to the resolution of such claim. Such counsel shall be compensated and necessary expenses paid to the extent provided by the Criminal Justice Act of 1964 (78 Stat. 552; 18 U.S.C. 3006A). The court may tax a defendant employer, as costs payable to the court, the attorney fees and expenses of a prevailing employee, where such costs were expended by the court pursuant to this subsection.

"(2) In any action or proceeding under this section the court shall award a prevailing juror who brings such action by retained counsel a reasonable attorney's fee as part of the costs.

"(3) No fees or court costs may be taxed against any individual bringing any action in good faith under this section.

"(e) Any private employer who fails to reinstate, discharges, threatens to discharge, intimidates, or coerces any employee by reason of such employee's jury service, attendance, or scheduled attendance in connection with such service, in any court of the United States shall be subject to a civil penalty of not more than $10,000 for each violation as to each juror.

"(f) For purposes of this section, the term 'jury service' includes attendance in any court of the United States in connection with service upon any grand or petit jury of the United States.".

(b) The analysis of such chapter 121 of title 28, United States Code, is amended by adding at the end thereof the following new item:

"1875. Employment rights.".

SEC. 4. Section 1869 of title 28, United States Code, is amended by adding at the end thereof the following:

"(j) 'undue hardship or extreme inconvenience' as a basis for excuse from immediate jury service under section 1866(c)(1) of this chapter shall include undue hardship or extreme inconvenience to the prospective juror, such as a grave illness in the family or any other emergency which outweighs in immediacy and urgency his obligation to serve as a juror when summoned. Additionally, in situations where it is anticipated that a trial or grand jury proceeding may require more than thirty continuous days of service, the court may consider, as a further basis for temporary excuse, severe economic hardship to an employer which would result from the absence of a key employee at the time when he is summoned for jury service.".

SEC. 5. (a) Chapter 85 of title 28, United States Code, is amended by adding at the end thereof the following new section:

"§ 1364. Employment rights of jurors

"The district courts shall have original jurisdiction, without regard to the amount in controversy, to require any private employer to comply with the provisions of section 1875 of this title, and to award damages for any loss of wages or other benefits suffered by reason of such employer's failure so to comply.".

(b) The analysis of such chapter is amended by adding at the end thereof the following new item:

"1364. Employment rights of jurors.".

SEC. 6. The amendments made by section 2 of this Act shall apply in the case of any grand or petit juror serving on or after October 1, 1978, and the amendments made by sections 3, 4, and 5 of this Act shall apply to any grand or petit juror summoned for service or actually serving on or after the date of enactment of this Act.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95-757), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE OF THE BILL AS AMENDED

The purpose of the bill as amended is to amend in its entirety the jury fee section, 28 U.S.C. § 1871 of the Jury Selection and Service Act of 1968, as amended. The bill would also add provisions to title 28 providing for a civil penalty and for injunctive relief against an employer who discharges or coerces an employee as a result of the employee's Federal jury service or summons for such service.

SELECTION AND QUALIFICATIONS OF JURORS

The Senate proceeded to consider the bill (S. 2074) to amend title 28, United States Code, to provide in civil cases for

juries of six persons, to amend the Jury Selection and Service Act of 1968, as amended, with respect to the selection and qualification of jurors, and to extend the coverage of the Federal Employees Compensation Act to all jurors in United States district courts, which had been reported from the Committee on the Judiciary with an amendment to strike all after the enacting clause and insert the following:

TITLE I—JURY SERVICE UPON RESTORATION OF CIVIL RIGHTS

SEC. 101. Paragraph 5 of subsection (b) of section 1865, title 28, United States Code, is amended by striking the phrase "by pardon or amnesty".

SEC. 102. Subsection (h) of section 1869 of title 28, United States Code, is amended by striking the words "by pardon or amnesty".

TITLE II—JURY SELECTION PROCEDURES, RECORDS, AND DEFINITIONS

SEC. 201. Section 1867(f) of title 28, United States Code, is amended by striking "$1,000" and inserting "$5,000" in lieu thereof.

SEC. 202. Section 1868 of title 28, United States Code, is amended by striking the words "for public inspection" and inserting the word "solely" in lieu thereof and by adding at the end thereof the following, "Any person who discloses the contents of any record or paper in violation of this section may be fined not more than $5,000 or imprisoned not more than one year, or both.".

SEC. 203. Section 1869 of title 28, United States Code, is amended by adding at the end thereof the following:

"(j) 'publicly draw' as referred to in sections 1864 and 1866 of this chapter shall mean a drawing conducted within the district, after reasonable public notice, which is open to the public at large and under the supervision of the clerk or jury commission: *Provided,* however, That when a drawing is made by means of electronic data processing, 'publicly draw' shall mean a drawing conducted at a data processing center, located in or out of the district, after reasonable public notice given within the district for which juror names are being drawn, which is open to the public at large and under such supervision of the clerk or jury commission as the Judicial Conference of the United States shall by regulation require;

"(k) 'juror summons' shall mean a summons issued by a clerk of court, jury commission, or their duly designated deputies, containing either a preprinted or stamped seal of court, and containing the name of the issuing clerk imprinted in preprinted, typed, or facsimile manner on the summons or the envelope transmitting the summons.".

TITLE III—COMPENSATION OF JURORS FOR SERVICE-RELATED INJURIES

SEC. 301. Chapter 81 of title 5, United States Code, is amended by the addition of the folfowing new section:

"§ 8142a. Federal petit or grand jurors

"(a) For the purpose of this section, 'Federal petit or grand juror' means a person selected pursuant to chapter 121 of title 28, United States Code, and summoned to serve as a petit or grand juror, who is in actual attendance in court such that he would be entitled to the fees provided for his attendance by section 1871 of title 28.

"(b) Subject to the provisions of this section, this subchapter applies to a Federal petit or grand juror, except that entitlement to disability compensation payments does not commence until the day after the date of termination of his service as a juror.

"(c) In administering this subchapter for a juror covered by this section—

"(1) a juror is deemed to receive pay at a rate equivalent to the monthly minimum pay of a GS–2 unless his actual pay as a Government employee while serving on court leave is higher, in which case his monthly pay is determined in accordance with section 8114 of this chapter.

"(2) any benefits payable under this section to a juror who is not covered under paragraph (f) of section 8101(1) of this chapter shall be reduced by the amount received under a noncontributory State or local disability compensation or survivor benefit program. If a juror has contributed to a State or local disability compensation or survivor benefit program, any benefits payable under this section shall be reduced in an amount which bears the same proportion to the full amount of such benefits as the cost or contribution paid by the juror's employer bears to the cost of disability or survivor benefits coverage for the juror.

"(3) performance of duty includes an act of a juror while he is in attendance at court, pursuant to a summons, in deliberation or when sequestered by order of a judge: *Provided, however,* That performance of duty shall not include his travel to and from the courthouse except under sequestration order or as necessitated by order of court, such as for the taking of a view.".

SEC. 302. The chapter analysis of chapter 81 of title 5, United States Code, is amended by inserting immediately after the item relating to section 8142 the following new item:

"8142a. Federal petit and grand jurors.".

EFFECTIVE DATE

SEC. 401. The amendments made by this Act shall take effect on October 1, 1978.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read:

A bill to amend the Jury Selection and Service Act of 1968, as amended, with respect to the selection and qualification of jurors, and to extend to all jurors in the United States district courts the provisions of title 5, United States Code, applicable to Federal employee service-related injuries.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95–758), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE OF THE BILL AS AMENDED

The proposed legislation, most of which has been previously recommended by the Judicial Conference of the United States, would make four separate changes in existing law:

1. The clarification of 28 U.S.C. § 1865(b)(5) with respect to the qualification for jury service of persons who have been convicted of a crime and have subsequently had their civil rights restored.

2. The amendment of sections 1867(f) and 1868 of title 28 to clarify the limited purposes for which jury selection records and papers may be disclosed, to increase the maximum fine in section 1867(f), and to establish a similar fine and imprisonment provision in section 1868 as exists in section 1867(f).

3. The addition to the definitional section of the Jury Selection and Service Act of 1968, as amended, 28 U.S.C. § 1869, of certain definitions respecting the jury selection and summoning process, in order to clarify the authority of district courts to employ automatic data processing in the selection of their juries.

4. The extension of the Federal Employees Compensation Act coverage to all persons serving as jurors in the United States district courts.

EXCUSE OF PROSPECTIVE JURORS FROM FEDERAL JURY SERVICE

The Senate proceeded to consider the bill (S. 2072) to amend the Jury Selection and Service Act of 1968, as amended, to make the excuse of prospective jurors from Federal jury service on the grounds of distance from the place of holding court contingent upon a showing of hardship on an individual basis, which had been reported from the Committee on the Judiciary with amendments as follows:

On page 1, line 4, strike "hereby";

On page 1, beginning with line 8, insert the following:

SEC. 3. The amendments made by this Act shall take effect on October 1, 1978.

So as to make the bill read:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That paragraph (7) of subsection (b), section 1863 of title 28, United States Code, is repealed.

SEC. 2. Paragraphs (8) and (9) of subsection (b), section 1863 of title 28, United States Code, are hereby redesignated as paragraphs (7) and (8).

SEC. 3. The amendments made by this Act shall take effect on October 1, 1978.

The amendments were agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95–759), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD as follows:

PURPOSE OF THE BILL

The proposed legislation would amend section 1863 of title 28, United States Code, by eliminating therefrom subsection (b)(7), which provides as follows:

* * * * *

"(b) Among other things, such plan shall—

* * * * *

"(7) fix the distance, either in miles or in travel time, from each place of holding court beyond which prospective jurors residing shall, on individual request therefor, be excused from jury service on the ground of undue hardship in traveling to the place where court is held."

U.S. MARSHALS' TRANSPORTATION EXPENSES ACT

The Senate proceeded to consider the bill (S. 2411) to amend chapter 315 of title 18, United States Code, to authorize payment of transportation expenses by U.S. marshals for transportation expenses for persons released from custody pending their appearance to face criminal charges before that court or any court of the United States in another Federal judicial district, which had been

reported from the Committee on the Judiciary with amendments as follows:

On page 2, line 1, strike "A court" and insert "Any judge or magistrate";

On page 2, line 3, after the comma, insert "any division of that court,";

On page 2, line 7, strike "person cannot provide the necessary transportation on his own" and insert "United States judge or magistrate is satisfied, after appropriate inquiry, that the dependant is financially unable to provide the necessary transportation to appear before the required court on his own";

On page 3, beginning with line 3, insert the following:

SEC. 3. The amendments made by this Act shall take effect on October 1, 1978.

So as to make the bill read:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That chapter 315 of title 18, United States Code, is amended by adding at the end thereof the following new section:

"§ 4285. Persons released pending further judicial proceedings

"Any judge or magistrate of the United States, when ordering a person released under chapter 207 on a condition of his subsequent appearance before that court, any division of that court, or any court of the United States in another judicial district in which criminal proceedings are pending, may, when the interests of justice would be served thereby and the United States judge or magistrate is satisfied, after appropriate inquiry, that the defendant is financially unable to provide the necessary transportation to appear before the required court on his his own, direct the United States marshal to arrange for that person's means of noncustodial transportation or furnish the fare for such transportation to the place where his appearance is required, and in addition may direct the United States marshal to furnish that person with an amount of money for subsistence expenses to his destination, not to exceed the amount authorized as a per diem allowance for travel under section 5702 (a) of title 5, United States Code. When so ordered, such expenses shall be paid by the marshal out of funds authorized by the Attorney General for such expenses.".

SEC. 2. The section analysis of chapter 315 of title 18, United States Code, is amended by adding at the end thereof the following new item:

"4285. Persons released pending further judicial proceedings.".

SEC. 3. The amendments made by this Act shall take effect on October 1, 1978.

Amend the title so as to read: "A bill to amend chapter 315 of title 18, United States Code, to authorize payment of transportation expenses for persons released from custody pending their appearance to face criminal charges before that court, any division of that court, or any court of the United States in another Federal judicial district.".

The amendments were agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read:

A bill to amend chapter 315 of title 18, United States Code, to authorize payment of transportation expenses for persons released from custody pending their appearance to face criminal charges before that court, any division of that court, or any court of the United States in another Federal judicial district.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95–760), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE OF THE BILL AS AMENDED

The purpose of the bill is to amend chapter 315 of title 18, United States Code, by adding a new section 4285. This section authorize a Federal court judge or magistrate to direct the U.S. marshal to furnish a financially needed defendant, pending his appearance before that court, in another judicial district, or within another division within the judicial district, with noncustodial transportation or with transportation expenses to the place where the charges are pending. If needed, it would also provide him with money for necessary subsistence expenses en route. The bill would expedite criminal proceedings in the Federal courts and conserve the manpower of the U.S. marshals by enabling a defendant who is otherwise eligible for release, but who could not provide the necessary transportation on his own, to travel unescorted by the U.S. Marshals Service to the place where criminal proceedings are pending. Transportation expenses would be paid from funds made available to the U.S. Marshal Service.

INCOME OF MUTUAL OR COOPERATIVE TELEPHONE COMPANIES

The Senate proceeded to consider the bill (H.R. 7581) to amend the Internal Revenue Code of 1954 to provide that certain income from a nonmember telephone company is not taken into account in determining whether any mutual or cooperative telephone company is exempt from income tax, which had been reported from the Committee on Finance with an amendment to strike all after the enacting clause and insert the following:

(d) EFFECTIVE DATE.—The amendment made by subsection (a) shall apply to taxable years beginning after December 31, 1974.

SECTION 1. TREATMENT OF MUTUAL OR COOPERATIVE TELEPHONE COMPANY INCOME FROM NONMEMBER TELEPHONE COMPANY.

(a) IN GENERAL.—Paragraph (12) of section 501(c) of the Internal Revenue Code of 1954 (relating to certain organizations exempt from income tax) is amended by adding at the end thereof the following new sentence: "In case of any mutual or cooperative telephone company, the preceding sentence shall be applied without taking into account any income received or accrued from a nonmember telephone company for the performance of communication services which involve members of such mutual or cooperative telephone company.".

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall apply to taxable years beginning after December 31, 1974.

SEC. 2. LENDING OF SECURITIES BY EXEMPT ORGANIZATIONS.

(a) TREATMENT OF INCOME FROM PAYMENTS WITH RESPECT TO SECURITIES LOANS.—

(1) INCLUSION IN GROSS INVESTMENT INCOME FOR PURPOSES OF DEFINING PRIVATE FOUNDATION.—Section 509(e) of the Internal Revenue Code of 1954 (relating to definition of gross investment income) is amended by inserting "payments with respect to securities loans (as defined in section 512(a)(5)),' after "dividends,".

(2) EXCLUSION FROM UNRELATED BUSINESS TAXABLE INCOME.—Section 512(b)(1) of such Code (relating to modifications of unrelated business taxable income) is amended by inserting "payments with respect to securities loans (as defined in section 512(a)(5)),' after "interest,".

(3) REGULATED INVESTMENT COMPANY INCOME.—Section 851(b)(2) of such Code (relating to limitations on regulated investment company income) is amended by inserting "payments with respect to securities loans (as defined in section 512(a)(5)),' after "interest,".

(4) INCLUSION IN NET INVESTMENT INCOME OF PRIVATE FOUNDATIONS.—Section 4940(c)(2) of such Code (relating to gross investment income) is amended by inserting "payments with respect to securities loans (as defined in section 512(a)(5)),' after "rents,".

(b) DEFINITION OF PAYMENTS WITH RESPECT TO SECURITIES LOANS.—Section 512(a) of such Code (relating to definition of unrelated business taxable income) is amended by adding at the end thereof the following new paragraph:

"(5) DEFINITION OF PAYMENTS WITH RESPECT TO SECURITIES LOANS.—

"(A) The term 'payments with respect to securities loans' includes all amounts received in respect of a security (as defined in section 1236(c)) transferred by the owner to another person in a transaction to which section 1058 applies (whether or not title to the security remains in the name of the lender) including—

"(i) amounts in respect of dividends, interest, or other distributions,

"(ii) fees computed by reference to the period beginning with the transfer of securities by the owner and ending with the transfer of identical securities back to the transferor by the transferee and the fair market value of the security during such period,

"(iii) income from collateral security for such loan, and

"(iv) income from the investment of collateral security.

"(B) Subparagraph (A) shall apply only with respect to securities transferred pursuant to an agreement between the transferor and the transferee which provides for——

"(i) reasonable procedures to implement the obligation of the transferee to furnish to the transferor, for each business day during such period, collateral with a fair market value not less than the fair market value of the security at the close of business on the preceding business day,

"(ii) termination of the loan by the transferor upon notice of not more than 5 business days, and

"(iii) return to the transferor of securities identical to the transferred securities upon termination of the loan.".

(c) TREATMENT FOR PURPOSES OF SECTION 514.—Subsection (c) of section 514 of such Code (relating to unrelated debt-financed income) is amended by adding at the end thereof the following new paragraph:

"(8) SECURITIES SUBJECT TO LOANS.—For purposes of this section—

"(A) payments with respect to securities loans (as defined in section 512(a)(5)) shall be deemed to be derived from the securities loaned and not from collateral security or the investment of collateral security from such loans,

"(B) any deductions which are directly connected with collateral security for such loan, or with the investment of collateral security, shall be deemed to be deductions which are directly connected with the securities loaned, and

"(C) an obligation to return collateral security shall not be treated as acquisition indebtedness (as defined in paragraph (1)).".

(d) TREATMENT OF GAIN OR LOSS ON CERTAIN LOANS OF SECTIONS.—

(1) NONRECOGNITION OF GAIN OR LOSS.—Part IV of subchapter O of chapter 1 of such Code

(relating to special rules) is amended by redesignating section 1058 as 1059 and by inserting after section 1057 the following new section:

"SEC. 1058. TRANSFER OF SECURITIES UNDER CERTAIN AGREEMENTS.

"(a) GENERAL RULE.—In the case of a taxpayer who transfers securities (as defined in section 1236(c)) pursuant to an agreement which meets the requirements of subsection (b), no gain or loss shall be recognized on the exchange of such securities by the taxpayer for an obligation under such agreement, or on the exchange of rights under such agreement by that taxpayer for securities identical to the securities transferred by that taxpayer.

"(b) AGREEMENT REQUIREMENTS.—In order to meet the requirements of this subsection, an agreement shall—

"(1) provide for the return to the transferor of securities identical to the securities transferred;

"(2) require that payments shall be made to the transferor of amounts equivalent to all interest, dividends, and other distributions which the owner of the securities is entitled to receive during the period beginning with the transfer of the securities by the transferor and ending with the transfer of identical securities back to the transferor;

"(3) not reduce the risk of loss or opportunity for gain of the transferor of the securities in the securities transferred; and

"(4) meet such other requirements as the Secretary may by regulation prescribe.

"(c) BASIS.—Property acquired by a taxpayer described in subsection (a), in a transaction described in that subsection, shall have the same basis as the property transferred by that taxpayer.".

(2) CLERICAL AMENDMENT.—The table of sections for part IV of subchapter O of chapter 1 of such Code is amended by striking out the last item and inserting in lieu thereof the following:

"SEC. 1059. Cross references.".

"SEC. 1058. Transfers of securities under certain agreements.

(e) EFFECTIVE DATE.—The amendments made by this section apply with respect to—

(1) amounts received after December 31, 1976, as payments with respect to securities loans (as defined in section 512(a)(5) of the Internal Revenue Code of 1954), and

(2) transfers of securities, under agreements described in section 1058 of such Code occurring after such date.

SEC. 3. CHANGE IN DEFINITION OF ELIGIBLE INDIVIDUAL FOR EARNED INCOME CREDIT.

(a) IN GENERAL.—Subparagraph (A) section 43(c)(1) of the Internal Revenue Code of 1954 (relating to definition of eligible individual) is amended by striking out clauses (i) and (ii) and inserting in lieu thereof the following:

"(i) an individual who has not attained the age of 19 at the close of the taxable year with respect to whom the eligible individual is entitled to claim a deduction under section 151,

"(ii) an individual whose relationship to the eligible individual is described in paragraph (1) or (2) of section 152(a), who is disabled (within the meaning of section 72(m)(7)), and with respect to whom the eligible individual is entitled to claim a deduction under section 151, or

"(iii) a child of the eligible individual if the child meets the requirements of section 151(e)(1)(B) (relating to additional exemption for dependents); and".

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall apply with respect to taxable years beginning after December 31, 1978.

SEC. 4. USE OF COMPLETED CROP POOL METHOD OF ACCOUNTING

Section 1382 of the Internal Revenue Code of 1954 (relating to taxable income of cooperatives) is amended by adding at the end thereof the following new subsection:

"(g) USE OF COMPLETED CROP POOL METHOD OF ACCOUNTING.—

"(1) IN GENERAL.—An organization described in section 1381(a) which is engaged in pooling arrangements for the marketing of products may compute its taxable income with respect to any pool opened prior to March 1, 1978, under the completed crop pool method of accounting if—

"(A) the organization has computed its taxable income under such method for the 10 taxable years ending with its first taxable year beginning after December 31, 1976, and

"(B) with respect to the pool, the organization has entered into an agreement with the United States or any of its agencies which includes provisions to the effect that—

"(i) the United States or such agency shall provide a loan to the organization with the products comprising the pool serving as collateral for such loan,

"(ii) the organization shall use an amount equal to the proceeds of such loan to make price support advances to eligible producers (as determined by the United States or such agency), to defray costs of handling, processing, and storing such products, or to pay all or part of any administrative costs associated with the price support program,

"(iii) an amount equal to the net proceeds (as determined under such agreement) from the sale or exchange of the products in the pool shall be used to repay such loan until such loan is repaid in full (or all the products in the pool are disposed of), and

"(iv) the net gains (as determined under such agreement) from the sale or exchange of such products shall be distributed to eligible producers, except to the extent that the United States or such agency permits otherwise.

"(2) COMPLETED CROP POOL METHOD OF ACCOUNTING DEFINED.—For purposes of this subsection, the term 'completed crop pool method of accounting' means a method of accounting under which gain or loss is computed separately for each crop year pool in the year in which the last of the products in the pool are disposed of.".

The amendment was agreed to.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.

The title was amended so as to read:

An act to amend the Internal Revenue Code of 1954 with respect to the treatment of mutual or cooperative telephone company income from nonmember telephone companies, and for other purposes.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95–762), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

I. SUMMARY

H.R. 7581 clarifies the income-source requirement which must be satisfied by a mutual or cooperative telephone company as a condition for exemption from Federal income taxation. Present law provides that such a company can qualify for tax-exempt status only if at least 85 percent of its income consists of amounts collected from members to meet expenses. The Internal Revenue Service ruled, in 1974, that when a mutual or cooperative telephone company completes telephone calls to its members made by customers of another company under a reciprocal call-completion arrangement, the mutual or cooperative company receives payments which constitutes nonmember income. The bill provides, for post-1974 taxable years, that such payments are not to be counted in determining whether the company satisfies the 85-percent member-income test.

The committee amendment to the bill makes substantive changes in three areas: one concerns the income tax treatment of an owner of securities who lends the securities to a broker; another relates to the earned income credit; and the last concerns the accounting methods of certain cooperatives.

The amendment provides that the lending of securities to a broker and the return of identical securities does not constitute a taxable sale or exchange of the securities and thus does not interrupt the lender's holding period or affect the lender's basis. The committee amendment also provides that payments on these securities loans are not to be treated as unrelated business taxable income for tax-exempt organizations. Furthermore, the committee amendment provides that these payments are to be treated in the same manner as dividends and interest for purposes of the excise tax imposed on the net investment income of private foundations, for the 90-percent income test for regulated investment companies, and for the support test limitations on investment income in determining whether a charitable organization is a publicly supported organization rather than a private foundation. With respect to exempt organizations and regulated investment companies, the amendment provides this treatment only for payments on security loans which are fully collateralized and which may be terminated on 5 business days' notice by the lending organization.

The committee amendment also clarifies the categories of persons eligible for the earned income credit to include any individual who maintains a household for any minor individual for whom a dependency exemption is allowed to that individual (for example, a grandparent maintaining a household for a grandchild for whom the grandparent can claim a dependency exemption).

The committee amendment also permits certain tobacco growers cooperatives to continue to use the completed crop pool method of accounting for computing taxable income, with respect to crop pools opened prior to March 1, 1978. The amendment applies to those cooperatives which enter into annual agreements with the Commodity Credit Corporation for purposes of assisting the Department of Agriculture in the administration of Federal tobacco price support programs.

"DEVELOPMENTS IN AGING: 1977"

The resolution (S. Res. 434) authorizing the printing of additional copies of part one of the report entitled "Developments in Aging: 1977," was considered and agreed to, as follows:

Resolved, That there be printed for the use of the Special Committee on Aging thirteen hundred additional copies of part one of its report to the Senate entitled "Developments in Aging: 1977".

PROGRESS IN THE PREVENTION AND CONTROL OF AIR POLLUTION IN 1977

The resolution (S. Res. 435) authorizing the printing of the report entitled,

"Progress in the Prevention and Control of Air Pollution in 1977" as a Senate document, was considered and agreed to, as follows:

Resolved, That the annual report of the Administrator of the Environmental Protection Agency to the Congress of the United States (in compliance with sections 202, 306(e), and 313 of Public Law 91-604, the Clean Air Act, as amended) entitled, "Progress in the prevention and Control of Air Pollution in 1977" be printed, with illustrations, as a Senate document.

SEC. 2. There shall be printed five hundred additional copies of said document for the use of the Committee on Environment and Public Works.

SPECIAL BRIDGE REPLACEMENT PROGRAM, SEVENTH ANNUAL REPORT TO CONGRESS

The resolution (S. Res. 436) authorizing the printing of the report entitled, "Special Bridge Replacement Program, Seventh Annual Report to Congress," as a Senate document, was considered and agreed to, as follows:

Resolved, That the annual report of the Secretary of Transportation to the Congress of the United States (in compliance with section 144, title 23, United States Code), entitled "Special Bridge Replacement Program, Seventh Annual Report," be printed, with illustrations, as a Senate document.

SEC. 2. There shall be printed seven hundred additional copies of said document for the use of the Committee on Environment and Public Works.

ADDITIONAL AUTHORIZATION FOR THE INDEPENDENT SAFETY BOARD

The bill (S. 2616) to amend the Independent Safety Board Act of 1974, as amended, to authorize additional expenditures, was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Independent Safety Board Act Amendment of 1978".

SEC. 2. Section 309 of the Independent Safety Board Act of 1974 (49 U.S.C. 1907) is amended by adding at the end thereof the following: "There are authorized to be appropriated for the purposes of this Act not to exceed $15,420,000 for the fiscal year ending September 30, 1979, and $16,350,000 for the fiscal year ending September 30, 1980, such sums to remain available until expended.".

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that it be considered in order to move to reconsider en bloc the votes by which the various measures were passed.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. I make that motion.

Mr. BAKER. Mr. President, before we proceed, I intend to move to table that motion, but I wonder if the majority leader would give me just one moment.

Mr. ROBERT C. BYRD. Yes.

Mr. President, I ask unanimous consent that I may withdraw the motion to reconsider.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXTENSION OF MORNING BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the period for routine morning business be extended for another 10 minutes, with statements therein limited to 10 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECESS UNTIL 11 A.M. ON MONDAY

Mr. ROBERT C. BYRD. Mr. President, so that our respective cloakrooms may inform Senators that tomorrow will be a good day for committee meetings without interruption from the floor, I ask unanimous consent that when the Senate completes its business today, it stand in recess until the hour of 11 o'clock on Monday morning.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. THURMOND and Mr. HARRY F. BYRD, Jr. addressed the Chair.

The PRESIDING OFFICER. The Senator from Virginia.

PATRICK HENRY HIGH SCHOOL AND THE PANAMA CANAL

Mr. HARRY F. BYRD, JR. Mr. President, yesterday the senior class of Patrick Henry High School in Ashland, Va., visited my office. Ashland is the site of Randolph-Macon College. It is a splendid community, situated in Hanover County, a large county adjacent to the city of Richmond. I might say that I am greatly indebted to the people of Hanover County. At least in the last two elections, the people there have given me almost 80 percent of their votes.

I was much impressed with this group of young students who came to my office.

We had a nice talk. I asked what subject they were most interested in, what they would like to discuss. The teacher said, "Well, this class has been studying and giving a great deal of attention to the Panama Canal treaties. Many of us listened to the Senate debates on public radio, and all of us read carefully the news accounts.

"And," he continued, "it was almost the unanimous conclusion of the senior class that these treaties are not in the best interest of our country."

Mr. President, I was very much interested in that viewpoint expressed by this large group of high school seniors. I was much impressed that the young people, as evidenced by this group, are taking a keen interest in government, in the problems facing our Nation, and in at least some of the actions being taken by the Congress of the United States.

When the meeting of this group adjourned, I felt hopeful and happy all day, because I think the great hope for the future of our Nation is that the young people take an interest in the problems of government and study, as this group did, one of the important issues of this decade. Regardless of what position those students had taken on the Panama Canal treaties, I would regard such interest as being very desirable.

I commend that group from Patrick Henry High School in Ashland, Va., and I use this occasion also to again express my deep gratitude to the people of Hanover County for the wonderful friendship which they have extended to me through the years.

HEW WASTE, MISMANAGEMENT, AND FRAUD

Mr. HARRY F. BYRD, JR. Mr. President, on April 3, 1978, the Inspector General of the Department of Health, Education, and Welfare submitted a formal report in which he stated that for the fiscal year 1977 HEW misspent, through waste, mismanagement, and fraud, somewhere between $6.3 and $7.4 billion. If we take sort of a middle figure of $7 billion, that means that the total income taxes paid by 5 million American families, earning an average of $15,000 each, would be necessary to total that $7 billion which HEW, by the assertion of its own Inspector General, misspent through waste, mismanagement, and fraud.

During the past 3 days, the Senate had two opportunities to take cognizance of this report of the Inspector General. I proposed two amendments to the concurrent resolution on the budget. One amendment sought to reduce by $5.6 billion the increase being proposed for the Department of Health, Education, and Welfare. That amendment was defeated by the Senate.

Yesterday, I proposed another amendment to reduce the increase by $2.1 billion, one-third of the waste—taking the lower of the Inspector General's figures—of HEW in the previous year. A vote was taken on that. Thirty-eight Members of the Senate voted for that amendment to reduce the HEW appropriation by $2.1 billion, but, of course, a majority voted against it. So it was not adopted.

I think it is very unfortunate that the Senate is unwilling to take any action, despite the fact that the Inspector General of that Department in a formal report stated that HEW misspent through waste, mismanagement, and fraud an amount of tax funds somewhere between $6.3 billion and $7.4 billion.

The only way we are going to prevent such misuse of tax funds in the future is for the Congress, through the legislative process, to get a message to HEW that their funds, in those areas where that misuse has occurred, will be reduced.

The Senate obviously was unwilling to do that. That is the Senate's prerogative. I disagree with it, but that is the will of the majority.

Mr. President, I ask unanimous consent to have printed in the RECORD at this point the first page from the Department of Health, Education, and Welfare Office of Inspector General annual report, the caption being "Chapter 1."

Incidentally, on this page is this sentence from the Inspector-General:

In our view, this report portrays a conservative measure of the extent of fraud, abuse, and waste in key HEW programs, and their causes.

In other words, what the Inspector-General is saying is that his findings of the misuse of funds, through waste, mismanagement, and fraud of between $6.3 billion and $7.4 billion is a conservative estimate.

Mr. President, I ask unanimous consent that this page from the report be printed at this point in the RECORD.

There being no objection, the page was ordered to be printed in the RECORD, as follows:

CHAPTER 1: AN INVENTORY OF "BEST ESTIMATES" OF FRAUD, ABUSE, AND WASTE IN HEW PROGRAMS

A wealth of information has resulted from Congressional hearings, GAO audits, HEW audits, quality control surveys, and other studies dealing with problems of fraud, abuse, and waste in HEW programs. Some of these span many years and reveal dramatic progress in reducing losses due to errors and ineligibility rates. But no summary or analysis of these findings has ever been compiled. Hence, it was decided to compile an inventory of the "best available estimates" we could locate.

It must be stressed that this summary is no more than an initial inventory. It is not an independent study, although we believe the data are reasonable estimates. Because the sources are not complete, the inventory is not complete. Despite these limitations, it is the best perspective that has yet been assembled. In our view, it portrays a conservative measure of the extent of fraud, abuse, and waste in key HEW programs, and their causes.

It must also be acknowledged that it is virtually impossible to distinguish sharply between fraud, abuse, and waste, since frequently one problem involves all three. For purposes of rough definition, we have adopted the following:

Fraud is defined as the obtaining of something of value, unlawfully, through willful misrepresentation.

Abuse covers a wide variety of excessive services or program violations, and improper practices not involving prosecutable fraud.

Waste is the incurring of unnecessary costs as a result of deficient practices, systems or controls.

As summarized below, this inventory of best estimates reveals that for programs involving Federal outlays in FY 1977 of $136.1 billion, the incidence of fraud, abuse and waste—at a minimum—ranged between $6.3 and $7.4 billion (Exhibit 1).

Mr. HAYAKAWA. Will the Senator from Virginia yield?

Mr. HARRY F. BYRD, JR. I am glad to yield to the Senator from California.

Mr. HAYAKAWA. Mr. President, I should like to associate myself with the remarks of my distinguished colleague from Virginia. I voted for both of the amendments, that which cuts $5.6 billion and the other one which would cut $2.1 billion from the budget of HEW, because it had been clearly revealed, as the Senator said, that there have been probably more than $7 billion mismanaged and wasted by that Department.

I want not only to comment on the economic effects of that waste, but to say that I have become increasingly aware of the fact that this waste involves real destruction of human character. There are, perhaps, tens of thousands, perhaps hundreds of thousands, nowadays, who are making a living ripping off the Government. They know it becomes increasingly easy, as more and more billions are appropriated which are not properly accounted for and not properly assigned with due care as to the people to whom they are assigned.

I read a recent column in the San Francisco newspaper which said a whole economy has been built upon this very principle, that no one should work; why should we work? We can get welfare and do good for others. What they meant by doing good was perhaps debatable. But there are economies developing which simply rip off the Government.

One of the things I have learned in the 16 months I have been here is a very hard lesson to learn. I have served in the Budget Committee, I have listened to debates here and there on appropriations, spending bills. I have learned that when it comes to assigning money for this or that project, it seems to me that we in the Senate, and perhaps the people in the House are in the same boat, all know how to add. If an appropriation for a given year is $5.5 billion, they know how to make it $7.7 billion, they know how to make it $9 billion. They all know how to add. But nobody knows the art of subtraction around here. I look forward to the day when a few lessons in elementary subtraction will be included as part of the training of all of us as Senators.

I thank the distinguished Senator from Virginia for his very wise and very lucid remarks. I wanted to tell him that we appreciate and share his concerns.

Mr. HARRY F. BYRD, JR. I thank my colleague from California very much and I join with him in expressing the hope that the majority of us will learn the value of subtracting as well as we know the merits of addition.

Mr. THURMOND. Mr. President, I wish to associate myself with the remarks of the able and distinguished Senator from Virginia. I have looked upon him since he came to this body as one of the soundest and wisest men among the membership here.

(Mr. MELCHER assumed the chair.)

Mr. DOLE. Will the Senator yield?

Mr. THURMOND. I am pleased to yield to the distinguished Senator from Kansas, provided his remarks will come at another place in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

NUCLEAR FUEL REPROCESSING

Mr. THURMOND. Mr. President, on April 7 of last year President Carter indefinitely deferred commercial reprocessing of spent nuclear fuel in the United States. This policy decision, which was part of the administration's effort to control nuclear proliferation, was made in an attempt to set an example for the rest of the world to follow. This past year has clearly demonstrated that the policy decision on reprocessing has failed on a worldwide basis and for good reason. Other nations have decided that they must reprocess spent nuclear fuel to recover the unused uranium and plutonium for recycle in today's light water reactors and for fueling the new generation of breeder reactors. Other nations such as Japan, France, Great Britain, West Germany, and the Soviet Union, are going ahead with their own reprocessing programs irrespective of what the United States does. The British House of Commons voted recently by more than a 3-to-1 margin to build a 1,200-ton spent fuel reprocessing plant in spite of opposition from the Carter administration.

With the administration's policy on nuclear fuel reprocessing so visibly failing, some of the spokesmen for the President have begun to weaken in their hard-line position. I am offering for the record a letter from me to Secretary of State Vance in which I call attention to a statement made by Ambassador-at-Large Smith before the Trilateral Commission in Bonn, Germany. Ambassador Smith stated that:

We have decided on a temporary deferral of commercial reprocessing in the U.S. I would emphasize the words temporary and deferral.

Mr. President, to me, temporary certainly connotes a weaker position than indefinite. The State Department response, which I also want to offer for the record, states that "temporary" is consistent with the President's policy and then goes on to say the administration is opposed to reprocessing because of conclusions "that commercial reprocessing is not economically necessary" and that it "is not essential to solution of waste disposal problems." Both statements are untrue and provide us with some insight on why foreign governments are disregarding our policy on reprocessing.

On the subject of the economics of reprocessing, government and private studies clearly show that reprocessing with recycle of uranium and plutonium when compared with a "throwaway" fuel cycle results in a net differential benefit in excess of $10 million per year for each operating reactor. Next, reprocessing and recycle of uranium and plutonium can reduce our natural uranium demands by 40 percent and our uranium enrichment requirements by 25 percent. A given quantity of uranium can be used to generate 60 percent more electricity when it is conserved and reused through reprocessing and recycling. Finally, the energy losses with a "throwaway" fuel cycle are staggering. By the year 2000, reprocessing with recycle of uranium and plutonium can save the energy equivalent of 35 billion barrels of oil or 10.4 billion tons of coal. Were the Barnwell nuclear fuel plant in my State of South

Carolina allowed to operate, it would recover annually the energy equivalent of 300 million barrels of crude oil—or two-thirds the annual supply from the Alaskan pipeline. With an ever-increasing dependence on oil imports, it does not make sense that the U.S. Government should even consider throwing away such a valuable energy resource as spent fuel.

On the matter of nuclear waste disposal, let me say that no issue is more crucial to resolve once and for all than the question of demonstrating to the public that we can safely manage wastes from our military and civilian programs. Reprocessing is, I believe, absolutely essential to our waste management programs and I don't think anyone can refute the following facts: First, reprocessing and solidification of liquid waste from a reprocessing plant could produce a sevenfold to fourteenfold volume reduction in nuclear waste that must be ultimately stored. This is clearly a most valuable contribution of the nuclear waste management program.

Second, studies I have reviewed show that the waste solidified and stored after reprocessing would have a biological hazard of less than the naturally occurring ore it was derived from after only 500 years. On the other hand, spent fuel stored as waste will have to wait some 10,500 years before it is at the same biological hazard level. Thus, reprocessing provides reduced waste storage requirements and a less hazardous waste product. With these facts, how can we state, as the administration does, that reprocessing "is not essential to solution of waste disposal problems"?

In conclusion, Mr. President, all Members of Congress, and indeed the American public, want to support the President's efforts to control nuclear proliferation. Yet, it seems very clear to me at this time that we have failed to convince other nations to forego reprocessing by using invalid and easily refuted reasons on economics and waste managment. Furthermore, the administration is fooling itself to think that the United States can afford to forgo reprocessing and throw away a vast in-hand energy source. Let us get on with reprocessing in an aggressive way and, in the process, help other nations develop their reprocessing facilities with U.S. technology on nuclear safeguards and waste management. The U.S. Government has operated for some 30 years three reprocessing plants whose output has been tailored exclusively for weapons use. We know how to handle weapons grade materials like plutonium and how to safeguard it. Now, to suddenly state that there are proliferation risks inherent in conventional reprocessing technology" is contradictory based on our military experiences, and makes the United States look ludicrous to foreign nations. A positive approach will go a lot further toward controlling proliferation than our present policy, which has clearly failed.

Mr. President, I ask unanimous consent that the letters I referred to be printed in the RECORD at this point.

There being no objection, the letters were ordered to be printed in the RECORD as follows:

COMMITTEE ON THE JUDICIARY,
Washington, D.C., February 21, 1978.

Hon. CYRUS VANCE,
U.S. Department of State,
Washington, D.C.

DEAR MR. SECRETARY: I am writing to obtain a clarification of the Administration's policy on commercial reprocessing of spent nuclear fuel. As you know, any future use of the Barnwell Nuclear Fuel Plant in South Carolina is affected by this policy.

This request for clarification is justified, I believe, because of two apparently conflicting statements made recently by the Administration on commercial reprocessing. President Carter, in his message to Congress entitled Priorities for 1978, A Message From the President stated that: "I have deferred indefinitely the commercial reprocessing of spent nuclear fuel and plutonium recycling." This statement sounds final, and I know that the officials at the Barnwell Nuclear Fuel Reprocessing Plant do not see any near-term prospects.

The confusion over Administration policy arose after my personal review of a speech by Ambassador at Large Gerard C. Smith at a recent meeting of the Trilateral Commission in Bonn, Germany. At that meeting, Ambassador Smith stated: "We have decided on a temporary deferral of commercial reprocessing in the U.S. I would emphasize the words temporary and deferral. This is a policy of stop, look and listen." This statement by Ambassador Smith implies that the deferral of commercial reprocessing is not indefinite, as stated by President Carter, but only temporary and subject to change at some date in the near future.

Any insight that you can provide on this seeming inconsistency would be very helpful. In addition, is there some date, such as the completion of the International Nuclear Fuel Cycle Evaluation (INFCE), where the Administration's policy on reprocessing will be review and reconsidered?

As you can imagine, this matter is of utmost importance to me and to the rest of the South Carolina delegation. Your assistance and clarification on this matter would be most appreciated. If there is anything with which I can assist you on this issue, please feel free to call.

With best wishes and kindest regards,
Sincerely,

STROM THURMOND.

DEPARTMENT OF STATE,
Washington, D.C., March 15, 1978.

Hon. STROM THURMOND,
U.S. Senate,
Washington, D.C.

DEAR SENATOR THURMOND: I have been asked to reply, on behalf of the Secretary, to your letter requesting clarification of the Administration's policy on commercial reprocessing of spent fuel.

The Administration's policy is based not only on the paramount need to seek ways of reducing proliferation risks inherent in conventional reprocessing technology, but also on the conclusion that commercial reprocessing is not economically necessary at this time and is not essential to the solution of waste disposal problems. Accordingly, President Carter ordered last April the indefinite deferral of commercial reprocessing and recycling of plutonium in the United States. I understand that, on the basis of a misunderstanding of the wording in Ambassador Smith's remarks to the Trilateral Commission, it has been inferred that the Administration's position on indefinite deferral of commercial reprocessing has been modified. Ambassador Smith intended those remarks to be a statement of the President's policy, which has not changed and with which they are fully consistent.

The International Nuclear Fuel Cycle Evaluation (INFCE), in which nearly fifty nations and four international organizations are participating, is not intended to lead only to a review and reconsideration of reprocessing. INFCE is a technical and analytical study intended to identify the most proliferation resistant nuclear fuel cycles, while assuring at the same time that nuclear power remains a viable energy source. The results of the evaluation will be transmitted to participating governments for their consideration in developing their nuclear energy policies, and the results will certainly be carefully considered by the United States.

Sincerely,

DOUGLAS J. BENNET, Jr.,
Assistant Secretary
for Congressional Relations.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. PROXMIRE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

"HOLOCAUST" SHOWS NEED FOR GENOCIDE CONVENTION

Mr. PROXMIRE. Mr. President, it has now been a week since the last episode of NBC's presentation of "Holocaust." The positive public reaction to this series was heartening—it demonstrated that Americans can look beyond their daily personal concerns and empathize with oppressed individuals elsewhere in the world.

I might point out that some 120 million Americans saw this remarkable dramatization of the genocide of the Jews in Hitler's Germany.

There was one scene that was particularly telling. It reflected personal courage and integrity of the highest order—qualities demonstrated time and again by the Nazi regime's victims.

As you will recall, Mr. President, it was Nazi policy in the early years of their purge to have groups of Jewish men strip, line up facing a ditch and Nazi henchmen would shoot them from behind. Soldiers would then check the bodies to determine if there were any survivors. If so, they would finish them off with a pistol.

These scenes were made even more ghastly by the German concern with not wasting unnecessary bullets carrying out this heinous task.

At one point during the war, Reichführer Himmler witnessed one of these mass shootings. As the men were lined up for execution, he noticed a tall young man on the left with Nordic features. Surely, he could not be Jewish. So Himmler called the man over to question him.

Yes, he was Jewish. But Himmler pursued the matter. All of his relatives and ancestors couldn't be Jews, could they? It was clear in that brief moment that if he had said no, if he had denied his ancestry, if he had repudiated his religion, he could have saved himself.

His response was a simple, yes. Then there is nothing I can do for you, Himmler responded. And the execution proceeded.

I mention this scene because of the immense courage that was exhibited. Even Heydrich admitted, "At least he did not deny his heritage. That took a bit of courage." This bravery cannot help but be admired.

Mr. President, the question that comes back to us over and over again is, what can we do about this?

But there is something we can do. At the very least, we can speak out against the kind of men, like Himmler, who judge that life should hang on the slender thread of race. We can do this by giving our wholehearted support to an international treaty condemning all acts of genocide. This treaty is the Genocide Convention. Members of the treaty resolve to eliminate the types of atrocities committed by the Nazis in "Holocaust."

Frankly, I am embarrassed by our previous failure to ratify this treaty. And I certainly fail to understand how anyone can watch "Holocaust" and not feel this same embarrassment. My hope is that "Holocaust" will provide the impetus for the Senate's ratification of the Genocide Treaty. By adopting this treaty, we would be affirming the right of every human being to express pride in his race without fear of physical reprisal. I therefore ask immediate ratification of the Genocide Treaty.

ORDER THAT CERTAIN ACTION BE TAKEN

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that during the recess of the Senate over until Monday, the Secretary of the Senate be authorized to receive messages from the other body and the White House, and that they may be appropriately referred.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that during the recess of the Senate over until Monday, the Vice President, the President pro tempore, and the Acting President pro tempore be authorized to sign all duly enrolled bills and joint resolutions.

The PRESIDING OFFICER. Without objection, it is so ordered.

AUTHORIZATION FOR SPECIAL COMMITTEE ON AGING TO FILE REPORT ON FRIDAY, APRIL 28

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Special Committee on Aging may be authorized to file a report on Friday, April 28.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT OF UNANIMOUS-CONSENT AGREEMENT ON H.R. 8309

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the time agreement entered into with respect to H.R. 8309, the Inland Navigation Act, be amended to provide that any amendment dealing with a project for water resources development be exempted from the germaneness requirement in consideration of said bill.

I further ask that it be in order on Wednesday, May 3, after the recognition of the two leaders, when the Senate again proceeds to consider H.R. 8309, Senator RANDOLPH be recognized to call up an amendment which shall be proposed on behalf of the Committee on Environment and Public Works; that 1 hour be allotted to such amendment, after which time the Senate proceed to the issue of waterway user charges; and that paragraph III of rule XII be waived.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECOGNITION OF SENATOR LEAHY ON MONDAY

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that on Monday, after the two leaders have been recognized under the standing order, Mr. LEAHY be recognized for not to exceed 15 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, are there any other orders for recognition of Senators on Monday?

The PRESIDING OFFICER. There are none.

Mr. ROBERT C. BYRD. I thank the Chair.

ORDER TO PROCEED TO CONSIDERATION OF S. 2146 ON MONDAY

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that after Mr. LEAHY's order has been completed on Monday the Senate then proceed to the consideration of Calendar Order No. 687, S. 2146, a bill to amend the Consolidated and Rural Development Act, as amended.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. ROBERT C. BYRD. Mr. President, on Monday the Senate will convene at 11 a.m. After the two leaders or their designees have been recognized under the standing order, Mr. LEAHY will be recognized for not to exceed 15 minutes, after which the Senate will proceed to the consideration of S. 2146, a bill to amend the Consolidated Farm and Rural Development Act, as amended.

There is a time agreement on that bill of 2 hours on the bill to be equally divided between Mr. TALMADGE and Mr. CURTIS, 1 hour on any amendment, 30 minutes on any amendment in the second degree, debatable motion, or appeal, with 2 hours on an amendment by Mr. MUSKIE. No rollcall votes will occur thereon on Monday and any rollcall votes that are ordered on Monday will be put over until Tuesday at a time agreed to on Monday.

RECESS UNTIL 11 A.M. MONDAY, MAY 1, 1978

Mr. ROBERT C. BYRD. Mr. President, if there be no further business to come before the Senate, hoping that the committees will take advantage of the golden opportunity tomorrow to get a lot of work done without interruptions by rollcalls and quorum calls from the floor, I move that the Senate, in accordance with the order previously entered, stand in recess until the hour of 11 a.m. on Monday.

The motion was agreed to; and at 5:32 p.m., the Senate recessed until Monday, May 1, 1978, at 11 a.m.

NOMINATIONS

Executive nominations received by the Senate April 27, 1978:

DEPARTMENT OF JUSTICE

Gilbert G. Pompa, of Texas, to be Director, Community Relations Service, for a term of 4 years, vice Benjamin F. Holman, resigned.

IN THE AIR FORCE

Lt. Gen. Howard M. Fish, [redacted], U.S. Air Force, for appointment as senior U.S. Air Force member of the Military Staff Committee of the United Nations, under the provisions of title 10, United States Code, section 711.

CONFIRMATIONS

Executive nominations confirmed by the Senate April 27, 1978:

OCCUPATIONAL SAFETY AND HEALTH REVIEW COMMISSION

Bertram R. Cottine, of the District of Columbia, to be a member of the Occupational Safety and Health Review Commission for a term expiring April 27, 1983.

NATIONAL RAILROAD PASSENGER CORPORATION

Charles Luna, of Texas, to be a member of the board of directors of the National Railroad Passenger Corporation for a term expiring July 18, 1980.

DEPARTMENT OF STATE

Robert Marion Sayre, of Virginia, a Foreign Service officer of class 1, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Brazil.

NATIONAL RAILROAD PASSENGER CORPORATION

Frank H. Neel, of Georgia, to be a member of the board of directors of the National Railroad Passenger Corporation for the remainder of the term expiring July 18, 1978.

The above nominations were approved subject to the nominees' commitments to respond to requests to appear and testify before any duly constituted committee of the Senate.

EXTENSIONS OF REMARKS

CIVIL RIGHTS FOR PREGNANT WORKERS

HON. CHARLES ROSE III

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 27, 1978

● Mr. ROSE. Mr. Speaker, in May, the House will consider a bill of major consequence to American workingwomen. The pregnancy disability bill, H.R. 6075, clarifies the intent of Congress to include pregnant workers among those protected from discrimination under title VII of the Civil Rights Act of 1964. As a cosponsor of this significant legislation, I would like to insert for the RECORD this excellent report by the Congressional Clearinghouse on Women's Rights.

CIVIL RIGHTS FOR PREGNANT WORKERS

BACKGROUND

Legislation to end discrimination based on pregnancy will be considered on the floor of the House later this month. H.R. 6075 amends Title VII of the Civil Rights Act of 1964 to include pregnant workers, expanding the statutory definition of sex discrimination.

This legislation, endorsed by President Carter and a bi-partisan coalition of labor, civil rights and women's organizations passed the Senate September 16 with an overwhelming 75–11 vote. The companion House bill has 117 sponsors.

The bill was introduced in response to the U.S. Supreme Court ruling in *General Electric Co.* v. *Gilbert*. The court held that discrimination on the basis of pregnancy did not constitute sex discrimination under Title VII of the Civil Rights Act of 1964. Representative Augustus Hawkins (D-CA), Chairman of the House Equal Employment Opportunity Subcommittee and a key sponsor of the bill, had this to say: "I know that when I cast my vote for Title VII I understood that protection to include pregnancy, the legislation we are introducing today will amend Title VII to define sex to specifically include pregnancy so there can be no doubt of the intent of Congress. I am saddened that the Supreme Court [in *G.E.* v. *Gilbert*] ignored the intent of Congress in its interpretation of Title VII which led to the harsh decision in Gilbert."

In Gilbert, the court ruled that G.E.'s practice of providing insurance to employees for a variety of conditions, including vasectomies, hair transplants, and cosmetic surgery while denying the same benefits to women disabled by pregnancy did not discriminate against those women employees. This ruling allows employers to discharge pregnant employees on the basis of their condition, to be placed on maternity leave, or to lose other employment benefits.

The Supreme Court, in Gilbert, rejected the sex discrimination claim because it felt that exclusion of benefits based on pregnancy had more to do with "condition" than "gender." The holding rejects the Equal Employment Opportunity Commission guidelines encouraging inclusion of pregnancy-related disabilities in company insurance plans. The court reasoned these guidelines were inconsistent with Congressional intent, emphasizing Congress did not confer authority upon the EEOC to promulgate rules pursuant to Title VII.

After Gilbert, the Supreme Court reviewed another pregnancy discrimination case, *Nashville Gas Co.* v. *Satty*. The court again held that a company's policy of not awarding sick-leave pay to pregnant employees did not violate Title VII, although seniority rights were upheld.

Most states have not conformed to the finding in Gilbert. Laws in the District of Columbia and 22 states require employers to pay pregnancy disability benefits. States requiring payment of pregnancy disability benefits are: Alaska, California, Colorado, Connecticut, Hawaii, Illinois, Indiana, Iowa, Kansas, Maryland, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, Oregon, Pennsylvania, South Dakota, Washington, and Wisconsin.

EMPLOYMENT PROFILE AND COSTS OF H.R. 6075:

Between 1960 and 1974, the greatest increase in the labor force participation by women occurred within the 20–34 age group, the most fertile child-bearing years. By 1975, nearly two-fifths of all workers were women.

While 40 percent of the U.S. work force enjoy some type of disability benefit, only 40 percent of these benefit plans include pregnancy disability coverage. This shows that of the 12.5 million women workers covered by sick and accident disability insurance, less than 5 million of them are protected in any way from wage loss or provided medical compensation for pregnacy disability.

Under most pregnancy disability plans, the average leave time is 6 weeks. Two factors contribute to misleading statistics regarding pregnancy leave. First, many employers require a woman to leave work months before she is disabled. Second, many employers impose an arbitrary date for return to work based on the stereotypical notions that women are unable to continue working or do not desire to return to work. However, according to the Senate Hearing record documenting employers in compliance with EEOC guidelines, women do return to work with impressive regularity.

	[1]	[2]
1973	46	44
1974	59	46.8
1975	69	45.7
1976	73	47.5

[1] Percent returning to work.

[2] Average days absent after delivery.

A former president of the American College of Obstetricians and Gynecologists has testified that the medical profession today regards it as desirable that pregnant women continue their usual pre-pregnancy activities until they go into labor, and that they are usually fully recovered and able to resume work within a few weeks after delivery.

Hawaii, the only state which treats all disability benefits equally, requires employers to cover pregnancy-related and other disabilities for 26 weeks. The state's disability statistics disprove some of the common assumptions regarding pregnant employees. When pregnancy claims were first mandated in May, 1973, there was no noticeable increase in the average duration of claims. The figures for 1975 show the average duration of disability claims for all employees was 4.9: for males, 5.1 weeks; for females, 4.4 weeks. Therefore, pregnancy coverage in Hawaii did not increase costs to employers. In fact, Hawaii reported that costs for temporary disability insurance had actually decreased.

The Department of Labor estimate of the cost impact of H.R. 6075 indicates that the expansion of fringe benefit coverage to include pregnancy disability would not result in significant cost increases for the employer. A Labor report stated, [T]emporary disability insurance contributions represent only 1.4 percent of the wage package for covered workers in private industry and H.R. 6075 will increase that percentage to only 1.5 percent."

Alexis Herman, Director of the Women's Bureau of the Department of Labor, said: "Assuming a continuation of the present fertility rate of 1.7 births over a woman's life and a ⅔ earnings replacement on 1976 earnings for a six-week benefit period for temporary disability due to pregnancy, our preliminary data indicate a total payment of $582 per month or $1,030 per woman over her working life. This $1,030 represents only ⅓ of one percent of the total lifetime earnings of the average female workers.

When considering cost estimates, it should be noted that employees contribute to medical insurance plans. Testifying in support of H.R. 6075, Representative Ted Weiss (D-N.Y.) said that denial of pregnancy benefits to women will in effect deny them benefits which have been earned by their monetary support of existing health plans. According to the Social Security Administration, one-third of all health plans are contributed to solely or in part by the employees.

ABORTION AMENDMENT TO H.R. 6075

The House Committee on Education and Labor approved an amendment to H.R. 6075 during mark-up session. The amendment states that an employer does not have to cover abortions except where necessary to preserve the life of the woman. Specifically, the amendment reads "under any health or temporary disability insurance or sick leave plan available in connection with employment, neither pregnancy nor related medical conditions may be construed to include abortions [except where the woman's life] would be endangered if the fetus were carried to term." This exception is not intended to forbid employers from providing abortion benefits if they wish to. It is also not intended to otherwise affect collective bargaining agreements. The Committee accepted this amendment, offered by Representative Edward Beard (D-R.I.), by a vote of 19 to 12. A similar amendment was considered and rejected in Subcommittee. The Beard Amendment evoked numerous dissenting views and few supporting statements.

ARGUMENTS AGAINST THE AMENDMENT

One of the arguments against the Beard Amendment was stated by Representative Charles W. Whalen, Jr. (R-Ohio) who is a principal sponsor of the original bill. Rep. Whalen opposes the Beard Amendment because it represents "an unreasonable intrusion by the federal government into a private labor management contractual agreement on something that is legal."

The Campaign to End Discrimination Against Pregnant Workers made other arguments against the amendment. (The Campaign is a broad-based coalition of labor unions, civil rights groups, and women's organizations.) The Campaign argued the amendment would interfere with both Title VII and first amendment religious freedom rights of women workers. The Campaign felt "there is no reason why large, non-religious, profit-making corporations should have the right to impose their moral or religious views on their employees."

Rep. Ted Weiss (D-N.Y.) rejected the amendment on the ground that it "adds a

new form of discrimination in place of the one it seeks to eliminate." The amendment, he said, diverts legislators from the original purpose of H.R. 6075 which is to protect the rights of women employees *not* their employers. (Emphasis added.)

Additional arguments leveled against the amendment include: (1) The amendment is unnecessary to prevent religious institutions from being forced to provide abortion coverage, as H.R. 6075 without the amendment would not interfere with a religious institution's first amendment rights. Further, the Civil Rights Act presently allows religious institutions to hire solely members of their own faith.

(2) The amendment discriminates against women employees by subjecting a portion of their medical coverage to employer discretion whereas male employees' portions are subjected to no such discretion for any surgical procedures.

(3) Because the financial contribution by employers is often insignificant, the amendment is unnecessary to alleviate the concern that employers will have to pay for abortions.

(4) The states with fair employment laws prohibiting discrimination on the basis of pregnancy and childbirth have found it unnecessary to include anti-abortion language in their interpretations cncerning pregnancy disability.

(5) The anti-abortion amendment turns the focus of the abortion battle directly to employers. The employers who would allegedly be protected by the Beard Amendment have not actively promoted it.

(6) Abortion coverage is included in most health insurance plans. The Beard Amendment was adopted without reference to current insurance practices and how the amendment would affect them.

(7) Most groups, which supported the bill without the amendment, believe an abortion provision is unnecessary.

(8) The Beard Amendment would likely result in the elimination of earned benefits currently available to women while the employer's contribution for the health benefits would not change.

(9) There is no testimony on the record in support of the amendment. The Catholic Conference was the only group which actively promoted the anti-abortion provision, though it did not do so at public hearing.

(10) The Beard Amendment is contrary to the aim of "pro-life" groups to encourage women to carry their pregnancies to term.

ARGUMENTS FOR THE BEARD AMENDMENT

U.S. Catholic Conference (USCC), as the major proponent of the Beard Amendment, argues the amendment would ensure that Congress does not coerce employers to finance abortions, except where the life of a woman would be endangered. USCC feels that without the amendment, the bill prohibits employers from attempting to accommodate the religious beliefs of employers who may be forced to pay part of abortion coverage costs in health insurance plans.

Another proponent of the Beard Amendment is the National Right to Life Committee. The Committee refers to the Beard Amendment as a freedom of choice amendment" to the Pregnancy Disability Bill saying it allows an employer the opportunity to choose whether to pay or not to pay for the abortion-related expenses of their employees."

Rep. Beard's office had no statement or arguments to add in favor of the amendment which he submitted to the House Committee.

CONCLUSION

The woman who is terminated from her job because she becomes pregnant must begin all over again to obtain job security and job benefits. Most women between the ages of 24 and 34 will have at least one child. It is during this ten-year period that women are most active in the work force. When pregnancy disability benefits are denied, a pregnant woman may be forced to quit her job, or as an alternative may be given unpaid maternity leave. Either option results in a loss of family income at a time when the family can least afford it.

The following illustrates a common situation. One of the plaintiffs in Gilbert lost her job because she became pregnant. She was separated from her husband and was raising a two-year-old child. She applied for welfare but did not receive a check in time to pay her bills. During November and December, she and her child lived without heat, electricity, or hot water in rural Virginia. They were unable to maintain the nutritive diet to which they were accustomed. This compelling example shows that women need pregnancy coverage.

The Supreme Court has given no sign that it will change the stand it took in Gilbert, where it said pregnancy discrimination was not gender related. Last month the court refused to review a court of appeals decision that limited employment for pregnant airline attendants. In *Condit* v. *United Airlines*, a flight attendant filed a class action suit, challenging United Airlines' requirement that attendants stop working as soon as they know they are pregnant. The airline contended that non-pregnancy was a bona fide occupational qualification, while the attendant argued that she should be able to continue working as long as she could safely carry out her duties. The appellate court reasoned that pregnancy could prevent an attendant from fulfilling the airline's duty of guaranteeing the safety of its passengers and ruled that the policy did not violate Title VII of the Civil Rights Act of 1964.

The Supreme Court's refusal to hear this case shows the need for legislative clarification of Title VII. ●

RABBI MORTON J. COHN—AN EXEMPLARY SAN DIEGAN

HON. CLAIR W. BURGENER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 27, 1978

● Mr. BURGENER. Mr. Speaker, San Diego has been fortunate to count among its residents for the past 32 years an extraordinary individual whose contributions to our city have been immense. That man is Rabbi Morton J. Cohn, D.D., the founder and spiritual leader of Temple Emanu-El, and I would like to pay tribute to Rabbi Cohn, whose distinguished spiritual leadership and community service will soon be honored with a testimonial dinner.

Rabbi Cohn was ordained in 1934 and served as Regional Rabbi with the Union of American Hebrew Congregations from 1934–38.

The Hebrew Union College and University of Cincinnati graduate joined Temple Israel in Memphis as associate rabbi from 1938–40, heading religious education and youth activities.

Temple Beth El in Niagara Falls, N.Y., was Rabbi Cohn's next pulpit from 1940–46 with an interlude from 1943 to early 1946 as a Navy chaplain. Rabbi Cohn served with distinction at New Caledonia, Pearl Harbor, the Chicago Navy Pier, and Glenview Naval Air Station.

From 1946 to the present however, we have been most fortunate to have him in San Diego with his lovely wife Sally. During his early years in San Diego, Rabbi Cohn served as the only Jewish chaplain in the 11th Naval District and for years patients at San Diego's Naval Hospital were warmed by his weekly visits.

In 1959 Hebrew Union College awarded him their doctor of divinity degree while those of us in San Diego were conferring on him our own admiration for his tireless community service efforts which lent so much to so many worthy organizations.

He was San Diego's first United Fund Campaign chairman and has served on the boards of community and civil organizations too numerous to mention. Rabbi Cohn, a past president of the Western Association of Reform Rabbis has lectured extensively through the western United States and for several years conducted a weekly radio worship service.

His leadership and motivation abilities, Mr. Speaker, are not easily surpassed in San Diego or indeed in the country, and I would just like to extend my personal warm tribute and admiration to Rabbi Morton Cohn for his years of service to a community we both love.●

SPECIAL HOUSING FOR DISABLED VETERANS

HON. WILLIAM L. ARMSTRONG

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 27, 1978

● Mr. ARMSTRONG. Mr. Speaker, today I am introducing legislation which should not be necessary, in my opinion, but it is.

As you may be, I was astounded to discover that a 100-percent disabled veteran suffering from uncontrollable mental seizures could not receive an allowance for specially adapted housing.

The veteran who contacted me was medically retired as a result of brain damage incurred while in the Army. He suffers as many as four seizures a day, usually without warning. He cannot climb stairs without extreme danger to his life, nor even take a bath without someone present.

According to the Veterans' Administration, a special housing allowance can only be paid to veterans who have lost the use of one or both legs. The question here is not disability, because Mr. Proctor is 100-percent disabled under service-connected conditions.

But any time he takes a step, Mr. Proctor has the real risk of falling in convulsions. Because of the severity of his condition, he requires housing be adapted, with padded wall corners, wide doorways, and hallway railings.

This legislation would not extend to any large number of veterans the specially adapted housing allowance, but would allow its payment to those veterans who are totally disabled as a result of seizures or brain damage.

While these veterans represent a small group, their needs and disabilities certainly entitle them to special housing grants.

So I would like to urge early and favorable consideration of this legislation and would like to commend it to all my colleagues.●

WASHINGTON STAR EDITORIALIZES ON ETHICS LEGISLATION IN THE HOUSE

HON. ROBERT W. KASTENMEIER

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 27, 1978

● Mr. KASTENMEIER. Mr. Speaker, I want to call to the attention of our colleagues the editorial which appeared in the April 26, 1978 Washington Star regarding the current status of the financial disclosure legislation, H.R. 1, and the effort to remove the limitation on outside earned income for House Members.

The Star recommends that the House pass the financial disclosure bill and retain the outside earnings limitation. This is sound advice.

The editorial follows:

[From the Washington Star, Apr. 26, 1978]

BACKSLIDING ON ETHICS

Members of Congress took a $12,900 pay raise last year with the distinct understanding that a strict code of ethics and a limit on outside earnings would be imposed on themselves. There seems to be some doubt now about how well the understanding will be honored.

Pending legislation would write into law the House rules on disclosure of financial interests that were approved overwhelmingly in March 1977. In addition to covering members of Congress, the legislation would extend the disclosure provisions to the executive and judicial branches. Federal judges and employees of all three branches compensated at a GS–16 salary level and above would be covered.

The bill, which had been scheduled for debate this week but was pulled from the House calendar Monday, would require annual reports on amounts and sources of income, gifts totaling $100 or more a year, free entertainment valued at $250 or more a year from a single source, real estate worth more than $1,000, personal property worth more than $1,000 that is held for investment or income production, debts that exceed $2,500 and transactions in securities or commodities futures that exceed $1,000.

Although the House last year passed its rules of financial conduct, which include a limit on outside earnings to take effect in 1979, by a vote of 402 to 22, there appears to be considerable backsliding. Their pay raise in hand and the volume of publicity from scandals (except for the Korean influence buying probe) abated, the enthusiasm for ethics reforms seems to have dropped off. The House last fall defeated a proposal to overhaul internal administrative procedures that would have tightened up accounting practices.

Although the House rules approved 13 months age would remain in effect if the bill is defeated, the rules lack the civil and criminal penalties embodied in the bill making them a part of the federal law. In addition, the coverage would not be extended to the executive and judicial branches.

It appears that the bill was pulled off the House floor by Speaker O'Neill because so many amendments were threatened that the outcome was uncertain. Supporters hope that the four committees involved in handling various sections of the legislation can reach a better understanding before it is brought back for floor action.

Complicating the situation was a Rules Committee decision to allow debate on a "non-germane" proposal to strike the House rule that limits members' outside earned income to 15 per cent of their annual congressional salary—or $8,625 based on their current salary of $57,500. The limit was designed to reduce conflicts of interest and to keep members from spending so much time away from their congressional duties. The earnings limit is not part of the disclosure bill but is part of the ethics package that the House voted last year to impose on itself (a similar restriction was voted in the Senate).

Opponents of the 15 per cent limit argue that it is unfair to restrict members from "earning" outside income but not to restrict earnings from investments. Proponents contend investment income is less likely to involve members in conflict of interest situations and less likely to keep them off the job. After thorough debate in March 1977, the earnings limitation was approved by the House 344 to 79.

The danger in reopening the earnings issue during debate on the disclosure bill is that it might create such antagonism and confusion on the floor that it could affect the vote on the disclosure bill. One might wonder what the motive of the Rules Committee was in allowing the earnings issue to be taken up with the disclosure bill.

Ethics Committee Chairman Richardson Preyer, D-N.C., fears that if the House doesn't pass the disclosure bill "we will appear to be backing down on our commitment to pass a tough ethics bill after we accepted a pay raise . . . We'll look like we're taking the sugar without the pill."

Actually that pill had two parts—financial disclosure and the earnings limit. They were parts of the bargain struck more than a year ago when Congress wanted to get a fat pay raise and try to clean up its image at the same time.

The disclosure bill ought to be passed and the earnings limitation ought to remain in the House—and Senate—rules. A bargain is a bargain.●

A TRIBUTE TO REVEREND RUDOLF REINARU

HON. JAMES J. HOWARD

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 27, 1978

● Mr. HOWARD. Mr. Speaker, just a short while ago the Estonian people celebrated the 60th anniversary of the declaration of independence of their nation. Although their homeland is presently under Soviet domination, those Estonians fortunate to have moved to the New Jersey shore area have remained together as a community preserving their religious principles and heritage.

One of the Estonian leaders in New Jersey, Rev. Rudolf Reinaru, honored the House of Representatives this morning by offering the opening prayer.

The determination of Reverend Reinaru to aid people throughout the world is indicated by his humanitarian service in Estonia, Poland, West Germany, Canada, and now as pastor of the Holy Ghost Estonian Evangelical Lutheran Church in Lakewood, N.J.

I ask my colleagues to join with me in extending best wishes to the Estonians in the United States in appreciation of their contributions to this great Nation.●

SUPPORT FOR NEW BWCA PROPOSAL

HON. JAMES L. OBERSTAR

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 27, 1978

● Mr. OBERSTAR. Mr. Speaker, last week I announced my intention to introduce a new legislative proposal for the Boundary Waters Canoe Area which is located in the northern part of my district.

This new proposal addresses many of the concerns about my bill raised in the past months.

I will introduce that bill in the next few days, as soon as certain technical language is clarified.

Meanwhile, I feel that, in fairness to the many people interested in this issue, I should outline the major changes in my new proposal:

First, terminates timber harvesting in the BWCA immediately upon enactment;

Second, continues wilderness designation for the entire 1,030,000-acre BWCA and deletes national recreation area designation for any lands within the BWCA or outside of it, as provided in my earlier proposal.

Last year, a U.S. Forest Service study estimated that the potential effect of the termination of timber harvesting in the BWCA portal zone would be the loss of 1,190 jobs and $30 million annually. Since the release of that study, the State of Minnesota and the U.S. Forest Service have determined that they can provide the softwood timber to replace the portal zone.

I have modified my proposal to reflect these assurances. My proposal simply ends logging in the BWCA and directs the Secretary of Agriculture, working with the State of Minnesota, to do what both have said they can do: make this replacement timber available. It also provides the Forest Service and the State with additional funds, a more intensive forest management program.

The reaction in the few days since I announced the outlines of my new proposal has been most encouraging.

It is recognized as a reasonable, appropriate compromise and a basis for a just solution to this long controversy.

I would like to commend to my colleagues an editorial which appeared in the Minneapolis Star Tuesday, April 25, 1978:

[From the Minneapolis Star, Apr. 25, 1978]

GOOD NEWS ON BWCA

Rep. James Oberstar's latest concessions on the Boundary Waters Canoe Area (BWCA) legislation are welcome. He has all but removed the logging question from the controversy. And he has dropped his effort to create a National Recreation area on 330,000 acres of the BWCA, thus agreeing those acres should continue to have wilderness designation.

That will please those who want to preserve as much as possible of the priceless BWCA as wilderness. But the toughest issue remains unresolved—how much of the area should be available for use by motorboats and snowmobiles. The two sides remain far apart on that one.

Oberstar said he is proposing termination of all timber harvesting within the BWCA because both the state and the U.S. Forest Service now are saying there is enough softwood outside the BWCA. Moreover, he said he has talked to representatives of the forest products industry and they have agreed to his proposal. So there seems to be agreement now that Minnesota can have both a healthy timber industry and a BWCA without logging, and that's good to hear.

In dropping all reference to a National Recreation Area from his bill, Oberstar said he was addressing two major concerns of his opponents—the classifying of 330,000 BWCA acres as non-wilderness and the expansion of federal controls to 80,000 acres outside the BWCA. His move suggests the proponents of the Burton-Vento bill could take the same step.

That bill, named after Reps. Burton of California and Vento of Minnesota, is the one passed by the House Interior Committee earlier this month. It establishes a BWCA wilderness area of about 1,075,000 acres, including some small increases to the current 1,030,000 acres.

But it also establishes 227,000 acres of a new National Recreation Area, which means a measure of federal control over development, along three road corridors in the BWCA vicinity. That's raised a lot of opposition from area residents, who see it as one more threat to their freedoms. We think it's an unnecessary addition to the legislation, one which obscures the real question of BWCA preservation, and urge that it be dropped.

It is possible, too, that the Burton-Vento backers can find some further areas in which to yield on the snowmobile-motorboat issue; they have already moved away from the concept of an outright ban to accept limited use of motors, and there may be another route or a couple more lakes where motors could be tolerated in the name of greater acceptance from the residents of the area. Basically, though, we hold to the thought that wilderness and motors don't mix worth a darn and urge passage of a law that reflects that sentiment.●

VIEWS EXPRESSED ON MANY ISSUES

HON. WILLIAM S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 27, 1978

● Mr. BROOMFIELD. Mr. Speaker, every year, I conduct a poll of my constituents to ascertain their views on many of the issues facing us in Congress.

This year, over 12,000 residents of Oakland and Livingston County, Mich., took time to respond to my questionnaire. Several hundred more expanded on their views in separate cards and letters.

I have found that this response from the people has helped me greatly to represent my district in voting on the many issues that affect them. I am inserting the results of this year's poll into the RECORD so that my colleagues may also benefit from hearing from the people:

QUESTIONNAIRE RESULTS

(1) Should Congress authorize payment of Medicaid funds to the poor for the cost of abortions?

Yes, 44%; No, 55%; undecided, 1%.

(2) Do you think the economy requires a tax cut larger than the $25 billion reduction proposed by the President?

Yes, 48%; no, 45%; undecided 7%.

(3) In general, are you satisfied with current U.S. policy in the Middle East?

Yes, 42%; no, 51%; undecided, 7%.

(4) Are new taxes on gasoline and heating oil a responsible way to encourage energy conservation?

Yes, 17%; no, 81%; undecided 2%.

(5) Should the Postal Service be allowed to discontinue Saturday mail delivery to help reduce its deficit?

Yes, 58%; no, 40%; undecided, 2%.

(6) Do you feel the President's emphasis on human rights has helped to further our overall foreign policy objectives?

Yes, 29%; no, 64%; undecided, 7%.

(7) Would you support mandatory sentencing and denial of parole for all crimes committed with a gun?

Yes, 89%; no, 9%; undecided, 2%.

(8) Would you support the elimination of mandatory retirement provided that you could voluntarily retire with full benefits at age 65?

Yes, 84%; no, 15%; undecided, 1%.

(9) Do you favor a personal income tax deduction for a portion of tuition costs for college education?

Yes, 72%; no, 27%; undecided, 1%.

(10) Would you support a national health insurance program run by the government with a corresponding tax increase to pay the cost?

Yes, 21%; no, 77%; undecided, 2%.

(11) In general, do you believe the Federal government has become too deeply involved in the auto industry?

Yes, 81%; no, 18%; undecided, 1%.●

PERSONAL EXPLANATION

HON. BOB GAMMAGE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 27, 1978

● Mr. GAMMAGE. Mr. Speaker, for the benefit of my colleagues and constituents in the 22d District. I am enclosing this self-explanatory material.

Due to an unfortunate error of the pairing clerk, I was incorrectly paired on H.R. 11401, the NASA authorization for fiscal year 1979. I was absent from the floor of the House because of official business in my district. I was personally hosting Secretary of Transportation Brock Adams on a familiarization tour of the site of the proposed deepwater superport and its surrounding area on the Texas gulf coast, in Congressional District 22. Had I been able to be present, I would have voted in favor of fiscal year 1979 NASA authorization.

I have worked with Chairman TEAGUE as a member of the Science and Technology Committee to have an effective and farsighted budget for the National Aeronautics and Space Administration. On February 28, I voted in favor of the budget as reported by the Space Science and Applications Subcommittee, and on March 7, I supported the NASA budget as reported out of the Science and Technology Committee.

I regret the error as reported in the CONGRESSIONAL RECORD on April 26, and hope this serves to set the record straight.●

HIGH TAX BURDENS

HON. JOHN H. ROUSSELOT

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 27, 1978

● Mr. ROUSSELOT. Mr. Speaker, current public opinion polls show that rising taxes are a constant burden to the American people. Through the ballot box, however, these same wage earners who are critically affected by unrestrained Government spending are finding an opportunity to protest their grievance. In my home State of California, there is a tremendous amount of grassroots support for a tax-limitation measure which will be voted on at the June 6 election—the Jarvis-Gann initiative which would, if adopted, first require a two-thirds vote of the State legislature for any increase in tax rates and second, reduce all property tax rates to not exceed 1 percent of the property's market value.

In strong reaction to overtaxation, people all over the country are taking a serious look at the California tax limitation measure and weighing the arguments thoughtfully. Opponents of the Jarvis-Gann initiative are utilizing "scare tactics" to beat the measure—threatening the loss of community services—fire, police, schools—and public jobs. A second case against these prophets of "gloom and doom" is intelligently made by the highly respected economist, Dr. Arthur B. Laffer, professor of business economics at the University of Southern California. In a recent statement, Dr. Laffer clearly and concisely makes the point that these ominous threats reflect a lack of knowledge of either economics or the situation in the State of California. His comments summarize not only the feelings of the working taxpayers in California but those of taxpayers throughout the Nation as well. I urge all of my colleagues to read Dr. Laffer's logical statement which follows:

JARVIS-GANN

The Jarvis-Gann initiative (Proposition 13 on the June 6th ballot) has two principal features: It—

(i) requires a two-thirds vote of the State legislature for any increase in tax rates; [1]

(ii) reduces all property tax rates to not exceed 1% of the property's market value.

[1] It also has a few other interesting features. For example, it would require a two-thirds favorable vote on any bond issues, which would lead to higher tax rates. One other feature could well be in trouble because it seemingly violates the "equal protection" clause of the Constitution. This feature maintains that market values used for tax purpose cannot rise faster than some small percentage per year unless the house has been sold recently. For the purposes of this analysis, I shall assume this feature is removed.

My view is that this initiative, if voted upon favorable at the June 6th election, would go a long way toward revitalizing California's economy. At present, California is one of the most heavily taxed States in the Nation, and the effects of these taxes are becoming more and more apparent every day. Businesses appear to be responding to the high tax rates by expanding their activities elsewhere. If this trend continues, it is my opinion that California will experience a deterioration in its relative position. The quality of life in California is being damaged by the high tax burdens and rather low priority use of some of those funds.

The successful passage of the Jarvis-Gann initiative would help reverse this debilitating trend.

In the first year, the initiative would lower property tax rates from approximately 3½ percent (the Los Angeles County rate) of market value to 1 percent of market value. Without considering any other economic changes, this would lead to a revenue shortfall of some $7 billion. Such a number, if used as an estimate of what would actually happen even in the first year, is misleading. In fact, revenues would fall by less than $7 billion. With the State's accumulated surplus, and the ability to use capital markets, spending would hardly have to be reduced at all.

Property tax revenues will fall by less than $7 billion because property values will rise and new construction activity will expand. Both of these effects will expand the tax base, and thus lead to less property tax revenue loss. In the out-years, property tax receipts will fall by far less than $7 billion annually. Take, for example, a $100,000 home, paying taxes of 3½ percent of market.[2] Taxes would be $3,500 per year without Jarvis. If Jarvis passes, the tax rate would fall to 1 percent of market, but tax receipts would be greater than $1,000. Using a discount rate of 10 percent, the approximate receipts would initially be $1,250, reflecting a rise in the market value of the house to $125,000.

In short order, the higher values of homes would encourage more new construction and an enlarged property base. As this process progressed, total property values would rise by far more than the 25 percent of the example.

Tax revenues elsewhere would expand absolutely. Social welfare mandated spending would fall. With property taxes lower, businesses will expand their activities within the State. This expansion will create new jobs, more investment, and higher real wages. Sales, incomes, and other forms of activity will expand. Sales taxes, income taxes, etc., all will rise. In addition, State outlays for social welfare will fall (unemployment compensation, rent subsidies, medical, etc.).

Tax revenues in future years will be reduced by less or, quite conceivably, even expanded as a result of Jarvis-Gann. When combined with the healthier economic base and, as a direct consequence, less social welfare expenditures. The State should shortly be back in a surplus condition. The people of California would have a number of options, including a healthy increase in spending on such things as schools, or further tax-rate reductions. As mentioned earlier, I do not foresee any need for sharply curtailed spending. To the extent that any spending cuts were deemed appropriate, they could be planned far in advance. With the State's surplus, the use of capital markets, and even the delay in when the Jarvis-Gann went into effect, there would be no difficulty in rationally planning expeditious spending reductions. The stories of closing schools and eliminating fire and police protection are not well-founded. They reflect a lack of knowledge of either economics or our State. In fact, given the legal priority structure of our spending, it is questionable whether spending on schools could be reduced legally, even if politicians were to foster such a move.

Business groups as well have been arguing that if Jarvis-Gann is passed, then the State will have to raise other taxes such as business taxes, sales taxes, or income taxes. Frankly, if Jarvis-Gann passes, the chances of higher tax rates elsewhere would be greatly reduced. With Jarvis-Gann, it would take a two-thirds majority of the legislature to pass a tax increase anywhere, while now it would only require a simple majority.

The last issue I feel needs addressing is the relationship between a reduction in property taxes, specifically, and rents. A number of people feel that rental pass-ons of property tax reductions should be written into law. Such pass-on provisions only encumber the law, add new levels of monitoring, and investigative personnel, and really do nothing for renters. In fact, rents are determined in the marketplace and in part reflect the rent-versus-buy decisions of homedwellers. Rents also reflect the alternative uses of capital for rental unit owners.

If property tax rates fall, as proposed by Jarvis-Gann, then the after-tax rate of return on rental units would rise. This will attract more capital, more units, and will lead to a direct reduction in rents. Likewise, the costs of owning one's own home would fall. If rents didn't fall commensurately, some renters would buy their own homes. This will cause rents to fall as well. In fact, the reduction in rents would most likely be dollar-for-dollar the same as the reduction in property taxes. Capital employed in rental housing tends to be a close substitute for capital employed elsewhere. Thus, the after-tax returns to rental capital are determined in the overall capital market. Any reduction in tax rates will be passed on to renters.

While my professional judgment is that Jarvis-Gann will improve the state of the California economy, I feel equivalent reductions in either income or sales taxes would be markedly preferable. From tax theory, we know that economic efficiency is enhanced when those productive factors that can escape the most are taxed the least, and those that can escape the least are taxed the most. In California, businesses, sales, incomes, etc., can all escape taxes relatively more easily than can property. Property has a relatively more difficult time escaping taxes, although it can do so to no small extent. Therefore, an optimal tax structure for California should most likely include higher taxes on property than on incomes or sales. To me, the need for income and sales tax relief is of higher economic priority than property tax relief. Jarvis-Gann, therefore, is, in my view, by no means the best proposal imaginable. It is, however, better than what we have, or are likely to get.●

[2] The number here is to reflect the average Los Angeles County property tax rate on residential structures. Other counties may well have higher or lower rates.

LELAND MEMORIAL HOSPITAL

HON. GLADYS NOON SPELLMAN

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 27, 1978

● Mrs. SPELLMAN. Mr. Speaker, on Monday, May 1, it will be my great pleasure to address those assembled at the groundbreaking of an expansion to the Leland Memorial Hospital. I consider myself, indeed, privileged to have such an honor, for the hospital, those who administer it, and those who care for the patients hold a special place of respect and affection in my heart.

Leland Memorial Hospital at present is a 76-bed, nonprofit institution, dedicated to quality health care for our community. The objective of the hospital expansion and renovation program is to respond to the perceived increased community needs in acute care beds. We expect the specialty care beds will bring the total bed capacity to approximately 130 beds. The plan calls for specialty care beds in mental health, substance abuse, and rehabilitation. The new wing will also allow for much needed expansion and modernization of the overcrowded diagnostic services an support areas in emergency room, intensive and coronary care, as well as in X-ray and laboratory.

The Hospital Community Health Education Department, on April 14, 15, and 16, tested 1,500 participants in a hypertension and pulmonary screening program. Presently they are reaching an average of 1,000 persons a month with health programs in weight control, smoking withdrawal, physical fitness, and vegetarianism. The educational components of the expansion program will be comprised of preventive services, public health education, crisis intervention, inpatient services, partial hospitalization, day care, and outpatient treatment. With the additional educational services permitted by the expansion, the number of people who will benefit will increase substantially.

Indeed, the expansion program is necessary in order to promulgate the commitment the hospital has made to maintaining quality health care in the surrounding communities based on present day standards and progressing into the future.

Mr. Speaker, I know my colleagues join me in saluting Leland Memorial Hospital for its progressive and farsighted programs which serve our citizens so well.●

FREE AND OPEN TRADE?

HON. JAMES J. DELANEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 27, 1978

● Mr. DELANEY. Mr. Speaker, I am sure my colleagues join me in the philosophy that free and open trade with other nations is important to the health of the world economy and to developing a sense of understanding between peoples. However this philosophy cannot be applied when the reality of the situation in a particular industry suggests that our Nation's intentions are being taken advantage of by those whose motives are not so honorable.

Such an abhorrent situation exists today in the American textile industry. What makes the situation so much more discouraging is that our tax laws encourage American manufacturers to have their work done in foreign countries at the expense of American jobs.

The plight of the American textile industry is eloquently expressed in an ar-

ticle written by Sol C. Chaikin, president of the International Ladies Garment Worker's Union which appeared in the New York Post on April 18. Mr. Chaikin is the leader of a union which has done more than its share to improve working conditions for the people who form the backbone of our textile industry—the Nation's largest.

It is my hope my colleagues find Mr. Chaikin's article to be informative and convincing.

The article follows:

[From the New York Post, Apr. 18, 1978]

IMPORTS KILLING OFF OUR LARGEST INDUSTRY

A flood of imports is washing away hundreds of thousands of jobs in the American economy, with devastating consequences for the entire nation.

The decline in the number of workers in the manufacture of apparel is not due to any loss of interest on the part of the American woman in being the best dressed in the world. Apparel purchases in America grow every year.

The workers who have lost their jobs have been displaced by imports. If imports were zero today, there would be another 170,000 people employed in the manufacture of women's garments.

What is happening in the garment industry is happening in the entire textile and apparel trade—the nation's largest factory employer with more than two and a quarter million employees. Were it not for mounting imports, textile and apparel would now be providing jobs to another quarter million workers.

But just as crucial as the number of jobs lost is the kind of people who have lost jobs. They are those who could least afford it. They are the marginal populations who are heavily employed in light manufacture. The displaced persons are disproportionately black, Hispanic, low-income whites. For millions of them, light manufacture has been the first rung on the economic ladder. When that rung goes, all hope goes with it.

For a city like New York that has traditionally depended on light manufacture as a prime base of its economy, the flood of imports has been catastrophic. Between 1969 and 1976, the total employment in manufacturing in New York has fallen from 825,836 to 522,878.

We are losing our market to imports not because of any deficiencies in our know-how. But our superiority is of little use because American manufacturers put our technology and skills to work in other lands where they make products for export to the U.S.

Not untypically, a shop in Bangkok will be making blouses exclusively for one American manufacturer who has supplied the style, some initial capital, the sizing and access to the American market. In this distant sweat shop, reminiscent of the garment industry before the turn of the century in the U.S., the young girls who work for a pittance (sometimes just a few bowls of rice a day) stitch the brand names of American outlets into their product. Sometimes, the label is that of an American manufacturer; sometimes it is that of an American chain store. In any case, it is an American company that employs incredibly exploited labor overseas to manufacture products for sale in the U.S.

As if such cheap labor were not sufficient incentive to export jobs to other land, the U.S. Tariff Code has a special proviso (Item 807) that further encourages American manufacturers to get their work done elsewhere. Under this law, U.S. companies that have American component parts assembled in other lands may import the finished product with the tariff limited to the value added, which in the case of low-wage countries, is very low. Hence, American apparel firms send their work to other lands to be stitched at 30 and 40 cents an hour, and then bring back the end product for sale in this country. So lucrative is this shuttle trade for American producers that Item 807 imports of garments have grown from $1,730,377 in 1955 to $292,475,804 in 1976.

Although the labor that goes into imports is very cheap, the American consumer rarely gets a bargain.

Several months ago, I submitted dramatic visible proof that savings in wage costs for products made overseas were not passed on to the consumer. I showed four identical blouses to a Senate Committee—blouses that we had bought in the same store—each carrying the same brand name and selling for the same price. One was made in the U.S. and the other three in other countries where labor was but a fraction of that paid here.

The beneficiaries of low wages were the manufacturer and/or the retailer who could make a larger profit on the cheap import.

One-million jobless costs the Federal treasury $16 billion a year in lost income and in money paid out for unemployment insurance, welfare, food stamps, etc. The cost to state treasuries is another $4 billion.

The import infection is spreading from light industry to heavy industry. We are hit not only by import of commodities but by export of capital and technology as giant multinational corporations close down plants here to open them in other lands to take advantage of cheaper labor, tax laws, and protected markets overseas.

The evidence of the infectious spread is written in our recent trade balances. In 1977, we ended the year with a deficit of $30 billion—by far the greatest annual loss in our history.

Theoretically, this last deficit should not have happened. Our bad balances have been devaluating the worth of the dollar on the world exchange. This cheapening of the buck should have boosted our exports since people with foreign currencies could buy things cheaply if they were priced in dollars. And, vice versa, our imports should have fallen since it takes more dollars to buy things priced in marks, yet, or francs. But just the opposite happened.

Why? Because every major (and many minor) country shut out our wares with both tariff and non-tariff barriers the last being a thousand bits of red tape to bar the entry of American goods. We, on the other hand, continue to leave our doors wide open—a free trade island in a protectionist ocean, with our economy eroding under the pounding waves of imports.

"Free trade" is a mischievous myth used by American manufacturers, retailers and importers to promote their profits. The American people pay the price in chronic unemployment that will not be cured by the traditional medicines.

What America needs today is a fair trade policy that is both generous and realistic. Such a policy would not close our doors to imports but would regulate the flow in accordance with our capacity to absorb. Thus, if the American garment market grows by 3 per cent a year, imports should be allowed to grow at the same rate. In that way, both domestic production and imports can grow as the U.S. market grows.●

KOREAGATE AND CBS

HON. HENRY J. HYDE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 27, 1978

● Mr. HYDE. Mr. Speaker, on April 3, CBS presented a documentary that, as so often with that network, was a masterpiece of misplaced emphasis.

Columnist Patrick Buchanan has scored again in his superb analysis of this program published in the April 29 issue of TV Guide. I respectfully commend this article to my colleagues:

[From TV Guide, Apr. 29–May 5, 1978]

CBS OVERLOOKS THE TRUE SCANDAL OF "KOREAGATE"

(By Patrick Buchanan)

Like those proverbial Chinese dinners that leave you hungry an hour later, CBS News' "Anatomy of a Scandal," telecast April 3, failed to satisfy.

For the documentary produced nothing new in the way of information, other than the allegation (since denied by all parties) that the CIA bugged the Blue House of Korean President Chung Hee Park.

The rest was predictable rehash, with predictable slant. The President of South Korea was repeatedly identified as a "dictator." Strange the networks so rarely use the moniker when identifying Brezhnev. The Koreans who died in Vietnam were "paid mercenaries of the United States." (Since the British at Normandy were also dependent on U.S. lend-lease arms and equipment, perhaps CBS would call the British war dead "paid mercenaries of the United States.")

South Korea's miraculous recovery from the war is disparaged as the consequence, largely, of U.S. aid and reactionary labor policies. And, of course, the examples of political repression are recounted in loving detail:

"NARRATOR: Student demonstrations . . . riot police and ROK CIA agents beating and arresting protestors . . . the trials of hundreds of prominent citizens, and charges of torture to obtain confessions . . . the faces of wives whose husbands had been sent to prison or death . . . the congregations of Christian churches moving by the thousands in candlelight parades of protest."

Throughout, there was a studious lack of sympathy for South Korea's perilous position, only passing references to the fact that South Korea is militarily menaced by one of the most barbarous regimes on Earth.

Summed up, "Anatomy of a Scandal", provided another rationale for those Americans looking for high moral grounds to grease the skids under South Korea.

The piece was also marked by a Pecksniffian posturing, comical in light of postwar history.

"NARRATOR: Why Park would eventually dare to illegally influence the decisions of the United States Congress is the question we will examine next."

Oh, come off it! Where has "Narrator" been for 30 years? In 1948 the United States reportedly fixed the Italian elections. In the '50s we dumped over regimes in Guatemala and Iran. In the '60s the boys at Langley plotted the assassination of half a dozen Third World thugs, sent an invasion force into Cuba, and "de-stabilized" Chile's economy, after we couldn't block the installation of its elected President Salvador Allende. We have bought off friends and enemies all over the world—because six American Presidents believed rightly that dirty business was sometimes necessary in defense of the Free World.

If the U.S. can allegedly bug the Blue House, from what lofty pulpit do we condemn President Park for, allegedly, trying to buy a few congressmen with "For Sale" signs around their necks?

Here we reach the heart of the matter. What was wrong with the CBS documentary is what has been wrong, to date, with the performance of the House ethics committee. The focus has been on what CBS terms South Korea's "desperate and corruptive plan" directed against Congress.

But the true villains are not Chung Hee Park or his KCIA. What they did, they did to secure support for their beleaguered, threatened country.

If Ben Franklin had bought off half the ministers of Louis XVI, to bring France in on the side of the American Revolution, we would today be celebrating the exploits in song and verse.

It is the corrupt Americans of Capitol Hill who gobbled up gifts, goodies and hundred-dollar bills who are the villains of the piece, it is they against whom the American people should direct their outrage.

Consider South Korea's situation. During Vietnam, she sees a growing isolationism in the U.S., a rising hostility toward South Korea; she hears public calls for an American pullout from mainland Asia. More dependent than Israel upon the U.S. for survival, she desperately sets out to buy back support she is beginning to lose. The alternative could be the death of an independent nation. South Korea's schemers, however unwise and inept, were certainly better motivated than the men who took the bribes.

The focus of U.S. resentment should be on the gift-takers, not the gift-givers from South Korea.

One is reminded of Mark Twain's story "The Man That Corrupted Hadleyburg." Hadleyburg, wrote Twain, was "an incorruptible town," surely "the most honest and upright town in all the region around about. It had kept that reputation unsmirched for three generations, and was prouder of it than of any other of its possessions." Twain's tale is about a mysterious stranger who corrupts the town. The story's point, however, is that the reputation was facade, that Hadleyburg was corrupt to the core, that all that was needed for the mask to be ripped away was a temptation alluring enough.

Capitol Hill is Hadleyburg.

CBS would have us believe Congress is somehow victim of a sinister plot.

Here is producer Jay McMullen, questioning a former State Department official: "Well, don't you think that *if the Congress was being corrupted by a foreign nation*, the public should have reason to know about it?" (Emphasis added.)

The true scandal of Koreagate is the coverup. Tongsun Park reportedly shoveled out $850,000; then Ambassador Kim Dong Jo was seen stuffing about two-dozen—count 'em—two-dozen envelopes full of cash, and heading off, on delivery day, for the Capitol.

Yet, two years into this investigation, not a single sitting congressman has been indicted. Not a single sitting member has been cited with an ethics violation. Where is the clamor for a Special Prosecutor—heard across the land in Watergate?

The seeds of Koreagate may have been produced in Seoul. But they sprouted, blossomed and bore fruit because they were planted in a compost heap called Capitol Hill—where enough dirt has been swept under the rug to qualify the place as a Federal soil bank.●

THE ARMS RACE: A TIME TO STOP

HON. JOHN CONYERS, JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 27, 1978

● Mr. CONYERS. Mr. Speaker, the arms race, the proliferation of nuclear weapons, the development of even more lethal and uncontrollable war machines than the ones that presently exist, are not easy issues to comprehend, let alone deal with. They involved unthinkable thoughts about a level and scale of nuclear devastation for which mankind has no precedents.

A few weeks ago the issue was whether or not this country would go ahead immediately with the production of neutron weapons. The proponents tried to convince us that the future of Western civilization itself depended upon their production and deployment. Fortunately, the President decided to defer production and left room for an eventual decision to cancel out this weapons program altogether. Even if this weapons system were scrapped, we can be sure that a thousand others like it will be put forward on the same grounds that they too are indispensable to the freedom and security of the American people.

Of course, few notions could be farther from the truth than the notion that our Nation's security depends upon the unfettered development and production of any and all weapons systems that our scientists and engineers come up with. Each new round in the arms race adds a greater degree of risk and instability that the last. The more we spend on weapons and the more sophisticated they are, the more the Russians spent and the more sophisticated their weapons become. The more weapons we sell to our clients overseas, the more the Russians sell to their clients. The military-industrial establishment propagates the view that these weapons and increased military spending are our only insurance against disaster. They are, of course, just the opposite: a ticket to that very disaster the nations of the world are pretending to avoid.

Next month the United Nations will convene a special session on disarmament. It will run from May 23 to June 28. We have for this reason an opportunity to think harder on the questions of the arms race and arms control than we have done up to now. Are we increasing or decreasing the likelihood of nuclear war by means of our present national security policies? Are we spreading or limiting the hazards to civilians by moving ahead with a new generation of tactical nuclear weapons such as neutron weapons? Can we and the world afford to continue the diversion of scarce, precious human and material resources that we are currently using up in military spending?

One thing is clear. We cannot afford not to confront these questions. A brilliant article, "A Time to Stop," written by Richard Barnet, has come my way, which deals with the basic question of security and survival in the context of military planning and the arms race. Mr. Barnet is the author of a number of extraordinary books, among them "Roots of War," "The Economy of Death," "Global Reach," and "The Giants." A former official in the Kennedy administration, he is currently a fellow at the Institute for Policy Studies in Washington. I urge my colleagues to read this article as we move closer to what I hope will be a period of extended debate on arms control and disarmament.

A TIME TO STOP

(By Richard J. Barnet)

Humankind is entering a period of unique opportunity and unprecedented danger. The opportunity is the creation of a world community in which the basic economic, political, and spiritual needs of every human being on the earth can be met. For the first time the idea of world community has become more than a philosopher's dream. Statesmen, politicians, economists, indeed almost anyone who thinks about public policy, realizes that the nation state cannot solve the fundamental political and economic problems facing mankind. No matter how many missiles a great nation amasses, it cannot defend its people. The Pentagon cannot defend the people of the United States if, despite the near certainty of its own destruction, the Soviet Union should decide to attack. The Soviet Government cannot defend its vast territory either.

Neither can any nation build prosperity for its people behind the walls of its national frontiers. There is no longer such a thing as a U.S. economy. There is a U.S. branch of a world economy, and the effects of oil shortages and food shortages in remote areas of the globe can no longer be kept from American shores. When unemployment, starvation, disease, war, and political repression strike millions in Asia, Africa, and Latin America, the consequences, increasingly, are felt here. The reality of interconnectedness is forcing us to think beyond the religion of nationalism and to work toward political structures that are obedient to the biblical injunction that mankind is one. It is only in the last twenty years that the two billion or so persons living in the former colonial and dependent world have become subjects rather than objects of history. Millions of people who for five centuries or more were less than persons in either a legal or political sense have arrived on the scene to demand the right to live as human beings.

The end of colonialism, the new awareness that vital resources of the globe are limited, and the realization that the political and economic problems of the United States (and every other country) cannot be solved except in the context of global solutions, are transforming the dream of world community into a political imperative. We are participating in an extraordinary moment in the whole history of man.

But it is a time of extraordinary danger precisely because we have been unable to adjust our thinking to the new era into which we are entering. We think about the world as if we still lived in the nineteenth century and it were still possible to defend territory, to fight successful wars, and to maintain prosperity through the arms race and other walls to keep out the rest of the world. The arms race now threatens to destroy the possibility of world community. Indeed, it threatens all human life on the planet.

The U.S.-Soviet detente has not produced any change in the institutions or habits of mind in either country that keep the arms race going. While the diplomats haggled at the SALT talks, stockpiles of nuclear weapons on both sides doubled, and major advances in military technology, such as MIRV, MARV, the cruise missile, and the new more powerful Soviet missiles were introduced. Thus while arms controllers have been preaching "stable deterrence" the military environment has become much more threatening to both sides. Military planners always wonder why the adversary in the age of overkill is adding more weapons. Trained to anticipate "worst-case scenarios," Soviet and American generals can always find plausible national security arguments to add more missiles, to search for the technological "break-through" that might make it pos-

sible once again to defend the nation, and to develop quick reaction, pre-emptive strategies to forestall a surprise attack.

For any rational political leader, war is indeed unthinkable, but huge military bureaucracies in the two countries are paid to think about it every day, to plan for it and to develop scenarios for "winning." The madness of the one sustains the efforts of the other, and the result is a military environment that is much less predictable and more ominous than it was before detente began.

Some U.S. generals and politicians are suspicious of "what the Soviets are up to" because Soviet military expenditures continue at a high level. The Soviets are making larger and more accurate missiles and as a result parts of the U.S. missile force are becoming more vulnerable. But the U.S., which has always set the pace of the arms race, is about to commit itself to a ten year buildup of major new weapons systems—the cruise missile, the neutron bomb, and the M–X—an elaborate subway system in which mobile missiles move silently under the earth. Soviet officials who emphasize correctly that they have always been behind in the arms race are alarmed that the U.S. is seeking to reestablish "superiority" by acquiring the new generation of U.S. weapons at a cost to the American taxpayer that is certain to reach $150 billion a year by 1981. Weapons programs telegraph intentions in ways more convincing than toasts and speeches.

The inherent instability of the arms race, in which both sides have moved toward 'war-winning technology"—missiles designed to destroy missiles—increases the tension and danger of the military environment and creates pressures on both sides for pre-emptive war strategies. (A missile designed to hit an enemy missile must strike first.)

But not only is the technical balance becoming more unstable but so also is the political balance. When the arms race was a two man game, fairly primitive notions about what it takes to deter a war could be safely applied. But now there are many players and the signals are increasingly confused. The U.S.S.R. is engaged in two arms races, one with us and another with China. The threat of nuclear' terrorism—from small countries, liberation movements, or private gangs—is real. Thirty-five nations have or can quickly acquire nuclear weapons. The bomb is not merely in new hands; it has become intertwined in an entirely new set of problems, It hangs over the Middle East and Southern Africa. The U.S. and the U.S.S.R., despite the intensity of their rivalry, have never had anything to fight about which the elites on either side thought was worth a nuclear war. Other political groups which have or will have the bomb are more desperate. Historical precedents—principally the two regional wars of this century that spread into global conflict—suggest that limiting a nuclear conflict would be very difficult.

The security problems for Americans in the coming era are real and serious, but none of them can be solved by adding extra missiles or tanks to our arsenal. The United States now has more than 9500 nuclear warheads each capable of burning the heart out of a major city. (The Soviet Union has 3700.) A hundred nuclear weapons landing on the Soviet Union would destroy a minimum of 37 million people and 59 percent of the industrial capacity, according to Pentagon calculations. Given these realities of the nuclear age, if the Soviets cannot be deterred by 9500, it is unclear why they will be deterred by 95,000.

The critical security problems for the United States in the coming period include maintaining the flow of oil and gas to factories and homes, staving off the bankruptcy of our major cities, controlling crippling inflation, and creating conditions for every citizen to make a productive contribution to society. Failure to meet any of these problems would imperil American civilization. Each of these threats, if we are to believe official CIA estimates of the extremely low probability of a Soviet blitzkrieg in Europe or anywhere else, is far more likely than the threats against which we are spending so much money. The tragic irony is that by overpreparing against implausible threats we are making ourselves less secure in two ways. First, we are wasting resources—money, energy, imagination—that could be directed at the most urgent security problems. Second, each projected escalation in the arms race, as we have already noted, makes it more likely that we will be involved in a war by miscalculation with the Soviet Union, not less.

The arms race mentality which makes detente and disarmament impossible rests on some fundamental assumptions about ourselves as a people—that we can feel secure only if we continually dramatize the threat of genocide, that our "national will" can be stiffened only by amassing killing power, and that the spiritual and economic sources of national strength count for little. The hideous irony is that there are enormous spiritual and economic costs to basing security on the threat to commit mass murder, and that the more we threaten and the more we amass the weapons to make the threat credible, the less secure we feel.

Despite the trillion and three quarters dollars spent for national security since 1945 the American people are objectively less secure and also feel less secure than they were thirty years ago. To support the over-expanding military machine—because of inflation it takes about a 3 percent increase a year just to stand still—we have starved crucial parts of the domestic society. The fiscal crisis of our cities and the resulting decay, the decline of social services, crime and mounting tension is a consequence of almost forty years of disinvestment in the civil society. The decline of the dollar is directly related to the balance of payments crisis brought on by the maintenance year after year of our huge global military network. The failure of American industry to remain competitive with other countries, despite its enormous advantages, is a result of our national failure to develop technology for solving the most urgent security problems—environmental protection, alternative energy sources, etc. The military has preempted not only the research dollars but, more important, the brains and the energy needed to understand and to address the real security problems of the coming era—how to relate to the coming into being of a new international order.

Security is fundamentally a spiritual and psychological problem. What we trust defines who we are as a nation. To develop the spiritual, psychological and economic resources for survival and growth we will have to put our trust in something other than weapons stockpiles which are always too small and are always obsolete.

The SALT negotiations have failed to stop the arms race because they are premised on the same assumptions that keep the arms race going. Rarely will an American and Soviet general agree on what constitutes a "military balance." Both sides try to derive the same sort of advantage through the negotiations that they seek through their own arms building programs. Thus the pace of negotiations has been so slow that the little progress that is made is overwhelmed by the march of technology.

The only way to stop the arms race is for both sides to communicate to each other a clear intention to stop based on the recognition that the risks of moving to a new stage of insanity outweigh the risks of peace. Since the SALT negotiation has been one of the battlefields of the nuclear arms race we cannot hope that such talks can bring about a reversal of the deadly competition in which the greatness of two nations is measured in megatons of killing power. To break out of the spiral the United States should take some clear and courageous independent initiatives that will convey our intention to find a new basis for our security. Such initiatives should be significant enough to challenge the Soviet Union and every other nation to rethink its own approach to security and to reciprocate with similar initiatives. U.S. initiatives should not depend, however, on reciprocation. There are many moves we could make right now to stop the arms race that would enhance our security—by making the military environment less dangerous to ourselves, by saving money and vital natural resources—whatever the Soviet response might be.

On May 24, 1978, the Special Session on Disarmament of the U.N. General Assembly will open in New York. The President of the United States should address that session and make these pledges for peace to the people of the world: 1) The United States will, starting today, cease all nuclear weapons tests everywhere. 2) The United States will, starting today, cease all flight tests of missiles, military aircraft, and other vehicles for delivering nuclear weapons. 3) The United States will suspend for three years all plans to acquire new strategic weapons systems. Development and procurement of the neutron bomb, the M–X, and the cruise missile will be stopped for such a period. 4) The United States is establishing a National Commission on Conversion with local branches in every community now affected by significant military production to use our wasted resources to create constructive job opportunities and to meet basic human needs in the United States and abroad. 5) The United States pledges to work for the outlawing of nuclear weapons which are at least as barbarous as chemical and biological weapons now banned by international agreement. To that end the U.S. now changes its military doctrine to make it clear that we will never use nuclear weapons except in retaliation for a nuclear attack.

These initiatives are sufficiently far-reaching to convey a change of attitude and to create a change of mood which is essential to get the negotiation process moving. In the past negotiating successes have been preceded by acts of unilateral restraint. The atmospheric test ban agreement of 1963 was made possible by the moratorium on atmospheric tests proclaimed unilaterally by the United States. A dramatic declaration could open new opportunities as have the dramatic visits of President Nixon to China or of President Sadat to Jerusalem.

None of these initiatives would change present military realities. If the U.S. were to postpone the next stage of the arms race, the Soviet Union would secure no advantage thereby. It would be able to destroy the United States as effectively as it can now and the U.S. would be able to destroy the Soviet Union as effectively as it can now. None of these initiatives would give any incentive to aggression; each would contribute to the reduction of tension and the development of a better climate for negotiating significant disarmament agreements.

There are only a few weeks left between now and May. Is it possible for the Christian Church to play a prophetic role at this critical moment in human history by launching a massive public education campaign to help the American people to confront the moral bankruptcy of the policies and institutions that are providing them with the illusion of security at the costs of sacrificing their most precious beliefs? Could the church take the lead in organizing mayors and city officials, union people, Congresspersons, and citizens from communities across the coun-

try to press the President to make an historic initiative for peace? Considerable support for these proposals can be found among the scientific community and specialists in arms control who now despair of progress through the negotiating route for the reasons discussed above. Recently a petition signed by more than a score of Nobel Prize winners and 12,000 other scientists for an end to flight tests of new strategic weapons systems was announced.

It would be unrealistic to assume that the President would make all of the initiatives. It is conceivable that he might make one of them, perhaps in a more hedged formulation. The point of the campaign, however, is not limited to inducing a response from the administration. It would be designed to focus attention on the underlying issues of the arms race and to set the stage for a long term, continuous public education campaign on national security.

The madness of basing security on demonic structures for blowing up the globe is self-evident. Every American president since the war has in one way or another recognized this. President Kennedy, for example, said that "mankind must put an end to the arms race or the arms race will put an end to man." Why then does it continue?

There is no doubt that a military-industrial complex, as President Eisenhower called it, exists. There are powerful institutions with a vested interest in the arms race, huge military bureaucracies trained to think of no other route to security but the threat to destroy others, military contractors fighting to hold on to their favorite customer, production workers in military plants and leaders of their unions who can think of no alternative ways to employ their talents, and so on. But this minority has been able to impose its blueprint for security on the country only by playing on the fears and insecurities of millions of ordinary Americans. There is no institution in the country, neither a political party nor church, which systematically tries to help Americans confront their fears and to examine whether our present approach to national security is in fact one of the sources of our mounting insecurity. What we call "deterrence" is really a massive hostage system. The moral issue of basing security on the threat to commit mass murder of innocent people is not raised except by a small band of prophetics. Until there is a national movement dedicated to looking behind the myths of national security of which most Americans are unwitting prisoners, there will be no end to the escalation of the arms race.

The myths will become all too obvious after the nuclear war. The challenge is to lift the level of awareness of the American people before a nuclear war brings catastrophe to millions of people.●

FBI PROTESTS

HON. FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 27, 1978

● Mr. STARK. Mr. Speaker, following is an article on the FBI written by a famous "cigar-chewing" Washingtonian. In his column. Art Buchwald asks the question, "When the FBI Protests, Who Infiltrates the Crowd?" I hope my fellow Members of Congress find the time to read this excellent article:

WHEN THE FBI PROTESTS, WHO INFILTRATES THE CROWD?

(By Art Buchwald)

I was shocked to turn on the television set last week and see FBI agents taking advantage of the First Amendment to protest the indictments of three of their own for allegedly violating the First Amendment rights of others.

Demonstrating in the streets is not what the FBI does best. Under J. Edgar Hoover and his successors, the role of the FBI was to monitor those people who were organizing and financing protests, to infiltrate those groups that were marching and to report on the "troublemakers" who were using the sidewalks and boulevards to call attention to their grievances.

Old habits die hard for some of the agents, and last week's FBI demonstration was no exception.

As the FBI agents and former agents were fiercely protesting in front of the U.S. District Court Building, a man was taking photographs of them.

"O'Toole," shouted one of the protesters, "what the hell are you doing?"

"I'm taking pictures of the ringleaders of this demonstration for the agency. I got some really good ones."

"Are you out of your mind? We're all FBI agents demonstrating." O'Toole seems disappointed. "You mean you don't want photos for your files?"

"No, we don't want photos of us demonstrating. What we're doing is perfectly legal. It's covered by the Constitution."

"I gotcha. I'll tell you what I'll do. I'll infiltrate the crowd with a tape recorder and check to see if anyone is talking about overthrowing the government."

"O'Toole, you don't have to do that. We're all good Americans and what we're doing is calling an injustice to the attention of the American people."

"Yeah, I've heard that one before. But someone's behind this demonstration and I think we better find out who. I hear the money's pouring in for a defense fund for the people who were indicted. It could be coming from the Soviet Union or Cuba."

"Dammit, O'Toole, the money for the defense fund is coming from former and present FBI agents. There is no foreign money involved. Why can't you understand we've got a legitimate grievance, and we want to see that the people who were indicted are not used as scapegoats just because the Justice Department wants blood?"

"I think we should tap the lines of the guys who were indicted. That could lead us to the source of the money, and also to where the orders are coming from."

"O'Toole, do you know who I am?"

"Sure, you're Turnbull from Identification."

"I'm one of the ringleaders."

"You could have fooled me. I never had you down for a radical nut."

"I'm not a radical nut. None of us is a radical nut. We're law-abiding citizens."

"Yeh. But in the '60s we were told that anyone who demonstrated in the streets was a radical nut. Either that or a misguided pawn in the commie struggle to destroy our way of life."

"That was in the '60s. Now everyone's in the streets. The farmers, the doctors, the hard hats. When you get desperate you have to let everyone know about it. What are you doing with that notebook?"

"I'm taking down names. We'll crosscheck them with the Socialist Workers Party. I can't believe all these people are FBI agents."

"O'Toole, this is a nonviolent demonstration."

"J. Edgar Hoover always said those are the worst kind." ●

HUMAN RIGHTS LANGUAGE INSERTED IN BANK BILL

HON. TOM HARKIN

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 27, 1978

● Mr. HARKIN. Mr. Speaker, next week, the Banking Committee will be continuing its markup of the Export Import Bank Act (H.R. 12157). As presently drafted, this bill will authorize $40 billion over the next 5 years for ExIm Bank. Last year, human rights language was applied to the bank. It is important that the Members of Congress understand how this language has been implemented. I urge all of you to read the following revealing study done by James Morrell and David Gisselquist of the Center for International Policy.

HUMAN RIGHTS AND THE U.S. EXPORT-IMPORT BANK

(By James Morrell and David Gisselquist)

(NOTE.—The Center for International Policy is a project of the Fund for Peace.)

SUMMARY

1. Since advisory human-rights language went into effect on October 26, 1977, Eximbank has authorized $210.5 million in loans, guarantees and medium-term insurance to 11 countries which the Carter administration has identified as human-rights violators.

2. Allowing an exception for loans that serve "basic human needs" would become a loophole that could be stretched to justify loans on nearly any good, and is inappropriate to Eximbank.

3. Human-rights restrictions need not adversely affect Eximbank support of total U.S. exports, because the bank is already deluged with four times more applications for its financial assistance than it is able to authorize. Eximbank's resources could easily be diverted to other countries.

4. Even if the bank refused to divert financial authority for exports to non-human rights violating countries, the maximum amount of U.S. exports that could be lost is $800 million, or 0.67 percent of all U.S. exports.

5. Other existing human-rights legislation, although effective, is inconsistent in that it only applies to Communist countries and only covers the right of emigration.

1. Eximbank aid to human-rights violators:

On October 26, 1977 human-rights language was added in an amendment to the charter of Eximbank. The language was, however, advisory. Instead of prohibiting loans to human-rights violators, Eximbank was directed to ". . . take into account . . . the observance of and respect for human rights . . ." in a recipient country.

For the period October 27, 1977 to March 31, 1978 during which advisory language on human rights has been in effect, Eximbank authorized a total of $210.5 million in loans, guarantees and medium-term insurance for exports to 11 countries which the Carter administration itself has identified as gross human-rights violators through aid cuts, cancellations or deferments, or opposition to loans from international financial institutions. Eximbank loans to the 11 countries represented close to 15 per cent of total Eximbank loans during the period October 27, 1977 to February 28, 1978.

Another $500 million in Eximbank loans and guarantees for South Korea is currently being held up because of the opposition of

Sen. Adlai E. Stevenson III (Democrat of Illinois), chairman of the Senate Banking subcommittee overseeing Eximbank.

TABLE 1.—EXIMBANK LOANS, GUARANTEES AND MEDIUM-TERM INSURANCE TO 11 HUMAN-RIGHTS VIOLATORS, OCT. 27, 1977, TO MAR. 31, 1978

[In millions of dollars]

Country	Loans	Guarantees and medium-term insurance	Total
Argentina	16.3	17.1	33.4
Brazil	111.8	10.7	122.5
Chile		1.4	1.4
El Salvador		1.0	1.0
Guatemala		2.2	2.2
Korea (Republic of)	23.8		23.8
Nicaragua	.3	1.4	1.7
Paraguay		.8	.8
Philippines	13.8	1.4	15.2
South Africa		7.9	7.9
Uruguay		.6	.6
Total	166.0	44.5	210.5

Note: Omits short-term insurance. Omits medium-term insurance in March 1978.

Source: U.S. Export-Import Bank.

Identification of human-rights violators: All 11 countries have been identified by the Carter administration as gross human-rights violators through aid cuts, cancellations or deferments, or opposition to loans from international financial institutions.

As Table 1 indicates, advisory language on human rights has had little effect on Eximbank activity, although the bank has canceled transactions with Argentina and Uruguay on human-rights grounds. Other human-rights abusers (designated as such by the Carter administration) continue to receive loans, guarantees, and insurance to help them import U.S. goods. Total flows to human-rights violators have increased along with increased Eximbank activity around the world.

2. The "basic needs" loophole:

Consideration of political realities in Congress might require a loophole in a human-rights amendment to permit Eximbank loans that serve "basic human needs." Such a loophole for Eximbank is vulnerable to serious abuse.

A loophole to permit loans for goods serving basic human needs could be stretched to justify loans on nearly any goods. Loans on nuclear power plants contribute to rural electrification. Capitol goods create jobs. Steel imports may be used for plows. Equipment for oil exploration may contribute to jobs.

At the same time that the loophole could and probably would be stretched to accommodate almost any export assistance, it is evident that Eximbank activity has nothing to do with "basic human needs" according to the legislative definition of that concept since the enactment of "new directions" aid guidelines in 1973.

First, Eximbank is designed to serve U.S. business and to create jobs in the United States. Eximbank loans and guarantees are, by the argument of the bank itself, not intended as aid.

Second, Eximbank is a bank. Its administrators are not trained in development economics and are not suited to discriminate between loans for the needy and loans that do not benefit the needy. It would be singularly inappropriate to ask bankers to make such a judgment.

Third, in the case of a country that is a gross violator of human rights, U.S. concern for basic human needs might more properly be expressed directly through U.S. AID if at all rather than through Eximbank loans or other forms of cooperation with the recipient government which is a human-rights violator.

Fourth, cutoffs of aid and loans to human-rights violators are intended as temporary measures to apply leverage for improvements in the human-rights performance of the governments involved. Loopholes for basic human needs should be as narrow as possible to make the leverage effective and thereby to permit resumption of full cooperation between countries. No Eximbank loans can be defended on a strict interpretation of basic human needs.

Effective human-rights language on Eximbank would be a) compulsory rather than advisory, and b) without loopholes. Loopholes for "basic needs" are singularly inappropriate for an institution that refuses to consider itself an aid institution. U.S. concern for basic human needs in any country is more appropriately expressed through U.S. aid programs.

3. Would a human-rights amendment adversely affect Eximbank support of total U.S. exports?

Eximbank is already deluged with far more applications for export credits than it is able to authorize. In fact, Eximbank staff estimate that the bank authorizes only one of every four applications submitted by U.S. exporters.

Of the applications received, some 80 percent result in "preliminary commitments" (PC's) by the bank after an assessment of seven major criteria including creditworthiness:

1. Is there a U.S. export involved?
2. What foreign competition exists?
3. Is the transaction economically viable?
4. Is there reasonable assurance of repayment?
5. Is Eximbank's assistance necessary or is there sufficient private capital available at competitive rates and terms to finance the transaction?
6. Would there be an adverse effect on the competitive position of U.S. industry from the transaction?
7. Would this transaction affect the availability of materials in short supply in the United States or domestic employment?

The PC is only the first stage. Only 30 to 35 percent of PC's are converted into export credits. Overall, only 25 percent of initial applications are authorized.

Under these circumstances, if financing for human-rights violators were denied, that financing would be freed up for other countries. The total level of Eximbank support for U.S. exports would remain the same.

Assuming, however, that none of the financing authorizations could have been diverted to other non-human rights violating countries, the Center for International Policy has found that a maximum of 0.67 per cent of total U.S. exports could be lost, based on Treasury Department and Eximbank data. Total U.S. exports come to approximately $120 billion a year. In an average year Eximbank participates in financing approximately 10 per cent of all U.S. exports, or $12 billion. Total financial authorizations to 21 human-rights violators (for the most part so designated by the Carter administration) in FY 1977 comprised 20 per cent of total world wide authorizations, therefore supported approximately 2 per cent of all U.S. exports, or $2.4 billion. The Treasury Department has calculated that of the $12 billion in total exports supported by the bank, about one-third or $4 billion "additional"—i.e., they would have been lost without Eximbank.

Since Eximbank supported $2.4 billion in exports to the human-rights violators, but only one-third or $800 million of that was "additional," the maximum amount that could be affected by human rights restrictions to these countries was $800 million, or 0.67 per cent of all U.S. exports.

It is important to repeat that even this calculation assumes that none of the authorizations could have been diverted to other countries. Since the bank is deluged with four times more applications than it is able to finance, it is evident that financing could easily be redirected to other countries.

4. Other existing human-rights language on Eximbank

The Trade Act of 1974 (the Jackson-Vanik amendment) prohibits U.S. export credits to Communist countries on human-rights grounds; the specific right cited is the right to emigration. This amendment has been effective in stopping all Eximbank credits to the Soviet Union and other Communist countries except for Poland, Romania and Yugoslavia, which have eased their emigration restrictions. (Hungary will also soon qualify.)

The amendment does not consider other human rights, such as freedom from torture, arbitrary arrest, prolonged detention without charges and other gross abuses; it only covers the right of emigration. Why this particular ranking of human rights should be enacted into law has never been explained. Also, the amendment is selective in that it only covers non-market economies.

Legislation that applies a single standard to all countries would overcome the inconsistency of existing law.●

MUSHROOM INDUSTRY UNDERMINED BY UNRESTRAINED IMPORTS

HON. RICHARD T. SCHULZE

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 27, 1978

● Mr. SCHULZE. Mr. Speaker, the American mushroom industry continues to be undermined by the unrestrained imports from Taiwan and South Korea. Obviously the voluntary restraint agreement is not working. We must act now to protect the U.S. mushroom industry before it is completely destroyed by foreign imports. I urge this Congress to give serious consideration to the following statement.

Twice in the past 2 years, the U.S. International Trade Commission has found that the domestic mushroom industry is being injured by imports of mushrooms from Taiwan and South Korea. The administration has attempted to deal with the problem by obtaining pledges from those two countries to restrain the shipments to the United States.

Those pledges do not appear to be any more lasting than a fresh picked mushroom in the July Sun.

Last year, Taiwan and South Korea agreed to limit exports of mushrooms to the United States so as to prevent further unemployment and injury in the domestic mushroom industry. The two nations promised to limit the volume of mushrooms shipped during the marketing period of January–June 1977. During that period, however, they shipped 6 million pounds of mushrooms more than they promised they would. Instead of limiting their exports to 37.5 million pounds, as they pledged, shipments totaled 43.5 million pounds—a mistake of 16 percent. How do you overship 6 million pounds of mushrooms? It hardly seems like an accident: someone would notice. I suspect that the two countries willfully proceeded to ship large volumes of mushrooms to this

country despite their agreement to limit shipments.

On January 24, 1978, Representative CHARLES VANIK, as chairman of the Trade Subcommittee, wrote Special Trade Representative Ambassador Strauss, as follows:

For nearly a year and a half, we have had voluntary agreements with the Republic of China and the Republic of Korea concerning the shipment of mushrooms to the United States.

In reviewing recent International Trade Commission statistics, however, it certainly does not appear that the Republic of China is showing any noticeable restraint in its mushroom shipments.

Could you please provide me with a statement as to the understanding between the governments of the United States and the Republics of China and Korea concerning mushroom shipments. Are the shipments of mushrooms from those two countries in compliance with the assurances, either oral or written, given by those two governments to the United States?

On April 11, the Ambassador replied, indicating that indeed the Taiwanese were paying little or no attention to their pledge to show restraint in their exports to the United States:

I regret the long delay in responding to your letter of January 24 regarding canned mushroom imports.

It appears to us that the Republic of Korea, which gave us oral assurances that its mushroom exporters would not disrupt the U.S. market is clearly adhering to its commitment. Shipments from Korea through mid-March of the marketing year beginning July 1, 1977 are well below those for the same period of the previous year. The Koreans also seem to be shipping at a rate consistent with their announced target of 20 million pounds for the marketing year, so that the problem with circumvention encountered in the previous marketing year appears to have been solved.

Imports from the Republic of China in the current marketing year are above the previous year by a substantial amount but it is not clear that they are disrupting the domestic market (the Taiwanese Government indicated in writing last spring that it would seek to avoid such disruptions and would consult if problems arose). We have informally expressed our concern about the substantial increase to the Taiwanese but have not yet sought consultations. USITC data through December 1977 suggest that the domestic industry's sales are recovering strongly and that the ratio of imports to consumption has declined slightly in this marketing year. We will be reviewing the situations again closely when domestic data for January–March 1978 become available.

Specifically, during the marketing year July 1976—June 1977, the Taiwanese exported 43 million pounds of mushrooms, but during the period July through December 1977, they shipped 27.7 million pounds, an annual rate of 55.4 million pounds, or an increase of 26 percent over the previous marketing year. For January and February, imports from Taiwan totaled 6.9 million pounds. This is 115 percent more than they shipped in January and February of 1977—hardly a sign of restraint or cooperation.

The domestic industry has been found eligible for relief and import penetration is still very high. Therefore, the administration should impress upon Taiwan that if their word cannot be trusted in this matter, then consideration will be given to other remedies available under the Trade Act of 1974—remedies such as quotas or tariffs.●

BELL RINGER FOR OUR FUTURE IN SPACE

HON. OLIN E. TEAGUE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 27, 1978

● Mr. TEAGUE. Mr. Speaker, I call to the attention of the House a very timely article which gives well merited recognition to a most remarkable citizen, Barbara Marx Hubbard, for her foresight and enthusiastic, tenacious leadership in identifying mankind's amazing opportunities for the future uses of our newly discovered realm of outer space.

Very interesting, useful reading is the feature by Suzanne Wille in the March issue of the Washington publication Dossier:

BARBARA MARX HUBBARD, SPACE CADET—LEADING THE EXODUS FROM EARTH

(By Suzanne Wille)

Mr. Crosby, I'd like you to meet Nivram Ralos from the planet Sunev.

Ms. Bogley, say hello to Erom Erom, Fera Tirma's most sought-after bachelor.

Ambassador Zahedi, it's my pleasure to introduce you to H. E. Riaf Yalp, Natiskap's Ambassador to the Universal Nations.

When Barbara Marx Hubbard mind plays about the emergence of brand new players into the human scenario, she's not just whistling Dixie. She's describing beings who are right out of this world, beings from outer space.

Although Barbara's "people" might resemble refugees from "Star Wars," she asserts that they'll be even more congenial than C3PO and R2D2.

According to Barbara, "If these other-worlders are smart enough to get to us before we get to them, it's safe to assume they've evolved beyond using their brains and technologies for war games. Concurrent with their technological advancement, they've likely reached the apogee of ethical and intellectual development to which humankind still aspires."

Who is Barbara Marx Hubbard? And why does she name drop about her new best friends from outer space? Is she really sci-fi writer Ray Bradbury in drag? A fantast between jobs? The kind of genetic kink that discreet families grin, bear and hide in closets whenever possible?

Ms. Hubbard is chairperson of the Board of the Washington-based Committee for the Future, Inc.—a self-appointed bell ringer with one insistent mandate: to rouse the consciousness of a semi-somnolent mankind to the enticing possibilities of laughing, loving and living in outer space.

Bright, Peter Pan pretty and the daughter of toy king Louis Marx, Barbara could have dedicated her life to shopping, sitting in saunas and getting massages. But she chose instead to spit out her silver spoon and follow the call of the stars. "I was determined to find something to work for—not more money, however, because I already had more than enough, just as I had too many toys. I was on welfare from my father, but any level of welfare is insufficient without a challenge to engender growth. What's the purpose of life when you have enough things?"

Before she discovered her cause celebre, Barbara knelt at lots of different altars in the search for something to work for and believe in—something bigger, better and beyond herself. It might have been a visit to the Museum of Modern Art in '62 that forced her diffused energies to converge in a skyward direction.

"There, being guarded by uniformed men, were the 'recent acquisitions' of the world's greatest modern museum. Vast canvases hung empty on the walls: one, all gray; one barely touched by some frantic tiny wiggle, like the trail of a form; then, a plastic hamburger; finally, some nails in plaster. I was shocked. Where are we? In a mad house? The powers of the modern intellectual cultural machine were being used to affirm meaninglessness and make people accept it as the nature of reality."

While the disasterologists and grim reapers of the '60s delivered eulogies for the future of the world, the toy maker's daughter looked up to the infinite possibilities of the navy blue unknown. In Barbara's opinion, the world had grown bone tired of disputation and the misuse of atomic power.

While hundreds of thousands screamed, picketed and slaved to rid mother earth of her throbbing toothache, NASA's Apollo Project gave a few men a lunar perspective of the troubled planet. "The lunar program was humankind's infantile reaction to the next major step in our evolution which is the development of our new home—outer space."

People don't always laugh behind Barbara's back; her pie in the sky ideas about space colonization are being given serious consideration by bodies no less august than NASA, Congress and the hierarchical powers of several major religious denominations. "Most of my audiences feel spiritually and creatively constrained by the artificial ceilings of bureaucracy, of our society, of planet earth. Most of them would blast off to a space colony tomorrow if given the chance."

When Barbara's futuristic philosophy is the issue, she and former Goldwater speechwriter Carl Hess don't see eye to eye. Commenting on her friendly adversary, Barbara jokes, "If I listened to Carl, the human race would still be living in the ocean." From his side Carl asserts, "Barbara labors under the delightful delusion that space colonies will be occupied by nice people like herself and her friends. In reality they'll be administrated by people like James Schlesinger and financed by people like Bert Lance."

Whether from the podium or at a cocktail party, Barbara fights skepticism with hopeful humor about the wonders of space life. "When our technology is sufficiently sophisticated to support colonies of humans in space, there will also be a spiritual evolution resulting in a more creative, intelligent and emphatic humankind. The difference between mankind in 1978 and mankind in 2078 will be as great as the present differences between mankind and the ape. Christ and Buddha were precursors of the kind of elevated consciousness that will be the legacy of our children's grandchildren.

Rep. Charlie Rose, who serves on the committee of the Congressional Clearinghouse for the Future, notes, "Barbara is one of the few futuristic thinkers to consider the spiritual ramifications of space colonization. Perhaps we're more likely to find spiritual utopia among the stars than here on earth."

Sitting cross-legged in the opulence of "Greystone", headquarters and bedquarters for the Committee for the Future, Barbara's face lights up with the horsepower of a new thought. "How strange and delightful. . . in 100 years our babies yet unborn will look back at earth with the same sentimental feelings as people who look back at the old country today."

If all goes according to plan, your children may be able to test the waters of the first extraterrestial community by 2004. That's the target year for NASA's first self-contained ecological system; a system that will function independently of earth.

Smithsonian seminar coordinator, Wilton Dillon has no problem swallowing the concept of space colonization. "Settling on or near mother moon is not much more than an extension of what's gone before. There were greater uncertainties settling the New World than there will be in space colonization."

Barbara's zest for tomorrow land isn't at all dulled by the fact that she won't be around to enjoy it. "Half the fun is getting there. The world has almost run out of having fun. In fact, we are in danger of boring ourselves to death. Movies like "Star Wars" and "Close Encounters of the Third Kind" will keep movie theaters full for some time because they let us escape this planet. You see, we don't have war, mass dissent or some holy crusade to keep us from getting bored. In the last several years, people from all walks of life have begun to look spaceward for hope, for fun, to keep from slipping into ennui."

Barbara and the other members of her Committee for the Future represent but a handful of the futuristic thinkers of the world. Sarge Shriver nearly adopted a futuristic platform in his unsuccessful bid for the Democratic nomination in '76. Shooting from the hip in her inimitable style, Rep. Barbara Mikulski asserts. "Those of us who are opinion makers have to think of more than making global ends meet. Maybe we have to get out in space to learn how to live on earth." Mikulski also sees the migration of outer space as the dawn of a Periclean age for women's rights.

Representatives Lindy Boggs, Millicent Fenwick, Jake Pickle, Gladys Spellman and California Gov. Jerry Brown represent an additional sampling of the elected who are giving more and more thought to the brave new worlds of our grandchildren somewhere in the great beyond.

Barbara Hubbard is nothing if not a consummate communicator. She has spent 16 years smoothing the hard edges of skepticism—paving a philosophical pathway to the stars. In the spring of '78 she will distill her philosophy into a theatrical event that will dramatize the cosmic sweep and the role humankind will play in its colonization. There'll even be a birthday party for the cosmic child (that's us folks) and possible telephone link-ups with futurists from different parts of the world.

Washington author and scientist, John David Garcia is one of several skeptics. He feels that persons should put their own house in order before attempting to colonize outer space. A more realistic challenge is to colonize the unused continent of Antarctica. In any case, he says, space will not be colonized by scientifically illiterate, though well-intentioned, romantics, but by disciplined scientists and engineers.

But the scoffers of this space advocate are having a harder and harder time getting up a quorum. When her severest critics send in the clowns, they still send Barbara in with them. But the toy maker's kid doesn't mind. Just as long as they spell the name right—F.u.t.u.r.e. ●

REWRITE OF THE COMMUNICATIONS ACT

HON. TIMOTHY E. WIRTH

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 27, 1978

● Mr. WIRTH. Mr. Speaker, as we emerge into the electronic society, the issue of competing technologies is increasingly before the Congress. I found the following article to be an excellent description of some of the public policy questions which we must answer in rewriting the Communications Act of 1934:

THE NEW NEW TELEPHONE INDUSTRY—COMPETITION AND TECHNOLOGY MEAN EVEN FASTER GROWTH OVER THE NEXT 20 YEARS

The days of plain old telephone service are over. Key decisions of the Federal Communications Commission recently cleared by the courts have opened to bruising competition vast sectors of the once-staid, $44 billion telephone industry and the $10 billion equipment manufacturing business it supports. Scores of new competitors are barging in—ranging from tiny beginners to such industrial giants as IBM, TRW, Southern Pacific, 3M, and Rockwell International. By offering new products and services, many of them hope to carve out billion-dollar segments of the nation's fastest-growing new market.

The opening of telecommunications to competition is "a major industrial watershed," says Robert E. LeBlanc, a Salomon Bros. partner and a veteran industry observer. And not only competition but also new technology—a complex mixture of semiconductors, computers, optics, and space satellites—is working radical change in the marketplace. New phone gadgetry may be the most visible for now, but key developments in facsimile, data transmission, and integrated voice-data-video systems are shaking the telephone industry right down to its buried cables.

Thus in the next few years, the growth of new information systems based on communications networks could make the first two decades of the electronic data-processing industry look like a warm-up. Increasingly, executives in both the phone and computer industries tend to agree that it is a mix of their two businesses that will lead, finally, to practical electronic funds transfer systems for banks and retailers, integrated information systems for corporations, and the so-called office of the future.

For American Telephone & Telegraph Co. and other phone utilities, the new competitive era is a mixed bag of hazards and opportunities. The new technology, uncontrollable in a competitive market, threatens premature obsolescence for a large part of the $120 billion worth of installed phones, wires, and switching equipment.

Beyond that, the orderly ways of traditional phone-equipment makers have been upended. AT&T's Western Electric Co., a giant with 1977 sales of $7.8 billion, has had to rush to build new plants, retrain workers, and accelerate new-product development. Until a few years ago, the company's phone switchgear plants were producing electromechanical equipment, but now, says Donald E. Procknow, Western's president, the product mix is 85% electronic.

THE MERGING MARKETS

The same kind of change has buffeted others. The phone manufacturing subsidiaries of General Telephone & Electronics Corp., No. 2 in the industry, are in the midst of a wholesale changeover to computer-like, digital switching equipment, and the company has even resorted to radio commercials to recruit computer programmers to speed product development. But in the face of the increased risks, the industry's third and fourth largest holding companies have sold off their manufacturing subsidiaries—in the process, strengthening other new AT&T competitors. International Telephone & Telegraph Corp. bought North Electric Co. from United Telecommunications Inc. late last year. And TRW Inc., which bought Continental Telephone Corp's Vidar Div. three years ago, has turned it into a leading maker of integrated digital transmission and switching equipment.

In all the ferment, two major markets—both promising rapid growth from a large, proven base—are up for grabs:

CONSUMER TELEPHONES

More than 70 million U.S. homes are wired into the telephone network. The FCC's action permitting telephone subscribers to buy their own phone instruments has opened up all those wires for the connection of competitive products. The products range from extension phones shaped like Mickey Mouse to more complex appliances with such features as automatic answering, automatic dialing, and call-timing. ITT is even blending a phone with a radio-alarm clock.

With such possibilities, "I see no reason why there shouldn't be four, five, or six telephones per home," says Henry Marcheschi, president and founder of 10-year-old American Telecommunications Corp., of El Monte, Calif. He got a jump on the consumer market by contracting to sell his decorator phones—including the Mickey Mouse model—exclusively through telephone companies, and even without direct sales, ATC phone-set revenues are close to $20 million a year. All told, the trend to more expensive models with convenience features could soon push the phoneset market to $1 billion.

BUSINESS COMMUNICATIONS

The unmistakable trend in the commercial market is the merging of traditional telephone service with data-processing functions. The newest digital switching systems of the phone companies are highly sophisticated on-line computers, and they will inevitably do many data-processing jobs in addition to switching phone lines. On the other hand, there is no longer any clear technical or service distinction in data processing between a terminal used for communications and one used as an input and output device for a computer system. In the new competitive environment, the two markets of communications and data processing are merging into one—served by both telephone and data-processing companies.

TWO TOUGH COMPETITORS

The U.S. telephone industry billed its business customers more than $25 billion for telecommunications services last year, while the U.S. data-processing industry, including its foreign operations, generated $38 billion in sales. And the area where the two industries most obviously overlap, communications-based information systems, is the fastest-growing market segment for both telephone and computer companies, one that could easily double and redouble in the next decade.

In addition, many U.S. manufacturers, riding the technological lead in semiconductors and computers, hope to capture a significant part of what is expected to be a major expansion in the telecommunications business abroad, as other nations try to upgrade primitive or congested service. The U.S., Sweden, and Switzerland now boast more than 60 phones per 100 population, while the world average is just 9.6. Arthur D. Little Inc. forecasts that by the year 2000, the world's telephones will triple to as many as 1.4 billion units. At $1,000 per phone, including the costs for cables, switches, and long-distance facilities, the next 20 years will see nearly $1 trillion invested in telecommunications, most of it outside the U.S.

Less obvious behind the rush to develop markets are the careful moves and countermoves of the two toughest U.S. competitors, IBM and AT&T. Either could become the dominant force in the evolving hybrid industry. The boldest stroke to date is IBM's joint venture into regulated communications with Comsat General Corp. and Aetna Life & Casualty Co., which is now taking shape as a $500 million investment in Satellite Business Systems. The SBS plan is to serve the communications needs of large businesses through a system of space-satellite relays and rooftop antennas.

Fearing IBM's strength, AT&T has bolstered its corporate marketing operations

with several hundred recruits, many from suppliers of data-processing equipment. And it has put many more marketing troops in the field. Four years ago, the Bell System's 23 operating companies did not even include the title of vice-president or director of marketing or sales on their executive rosters. Now each has a marketing officer.

Bell's new marketing plan, built very much on the successful IBM pattern, foresees an expansion of services into a much wider spectrum than before. The system's planners expect the U.S. "information services" industry to generate annual revenues of about $380 billion by the early 1990s. That figure, according to Archie J. McGill, a former IBM executive and now director of market planning at AT&T, is drawn from analysis of possible "displacement costs" for transportation, data collection, paper shuffling, and energy in more than 60 market areas.

McGill's estimate gets strong support from J. Sidney Webb, executive vice-president of TRW, who heads that company's newly formed communications group. He says that the "merging computers and communications markets" will grow 15 percent to 25 percent per year for the next 10 to 20 years. "At that rate", he says, "it doesn't take long to reach the $300 billion to $400 billion level."

Webb's $500 million-a-year mix of TRW divisions encompasses data terminals, credit-reporting services, telephone transmission and switching systems, and electronic components. "We put it together after years of study, convinced that communications was the place to be," says Webb. "It will be TRW's major growth path."

General Dynamics Corp. is on the same scent as TRW. In 1973 it bought troubled Arcata Communications, an "interconnect" company that sells business phone systems, and in 1974 it added a similar operation, United Business Communications Inc., and renamed the combination General Dynamics Communicaitons Inc. Coupled with a small business in computer peripherals and its big Stromberg-Carlson Corp. subsidiary, a major manufacturer of telephone equipment, the acquisitions give the company a substantial base.

Stromberg-Carlson has already made a painful conversion needed for survival. Leonard A. Muller, another former IBM executive, took over as president in 1974 and made an early decision to change from electromechanical to all-digital switching equipment. He phased out the company's major plants in Rochester, N.Y., and moved production to Florida. His company was the first to supply an all-digital local switching office to a U.S. telephone company—Coastal Utilities Inc., in Richmond Hill, Ga. "I thought I was getting out of the computer business," says Muller. "But no way. We are in the information systems business in spades."

LEGISLATIVE IMPASSE

The prospect of TRW or General Dynamics as serious competitors in commercial telecommunications—if still small by AT&T or IBM standards—would have seemed unthinkable a few years ago. The FCC's pro-competition stance was well-established, but its decisions were stalled in court appeals filed by the telephone industry. During the breather, the independent telephone companies, with plenty of support from AT&T, were trying to generate pressure on Congress that, they hoped, would result in quick passage of the industry-opposed Consumer Communications Reform Act. That legislation would have reversed many of the FCC's actions. As long as the bill stood a chance of passing, many potential competitors were unwilling to invest heavily in new-product development and tooling.

But the proposed legislation, which industry opponents and key consumer groups dubbed the Bell Bill and the Monopoly Protection Act, soon stalled in the communications subcommittees of both houses of Congress. While the proposal has been reintroduced and is far from dead, "in its present form, it stands no chance of passage," says Representative Lionel Van Deerlin (D-Calif.), chairman of the House subcommittee.

On the legal front, phone-industry attorneys apparently ran out of delaying tactics in November. That was when the U.S. Supreme Court refused to hear their appeal on a lower-court decision supporting the FCC's right to allow competitive equipment, properly registered, to be connected to the phone network without interface equipment.

As a result, phone executives are resigned to many changes in their business. Following the Supreme Court decision, AT&T Chairman John D. deButts issued a brief statement in which he vowed to do his best to make the FCC product-registration program work. In December, moreover, a special phone-industry task force submitted a new set of recommendations suggesting that terminal equipment be unregulated.

However, the same report maintained the industry's adamant stand against the competition in intercity transmission that has been mounted or threatened by such companies as MCI Communications, Southern Pacific, ITT, and other specialized carriers, including space-satellite operators. Congress may have to be the final arbitrator.

Even without the FCC's pro-competition moves, the telephone industry would have had to face up, eventually, to radical changes because of new technology. In the absence of competition, new technology has found its way only slowly into phone circuits, though, ironically, much of it, such as the basic transistor, was developed in AT&T's Bell Telephone Laboratories. Some executives of computer companies and large corporations, accustomed as they are to the five-year product cycle in computers and rapid advances in price-performance ratios, find it hard to believe phone-company projections that the telephone network will still contain electromechanical equipment until the year 2000.

Such a schedule hardly jibes with the pace of technology. Semiconductor devices have tipped the scales decisively in favor of digital techniques—the on-off circuitry of computers—for both transmission and switching of voice, as well as for data communications. High-capacity glass fibers, which carry light signals and are immune to electrical interference, are just starting to replace coaxial cables and their electrical signals. Satellites hovering in fixed positions over the equator can relay signals to almost any point on the the globe, substituting for terrestrial networks.

THE REGULATORY MAZE

All this creates massive opportunities for newcomers. The situation, many executives say, is almost a replay of the early days of the computer industry. "Technology is moving so powerfully and so fast that it can find its way around any regulatory rules," says Stromberg-Carlson's Muller.

However, the regulatory scene is still a tricky maze. "Right now there is utter chaos in the marketplace," warns consultant W. Porter Stone. The fast-moving technology, he explains, is making it impossible for the FCC and the courts to draw a hard line between computers, which are unregulated, and communications, which is regulated. "But monopoly and competition can't operate in the same marketplace," he says.

A confrontation between AT&T and the big computer makers has been inevitable since data processing evolved to include remote terminals and computers connected by communications lines. At first, IBM and the other computer makers moved cautiously. They had no wish to offend AT&T, which is second only to the federal government as a customer for data-processing equipment. Besides, they had all they could do to manage their own torrid growth. As early as 1967, though, Bernard Strassberg, then chief of the FCC's Common Carrier Bureau, warned that computers and communications were fast becoming a "scrambled eggs" mixture that would be difficult to separate. The FCC began an inquiry into the problem. But today seems no closer to separating the yolks from the whites than it was a decade ago.

Now IBM and the Computer & Business Equipment Manufacturers Assn. are assaulting the regulatory barriers head-on. IBM is actively fighting an FCC decision that permits AT&T companies to rent data terminals made by Teletype Corp., a subsidiary of AT&T's Western Electric. And in a turnabout, AT&T is trying to persuade the FCC to limit the services planned by IBM's joint venture, Satellite Business Systems.

The problem of coexistence boils down to a matter of cross-subsidies between the monopolistic and competitive sectors. IBM and the other computer makers fear that AT&T will use revenues from its monopoly services, such as ordinary phone service to business and residential customers, to bolster its competitive businesses, such as computer terminals and electronic funds transfer systems for banks and retail stores. In turn, the phone industry fears that unbridled competition in long-distance transmission and phone equipment will drive down rates and drain revenues that, it says, are necessary to keep down residential service charges and maintain the rate-averaging that brings economical service to remote areas.

So far, the phone companies have not been able to convince the FCC that their rate-averaging structure—similar to that of the postal system—is in danger. "There is no evidence that competition has had any adverse effect on local telephone rates or that we can expect a significant negative impact in the future," FCC Commissioner Joseph R. Fogarty told a meeting of independent phone companies in December. And in support of the computer makers' fears, he added that "there is a body of evidence in the record" suggesting that local phone service may be subsidizing the terminals and PBXs offered to businesses by phone companies.

Determining where subsidies exist is difficult because of the phone industry's accounting methods. "Even the most naive businessman would never attempt to run a business with the kind of accounting phone companies use," remarks consultant Stone. Based on the federally mandated Uniform System of Accounts that dates to the turn of the century (BW—Feb. 14, 1977), the phone companies' books aggregate capital and operating costs without assigning them to the products and services that earn the revenues. With the FCC's support, AT&T has embarked on a $3 million program to install a "functional" accounting system, but it is still years off.

For phone users, the most obvious outcome of the phone revolution is the proliferation of consumer devices on the market. Many new designs were shown at the recent Consumer Electronics Show in Las Vegas, where telephone exhibits drew crowds for the first time. Buyers enthusiastically signed orders in anticipation of the first big market test for phones—the pre-Christmas buying seasons next fall. "We won't be selling ordinary black telephones," says Warren Zorek, electronics buyer for Bloomingdale's in New York City. "But telephones with convenience features, such as answering devices, call-forwarding ability, and abbreviated dialing look very good," he adds.

A CONSUMER PUSH

No one pretends to be confident about the size of the consumer market. But since the average U.S. home has only 1.7 phones, it is conceivable that heavy merchandising by both phone companies and equipment retailers could double or triple the number of

extension phones. Meanwhile, in a kind of last-ditch fight, the phone companies are trying to preserve part of their traditional end-to-end responsibility for providing service. They have asked the FCC to revise its rules so that a phone company will still be entitled to provide one phone—a so-called "primary instrument"—in each installation. So far, the FCC has been cold to that proposition.

While the consumer-marketing push has chiefly benefited such small companies as American Telecommunications, the big phone-set makers are also gearing up for the new business. Western Electric, which produces 10 million phones a year, has yet to move beyond sales within the Bell System. But GTE's Automatic Electric, Stromberg-Carlson, and ITT, which together produce about 2 million sets a year, are planning to expand their marketing to retailers. And Northern Telecom Inc., the U.S. subsidiary of Canada's Northern Telecom Ltd., is turning out new lines of decorator sets for both home and office.

Operating companies of the Bell System have begun to adjust to the new climate—generally cutting service rates by about 70¢ a month if subscribers buy their own instruments. Rochester Telephone Corp., an independent, jumped the gun last summer when it offered to sell subscribers their existing phones and, if desired, the phone wires in their buildings. "We really felt that the telephone was going to become a consumer product," says J. C. Henderson, president, "and we wanted to be ready when that day happened." Over 2,500 of Rochester Telephone's customers responded.

GTE, controlling about 10% of the nation's phones is setting up a direct-marketing operation at its subsidiary, Automatic Electric Inc., under Dennis Casey, vice-president for industrial and consumer products. Smaller suppliers, who have always sold phone sets only to phone companies, read the GTE move as a major signal that the old market patterns are gone for good.

Even the Bell System's policy is showing some cracks. This year Western Electric set up an international subsidiary to sell products overseas, and it has recently sold a few large switching systems to independent phone companies. Western Electric signed an antitrust consent decree with the Justice Dept. in 1956 that prevents it from selling or making any products not used in the telephone network. But there is nothing to keep the company from selling phones over the counter in the local five-and-dime.

THE BUSINESS MARKET

A totally different and much larger market is evolving for business products and systems. In the business environment, phone handsets may be just minor parts of a multi-million-dollar system linking integrated work stations with a wide choice of such functions as voice, data, facsimile, even video.

The business market for phone equipment got an eight-year headstart on the consumer phone sector because the new regulations permitting connection of PBXs and data-communications devices to the phone network were the first to clear the FCC. This early phase of the so-called "interconnect" market exploded in the early 1970s as hundreds of local dealers and distributors began to offer more or less standard phone equipment. Most of their PBXs and "keysets"—multiple-extension installations for small offices—came from foreign manufacturers, since there was no significant U.S. supply source.

It was a shaky start, as the new industry suffered predictable problems of overexpansion, bad management, technical inadequacies. and poor maintenance, along with capital shortages in companies that leased their products. On top of that, there was the hostility of phone companies, manifested in such moves as state regulations banning interconnect equipment and secondary boycotts against companies that installed foreign equipment. But none of this turned back the competitive tide. Manufacturers tooled up to make new electronics-based products. Mergers, acquisitions, and convincing performances by the more capable companies in the industry cleared the air. Rockwell International Corp., for example, has sold more than $80 million worth of its Collins automatic call distributors to airlines, stock exchanges, and credit-reporting agencies. Last year the interconnect companies, which would rather be known as business-communication-system suppliers, installed more than $600 million worth of phone systems.

"This year sales could easily double," says Harry Newton, president of Telecom Marketing Group, in New York. Corporate phone bills, Newton points out, are rising 17% a year compared to 5% in the mid-1960s. "Business customers could save $3 billion a year if they just managed their communications better," he says.

As in the computer business, single-system orders in the new communications business can be sizable. Danray Inc., a Dallas company acquired by Canada's Northern Telecom in January, recently landed an $8.5 million PBX order from Equitable Life Assurance Co. for electronic switches to handle the company's national voice and data traffic. Other big Danray customers include several Exxon Corp. subsidiaries, Time Inc.'s New York headquarters, a major Citibank office, and the Massachusetts Institute of Technology.

At Citibank, "generally good experience" with a 2,000-phone Danray system in downtown New York City led the company to choose a similar system made by Northern Telecom (the bidding preceded that company's acquisition of Danray) in its new headquarters building uptown. And William L. Solway, Citibank's vice-president of domestic communications, is aiming for even more advanced phone systems that can carry digital voice and data simultaneously over the same wires directly to office phones and data-processing terminals. The company has already installed a prototype system and has applied for an FCC permit to install a digital microwave link between its uptown and downtown offices. For such advanced systems, Solway complains, "the average telephone man just doesn't know what we are talking about."

As bank credit card transactions grow and electronic funds transfer systems evolve, data communications becomes the key to the future of banking. Other industries, too, are pushing against the limits of present telecommunications products and services. "Our data communications costs are approaching our voice costs now," says James L. Hodges, general manager of computer services for Texaco Inc. By using satellite links for voice and data between New York and Houston, Hodges has been able to double his communications capacity without raising costs. To feed its big computer centers, Texaco even has special digital lines, backed up by parallel microwave links, that carry data at more than a million bits per second over an 8 mi.-to-10-mi. circuit. "We can't wait around—we'll use anything we can get," says Hodges.

Despite their accelerated product development and their reorganized marketing and pricing strategy, the regulated telephone companies may have trouble holding their market share against the innovators. Even in the more prosaic world of voice switching, the big new electronic PBXs, like those at Citibank and Equitable, are a lot more than just mechanized switchboards. In addition to providing such convenience features as conference calling, abbreviated dialing, and automatic call-forwarding, the new PBXs are programmed to keep detailed accounting records and to check the condition of extensions and telephone company lines. In some cases they route toll calls over the least costly paths, cutting charges by as much as 30%.

TWO LONG SHADOWS

Word of such cost-savings has resulted in a rush of new orders for private business telephone systems. "Just in the last few months, things have turned around completely," says Michale Bowen, director of marketing for Danray. "For the first few years, we had a very hard time convincing large companies that we could do the job. Now, big customers have started to call us."

The new orders have helped other small competitors, such as TeleResources Inc. in Armonk, N.Y., and Rolm Corp. in Santa Clara, Calif., to carve out successful niches in the market. Rolm, which produced its first electronic PBX in 1975, sold $17 million worth of them during its most recent fiscal year.

Mergers, acquisitions, and joint ventures in the industry are likely to continue. General Dynamics and Canada's Northern Telecom, which is already a $1.2 billion company, are hot on the acquisition trail. Before snatching up Danray, Northern Telecon picked up Cook Electric Co., Morton Grove, Ill., and Telecommunications Systems of America in Nashville, where it has set up its U.S. headquarters. Northern has also bought large blocks of stock in two makers of computer terminals.

Even the fastest-growing contenders, though, remain in the long shadows cast by the two giants, AT&T and IBM. AT&T's Western Electric has vast resources to draw on, including prestigious Bell Labs. Its virtually guaranteed market in the Bell System, which controls 82% of the existing phones in the U.S., should be enough to ease Western through a long transition period.

As for IBM, though its communications accessories for computers are among its fastest-growing product lines, it has yet to make a major move to add voice, as well as data-communications products in the U.S. The big computer maker is selling a large electronic PBX in Europe, though, and some see that as a rehearsal for the main show in the U.S. IBM, as usual, will not say. In any case, IBM's technology and marketing skills, its move into SBS, its participation in FCC actions, its cash hoard of $5 billion, and its size—annual revenues of $18 billion—make it the most formidable competitor that AT&T has ever had to face.

But both AT&T and IBM have shadows of a different sort to worry about. Both are dogged by antitrust suits, goyernmental and private. Neither Congress nor the FCC is content with the present chaotic mix of regulation and competition, and neither wishes to see a potential $400 billion industry split between just two giants, regulated or not. So governmental action and concern will continue to play a key role in determining the long-term success of the new competition.●

CRAWLING TO THE FLOOR

HON. OLIN E. TEAGUE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 27, 1978

● Mr. TEAGUE. Mr. Speaker, we have talked on many occasions in this Chamber of the need to eliminate architectural barriers, thereby providing accessibility to our environment for elderly and handicapped individuals. Sometimes I wonder, though, if we're not just talking.

This past week the front page of the Washington Star included the following sad story of a visitor who ran into obstacle after obstacle when attempting to viist some of our historic and cultural

centers, including the Kennedy Center, the Museum of History and Technology, and our own Library of Congress.

Maybe we could understand and appreciate this young man's plight, the dilemma which faces millions of elderly and handicapped citizens who visit or try to conduct their business in Washington, D.C., if we were to lose our parking spaces, restrict ourselves to wheelchairs for a week, and had to come crawling to the floor of the U.S. House of Representatives every time we had a roll-call vote.

The article and my letter to the Librarian of Congress follows:

OBSTACLES FOR SCLEROSIS VICTIM ABOUND AT MUSEUMS AND MALL

(By Mary Ann Kuhn)

Helen and Ed Sbragia have never been to Washington before, and the first days of sightseeing have been enough to make Helen Sbragia cry from humiliation and frustration.

Ed Sbragia, 48, struck by multiple sclerosis nine years ago, had to get down on his hands and knees one day in the midst of tourists and crawl his way up the steps to the Smithsonian's Museum of History and Technology.

That was the only way he knew of to get in the museum. The ramp for handicapped persons several yards away was blocked by a huge pile of dirt and a work crew.

Another day, Helen Sbragia pushed her husband's wheelchair down five blocks on Capitol Hill and over two more to get inside the Library of Congress.

At the library's front entrance, she nearly fell backwards straining to get her husband's wheelchair up a ramp for the handicapped that is so steep she couldn't do it without help.

"You don't know what it's like to push a load," Helen Sbragia said, out of breath. "It's a hard thing to do."

Among the 48 spaces reserved in front of the library for its officials, there is no reserved daytime parking for handicapped tourists. There are three parking spaces for handicapped employees, and tourists can use them only after 4:30 p.m. and on weekends.

However, handicapped tourists can call the library a day in advance to try to make parking arrangements.

But Helen and Ed Sbragia of Modesto, Calif., didn't know that.

At the Kennedy Center one afternoon, they got a $5 ticket for parking in the area reserved for the handicapped outside the front entrance.

When they confronted the policeman there, showed the wheelchair, and explained that Sbragia was a multiple sclerosis victim, the officer tore up the ticket.

"This is emotionally debilitating, not just for the handicapped person, but for his family," said Dennis deLeon, a Justice Department lawyer here and nephew of the Sbragias.

"My aunt called me at my office at the end of their sightseeing Monday and she was in tears," said deLeon. "She's a strong person. She said it was one of the most frustrating days she ever had."

DeLeon, a trial lawyer in the general litigation section of the civil division, is familiar with the plight of handicapped persons from his work.

Ironically, his job is defending federal agencies against lawsuits filed by handicapped persons who claim they can't get access to a federal building.

"It is strange," said deLeon, 28, in an interview yesterday, "to see what I am told by the federal agencies and then to see in reality what is available to handicapped persons. You have reality when you accompany a handicapped person."

DeLeon, who accompanied his Aunt Helen and Uncle Ed sightseeing on Sunday, said there are "little details" overlooked by most persons who are not handicapped, such as the difficulty finding a parking space when there are none available for the handicapped, or pushing a wheelchair for blocks and blocks or around the sides of museums trying to find a sign showing which entrance is for the handicapped, or getting parking tickets because rental cars have no identifying sticker for the handicapped on the tags or windshield.

Yesterday, a little after 12 noon, the Sbragias could not find a place to park on the Mall. Helen Sbragia, a claims representative in the social security office of the U.S. Department of Health, Education and Welfare, was driving a blue Oldsmobile they rented when they arrived here over the weekend.

All of the parking spaces reserved for handicapped victims on the Mall across from the Museum of History and Technology were taken. Five cars were illegally parked there, including one with a U.S. Senate sticker, between the brown and white signs identifying the area as for handicapped.

None of the five cars had an identifying sticker for the handicapped, given out by many states. Three of the cars had $5 parking tickets on their windshield for violating an official sign.

Helen Sbragia drove to the other side of the Mall and pulled up outside the red Smithsonian castle to get help from a U.S. Park policeman.

"My husband is handicapped," Helen told him. "He uses a wheelchair. We can't find anywhere to park our rental car."

The policeman leaned toward her and whispered in her ear.

"Park any place you want," he said, "if you have a rental car."

"Are you kidding?"

"Did I tell you anything?" the police officer asked, feigning innocence.

The Sbragias stopped another U.S. Park policeman several yards away. He was sitting on his motor scooter near a brown and white sign marked Handicapped Parking Only.

"You can't park here," the policeman told Helen Sbragia, waving his hand for her to move on.

"But my husband is handicapped," she said, pointing to him in the passenger seat. "He uses a wheelchair."

"This is handicapped parking for handicapped operators of vehicles only," said the officer. "You can drop him off at the front and find a place to park."

"That's absurd," Helen Sbragias said to her husband as she drove away from the Mall area, deciding to sightsee elsewhere. "I never heard that interpretation before."

Nor had the National Park Service. A spokesman said the police officer gave the Sbragias wrong information.

"We honor the car the handicapped person is in," said George Berklacy, spokesman for the National Park Service. "It doesn't matter who is operating it."

Berklacy said he talked with the Park Police watch commander who oversees parking on the mall. "He said it is not unusual for non-handicapped persons to use those reserved spaces for the handicapped. But the motorcycle officer there gives lots of tickets to them."

Berklacy said that the problem the Sbragias have had in using a rental car without any identifying sticker has confronted others.

"It's not unusual for a handicapped visitor to rent a car and park it there and get ticketed," he said. "The police have gotten letters from handicapped people about this, and we've always rescinded the tickets."

Berklacy said the park service has 100 parking spaces reserved for the handicapped in such areas as the Mall, the Kennedy Center, the Visitor Center, the Washington Monument and other memorials. There are also 125 curb ramps on the Mall, he said.

"Overall, handicapped visitors are much better served on the Mall than they were three years ago—with additional curb ramps and parking spaces and the two closed roadways," he said.

Berklacy also noted that in 1976, the Park Service installed two new elevators for the handicapped, one at the Jefferson Memorial, the other at the Lincoln Memorial.

"And plans are underway to put in eight windows at eye level at the top of the Washington Monument for handicapped persons in the near future," he said.

Two weeks ago the Park Service came out with a guide for handicapped visitors, which can be purchased for $3.50 at the Government Printing Office, according to Berklacy.

In 1968, Congress passed the Architectural Barriers Act, which requires such facilities as ramps for the handicapped in buildings in which federal funds are involved.

Because federal agencies were not complying with the law, a board was set up five years later to enforce it. Called the Architectural and Transportation Barriers Compliance Board, it was created under the 1973 Rehabilitation Act.

The board's authority extends to those buildings built since 1968, said Larry Allison, director of public information for the board.

"Anything constructed prior to 1968, even if it has 1,000 steps to the entrance, there is nothing really we can do about it," he said.

Many federal agencies which don't come under the 1968 law, he said, are voluntarily spending money to make their buildings accessible to the handicapped.

There were times during the Sabragias' visit when they said officials made a special effort to consider their needs. The couple praised the way a tour guide at the Library of Congress who saw Ed Sbragia in his wheelchair behind a large tour group asked the crowd to make way for him to come to the front. There he had a perfect view of the Gutenberg Bible.

At Mount Vernon, a police officer pulled Sbragia in his wheelchair up the front steps to the mansion.

The Sbragias, who are leaving Washington the day after tomorrow, said they hope by describing what happened to them, others will be helped.

"I hope this does something for somebody else," said Helen Sbragia.

COMMITTEE ON SCIENCE
AND TECHNOLOGY,
U.S. HOUSE OF REPRESENTATIVES,
Washington, D.C., April 26, 1978.

Mr. DANIEL J. BOORSTIN,
The Librarian of Congress,
Washington, D.C.

DEAR MR. BOORSTIN: I read with interest and dismay the front page of the Washington Star on the accessibility or inaccessibility of our Nation's Capitol to our handicapped citizens.

I know it is difficult to retrofit and correct some of our earlier mistakes, at the same time retaining the architectural integrity and beauty of some our historic landmarks; but we must make every possible effort to make these facilities accessible to all, including the elderly and the handicapped.

I am disturbed to see that even parking at the Library of Congress seems to be unavailable to the handicapped, at least without a request being made a day in advance. Now that is preposterous! We should provide a number of spaces for use by the disabled in accordance with the frequency and persistency of their parking needs in accordance with the American National Standards Institute's requirements for accessibility. I am confident this oversight can be quickly corrected and appreciate your early action.

Sincerely,

OLIN E. TEAGUE,
Chairman.●

SENATE—*Monday, May 1, 1978*

The Senate met at 11 a.m., on the expiration of the recess, and was called to order by Hon. ROBERT MORGAN, a Senator from the State of North Carolina.

PRAYER

The Chaplain, the Reverend Edward L. R. Elson, D.D., offered the following prayer:

God of our Fathers and our God, for the privilege of prayer at this time and in this place we give Thee thanks.

We thank Thee day after day for that wise provision of the Founding Fathers separating the institutions of church and state, but never separating God and prayer from the state, knowing that spiritual verities are the very foundation of the Republic.

Imbue with the spirit of wisdom all those entrusted with public office, that free people may remain free, those in bondage liberated, democracy redeemed from its flaws and failures and justice and truth prevail among the nations.

To serve the present age
Our calling to fulfill
O may it all our powers engage
To do the Master's will.

In Thy holy name we pray. Amen.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. EASTLAND).

The assistant legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, D.C., May 1, 1978.

To the Senate:

Under the provisions of rule I, section 3, of the Standing Rules of the Senate, I hereby appoint the Honorable ROBERT MORGAN, a Senator from the State of North Carolina, to perform the duties of the Chair.

JAMES O. EASTLAND,
President pro tempore.

Mr. MORGAN thereupon assumed the chair as Acting President pro tempore.

RECOGNITION OF LEADERSHIP

The ACTING PRESIDENT pro tempore. The Senator from West Virginia.

THE JOURNAL

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Journal of the proceedings of Thursday, April 27, 1978, be approved.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

COMMITTEE MEETINGS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Foreign Relations Committee be authorized to meet during the session of the Senate today, beginning at 3:30 p.m., to consider the Middle East arms sales.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Nutrition Subcommittee of the Agriculture, Nutrition, and Forestry Committee be authorized to meet during the session of the Senate on Wednesday, May 3, 1978, beginning at 2:30 p.m. to hold a markup session on child nutrition legislation.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Armed Services Committee be authorized to meet during the sessions of the Senate on Tuesday, May 2; Wednesday, May 3; Thursday, May 4; and Friday, May 5, to hold markup sessions on the military procurement authorization, the Department of Energy national security program, and the military construction authorization, which must be reported to the Senate by May 15, 1978, under the Budget Act.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I wish to reserve, for the moment, the remainder of my time under the standing order.

The ACTING PRESIDENT pro tempore. The Chair recognizes the acting minority leader (Mr. GOLDWATER).

THE RETIREMENT OF MAJOR GENERAL SINGLAUB

Mr. GOLDWATER. Mr. President, last Friday, a fine military officer and a great patriot was forced to retire because of a disagreement with the Carter administration over matters directly related to the future and security of the United States. As I am sure you know, Maj. Gen. John K. Singlaub announced his retirement as an aftermath of a speech in which he disagreed with the President's decision to junk the B–1 bomber, delay production of the neutron artillery shell, and give away the Panama Canal.

It is my belief, Mr. President, that General Singlaub well understood the probable price of his outspoken criticism before he delivered the talk which got him called on the carpet by the administration. And I believe, in his great concern for his country, he was willing to pay that price.

Mr. President, I suggest that what we have here is a brave and courageous man willing to stand out alone among his fellow officers and declare what he feels to be right. This is not the first time that General Singlaub has displayed an uncommon courage in matters of military policy. He was relieved of his command in South Korea last year because he could not stand by and accept Washington's decision to withdraw much-needed American troops from that Communist-threatened country.

I would like to say right now, that I associate myself personally with everything General Singlaub has to say, and what is more, I believe President Carter has yet to make a correct decision in the field of military strategy or foreign policy. He certainly has our defense priorities in exactly the wrong order and his attitudes toward Communist countries like China and Cuba are way off base.

So I say, Mr. President, that General Singlaub deserves the high praise and heartfelt thanks of all Americans who are seriously concerned about the continued weakness being spelled out in the policies of the Carter administration. I hail his devotion to the best interests of his country and I say "well done" to a man who has served his country valiantly on the field of battle and courageously in the area of policy. In his differences with President Carter, I say the wrong man resigned.

Mr. President, I yield the floor.

Mr. ROBERT C. BYRD. Mr. President, every commanding officer knows that he has a chain of command through which he can express his viewpoints, and, of course, military officers are entitled to express their viewpoints through that chain of command; but they know that under our Constitution this is a civilian form of government, and that our military officers do not set policy, they carry out policy.

I do not question General Singlaub's patriotism or his right to his viewpoint, but this was the second indescretion on his part. He well knew that he was not the one to set policy, and it is a situation in which, in my judgment, two strikes mean you are out.

I think his resignation was perfectly proper. I think when generals feel that they can speak out in contradiction to the policies set by the civilian leadership of our Government, they ought to be prepared to retire.

Mr. GOLDWATER. Mr. President, will the Senator yield?

Mr. ROBERT C. BYRD. Yes, I yield.

Mr. GOLDWATER. I am fully aware of the relationship between the civilian and the man in uniform in this country, and I can say that no one respects that relationship more than the man in uniform. I completely agree with the majority leader with respect to his remarks concerning the Commander in Chief, when the relationship is that of a Commander in Chief versus subordinate type of situation. Such as when President Truman relieved General MacArthur for rank disobedience of orders.

But I am sure the majority leader has, as many of us have, talked to war colleges and classes of ROTC candidates, as this general was doing, and in the subsequent question-and-answer period we

have made known our feelings, just as general officers, colonels, captains, and admirals in the Navy have, before the various colleges.

I am not going to defend the general on the fact that this is supposed to have been an imprudent remark. I just feel that any general in uniform, not, however, at that time under direct orders of the Commander in Chief, has a right to express how he feels when questioned about it. He was chastised for his remarks on South Korea, and yet many organizations in our Government have since that time proved him to be right. As far as any refutation of his remarks on the B–1 is concerned, he is not alone in his comments on that situation, nor is he alone in his comments on the neutron bomb.

I would just say, Mr. President, that anyone, citizen or soldier, trying to follow what President Carter has in mind, would have a most difficult task.

Mr. ROBERT C. BYRD. Mr. President, I admit that I and the Senator from Arizona and other Senators do answer questions and make our remarks in response to questions when we go about the country and appear before various groups. But we are part of the civilian Government to which I have referred. But this is quite different from the military.

As I have stated, the general had his opportunity to express his viewpoint, but he knows that this is a civilian system of government, that the Government is under civilian control, and that for military people to go around the country questioning the policies set by the Commander in Chief, who is a civilian in Government can only lead to confusion, carping, and misunderstanding, therefore, I think his resignation was proper.

LETTER FROM GENERAL TORRIJOS

Mr. ROBERT C. BYRD. Mr. President, I have received a most gracious, personal letter from Gen. Omar Torrijos regarding the recent ratification of the Panama Canal treaties. He asks that I convey to the Senate—and these are his words:

> My profound thanks on behalf of my entire people for an accomplishment that will ring the bells of history as long as free men, proud men exist.

General Torrijos continues that—

> A United States that can do what (the Senate) has made possible in dealing with a small but proud neighbor is the kind of United States that the world needs—a strong country that can still understand the needs and the pride and the hopes of smaller countries everywhere.

Throughout the debate on the treaties, there was considerable mention of the United States establishing a new relationship not only with Panama, but also with all the countries of the Western Hemisphere. And those of us who supported the treaties maintained that their ratification would better insure the continued, secure operation of the Panama Canal.

General Torrijos addresses both those points in his letter to me. He writes:

> Words are insufficient to express what is in my heart at this moment. I believe that we have entered on an entirely new era, one in which our two countries are partners, are friends, are going to work together to make the future better for both our peoples. And you should know, also, that the Canal has never been safer, more secure than it is at this moment—and as it will be into the far future. That is something good for my country, for yours, and for the world.

Mr. President, the Panama Canal treaties were controversial, and the debate, predictably, was sometimes emotional. In both Panama and in the United States, intemperate remarks were made. But a strong friendship—such as the one which exists between the United States and Panama—can withstand temporary strain.

I agree with General Torrijos that we have entered into a new era in our long and lasting friendship with Panama and its people, and with the other countries of the Western Hemisphere. I believe that, in ratifying the treaties, the Senate seized an opportunity for the United States to exercise power with generosity—to show the world that our commitment to fairness is as great as our military might.

EXECUTIVE SESSION

Mr. ROBERT C. BYRD. Mr. President, there are certain nominations on the calendar which have been cleared for action, if I may have the attention of the distinguished minority leader. The nominations are two nominations under the judiciary which have been cleared, and the nominations beginning under New Reports, U.S. Air Force, and continuing through the end of the calendar. If I am correct that these have been cleared, I ask unanimous consent that the Senate go into executive session for not to exceed 2 minutes to consider the nominations.

Mr. BAKER. Mr. President, reserving the right to object, and I shall not object, the majority leader is correct. These items are cleared on our calendar as well. We have no objection to proceeding on them in executive session.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The first nomination will be stated.

THE JUDICIARY

The assistant legislative clerk read the nomination of Gustave Diamond, of Pennsylvania, to be U.S. district judge for the western district of Pennsylvania.

The ACTING PRESIDENT pro tempore. Without objection, the nomination is considered and confirmed.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the nomination was confirmed.

Mr. BAKER. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The ACTING PRESIDENT pro tempore. The second nomination will be stated.

The assistant legislative clerk read the nomination of Donald E. Ziegler, of Pennsylvania, to be U.S. district judge for the western district of Pennsylvania.

The ACTING PRESIDENT pro tempore. Without objection, the nomination is considered and confirmed.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the nomination was confirmed.

Mr. BAKER. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AIR FORCE—ARMY—NAVY—MARINE CORPS

The assistant legislative clerk proceeded to read sundry nominations in the U.S. Air Force, the U.S. Army, the U.S. Navy, and the U.S. Marine Corps.

NOMINATIONS PLACED ON THE SECRETARY'S DESK

The assistant legislative clerk proceeded to read sundry nominations in the Air Force, Army, and Navy placed on the Secretary's desk.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the nominations under the U.S. Air Force, U.S. Army, U.S. Navy, and U.S. Marine Corps and the nominations placed on the Secretary's desk in the Air Force, Army, and Navy be considered and confirmed en bloc.

The ACTING PRESIDENT pro tempore. Without objection, the nominations are considered and confirmed en bloc.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that it be in order to move to reconsider en bloc the vote by which the nominations were confirmed.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I make that motion.

Mr. BAKER. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the President be immediately notified of the confirmation of the nominations.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

(All nominations confirmed today are printed at the end of the Senate proceedings.)

LEGISLATIVE SESSION

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate resume the consideration of legislative business.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

VITIATION OF ORDER FOR RECOGNITION OF SENATOR LEAHY TODAY

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the recognition of Mr. LEAHY at this time be vitiated.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

AGRICULTURAL CREDIT ASSISTANCE ACT OF 1978

The ACTING PRESIDENT pro tempore. Under the previous order, the Senate will now proceed to the consideration of S. 2146, which the clerk will state by title.

The assistant legislative clerk read as follows:

A bill (S. 2146) to amend the Consolidated Farm and Rural Development Act, as amended.

The Senate proceeded to consider the bill which had been reported from the Committee on Agriculture, Nutrition, and Forestry with an amendment to strike all after the enacting clause and insert the following:

That this Act may be cited as the "Agricultural Credit Assistance Act of 1978".

TITLE I—AMENDMENTS TO THE CONSOLIDATED FARM AND RURAL DEVELOPMENT ACT

ELIGIBILITY FOR FARM OWNERSHIP AND OTHER LOANS UNDER SUBTITLE A

SEC. 101. (a) Section 302 of the Consolidated Farm and Rural Development Act is amended by—

(1) striking out the language down through the first comma and inserting in lieu thereof the following: "The Secretary is authorized to make and insure loans under this subtitle to farmers and ranchers, and to private domestic corporations and partnerships controlled by farmers and ranchers and engaged primarily and directly in farming or ranching, in the United States who individually, or, in the case of corporations and partnerships, the principal stockholders or partners of which, (1) are citizens of the United States,"; and

(2) adding at the end thereof the following: "In the case of corporations and partnerships, the family farm requirement of clause (3) of the first sentence of this section shall apply to the farm or farms in which the entity and its principal stockholders or partners, as applicable, have an ownership and operator interest, and the requirement of clause (4) of the first sentence of this section shall apply both to the entity and its principal stockholders or partners.".

(b) Section 304(a) of the Consolidated Farm and Rural Development Act is amended by striking out the word "individual".

LIMITATIONS ON LOANS UNDER SECTIONS 302, 303, AND 304 OF THE ACT

SEC. 102. Section 305 of the Consolidated Farm and Rural Development Act is amended by striking out the first sentence and inserting in lieu thereof the following: "The Secretary shall make or insure no loan under sections 302, 303, and 304 of this title that would cause the unpaid indebtedness under such sections of any one borrower to exceed the smaller of (1) the value of the farm or other security, or (2) in the case of a loan other than a loan guaranteed by the Secretary, $200,000, or in the case of a loan guaranteed by the Secretary, $300,000. The Secretary is authorized to establish each year an amount or amounts of total unpaid indebtedness that may exist against the farm or other security, which shall apply with respect to loans made or insured during that year. Whenever such amount or amounts are in effect, the Secretary shall make or insure no loan under sections 302, 303, and 304 of this title that would cause the total unpaid indebtedness against the farm or other security at the time the loan is made to exceed the applicable amount.".

LOANS FOR POWER TRANSMISSION FACILITIES

SEC. 103. (a) Section 306(a) of the Consolidated Farm and Rural Development Act is amended by inserting at the end thereof a new paragraph (14) as follows:

"(14)(A) The Secretary may make or insure loans in the full amount thereof, but not to exceed $1,000,000 for any such loan, to associations, including corporations not operated for profit, Indian tribes on Federal and State reservations and other federally recognized Indian tribes, and public and quasi-public agencies, for the purpose of financing the construction, acquisition, and operation of transmission facilities for any electric system that is owned and operated by a public body located in a rural area, and as of October 1, 1976, was receiving bulk power from any of the following agencies of the Department of the Interior:

"(i) the Southwestern Power Administration,

"(ii) the Southeastern Power Administration,

"(iii) the Bonneville Power Administration,

"(iv) the Bureau of Reclamation, or

"(v) the Alaska Power Administration.

A loan may not be made or insured under this paragraph (14) unless the Secretary determines that the applicant for the loan cannot obtain sufficient credit elsewhere from reliable sources at reasonable rates and terms for financing the construction, acquisition, and operation of such facilities.

"(B) Interest or other income from obligations evidencing loans guaranteed under this paragraph (14) shall be included in gross income for the purposes of chapter 1 of the Internal Revenue Code of 1954.

"(C) The Administrator of the Rural Electrification Administration shall administer loans made or insured under this paragraph (14).

"(D) The authority provided to the Secretary by subparagraph (A) of this paragraph (14) shall terminate September 30, 2006.

"(E) There are hereby authorized to be appropriated for the administration of loans under this paragraph (14) such sums as Congress from time to time may deem necessary.".

(b) Section 309A(a) of the Consolidated Farm and Rural Development Act is amended by inserting "306(a)(14)," immediately after "sections 304(b), 306(a)(1),".

WATER AND WASTE DISPOSAL GRANTS

SEC. 104. Effective October 1, 1978, section 306(a)(2) of the Consolidated Farm and Rural Development Act is amended by—

(1) striking out "$300,000,000" and inserting in lieu thereof "$1,000,000,000"; and

(2) striking out "50 per centum" and inserting in lieu thereof "75 per centum".

INTEREST RATES FOR LOANS UNDER SUBTITLE A; DELETION OF ESCROW AGENT PROVISION

SEC. 105. Section 307 of the Consolidated Farm and Rural Development Act is amended by—

(1) amending subsection (a) to read as follows:

"(a)(1) The period for repayment of loans under this subtitle shall not exceed forty years.

"(2) Any loan made under this subtitle as a guaranteed loan shall bear interest at such rate as may be agreed upon by the borrower and the lender.

"(3) Except as otherwise provided in paragraphs (4), (5) and (6) of this subsection, loans, other than guaranteed loans, made or insured under this subtitle shall bear interest at rates determined by the Secretary of the Treasury taking into consideration the current average market yield on outstanding marketable obligations of the United States with remaining periods to maturity comparable to the average maturities of such loans, plus not to exceed 1 per centum per annum as determined by the Secretary, and adjusted to the nearest one-eighth of 1 per centum.

"(4) Loans made or insured under section 303 of this title shall, when made other than as guaranteed loans, bear interest at a rate prescribed by the Secretary, but not in excess of 5 per centum per annum.

"(5) Loans for water and waste disposal systems, essential community facilities, and land acquisition pursuant to the Act of April 11, 1970 (Public Law 91-229, 84 Stat. 120), shall, when made other than as guaranteed loans, bear interest at a rate prescribed by the Secretary, not in excess of 5 per centum per annum.

"(6) Loans made or insured under sections 304(b) and 310B of this title shall, when made other than as guaranteed loans, bear interest at rates prescribed by the Secretary, not less than rates determined by the Secretary of the Treasury taking into consideration the current average market yield on outstanding marketable obligations of the United States with remaining periods to maturity comparable to the average maturities of such loans, adjusted in the judgment of the Secretary of the Treasury to provide for rates comparable to the rates prevailing in the private market for similar loans and considering the Secretary's insurance of the loans, plus an additional charge, prescribed by the Secretary, to cover the Secretary's losses and cost of administration, which charge shall be deposited in the Rural Development Insurance Fund, and further adjusted to the nearest one-eighth of 1 per centum.";

(2) redesignating subsection (b) as subsection (c); and

(3) inserting a new subsection (b) to read as follows:

"(b) The borrower shall pay such fees and other charges as the Secretary may require, and borrowers under this title shall prepay to the Secretary such taxes and insurance as the Secretary may require, on such terms and conditions as the Secretary may prescribe.".

REPEAL OF LIMITATION ON AMOUNT OF OUTSTANDING LOANS UNDER THE AGRICULTURAL CREDIT INSURANCE FUND

SEC. 106. (a) Section 309(f) of the Consolidated Farm and Rural Development Act is amended by changing the period at the end of the first sentence in paragraph (1) to a semicolon and striking out the second sentence therein, which reads: "The aggregate of the principal of such loans made and not disposed of shall not exceed $500,000,000 at any one time;".

(b) Section 328 of the Consolidated Farm and Rural Development Act is amended by striking out ": *Provided*, That loans made under this section shall not be included in applying the $500,000,000 limitation in section 309(f)(1)".

TRANSFER OF ADMINISTRATIVE FUNDS

SEC. 107. Section 309A(g) of the Consolidated Farm and Rural Development Act is amended by striking out the period at the end of paragraph (8) and inserting in lieu thereof the following: ", either directly from the Insurance Fund or by transfers from the Fund to, and merger with, any appropriations for administrative expenses.".

PURCHASE BY THE SECRETARY OF GUARANTEED PORTIONS OF LOAN

SEC. 108. The Consolidated Farm and Rural Development Act is amended by adding immediately after section 309A a new section 309B as follows:

"SEC. 309B. The Secretary may purchase, on such terms and conditions as the Secretary may deem appropriate, the guaranteed portion of any loan guaranteed pursuant to this title: *Provided*, That the Secretary may not pay for any such guaranteed portion of a loan in excess of an amount equal to the unpaid principal balance and accrued interest on the guaranteed portion of the loan. The Secretary may use for such purchases funds from the Rural Development Insurance Fund with respect to rural development loans as defined in section 309A(a) of this title and funds from the Agricultural Credit

Insurance Fund with respect to all other loans under this title. This authority may be exercised only after the Secretary determines that an adequate secondary market is not available in the private sector.".

EXEMPTION OF SMALL BUSINESS PROJECTS FROM RESTRICTIONS ON RURAL INDUSTRIAL ASSISTANCE AND OTHER LOANS

SEC. 109. Section 310B of the Consolidated Farm and Rural Development Act is amended by inserting in paragraphs (1), (2), and (3) (that follow subsection (d)) immediately after "312(b)" wherever that term appears therein, the following: ", except for cases in which such assistance does not exceed $1,000,000 or for cases in which direct employment will not be increased by more than fifty employees,".

ELIGIBILITY FOR OPERATING LOANS

SEC. 110. (a) Section 311(a) of the Consolidated Farm and Rural Development Act is amended by—

(1) striking out the language down through the first comma and inserting in lieu thereof the following: "The Secretary is authorized to make and insure loans under this subtitle to farmers and ranchers, and to private domestic corporations and partnerships controlled by farmers and ranchers and engaged primarily and directly in farming or ranching, in the United States who individually, or, in the case of corporations and partnerships, the principal stockholders or partners of which, (1) are citizens of the United States,"; and

(2) adding at the end thereof the following: "In the case of corporations and partnerships, the family farm requirement of clause (3) of the first sentence of this subsection shall apply to the farm or farms in which the entity and its principal stockholders or partners, as applicable, have an operator interest, and the requirement of clause (4) of the first sentence of this subsection shall apply both to the entity and its principal stockholders or partners.".

(b) Section 312(a) of the Consolidated Farm and Rural Development Act is amended by striking out the word "individual".

LIMITATIONS ON FARM OPERATING LOANS

SEC. 111. Section 313 of the Consolidated Farm and Rural Development Act is amended to read as follows:

"SEC. 313. The Secretary shall make or insure no loan under this subtitle (1) that would cause the total principal indebtedness outstanding at any one time for loans made under this subtitle to any one borrower to exceed, in the case of a loan other than a loan guaranteed by the Secretary, $100,000, or, in the case of a loan guaranteed by the Secretary, $200,000; or (2) for the purchasing or leasing of land other than for cash rent, or for carrying on any land leasing or land purchasing program.".

FARM OPERATING LOAN INTEREST RATES; CONSOLIDATION AND RESCHEDULING OF LOANS

SEC. 112. Section 316 of the Consolidated Farm and Rural Development Act is amended to read as follows:

"SEC. 316. (a) The Secretary shall make all loans under this subtitle upon the full personal liability of the borrower and upon such security as the Secretary may prescribe. Such loans, except for guaranteed loans, shall bear interest at a rate, prescribed by the Secretary, not more than a rate determined by the Secretary of the Treasury taking into consideration the current average market yield on outstanding marketable obligations of the United States with remaining periods to maturity comparable to the average maturities of such loans, plus an additional charge not to exceed 1 per centum per annum as determined by the Secretary, which charge shall be deposited in the Rural Development Insurance Fund or the Agricultural Credit Insurance Fund, as appropriate, and adjusted to the nearest one-eighth of 1 per centum. Guaranteed loans made under this subtitle shall bear interest at such rate as may be agreed upon by the borrower and lender.

"(b) Loans made under this subtitle shall be payable in not to exceed seven years. The Secretary may consolidate or reschedule outstanding loans for payment over a period not to exceed seven years from the date of such consolidation or rescheduling, and the amount of unpaid principal and interest of the prior loans so consolidated or rescheduled shall not create a new charge against any loan levels authorized by law. A new loan may be included in a consolidation. Such new loan shall be charged against any loan level authorized by law. The interest rate on such consolidated or rescheduled loans, other than guaranteed loans, may be changed by the Secretary to a rate not to exceed the rate being charged for loans made under this subtitle at the time of the consolidation or rescheduling. Guaranteed loans under this subtitle that may be consolidated or rescheduled for payment shall bear interest at such rate as may be agreed upon by the borrower and the lender.".

TECHNICAL AMENDMENTS

SEC. 113. Section 321(b) of the Consolidated Farm and Rural Development Act is amended by—

(1) striking out "Disaster Relief Act of 1970, as amended," and inserting in lieu thereof "Disaster Relief Act of 1974"; and

(2) inserting "domestic" immediately before "partnerships".

EMERGENCY LOAN INTEREST RATES

SEC. 114. (a) Section 324 of the Consolidated Farm and Rural Development Act is amended by—

(1) striking out the first sentence in subsection (a) and inserting in lieu thereof the following: "Loans made or insured under this subtitle shall be at rates of interest as follows:

"(1) with respect to loans or portions of loans up to the amount of the applicant's actual loss caused by the disaster, (A) if the applicant is unable to obtain sufficient credit elsewhere to finance the applicant's actual needs at reasonable rates and terms, taking into consideration prevailing private and cooperative rates and terms in the community in or near which the applicant resides for loans for similar purposes and periods of time, the interest rate shall be a rate prescribed by the Secretary not in excess of 3 per centum per annum, and (B) if the applicant is able to obtain sufficient credit elsewhere, the interest rate shall be a rate prescribed by the Secretary not in excess of the average annual interest rate on all interest-bearing obligations of the United States then forming a part of the public debt as computed at the end of the fiscal year immediately preceding the date of the disaster, plus not to exceed 1 per centum per annum as determined by the Secretary, and adjusted to the nearest one-eighth of 1 per centum; and

"(2) with respect to loans or portions of loans exceeding the amount of actual loss caused by the disaster, the interest rate shall be that prevailing in the private market for similar loans, as determined by the Secretary."; and

(2) repealing subsection (b) and redesignating subsection (c) as subsection (b).

(b) Section 321 of the Consolidated Farm and Rural Development Act is amended by striking out in subsection (b) all that follows after "with the assistance of such loan" down through the end of the subsection and inserting in lieu thereof a period.

AUTHORITY WITH RESPECT TO PROPERTIES IN AREAS THAT HAVE CHANGED FROM RURAL TO URBAN AND LETTERS OF INTENT

SEC. 115. Section 331 of the Consolidated Farm and Rural Development Act is amended by—

(1) striking out the period at the end of clause (i) and inserting in lieu thereof a semicolon; and

(2) adding at the end thereof new clauses (j) and (k) as follows:

"(j) notwithstanding that an area ceases, or has ceased, to be 'rural', in a 'rural area', or an eligible area, make loans and grants, and approve transfers and assumptions, under this Act on the same basis as though the area still was rural in connection with property securing any loan made, insured, or held by the Secretary under this Act or in connection with any property held by the Secretary under this Act; and

"(k) issue to loan applicants letters of intent or conditional commitments to make loans so that such applicants may obtain temporary financing from other sources pending completion of loan processing, subject to such conditions as the Secretary may prescribe.".

APPEAL AND REVIEW OF COUNTY COMMITTEE DETERMINATIONS; EXEMPTION OF GUARANTEED LOANS FROM "GRADUATION" REQUIREMENT

SEC. 116. Section 333 of the Consolidated Farm and Rural Development Act is amended by—

(1) striking out the semicolon at the end of subsection (b) and inserting in lieu thereof the following: ": *Provided*, That the Secretary may provide a procedure for appeal and review of any determination relating to a certification or recommendation required to be made by the county committee under this title, and for reversal or modification thereof should the facts warrant such action;"; and

(2) inserting in subsection (c) "except for guaranteed loans," immediately before "an agreement by the borrower".

SEPARATE APPROPRIATION AMOUNTS; PARTICIPATION BY OTHER DEPARTMENTS AND AGENCIES

SEC. 117. The Consolidated Farm and Rural Development Act is amended by adding at the end thereof new sections 346 and 347 as follows:

"SEC. 346. Congress may from time to time in appropriation Acts establish levels for the loan programs authorized in this title. Such level for any program shall consist of two amounts, one against which loans made from the insurance funds by the Secretary shall be charged and the other against which loans guaranteed by the Secretary shall be charged, with or without authority for the Secretary to transfer amounts between such categories within a program for more effective program administration.

"SEC. 347. Notwithstanding any other provision of law, other departments, agencies, and executive establishments of the Federal Government may participate and provide financial and technical assistance jointly with the Secretary to any applicant to whom assistance is being provided under any program administered by the Farmers Home Administration. Participation by any other department, agency, or executive establishment shall be only to the extent authorized for, and subject to the authorities of, such other department, agency, or executive establishment, except that any limitation on joint participation is superseded by this section.".

AREAS COVERED UNDER THE CONSOLIDATED FARM AND RURAL DEVELOPMENT ACT

SEC. 118. The Consolidated Farm and Rural Development Act is amended by—

(1) in section 306(a)(7), striking out ", the Commonwealth of Puerto Rico and the Virgin Islands,";

(2) in section 321(a), striking out ", Puerto Rico, and the Virgin Islands";

(3) in section 325, striking out ", Puerto Rico, or the Virgin Islands";

(4) in clause (a) of section 331, striking out "and in Puerto Rico and the Virgin Islands"; and

(5) in section 343, striking out "and" immediately before "(5)", and inserting imme-

diately before the period at the end thereof the following: ", and (6) the term 'United States' shall include the States, the Commonwealth of Puerto Rico, the Virgin Islands of the United States, the territories and possessions of the United States, and the Trust Territory of the Pacific Islands, and the term 'State' shall include the Commonwealth of Puerto Rico, the Virgin Islands of the United States, the territories and possessions of the United States, and the Trust Territory of the Pacific Islands".

EFFECTIVE DATE

SEC. 119. Except as otherwise provided in section 104 of this title, the provisions of this title shall become effective upon enactment.

TITLE II—EMERGENCY AGRICULTURAL CREDIT ADJUSTMENT ACT OF 1978

SHORT TITLE

SEC. 201. This title may be cited as the "Emergency Agricultural Credit Adjustment Act of 1978".

AUTHORITY TO INSURE OR GUARANTEE LOANS

SEC. 202. The Secretary of Agriculture may insure or guarantee loans to bona fide farmers and ranchers who are primarily and directly engaged in agricultural production and who are citizens of the United States, and to domestic corporations or partnerships that are primarily and directly engaged in agricultural production and in which a majority interest is held by stockholders or partners who themselves are citizens of the United States and primarily and directly engaged in agricultural production, if the applicant for such loan—

(1) has the experience and resources necessary to asure a reasonable prospect for successful operation with the assistance of such loan;

(2) needs such credit in order to maintain a viable agricultural production operation; and

(3) is unable at the time the loan application is filed to obtain sufficient credit from normal credit sources to finance actual needs at reasonable rates and terms due to national or areawide economic stresses, such as a general tightening of agricultural credit or an unfavorable relationship between production costs and prices received for agricultural commodities. As used in this title, the term "agricultural production" shall include aquaculture.

PURPOSES OF LOANS

SEC. 203. Loans may be insured or guaranteed under this title for (1) refinancing outstanding indebtedness, including the making of installment payments of principal and interest on real estate or other debts that cannot be paid unless assistance is rendered pursuant to this title, or that must be consolidated or restructured to provide adequate terms within repayment ability; (2) reorganization of the farm or ranching operation, including changes in the nature or method of operation, necessary to provide an economically sound operating unit; (3) purchase of essential water rights, supplies, and irrigation facilities; (4) acquisition of land to maintain the normal level of operations; (5) loan closing costs; (6) purchase of essential livestock, poultry, and farm equipment; (7) purchase of feed, seed, fertilizer, insecticides, and farm supplies and other essential farm operating expenses, including cash rent; (8) financing essential land and water development, use, and conservation; and (9) other essential farm and home needs, including, but not limited to, family subsistence.

GUARANTEED LOAN LIMITS; RATES OF INTEREST; REPAYMENT PERIOD; RESTRICTIONS

SEC. 204. (a) The Secretary of Agriculture may guarantee under this title the principal and interest on any loan made by a legally organized lending agency, and that otherwise meets the purposes and conditions of this title, except that such guarantee shall not exceed 90 per centum of the principal and interest of the loan.

(b) Loans guaranteed under this title shall bear interest at rates to be agreed upon by the lender and borrower. Loans insured under this title shall bear interest at rates determined by the Secretary of Agriculture taking into consideration the current average market yield on outstanding marketable obligations of the United States with remaining periods to maturity comparable to the average maturities of such loans, adjusted to the nearest one-eighth of 1 per centum, plus not to exceed 1 per centum per annum as determined by the Secretary.

(c) Loans insured and guaranteed under this title shall be repayable at such times as the Secretary of Agriculture may determine, taking into account the purpose of, and need for, the loan, but not later than provided for loans for similar purposes under the Consolidated Farm and Rural Development Act: *Provided*, That, if the loan is for a purpose described in subtitle B of such Act, the Secretary may make the loan repayable at the end of a period not exceeding twenty years if the Secretary determines that the need of the applicant justifies a longer repayment period.

(d) The total loan insured or guaranteed under this title for any borrower shall not exceed $500,000.

(e) No fees or charges shall be assessed by the Secretary of Agriculture for any loan insured, or for any guarantee provided, under this title.

LOAN CERTIFICATIONS AND CONDITIONS

SEC. 205. (a) As a condition of the Secretary of Agriculture guaranteeing any loan under this title, the lender shall certify that—

(1) the lender is unwilling to provide credit to, or continue with, the loan applicant in the absence of the guarantee authorized by this title;

(2) the loan applicant is directly and in good faith engaged in agricultural production; and

(3) the financing to be furnished the loan applicant is to be used for one or more of the purposes set forth in section 203 of this title.

(b) As a condition of the Secretary insuring any loan under this title, the loan applicant shall certify that—

(1) the loan applicant will be unable to obtain financing in the absence of the assistance authorized by this title;

(2) the loan applicant is directly and in good faith engaged in agricultural production; and

(3) the financing to be furnished the loan applicant is to be used for one or more of the purposes set forth in section 203 of this title.

(c) As a condition for insuring or guaranteeing any loan under this title, the Secretary must find that there is reasonable probability of accomplishing the objectives of this title and repayment of the loan.

(d) The Secretary shall require—

(1) the county committee authorized under section 332 of the Consolidated Farm and Rural Development Act to certify in writing that the applicant for a loan under this title meets the eligibility requirements for the loan, has the character, industry, and ability to carry out the proposed operations, and will, in the opinion of the committee, honestly endeavor to carry out his or her undertakings and obligations; and

(2) except for guaranteed loans, an agreement by the applicant for a loan under this title if at any time it shall appear to the Secretary that the applicant may be able to obtain a loan from a production credit association, a Federal land bank, or other responsible cooperative or private credit source, at reasonable rates and terms for loans for similar purposes and periods of time, the applicant will, upon request by the Secretary, apply for and accept such loan in sufficient amount to repay the Secretary or the insured lender, or both, and pay for any stock in a cooperative lending agency that must be purchased in connection with such loan.

LOAN SECURITY

SEC. 206. Loans shall be insured or guaranteed under this title upon the full personal liability of the borrower secured by such collateral as is available that, together with the confidence of the Secretary of Agriculture, and, for guaranteed loans, the confidence of the lender, in the repayment ability of the loan applicant, is deemed by the Secretary adequate to protect the Government's interest. The collateral may be subject to a prior lien or may be collateral that has depreciated in value owing to temporary economic conditions.

FUNDING; LIMITATION ON OUTSTANDING LOANS

SEC. 207. The fund created in section 309 of the Consolidated Farm and Rural Development Act shall be used by the Secretary of Agriculture for the operation of the loan program, and for the discharge of the obligations incurred by the Secretary, under this title. The Secretary is authorized to use such fund to (1) pay administrative expenses of the Secretary necessary to insure, guarantee, and service loans, and otherwise carry out the provisions of this title, and (2) purchase, on such terms and conditions as the Secretary may deem appropriate, all or any portion of any loan insured or guaranteed pursuant to this title, or to defer payments of principal and interest with respect to such loan, and to pay expenses and fees incident to such purchase or deferral. There shall be reimbursed to such fund by appropriations annually an amount equal to the costs incurred in the operation and administration of the program created by this title. The total principal balance outstanding at any time on loans insured or guaranteed under this title shall not exceed $4,000,000,000.

FULL FAITH AND CREDIT

SEC. 208. Any contract of guarantee or insurance executed by the Secretary of Agriculture under this title shall be an obligation supported by the full faith and credit of the United States and incontestable except for fraud or misrepresentation of which the holder has actual knowledge at the time it becomes a holder.

ISSUANCE OF CERTIFICATES OF BENEFICIAL OWNERSHIP; CONTRACTS OF GUARANTEE ASSIGNABLE; REGULATIONS

SEC. 209. (a) The provisions of section 310B(6) of the Consolidated Farm and Rural Development Act shall apply to loans insured or guaranteed under this title. The Secretary of Agriculture is authorized to handle loans guaranteed under this title in the same manner as loans guaranteed under the Consolidated Farm and Rural Development Act.

(b) Contracts of guarantee executed pursuant to the provisions of this title shall be fully assignable.

(c) The Secretary is authorized to issue such regulations as the Secretary determines necessary to carry out this title.

EFFECTIVE PERIOD

SEC. 210. The provisions of this title shall become effective upon enactment, and the authority to make new contracts of insurance or guarantee under this title shall terminate May 15, 1980.

TITLE III—EXTENSION AND AMENDMENT OF THE EMERGENCY LIVESTOCK CREDIT ACT OF 1974

SEC. 301. (a) The Emergency Livestock Credit Act of 1974 is amended by—

(1) amending section 8 to read as follows:

"SEC. 8. The provisions of this Act shall become effective upon enactment, and the authority to make new guarantees shall expire September 30, 1979, except that, with

respect to any loan for a line of credit guaranteed under this Act, if the lender advances loan funds within the line of credit at any time during the remaining term or authorized renewal period of the loan after September 30, 1979, the guarantee of such advances shall not be considered new guarantees."; and

(2) in section 11, amending the first sentence to read as follows: "The Secretary shall, not later than December 15 of each year, report to the House Committee on Agriculture and the Senate Committee on Agriculture, Nutrition, and Forestry on the effectiveness of this Act.".

(b) The provisions of this section shall become effective upon enactment.

The ACTING PRESIDENT pro tempore. Time for debate on this bill is limited to 2 hours, to be equally divided and controlled by the Senator from Georgia (Mr. TALMADGE) and the Senator from Nebraska (Mr. CURTIS), with 1 hour on any amendment in the first degree except the Muskie amendment, on which there will be 2 hours, and 30 minutes on any amendment in the second degree, debatable motion, appeal, or point of order. No rollcall votes in relation thereto will occur prior to Tuesday, May 2, 1978. Who yields time?

Mr. CURTIS. Mr. President, I yield myself such time as I may wish to use.

Mr. President, I am pleased today to speak for Senate bill S. 2146. S. 2146, as amended by the committee, makes a number of changes in the Federal credit assistance programs for farmers, ranchers, rural communities, and businesses.

Title I amends the Consolidated Farm and Rural Development Act, title II establishes a new economic emergency loan program for farmers and ranchers, and title III amends and extends the Emergency Livestock Credit Act of 1974.

This bill has been under consideration for over 3 years. I believe it has been studied and has been gone over by all the groups that are concerned with its passage. The time has come to pass the bill and improve the credit programs the Farmers Home Administration offers to rural citizens.

Many of the changes that will be brought about by this bill were needed months ago for the Farmers Home Administration to adequately serve farmers. The FmHA has been handicapped by low loan ceilings to where they have not been able to serve Nebraska farmers and farmers all across America.

Many thousands of America's farmers are facing financial crisis. They are struggling with high production costs, low commodity prices, and, for a number of farmers, crop losses due to drought or other disasters.

I have farmers from Nebraska calling in every week explaining their financial crisis and the need for additional credit.

Due to the cost price squeeze, farm debt has nearly doubled since 1974 to the unprecedented level of $119 billion outstanding at the beginning of this year.

In the last 3 years the annual ratio of increasing debt to net farm income has soared from 24.8 to 57.8 percent. In 1977 (when commodity prices were at 5-year lows and many parts of the country were suffering severe production losses due to drought), the $24.3 billion of net farm income and $59 billion in increased farm assets in the United States were watered down by a $16 billion increase in farm debt.

The Farmers Home Administration, the major Government lending institution for farmers, is simply not in a position, with its existing programs, to meet all the credit needs of the farmers today.

The FmHA has an emergency loan program for farmers affected by natural disasters, but it does not have a loan program specifically designed for economic disasters (except for the emergency livestock loan program that is made available only to livestock producers).

The Farmers Home Administration regular farm real estate and operating loan programs have been of some assistance to farmers and ranchers suffering from economic disasters. However, due to size restrictions and funding limitations, these two loan programs cannot meet the total needs of farmers and ranchers affected by the current economic disaster.

From 1953 to 1961, the Farmers Home Administration had an "economic emergency" loan program. This program, established by Public Law 83–115, enacted on July 14, 1953, authorized the Secretary of Agriculture to make economic emergency loans to farmers in areas where the Secretary found that an economic disaster had caused a need for agricultural credit that could not be met by the commercial lenders or by the Farmers Home Administration under its regular loan programs.

Clearly, there is a need for such an economic emergency program. This need is met by the new loan program established in title II of S. 2146.

In addition, the Emergency Livestock Credit Act of 1974 should be extended.

Recovery of the industry has been slow and the almost $1 billion in emergency livestock loans has kept thousands of stockmen in business during the last 4 years. While there is evidence that the livestock picture is brighter and profitability is rebounding in 1978, it will probably take a while longer before creditors will be willing to carry the industry's debt burden.

S. 2146 extends the 1974 act for an additional year.

S. 2146 also makes a number of amendments to the act to improve the Farmers Home Administration delivery of services to farmers and rural America. These amendments will be of substantial assistance to the farmers in deep economic distress today and should be adopted.

Mr. President, while it is exceedingly proper that the loan limits be raised, we must keep in mind that credit alone does not improve farm prices. Credit is needed because, as I said earlier, we had a 5-year low in farm prices. At the same time, the costs that farmers must pay, because of inflation, high-wage costs, and other factors, have soared at a most unusual rate. While we support this bill for more credit, we do so realizing that this does not alone, or in any great measure, improve the agricultural picture across the land. We hope that other steps can be taken.

The hostility of the Carter administration toward farm legislation this year was a big mistake. The way the legislation was opposed was nothing less than disgraceful. Tending to blame farmers for inflation and branding a modest bill as inflationary was morally wrong.

We have not improved our exports of farm products in the manner that we should. The administration should get back of the efforts for gasohol. Here we are, importing half of our petroleum products. We can blend at least 10 percent of alcohol in our gasoline and thus make it go that much farther, and that gasoline can be made from surplus farm products.

There are other features that have been sadly neglected. This year, however, the farmers are desperately in need of immediate income and dependable income before the year is over so that their credit position can be improved.

I can mention one telephone call I received from Nebraska, which is not uncommon. It is a small town, not even a county seat. The dealer in seed and fertilizer informed me how much money he had out on his books. He said the farmers cannot pay; he cannot extend them any more credit and he cannot secure any more seed and fertilizer to send them, because he has to pay his bills. It was on that basis that the Senate passed a legislative bill that did increase the commodity loans and just as soon as that had become law, their position would have been better with their implement dealer, their supplier of seeds and fertilizer, their bank, and all around. That was not done. In fact, it failed in the House because of the arm twisting, lobbying, and the pressure put on by the administration.

Mr. President, I am fully aware that in a strict sense, those matters are not at issue in this bill, but I do want to piont out that this bill is necessary because of the law farm prices. Also, it should be noted that, while this is a necessary extension of credit, it is not a solution to the disastrously low farm prices that have prevailed in the country.

I hope that the bill will be passed by an overwhelming vote.

I yield the floor.

The ACTING PRESIDENT pro tempore. The Senator from Alabama is recognized.

Mr. ALLEN. Mr. President, I yield myself such time as I may require.

First, I wish to commend the distinguished Senator from Nebraska (Mr. CURTIS) for his very fine and analytical statement with respect to the farm credit bill, the need for the bill, the hardships that our farmers are experiencing, and his fine support for this legislation.

Mr. President, I ask unanimous consent that the amendment of the Committee on Agriculture, Nutrition, and Forestry be agreed to and considered as the original text subject to amendment by the Senate.

The ACTING PRESIDENT pro tempore. Without objection, the committee amendment will be agreed to and considered as original text.

Mr. ALLEN. Mr. President, I ask further unanimous consent that when there has been a third reading of S 2146, the Senate proceed immediately to the consideration of H.R. 11504; that S. 2146, as amended by the Senate, be offered as a substitute to H.R. 11504; and that the Senate proceed without further debate to an immediate vote on such substitute and passage of H.R. 11504.

The ACTING PRESIDENT pro tempore. Is there objection? Without objection, it is so ordered.

Mr. ALLEN. Mr. President, I ask uanimous consent that the following people be granted the privilege of the floor during the consideration of these bills, S. 2146 and H.R. 11504, including rollcall votes on amendments and passage:

Staff members of the Committee on Agriculture, Nutrition, and Forestry: Henry Casso, Carl Rose, Jim Giltmier, Ray Bennett-White, Dale Stansbury, Phil Fraas, Stuart Hardy, Karen Schubeck, Glenn Tussey, Morgan Williams, Tom Kay of my staff; and Bill Seale, and Mary Anne Peterson of Senator HUDDLESTON's staff.

The ACTING PRESIDENT pro tempore. Is there objection? Without objection, it is so ordered.

Mr. ALLEN. Mr. President, I am pleased to rise at this time and request Senate consideration of S. 2146, a bill to amend the Consolidated Farm and Rural Development Act, provide an economic emergency loan program for farmers and ranchers, and extend the Emergency Livestock Credit Act of 1974.

This bill was unanimously reported from the Committee on Agriculture, Nutrition, and Forestry. It is the culmination of nearly 3 years of work by our committee and the House Agriculture Committee to improve the functioning of our present lending programs for farmers.

The first author of this measure was Secretary of Agriculture Bob Bergland, when he was a Member of the House.

In many respects the bill had its beginnings 5 years ago when our committee began a highly detailed evaluation of the management and operations of the Farmers Home Administration. That evaluation took hundreds of hours of staff and hearing time; the participation of the Program Analysis Division of the General Accounting Office; a program user survey designed for us by the Bureau of Standards through GAO; the full cooperation of Secretary of Agriculture Earl Butz; plus an additional financial management review of the agency by the joint financial management improvement team.

To our knowledge, this is the most comprehensive review ever made into the operations of a civilian Federal agency. The credit for this review must go to Chairman TALMADGE, who ordered it, and to Senator CLARK, chairman of the Rural Development Subcommittee, who did most of the oversight work.

This kind of program review is frankly dull and tedious. It does not engender a lot of headlines nor accrue much public credit to the members of the Senate. But to me it symbolizes a new wave of essential activity by the Senate. Our former majority leader, Mr. Mansfield, reminded us many times that our responsibility was not merely to legislate, but that it is also our job to make certain that legislation is being carried out according to the intent of Congress in a cost-effective and efficient manner and with a minimum of redtape.

The Farmers Home Administration continues to have a number of problems—most of them due to inadequate personnel. But FmHA and the committee have new understandings of our interrelationships, and a new mutual respect, based on the fact that we know one another better. The stage has been set for major improvements within the agency provided we can get White House cooperation.

The bill before us today represents what I believe to be the best legislative thinking on new legislative initiatives required to improve the operations of the agency.

COMMITTEE CONSIDERATION

The Farmers Home Administration was originally established as the Resettlement Administration in 1935. Since that time this agency has served as a primary force in agricultural lending for low-resource and low-income farmers, under the basic authority of the Consolidated Farm and Rural Development Act.

The last major revision of the act was the Rural Development Act of 1972. The 1972 act upgraded farm credit programs and introduced new credit programs in business and industrial development and community facilities.

In the years following the enactment of the Rural Development Act of 1972, the situation of our Nation's farmers changed substantially, primarily as production costs skyrocketed. It became clear by early last year that additional amendments to further update the act would be needed.

To this end, Senator BELLMON introduced S. 312 on January 18, 1977; Senator CHURCH introduced S. 2126 on September 22, 1977; and Chairman TALMADGE introduced S. 2146 (by request) on September 27, 1977.

The Subcommittee on Agricultural Credit and Rural Electrification met on October 11, 1977, to hear testimony on these bills and the changes they would make in the Farmers Home Administration loan programs.

At this hearing, it was agreed that the subcommittee would consider the three bills, S. 312, S. 2126, and S. 2146, together at subcommittee markup, but report only the administration's request bill, S. 2146, to the full committee.

The Subcommittee on Agricultural Credit and Rural Electrification met in executive session on October 25, 1977, to markup S. 312, S. 2126, and S. 2146. After adoption of several amendments, S. 2146 was ordered reported to the full committee.

On March 15, 1978, the committee met in executive session to consider S. 2146, as amended by the Subcommittee on Agricultural Credit and Rural Electrification. S. 2146 was approved, with several amendments, and ordered reported to the Senate.

NEED FOR THE BILL

Many thousands of America's farmers are facing financial crisis. They are struggling with high production costs, low commodity prices, and, for a number of farmers, crop losses due to drought or other disasters.

According to the Department of Agriculture, the index of prices paid by farmers for commodities and services, interest, taxes, wages, and other production necessities increased by 66 percent from January 1972 to January 1978.

At the same time, commodity prices received by farmers, after reaching record levels in 1973–74, steadily declined over the next 3 years to pre-1972 levels.

As a result of the combination of greatly increased costs and drastically lower prices received, average net income per farm fell from $10,610 in 1973 to $7,540 in 1977 (the net income figures are just averages; some individual farmers have actually suffered 3 consecutive years of losing operations since 1974). During this same time period, farmers and their families, like all Americans, suffered from an inflationary rise in the cost of living.

This situation should improve greatly by the end of this year. The cost-price squeeze should in time be rectified by higher prices as a better balance of supply in relation to demand is reached, and disaster-caused losses will at least partially be recouped if there is good weather.

But for many farmers, the crucial and immediate problem is how to meet debt obligations and continue in operation until those cures for the crisis can take effect. S. 2146 addresses this problem by establishing an economic emergency loan program and making a number of improvements in current loan programs.

ECONOMIC EMERGENCY LOAN PROGRAM

Due to the cost-price squeeze, farm debt has nearly doubled since 1974 to the unprecedented level of $119 billion outstanding at the beginning of this year.

In the last 3 years the annual ratio of increasing debt to net farm income has soared from 24.8 to 57.8 percent. In 1977—when commodity prices were at 5-year lows and many parts of the country were suffering severe production losses due to drought—the $24.3 billion of net farm income and $59 billion in increased farm assets in the United States were watered down by a $16 billion increase in farm debt.

Furthermore, the increase in assets, which in many cases is the only thing keeping many farmers from liquidation, has been due to a large extent only to continued inflation in the value of land. Iowa farmland values, for example, increased on the order of 35 percent between February 1976 and February 1977.

The total increase in farm debt in 1977 has not all been new debt. Farmers are not repaying at the same rate as they have in the past. Federal Reserve statistics show that in January of 1976, less than a third of the banks of the Federal Reserve District 9 in Minneapolis reported slower rates of farm loan repayment. But in October of 1977, almost three-fourths of the banks in that reserve district reported a slower rate of

farm loan repayments. In January of 1976, less than 40 percent of the banks in the district reported an increase in demand for farm loan renewals. By October 1977, that figure had increased to almost two-thirds.

For many farmers, current debt load is becoming unmanageable. The Department of Agriculture has released data that shows that, as of April 1977, 13,900 farmers in the nine Great Plains States were found to have no possibility of meeting their financial obligations in 1977 and 59,300 farmers and ranchers required refinancing or disposal of some of their assets in order for them to continue in business.

It has become clear that many farmers will need special credit assistance in 1978—to ease the pressures of unmanageable payments due on existing debt, and provide themselves with working capital so that they can earn their way back to solvency.

Yet, as America's farmers seek credit assistance to survive this economic emergency and continue in operation, private and public lending organizations are reaching the limits of their capacities.

Many commercial lenders are loaned up to their limits and are reluctant to overextend since new loans to farmers who are overloaded by present obligations and still operating at little or no profit are hardly good risks.

The Farmers Home Administration, the major governmental lending institution for farmers, is simply not in a position, with its existing programs, to meet all the credit needs of the farmers today.

The Farmers Home Administration has an emergency loan program for farmers affected by natural disasters, but it does not have a loan program specifically designed for economic disasters (except for the emergency livestock loan program that is made available only to livestock producers).

Farmers Home Administration regular farm real estate and operating loan programs have been of some assistance to farmers and ranchers suffering from economic disasters. However, due to size restrictions and funding limitations, these two loan programs cannot meet the total needs of farmers and ranchers affected by the current economic disaster.

From 1953 until 1961, the Farmers Home Administration had an "economic emergency" loan program. This program, established by Public Law 83–115, enacted on July 14, 1953, authorized the Secretary of Agriculture to make economic emergency loans to farmers in areas where the Secretary found that an economic disaster had caused a need for agricultural credit that could not be met by the commercial lenders or by the FmHA under its regular loan programs.

Clearly, there is a need for such an economic emergency program. This need is met by the new loan program established in title II of S. 2146.

EMERGENCY LIVESTOCK CREDIT ACT OF 1974

In addition, the Emergency Livestock Credit Act of 1974 should be extended.

The 1974 act was adopted in a period of high feed grain prices and low cattle prices due to an oversupply of cattle on feed—in other words, a similar period of economic emergency, but one only involving livestock producers. The objective of the 1974 act was to make more credit available in the form of loans guaranteed by the FmHA to bona fide farmers and ranchers primarily and directly engaged in agricultural production who had substantial livestock operations, so that they could continue their normal operations during the temporarily adverse economic period.

Recovery of the industry has been slow and the almost $1 billion in emergency livestock loans has kept thousands of stockmen in business during the last 4 years. While there is evidence that the livestock picture is brighter and profitability is rebounding in 1978, it will probably take a while longer before creditors will be willing to carry the industry's debt burden.

S. 2146 extends the 1974 act for an additional year.

AMENDMENT TO THE CONSOLIDATED FARM AND RURAL DEVELOPMENT ACT

The Farmers Home Administration has, since 1935, served as a primary force in agricultural lending for low-resource and low-income farmers in the United States. Over the years, the FmHA has been given additional responsibilities for providing financial assistance in three major areas: First, farm operations; Second, rural housing; and Third, the construction and operation of rural community facilities.

The basic legislative authority for the FmHA programs is the Consolidated Farm and Rural Development Act.

S. 2146 makes a number of amendments to the act to improve FmHA's delivery of services to farmers and rural America. These amendments will be of substantial assistance to the farmers in deep economic distress today and should be adopted.

ELIGIBILITY EXTENDED

S. 2146 proposes to extend eligibility for farm real estate and operating loans under the act to family farm corporations and partnerships, ending the present limitation on eligibility for such loans to individual farmers and ranchers.

This extension of eligibility will bring the act more in line with the current trend of creating farm partnerships and farm corporations to own or operate family farms and ranches. Frequently, a husband and wife, a father and son, or other members of a family form a partnership or family corporation so that their children, who want to continue the operation, will inherit stock rights, and the costs of probate proceedings will be reduced. Such an arrangement also permits continuation of the farming operation with minimum disruption in the event of the death of a family member.

The extension of eligibility will enable the FmHA to help more individuals who rely on farm income for a living. In the 1974 Census of Agriculture, showing 1,695,047 farms in the United States with gross sales above $2,500 a year, 144,969 were partnerships and 28,656 were corporate farms. Thirty-six percent of the partnerships and 55 percent of the corporate farms had gross sales under $40,000.

LOAN LIMITS RAISED

S. 2146 will increase the loan limits on farm real estate loans under the act from $100,000 to $200,000 for direct and insured loans and $300,000 for guaranteed loans, and cofarm operating loans under the act from $50,000 to $100,000 on direct or insured loans and $200,000 on guaranteed loans.

The existing limits are inadequate in many States. According to the U.S. Department of Agriculture, the national average per acre value of farm real estate, including land and buildings, rose between March 1971 and November 1977 from $204 to $474 per acre. During that same period in Iowa, for example, per acre values increased from $392 to $1,250; in Georgia, from $255 to $522; in Tennessee, from $277 to $571; in North Dakota, from $95 to $266; in Oklahoma, from $182 to $379. The national average value per farm rose from $79,600 in March 1971 to $191,300 in February 1977. Current projections indicate that average value now exceeds $200,000. Farm real estate transfers specifically for agriculture in 1976 involved an average of 303 acres per farm at a price of $520 per acre, for a total value of $157,560. In 1977, farms sold for use only in agriculture averaged 314 acres at $645 per acre, for a total average value of $202,530.

Operating costs and the demand for short- and intermediate-term credit have escalated along with land costs. As noted previously, the index of prices paid by farmers for production items increased by 66 percent from January 1972 to January 1978.

In addition to the increase in the overall index of costs to farmers, there is a continuing increase in the size of operations, requiring more total dollars for all production items. The number of farms with gross farm income between $40,000 and $100,000 increased by 67 percent from 1972 to 1976.

The average size of operating loans made by the Farmers Home Administration has increased by 170 percent between 1970 and early 1978.

INTEREST RATES CHANGED

S. 2146 makes substantial revisions in the interest rates for the programs under the act. Low interest rates are retained as needed to provide credit on reasonable terms to those in greatest need, and the interest rates are increased in other instances to encourage expansion of the program.

Interest rates for guaranteed loans: The existing 5 percent interest rate for guaranteed real estate loans requires Government subsidization of the loans due to the higher interest rates prevailing in the commercial market. Under S. 2146, all guaranteed loans under the act will bear interest at a rate agreed to by the borrower and lender. This will result in reduced Government subsidies and make the program more attractive to commercial lenders.

Interest rates on insured real estate loans: S. 2146 provides that the interest rate on such loans cannot exceed 5 percent—as under existing law.

Most FmHA real estate loan applicants are young farmers who for the first time are able to buy land, or farmers with limited resources and low income. (The 1974 Census of Agriculture shows that nearly 200,000 farmers have gross farm sales of less than $20,000 and off-farm income of less than $5,000.)

A 5-percent—or lower—interest rate on insured farm ownership loans will enable many of these truly low-resource and low-income farmers to become more soundly established in agriculture.

Further, many established small farmers who have suffered severe economic reversals over the last few years will greatly benefit from such low-cost credit.

Interest rates on insured community facility loans: The interest rate on these loans (including loans for rural water and waste disposal systems) will remain, as under current law, at not in excess of 5 percent.

To increase the interest rate on these loans at this time would be a regressive move. High interest rates will result in the FmHA abandoning the smallest, neediest rural communities and becoming instead banker for the wealthier towns that can afford the rates.

In addition, market based interest rates for these loans would raise the price rural consumers must pay for waste disposal and water at a time when rural utility rates are already two to three times those of urban consumers.

In many cases, the small, needy towns with low-income populations already have trouble repaying loans with 5 percent interest rates. An increase in the interest rate on loans would probably force these towns to seek direct grants, rather than loans. If the program shifted heavily away from loans to grants, the rural water and waste disposal program could end up costing the Government more than it does now with subsidized 5-percent interest rates.

Interest rates for other programs under subtitle A of the act: S. 2146 increases the interest rate on all loans under subtitle A of the act—other than those noted above and business and industrial loans (which keep the market-based interest rates of existing law)—from 5 percent to the cost of money to the Government plus a charge of up to 1 percent set by the Secretary. The elimination of the subsidized interest rate on the programs for which there is no special need should result in Congress assigning higher levels of lending for these programs. This was the experience with the FmHA operating loans when the interest subsidy was eliminated.

Interest rates on insured operation loans: The interest rate is changed from a rate equal to the cost of money to the Government plus up to 1 percent added on by the Secretary of Agriculture to a rate not in excess of the cost of money to the Government plus up to 1 percent added on by the Secretary. This change will enable the FmHA to lower interest rates for farm operating loans whenever farmers need such credit assistance due to economic or other emergencies.

Interest rates for insured emergency loans: S. 2146 establishes a two-tiered interest rate for insured emergency loans under the act to cover actual losses caused by natural disasters—3 percent for farmers who meet the "test for credit elsewhere," and cost of money to the Government plus up to 1 percent added on by the Secretary of Agriculture for those who can obtain credit elsewhere.

During the severe 1977 drought, it became evident that many hard-hit farmers were unable to obtain credit under the FmHA emergency loan program because of the "test for credit elsewhere" requirement. At the same time the Small Business Administration, following recent changes in the Small Business Act, opened up its disaster loan program to all farmers without imposing a "test for credit elsewhere." Charges followed that the FmHA, as compared to the SBA, treated farmers as "second class citizens."

The two-tiered interest rate will solve this problem. The FmHA loan program will be open to all farmers injured by disaster, not just those who meet the "test for credit elsewhere," but only really needy farmers—who can meet the test—will be eligible for the beneficial 3-percent interest rate.

CREDIT AVAILABILITY EXPANDED

The FmHA is currently able to make about one farm real estate loan for every three applications that are filed. Witnesses who testified at hearings on S. 2146 repeatedly noted the need to increase the availability of farm credit, especially to the young and limited-resource farmers who make up the bulk of FmHA borrowers and who are suffering the most from the current crisis in the farm economy.

Inceasing the loan limits and expanding eligibility for loans to include family-farm corporations and partnerships means that more farmers will be eligible for large loans.

Also, inceasing the interest rates on loans for several FmHA programs to the cost of money to the Government will likely encourage Congress to raise the overall ceilings for these programs. Increasing the interest rate on all guaranteed loans under the act to the rate agreed to by borrower and lender should likewise encourage private lenders to make more use of the FmHA guaranteed loan programs.

S. 2146 also contains several other provisions that will serve to expand the availability of credit, as follows:

First. Elimination of the "graduation" requirement from FmHA's guaranteed loan program in the event the borrower becomes able to obtain a loan from other sources;

Second. Authority for the Secretary of Agriculture to purchase the guaranteed portion of loans guaranteed under the act, as necessary to assure an adequate secondary market for such loans.

Third. Authority for other Federal departments and agencies to participate with the FmHA in its programs of financial and technical assistance under the act;

Fourth. Authority for guaranteed lenders under the Emergency Livestock Credit Act of 1974 to continue to make advances on line-of-credit loans throughout that part of the loan period falling after the cutoff date—September 30, 1979—for the making of new loan guarantees under that act; and

Fifth. Authority for consolidation and rescheduling of operating loans over a period of up to 7 years in addition to the original loan period.

Graduation from FmHA credit: S. 2146 will exempt borrowers of guaranteed loans under the act from the requirement that they refinance their debt if they become able to obtain credit from other sources at reasonable rates and terms. The act's longstanding requirement that borrowers agree to "graduate" from FmHA assistance when possible was based on the principle that direct or insured Government loans should not be furnished to borrowers whose financial situation enables them to use credit available from the private sector. Inasmuch as guaranteed loans are made by the private sector, this argument becomes less persuasive. Further, the continued insertion of a graduation requirement into guaranteed loan agreements has proved to restrict lender interest in making FmHA guaranteed loans, or acquiring them on the secondary market. Lenders foresee the possibility of a loan being terminated under a graduation edict from the agency. Elimination of this requirement from guaranteed loan contracts is an important prerequisite for winning wider use by the private sector of FmHA farm loan guarantees.

FmHA purchase of guaranteed loans: The Secretary of Agriculture will be given authority to purchase the guaranteed portions of loans guaranteed under the act, as necessary to assure an adequate secondary market for such loans.

One of the principal impediments to private lenders' full acceptance of the opportunity to serve rural borrowers under Federal guaranteed loan programs is the absence of assurance that a secondary market for loans will be available.

The FmHA has developed procedures for transferring loans to the secondary market that are generally acceptable to commercial institutions. Lacking, however, is assurance that a secondary market would be available in event of tight money in the private market.

S. 2146 will permit the Secretary, through the agricultural insurance fund and the rural development insurance fund, to purchase FmHA-guaranteed notes from lenders who are unable to find private buyers for the note. This will give added assurance to lenders cooperating in the FmHA program that they may redeem their loan commitments when necessary through secondary marketing. It will offer protection to smaller lenders, such as country banks, against being caught in a liquidity squeeze through inability to market FmHA guaranteed loans.

The proposed change in the law will not authorize the payment of market premiums, over and above the amounts of unpaid principal and accrued interest, and will not place the Government in competition with the private sector in the secondary marketing of notes.

Participation by other agencies in FmHA programs: This provision of S.

2146 will authorize other Federal departments and agencies to participate with the FmHA in its program of financial and technical assistance under the act.

This provision will provide authority now lacking under law for the Heritage Conservation and Recreation Service to join with the FmHA in financing community recreation projects, and will resolve any similar questions that may arise as to the ability of other agencies, whose funding authorities might complement FmHA programs, to participate in those programs.

Line of credit under the Emergency Livestock Credit Act of 1974: S. 2146 will expand credit to livestock producers under the 1974 act by permitting borrowers to make new drawdowns under lines of credit guaranteed by the Secretary of Agriculture under the 1974 act after September 30, 1979 (the date after which no new loan guarantees under the 1974 act can otherwise be made).

LOANS FOR POWER TRANSMISSION FACILITIES

S. 2146 will add a new program to the act authorizing the Secretary of Agriculture to make or insure or guarantee loans—of up to $1 million—to rural communities that are cut off from access to electric energy sources, for the construction, acquisition, and operation of power transmission facilities.

This provision addresses a problem faced by rural communities throughout the Nation that have had or will have their electric power supply reduced substantially as their suppliers convert from supplying "firm" power to "peaking" power.

The rural communities involved are those supplied by the several electric power marketing administrations of the Department of the Interior, including the Southwestern Power Administration (which serves Oklahoma, Arkansas, Missouri, Texas, and Louisiana), the Southeastern Power Administration (which serves Alabama, Florida, Georgia, North Carolina, and South Carolina), the Bonneville Power Administration (which services 36 communities in Washington, Oregon, Idaho, and Montana), the Bureau of Reclamation (which serves 220 communities in Arizona, California, Colorado, Iowa, Minnesota, Nebraska, Nevada, New Mexico, North Dakota South Dakota, Utah, and Wyoming), and the Alaska Power Administration.

The communities facing a cutoff of power must construct or acquire transmission facilities that will connect them to other sources of firm power.

However, some of these small rural communities would find it difficult to obtain financing for such construction or acqusition without the help provided in the bill. Many are already at the limit of their borrowing capacity with private credit sources, or have exhausted their ability to levy additional taxes or submit new bond issues.

WATER AND WASTE DISPOSAL GRANT

S. 2146 will increase the amount available annually for rural water and waste disposal grants under the act from $300 million to $1 billion, and increase the maximum allowable Federal share on such water and waste disposal projects from 50 to 75 percent.

The act authorizes the award of grants for rural water and waste disposal projects because many small rural communities cannot otherwise afford the facilities they need. The average income of their citizens may be too low for them to be able to assess sufficient taxes to repay loans. Also, in many instances, the expense of projects is driven up beyond a community's borrowing capacity by Federal rules requiring very expensive facilities.

Notwithstanding the grants and loans made under this program over the past several decades, thousands of small rural communities are still without adequate water and sewage disposal systems. As of October 1, 1977, the money amount of the backlog of applications for grants equaled $395 million.

Increasing the Federal share on grants from 50 to 75 percent will aid the Nation's neediest rural communities that cannot afford to put up a 50-percent share of the project. The change to 75 percent sharing will bring this program in line with similar Federal programs for urban communities.

ACIF DEBT LIMIT

S. 2146 will repeal the $500 million ceiling on the amount of loans that may be outstanding against the agricultural credit insurance fund at any one time.

The $500 million limit on the agricultural credit insurance fund, which funds loans made under the FmHA farmer programs, carries over from FmHA legislation of the distant past. No limit is imposed on loan revolving funds established more recently—the rural housing insurance fund, and the rural development insurance fund for FmHA community facility and business-industrial loans.

The FmHA is now obliged to sell certificates of beneficial ownership (representing blocks of insured loan notes) when agricultural credit insurance fund holdings approach the $500 million level in order to permit continued farm loan activity. With nonemergency farm loan programs now at a level of more than $1.4 billion a year, the $500 million ceiling necessitates replenishment of the agricultural credit insurance fund at frequent intervals during the year. This restricts the Government's leeway for marketing securities under the most favorable market conditions.

In the event of increased volume of lending and expanded program operations resulting from enactment of the other provisions of S. 2146, management of the agricultural credit insurance fund would be still more complicated by the obligation to maintain a $500 million ceiling on loans held in this fund. For the best management of the fiscal aspects of FmHA farm programs, the ceiling should be removed and the agricultural credit insurance fund operated on the same basis as the other funds.

BUSINESS AND INDUSTRIAL LOANS

S. 2146 will exempt small businesses from the requirements of current law that business and industrial loans and grants under the act may not be made if the project being financed would cause a shift in employment or business activity from one area to another or cause overproduction. The exemption is to apply if the loan or grant involved does not exceed $1 million, or if employment will not be increased by more than 50 employees.

This provision of S. 2146 will eliminate redtape that slows down the processing of applications and results in costly and needless delay.

Experience based on the processing of some 2,500 loan guarantees since the inception of the program shows that the referral of smaller rural projects to the Department of Labor for clearance on the shift of employment or production and overproduction issues is an unnecessary procedure and a source of needless delay in providing decisions to loan applicants. Almost all loans that are made to smaller rural enterprises pose no threat to the industry or labor forces of other areas, nor to other established businesses in their local areas. The existing procedure has resulted in an overload of work for Department of Labor staff and has handicapped its review of large-scale proposals that entail valid questions of relocation, labor impact, or market impact.

EXTENSION OF THE APPLICABILITY OF THE CONSOLIDATED FARM AND RURAL DEVELOPMENT ACT

S. 2146 will extend the applicability of the act to the territories and possessions of the United States, including the Trust Territory of the Pacific Islands.

Extension of services provided under the act has been too long delayed for American citizens on Guam, American Samoa, and other Pacific Island Territories of the United States, and for people of United Nations Trust Territory Islands who live under American administration.

Because of the cost and communication problems in delivering services to these areas, they were excluded from original authorizations of the act, which were applied only to the States, District of Columbia, the Commonwealth of Puerto Rico, and the Virgin Islands of the United States.

However, rural housing authorities administered by the FmHA under the Housing Act were extended to the other Pacific areas 4 years ago, and the agency has organized facilities to make housing loans in the islands beyond Hawaii. The Secretary of Agriculture has announced that a separate State office will be established this summer in Hawaii to direct FmHA operations in that State and in other Pacific Islands territories.

The FmHA is now prepared to provide not only housing credit, but also farm, community facility, and business development assistance in all rural areas that are under the American flag. Many farmers and communities of the Pacific Islands have the same need for these services as in areas now being served. The time has come to amend the act and extend its authorizations accordingly.

Mr. President, as I pointed out earlier, this is not rashly considered legislation. The bill began as a program evaluation project by the committee 5 years ago. The legislation is badly needed and I commend it to the Senate recommending that it be adopted.

Mr. President, I ask unanimous consent that a summary of the major provisions of the bill be printed in the RECORD at this point.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

SUMMARY OF MAJOR PROVISIONS

Amendments to the Consolidated Farm and Rural Development Act

Title I of the bill would—

(1) Extend eligibility for farm real estate and operating loans under the Consolidated Farm and Rural Development Act ("the act") to family farm corporations and partnerships (loans may now be made only to individual farmers and ranchers);

(2) Increase the lending limits for farm real estate and operating loans under the act (from $100,000 in the case of farm real estate loans to $200,000 for loans insured by the Secretary of Agriculture, and to $300,000 for loans guaranteed by the Secretary; and from $50,000 in the case of operating loans to $1,000,000 for loans insured by the Secretary, and to $200,000 for loans guaranteed by the Secretary);

(3) Authorize the Secretary of Agriculture to make or insure or guarantee loans—of up to $1 million—to rural communities that are cut off from access to electric energy sources, for the construction, acquisition, and operation of power transmission facilities;

(4) Increase the amount available annually for water and waste disposal project grants under the act from $300 million to $1 billion and increase the maximum allowable Federal share on such water and waste disposal projects from 50 percent to 75 percent;

(5) Establish interest rates for loans under the act as follows:

(a) *Guaranteed loans.*—The rate agreed on by the borrower and lender.

(b) *Farm real estate loans.*—Not in excess of 5 percent (as under current law),

(c) *Community facility (including water and waste disposal) loans.*—Not in excess of 5 percent (as under current law),

(d) *Business and industrial loans under section 304(b) and 310B of the act.*—Not less than the cost of money to the Government adjusted to provide a rate comparable to the private market rate for similar loans, plus a service charge set by the Secretary (as under current law),

(e) *All other loans under subtitle A of the act.*—The cost of money to the Government plus a charge of up to 1 percent added on by the Secretary.

(f) *Farm operating loans.*—Not in excess of the cost of money to the Government plus a charge up to 1 percent added on by the Secretary.

(g) *Emergency loans (actual loss).*—Under a two-tiered system, borrowers who meet the "test for credit" would receive an interest rate not in excess of 3 percent, and for other borrowers the rate would be not in excess of the cost of money to the Government plus a charge of up to 1 percent added on by the Secretary, and

(h) *Emergency loans (portion of loan in excess of actual loss).*—The rate prevailing in the private market for similar loans (as under current law);

(6) Repeal the $500 million loan ceiling for the Agricultural Credit Insurance Fund;

(7) Authorize the Secretary to purchase the guaranteed portion of loans guaranteed under the act, as necessary to assure an adequate secondary market for such loans;

(8) Exempt small businesses from the requirements of existing law that business and industrial loans and grants under the act may not be made if the project being financed would cause a shift in employment or business activity from one area to another or cause overproduction, with the exemption applying if the financial assistance involved did not exceed $1 million or employment was not increased by more than 50 employees;

(9) Authorize the Secretary to consolidate or reschedule farm operating loans for payment over a period of up to 7 years from the date of consolidation or rescheduling;

(10) Authorize the Secretary to continue operations under the act with respect to property securing a loan in an area that has changed from rural to urban;

(11) Authorize the Secretary to issue letters of intent to make loans so that loan applicants can obtain temporary non-Federal financing pending the completion of loan processing.

(12) Authorize the Secretary to provide procedures for the appeal, review, and possible reversal or modification of determinations made by county committees under the act;

(13) Exempt borrowers of guaranteed loans under the act from the requirement that they refinance their debt if they become able to obtain credit from other sources at reasonable rates and terms;

(14) Require that appropriations acts setting budget levels for programs authorized by the act state two amounts for each program—one amount for insured loans and a separate amount for guaranteed loans;

(15) Authorize other Federal departments and agencies to participate with the Farmers Home Administration in its programs of financial and technical assistance under the act; and

(16) Extend the applicability of the act to the territories and possessions of the United States, including the Trust Territory of the Pacific Islands.

EMERGENCY AGRICULTURAL CREDIT ADJUSTMENT ACT OF 1978

Title II of the bill would authorize the Secretary of Agriculture to insure or guarantee loans to individuals, and domestic corporations and partnerships, directly and primarily engaged in agricultural production, if the loan applicant—

(1) has adequate experience and resources.

(2) needs such credit to maintain a viable agricultural production operation, and

(3) is unable to obtain sufficient credit at reasonable rates and terms from normal credit sources due to national or areawide economic stress, such as a general tightening of agricultural credit or low prices received for agricultural commodities.

Use of loan proceeds.—The proceeds of these loans could be used for refinancing outstanding indebtedness, reorganization of the farming and ranching operation, acquisition of land in order to maintain the normal level of operation, loan closing costs, and operating expenses or other essential farm and home needs.

Interest rates.—The interest rate for insured loans would be the cost of money to the Government plus a charge of up to 1 percent added on by the Secretary. The interest rate for guaranteed loans would be the rate agreed on by the borrower and lender.

Guaranteed loan limit.—The Secretary could guarantee up to 90 percent of a loan under title II.

Fees or charges.—The Secretary could not assess fees or charges for any loans insured or guaranteed under title II.

Repayment period.—These loans would be payable within the same time period prescribed for loans for similar purposes under the Consolidated Farm and Rural Development Act, except that the repayment period for operating loans could extend to 20 years if justified.

Loan limit.—Loans would be limited to $500,000 per borrower.

Conditions.—Applicants must be unable to obtain credit in the absence of assistance under this title, and borrowers would be required to refinance their debt ("graduate") if they become able to obtain credit from other sources at reasonable rates and terms.

Security.—The borrower would be required to secure the loan with such available collateral that, together with the confidence of the Secretary, and (for guaranteed loans) the lender, in the borrower's repayment ability, is deemed adequate by the Secretary to protect the Government's interests.

Funding.—The Secretary would use the Agricultural Credit Insurance Fund to operate this loan program. The fund would be reimbursed by appropriations annually for program expenses. There would be a $4 billion ceiling on the amount of loans outstanding at any time.

Effective period.—The Secretary could insure or guarantee loans under this title from the date of enactment of the bill through May 15, 1980.

Extension and Amendment of the Emergency Livestock Credit Act of 1974

Title III of the bill would—

(1) Extend the authority of the Secretary of Agriculture to make new loan guarantees for the 1974 act for 1 year to September 30, 1979; and

(2) Permit guaranteed lenders under the 1974 act to continue to make advances on line-of-credit loans during that part of the loan period falling after the cutoff date for the making of new loan guarantees (which would be September 30, 1979).

COMMITTEE AMENDMENTS

The committee amendment to the text of S. 2146 strikes all after the enacting clause and inserts a substitute text. The committee also amended the title of the bill.

BACKGROUND AND NEED

Many thousands of America's farmers are facing financial crisis. They are struggling with high production costs, low commodity prices, and, for a number of farmers, crop losses due to drought or other disasters.

According to the Department of Agriculture, the index of prices paid by farmers for commodities and services, interest, taxes, wages, and other production necessities increased by 66 percent.

PURPOSE OF THE LEGISLATION

Mr. ALLEN. Mr. President, S. 2146, as amended by the Committee on Agriculture, Nutrition, and Forestry extends, expands, consolidates and makes a number of other improvements in the Federal credit assistance programs for farmers, ranchers, rural communities and businesses.

Principal features of title I of the bill would—

First, expand the eligibility for farm real estate and operating loans under the Consolidated Farm and Rural Development Act to include family farm corporations and partnerships;

Second, increase the lending limits for farm real estate and operating loans under the Consolidated Farm and Rural Development Act (from $50,000 in the case of operating loans to $100,000 for loans insured by the Secretary, and to $200,000 for loans guaranteed by the Secretary; and from $100,000 in the case of farm real estate loans to $200,000 for loans insured by the Secretary, and to $300,000 for loans guaranteed by the Secretary);

Third, authorize the Secretary of Agriculture to make or insure or guarantee loans—of up to $1 million—to rural communities that are cut off from access to electric energy sources for the construction, acquisition, and operation of power transmission facilities—I do not believe there are many instances of this type of loan. We know of only one such instance

where the loan will be applied for. Perhaps there are others, and this would authorize such loans:

Fourth, increase the amount available annually for water and waste disposal project grants under the act from $300 million to $1 billion and increase the maximum allowable Federal share on such water and waste disposal projects from 50 percent to 75 percent.

Fifth, make a number of changes in the interest rates for loans made under the act;

Sixth, repeal the $500 million loan ceiling for the Agricultural Credit Insurance Fund; and

Seventh, authorize the Secretary to purchase the guaranteed portion of loans guaranteed under the act, as necessary to assure an adequate secondary market for such loans.

Principal features of title II of the bill would—

First, authorize the Secretary of Agriculture to insure or guarantee emergency agricultural loans to individuals, and domestic corporations and partnerships, directly and primarily engaged in agricultural production;

Second, permit the proceeds of these loans to be used for refinancing outstanding indebtedness, reorganization of the farming and ranching operation, acquisition of land in order to maintain the normal level of operation, loan closing costs, and operating expenses or other essential farm and home needs; and

Third, limit loans to $500,000 per borrower with a credit-elsewhere provision.

Principal features of title III of the bill would—

First, extend the authority of the Secretary of Agriculture to make new loan guarantees under the Emergency Livestock Credit Act of 1974 for 1 year to September 30, 1979; it would extend that program for an additional 1 year; and

Second, permit guaranteed lenders under the 1974 act to continue to make advances on line-of-credit loans during that part of the loan period falling after the cutoff date for the making of new loan guarantees, which would be September 30, 1979.

BUDGET IMPACT

Based on a cost estimate prepared by the Congressional Budget Office the Committee on Agriculture, Nutrition, and Forestry estimated the cost of carrying out the provisions of the bill.

Mr. President, I ask unanimous consent that this table be printed in the RECORD at this point.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

OUTLAYS

[In millions of dollars]

	Fiscal year—				
	1978	1979	1980	1981	1982
Title I	1	56	209	427	549
Title II	22	3	−18	3	3
Title III			1	1	1
Total	23	59	192	431	553

Mr. ALLEN. Mr. President, there are a number of amendments, some three or four, that we have knowledge of that will be offered to the bill, but I see none of the Senators on the floor who have these amendments. So I ask unanimous consent, Mr. President, that I be allowed to suggest the absence of a quorum with the time to be charged equally to both sides.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The clerk will call the roll.

The assistant legislative Clerk proceeded to call the roll.

Mr. BELLMON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. BELLMON addressed the Chair.

The ACTING PRESIDENT pro tempore. Who yields time?

Mr. CURTIS. Mr. President, I yield such time as the distinguished Senator from Oklahoma chooses to use on the bill.

The ACTING PRESIDENT pro tempore. The Senator from Oklahoma is recognized.

Mr. BELLMON. Mr. President, I rise in support of S. 2146. I know how serious the problem of American agriculture is, and while this legislation will not solve it, it should be a major help to farmers who are strapped for credit.

In January 1977, which is more than a year ago, I introduced S. 312, a bill that was nearly identical to S. 2146. These amendments to the FmHA program were offered to update the current program to a more realistic level. These programs have served American agriculture well at minimal final costs to the U.S. Treasury. The loan limits are outdated because of the rapid increase in the cost of land and farm operating expenses. The need for providing a more current credit program for our Nation's farmers is precisely why I introduced S. 312 and am strongly in support of S. 2146.

The family farmers of this country have made our Nation's agriculture the most efficient and productive in the world. The result is that U.S. consumers are the best fed in the world at the lowest cost. The young farmer and small farmer are precisely the persons FmHA is designed to help. FmHA credit is essential when farmers are caught in the economic wringer as they have been over the last 3 years. The problem is, however, that limits on this badly needed line of credit for our Nation's farmers has failed to grow with the realities of today's agriculture. Our country must keep a strong and viable agriculture. To do so, we must provide necessary lines of credit to farmers that realistically reflect the costs of farming. This is especially true with young farmers or those who cannot get credit elsewhere.

This bill increases farm ownership loan limits from $100,000 to $200,000. The current level of $100,000 was established in 1970. Since that time the price of agricultural land has risen 213 percent according to ERS. As is easily seen, the levels which S. 2146 establishes may already be outdated. Yet, these new levels will provide necessary credit to many family farmers to enable them to get through these trying times.

Operating loan limits are raised from $50,000 to $100,000 by S. 2146. The index of prices paid by farmers has increased more than 160 percent since the $50,000 limit was established. This limit on operating loans must be raised in order to assure producers their existence and consumers a dependable supply of food.

When our Nation's agriculture is healthy, our entire economy benefits. When the agricultural economy slows, so does the rest of our economy. Without needed lines of credit during times of distress, our Nation's food producers cannot survive. By expanding loan limits to more realistic levels, producers and consumers alike will benefit.

Exports of agricultural products account for 20 percent of our total exports from this country. This is a highly significant amount especially during present times. Raising these loan limits will help our farmers compete for these essential world markets.

Historically, FmHA has had an envious loan repayment record. This is one Government loan program with a default rate that would make most banks envious. Much of this good history is due to the method by which FmHA works with borrowers to aid producers in planning their operation so they can meet their obligations. FmHA provides needed management and counseling to borrowers so that mistakes are avoided and sound decisions are made. The result has been minimal losses to the Government and a highly efficient productive U.S. agriculture.

Last year I sent an agricultural credit task force to Oklahoma to talk to producers and bankers to find out what would be the best method to help farmers weather the present cost-price squeeze. Many opinions were expressed with one major theme and that is that the Government, through the Farmers Home Administration, needed to supply the credit that commercial sources were hesitant to supply in these difficult times. Otherwise many young farmers, it was said, would be forced out of business and would not be able to return to farming.

It is primarily to help these younger farmers, these family farmers, through these difficult times that I urge the Senate to favorably consider the measure before us, S. 2146, as a necessary step to provide assistance to producers. In doing so we will also benefit consumers by helping assure an abundant supply of food for the future at reasonable prices.

The PRESIDING OFFICER (Mr. BUMPERS). Who yields time?

Mr. ALLEN. In the absence of Senators who have amendments to offer, I ask unanimous consent that there be a quorum call at this time and that time be charged equally to both sides.

The PRESIDING OFFICER. Is there objection?

Mr. CURTIS. Reserving the right to object, Mr. President, I wonder since we are using up all of our time under the bill by rollcalls if it is necessary that we continue here or whether we should take a recess until somebody is around who

wants to legislate? But I shall not object. I shall follow the lead of my distinguished friend.

Mr. ALLEN. One Senator will be in shortly, so if the Senator has no objection, I suggest the absence of a quorum and I ask unanimous consent that it be charged to both sides.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. BELLMON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 1249

Mr. BELLMON. Mr. President, I have an amendment at the desk. I ask that it be reported.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Oklahoma (Mr. BELLMON) proposes an unprinted amendment numbered 1249.

Mr. BELLMON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 14 after line 4, insert the following:

"ELIMINATION OF REQUIREMENT FOR BOND COUNSEL FOR CERTAIN WATER AND WASTE DISPOSAL FACILITY LOANS

"SEC. 104A. Section 306(a)(1) of the Consolidated Farm and Rural Development Act is amended by adding at the end thereof the following: 'With respect to loans of less than $500,000 made or insured under this paragraph (1) that are evidenced by notes and mortgages, as distinguished from bond issues, borrowers shall not be required to appoint bond counsel to review the legal validity of the loan whenever the Farmers Home Administration has available general counsel to perform such review'.".

Mr. BELLMON. Mr. President, if I may have the attention of the Senator from Alabama and the Senator from Nebraska, I would like to try to explain the amendment.

What this amendment does is attempt to relieve some of the economic pressure many small communities face while trying to develop better facilities for their citizens.

Currently, when a small community obtains community facility or water and waste loans they are required to obtain bond counsel's opinion if the loan is for more than $50,000. The rationale for this regulation is to allow Farmer's Home to resell the instrument to a secondary market. The fact of the matter is, however, that few, if any, of these instruments are ever sold on a secondary market. Therefore, this expense to these small communities, which may run as high as 2 percent of construction costs, is unnecessary.

I do not intend for the requirement to be lifted for actual bonds. My amendment is applicable only to loans secured by notes and mortgages and of an amount of $500,0000 or less. Further, the amendment is applicable only to those States which have general counsel for FmHA located in their State offices.

Mr. CURTIS. Mr. President, will the distinguished Senator yield?

Mr. BELLMON. I am very happy to yield.

Mr. CURTIS. As I understand it, the Senator's amendment provides for situations where the indebtedness is evidenced by notes and mortgages, as distinguished from a bond issue?

Mr. BELLMON. That is correct.

Mr. CURTIS. The Senator is not referring to situations where, to comply with local and State law, they are making a bond issue, and it is the ordinary and accepted situation?

Mr. BELLMON. That is correct.

Mr. CURTIS. The intent of the amendment is that so far as the Federal Government is concerned, they are not required to obtain bond counsel, but if they have some local situation or related problem, if they so choose, it does not interfere with that at all?

Mr. BELLMON. It does not prohibit it at all.

Mr. CURTIS. But it merely removes the requirement of the Federal Government that they have to have a bond counsel?

Mr. BELLMON. That is correct.

Mr. CURTIS. I think the amendment is all right.

Mr. BELLMON. Attorneys who draw up these proposals, such as a rural water district, are generally quite capable and knowledgeable of their subject. If a State also has general counsel located in their offices, there is no need to get a third opinion as to the validity of the loan.

Therefore, Mr. President, this limited amendment will allow communities to save some costs of supplying their citizens needed services. This will enhance the rural development of these small communities. Therefore, I urge favorable consideration of this measure.

Mr. ALLEN. Mr. President, I yield myself 2 minutes.

This amendment has been submitted to the Administration, the Farmers Home Administration, and they report that they are willing to accept the amendment.

It does seem that there would be additional unnecessary costs to the borrower to impose the condition that bond counsel approved of a loan which is secured by a note and mortgage, as distinguished from a bond issue; and the Government would be protected in that the amendment is applicable only in the event that the Farmers Home Administration has available a general counsel to perform the review of the legality of the mortgage, and by the fact that the Farmers Home Administration would have a first lien on the property.

So, with the attitude of the administration being one of willingness to accept the amendment, we will agree to the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Oklahoma.

The amendment was agreed to.

Mr. BELLMON. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. ALLEN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. Who yields time?

Mr. ALLEN. Are there further amendments to be offered?

Mr. President, I suggest the absence of a quorum, the time to be charged equally to both sides.

The PRESIDING OFFICER. (Mr. Clark). Without objection, it is so ordered. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. BUMPERS. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The Chair would remind the Senator from Arkansas that a quorum call is in progress.

Mr. BUMPERS. I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 1250

(To authorize the Secretary of Agriculture to increase the target price for rice whenever a set-aside program is in effect)

Mr. BUMPERS. Mr. President, I send to the desk an amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Arkansas (Mr. BUMPERS) offers an unprinted amendment numbered 1250.

Mr. BUMPERS. I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 35, immediately after line 16, insert the following:

"TITLE IV—PRICE SUPPORT FOR PRODUCERS OF RICE

"SEC. 401. (a) Section 1001 of the Food and Agriculture Act of 1977 is amended by inserting '(a)' after the section designation and adding a new subsection (b) as follows:

"'(b) Notwithstanding any other provision of law, whenever a set-aside is in effect for any of the 1978 through 1981 crops of rice, the Secretary may increase the established price for rice by the amount the Secretary determines appropriate to compensate producers for participation in such set-aside. In determining the amount of any such increase, the Secretary shall take into account changes in the cost of production resulting from participation in the set-aside involved. If the established price is increased for any crop of rice for which a set-aside is in effect, the Secretary may increase the established price for any other commodity in such amount as the Secretary determines necessary for effective operation of the program. The Secretary shall adjust any increase in the established price to reflect, in whole or in part, any land diversion payments for the crop for which an increase is determined.'

"(b) This section shall become effective October 1, 1978, and any producers who, prior to such date, receive loans and payments on the 1978 crop of the commodity as computed under the Agricultural Act of

1949, as amended by the Food and Agriculture Act of 1977, may elect after September 30, 1978, to receive loans and payments as computed under this section.".

Mr. BUMPERS. Mr. President, if I may have the attention of the Senator from Alabama for a moment to explain the amendment, this amendment would have been offered by the distinguished chairman of the Agriculture Committee (Mr. TALMADGE), but he is not yet back in town, and one of his staff members has asked me to introduce the amendment, which I am happy to do because it deals with a commodity very important to the agriculture economy of my State.

As the Senator from Alabama knows, under present law, under the rice bill which we passed in January or February of 1976, there is already a target price established on rice. Under this bill, the Secretary of Agriculture is given discretionary authority to raise the target price on wheat, feed grains, and upland cotton, but rice, I think possibly for some reason, was omitted.

Now, while there is already a legislative system for establishing target prices on rice, it occurs to me, as it did, certainly, to the chairman of the committee, that the Secretary should also have the same discretion to raise the target price of rice, perhaps higher than the legislative formula now permits, if the cost of production dictates that it be done.

I hope the amendment will be agreeable to the committee.

Mr. ALLEN. Mr. President, this matter came up in the conference committee which was composing the differences between the House and the Senate agricultural bills, where it was noted that for some reason or other rice had not been included in the commodities as to which the Secretary of Agriculture would be given discretionary authority to raise the target price.

Since the addition of rice to that bill was outside the scope of the conference, it was suggested by Chairman TALMADGE of the Senate conferees and Mr. FOLEY, the chairman of the House conferees, that the amendment be offered to this bill.

There has been approval in the House and the Senate that rice be added, along with the other commodities. This was agreed to by Dr. York, representing the administration in the conference committee, and certainly our committee would have no objection to it.

So the committee of conference on H.R. 6782, the Emergency Agricultural Act of 1978, has agreed to language that would permit the Secretary of Agriculture to increase target prices for wheat, feed grains, and upland cotton whenever a setaside program is in effect for one or more of the 1978 through 1981 crops for those commodities. That conference report on H.R. 6782 will likely to considered in the Senate tomorrow.

Mr. YOUNG. Mr. President, will the Senator yield?

Mr. ALLEN. I am delighted to yield to the distinguished Senator from North Dakota.

Mr. YOUNG. The distinguished Senator from Alabama has accurately explained the problem. The Senate conferees would have adopted the rice provision except for a technicality. I understand it would have been subject to a point of order. Rather than run that risk, it was decided by the conferees that it be handled through separate legislation as an amendment to this bill. I know of no objection to it, and I believe it should be approved.

Mr. ALLEN. I thank the distinguished Senator from North Dakota for his support of the amendment.

Mr. BUMPERS. I thank the Senators for their comments. It will warm the rice farmers of my State. It was an oversight. We are not greedy, but we want to be treated as fairly as the growers of other crops are treated. I appreciate the statement.

Mr. President, I move the adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. BUMPERS. Mr. President, if there are no other Senators to offer amendments at this time, I suggest the absence of a quorum.

The PRESIDING OFFICER. On whose time?

Mr. BUMPERS. Mr. President, I ask unanimous consent that the time be charged equally to both sides.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. CLARK. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. BUMPERS). Without objection, it is so ordered.

UP AMENDMENT NO. 1251

(Subsequently numbered amendment No. 1825.)

Mr. CLARK. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The second assistant legislative clerk read as follows:

The Senator from Iowa (Mr. CLARK) proposes an unprinted amendment numbered 1251.

Mr. CLARK. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 16, between lines 19 and 20, insert a new subsection as follows:

"(b) Section 309 (f) of the Consolidated Farm and Rural Development Act is amended by adding a new paragraph (6) as follows:

'(6) to pay the Secretary's costs of administration necessary to insure, make grants, service, and otherwise carry out the programs under this title not specifically covered by the Rural Development Insurance Fund of section 309A, including costs of the Secretary incidental to guaranteeing loans under this title, either directly from the fund or by transfers from the fund to, and merger with, any appropriations for administrative expenses.'"

On page 16, line 20, strike out "(b)" and insert "(c)".

On page 17, strike out lines 2 through 7, and insert in lieu thereof the following:

"Section 309A(g)(8) is amended to read as follows: 'to pay the Secretary's costs of administration necessary to insure, make grants, service, and otherwise carry out the programs referred to in subsection (a), including costs of the Secretary incidental to guaranteeing rural development loans under this title, either directly from the Insurance Fund or by transfers from the Fund to, and merger with, any appropriations for administrative expenses.'"

Mr. CLARK. Mr. President, I am proposing today an amendment to S. 2146 to strengthen the field staff of the Farmers Home Administration.

This amendment would permit the Secretary to pay certain costs of overseeing FmHA programs, either directly from the rural development insurance fund or by transfers from the fund to and merge with any appropriations for administrative expenses.

Basically, it would allow the Secretary of Agriculture to use program funds to pay administrative costs—the administrative costs of additional field personnel.

The Farmers Home Administration is facing a management crisis. In recent days, Don Muhm of the Des Moines Register has written a series of articles pointing out that Farmers Home Administration simply does not have enough people to make all the inspections needed to protect buyers of the new houses Farmers Home Administration finances—and that those inspections that are done may be made by persons with inadequate training.

Mr. President, I ask unanimous consent that these two articles be printed in the RECORD at this point.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

FmHA SHORT OF INSPECTORS TO ENSURE QUALITY CONTROL

(By Don Muhm)

The rural housing program of the Farmers Home Administration is inadequately manned to do its job, according to Max McCord, the FmHA's new Iowa director.

So home buyers are suffering because the FmHA inspection force is too small to properly inspect the construction of FmHA homes, he indicated.

A federal memo indicates that McCord has complained to regional FmHA officials that the first and second of the required three inspections often have been skipped or done after the fact.

McCord, who took over the Iowa agency Feb. 1, also expressed concern last week that there is no record of any inspection training for Iowa's FmHA housing inspectors in the past six years.

Complaints from dissatisfied home buyers have become bitter, as typified by the situation in Milo, where owners of four new $30,000 houses are considering legal action over basements that are too wet to be habitable.

The inspection problem grows from the fact that the FmHA's increasing role in rural housing has not been accompanied by a corresponding increase in staff, McCord indicated.

In 1970, the FmHA handled loans and grants of $48 million in Iowa with a staff of 212. Last year, the agency handled $282 million in loans and grants with a staff of 225—almost six times the volume with only 13 more employees.

HELP REQUESTED

McCord said last week that he is requesting some 58 additional employees in Iowa.

Federal officials agree that the Iowa agency needs more manpower. But "we have not been allocated the human resources we feel necessary [to do the job]." Gordon Cavanaugh, federal FmHA administrator in Washington, D.C. wrote to McCord on April 6.

The FmHA has in recent years become increasingly involved in rural and small town housing ventures, in contract to its traditional role of providing loans to help farmers plant their fields and raise livestock. People who are unable to obtain home loans from conventional sources, because of low incomes, sometimes can buy an FmHA-financed house for as little as $250 down.

Last year the FmHA financed construction of 685 new homes in Iowa. This year the agency is to build about 500 new homes. But, McCord vowed last week, "we're going to build them right or we aren't going to build them at all."

McCord has ordered that an inspectors' training school be held in Iowa within a month. Federal officials said in a telephone interview from Washington last week that they encourage such sessions and will cooperate in the effort.

McCord recently issued a memo ordering that county workers "follow MPS" in housing inspections. "MPS" stands for "minimum property standards" and is the "bible" to be followed in building FmHA homes.

HEAVY WORKLOAD

McCord further ordered, "In regard to all housing starts after Feb. 1, 1978 [the date he became state FmHA director] including multiple dwellings, I want to see first, second and third inspections of every building under your supervision.

McCord's memo told the inspectors. "As far as I am concerned it is the responsibility and job from the top man to the bottom to help you as your work load is absolutely unbearable.

"My only concern is that you are too good a bunch of guys to have to take the blame for something you can't help," he added.

McCord noted, too, that he had been "advised by lawyers" that "if we [FmHA people] do not make our second home inspection, and just make a notation [on the inspection report] that the builder called in, we have not represented the buyer as he should expect."

The three FmHA inspections required in the MPS procedure are for inspections of the footings of the dwelling during the rough-in of the dwelling and then a final inspection after the dwelling is built.

Inspectors are required to be on hand at these times to guarantee that the dwelling was built according to specifications and that it can, in turn, be represented properly to the prospective buyer.

CAN'T SACRIFICE

McCord's appeals for additional help resulted in a meeting with federal FmHA officials, including Michael Dunn, formerly of Keokuk, and now the regional coordinator for FmHA in nine Midwest states, including Iowa.

Federal administrator Cavanaugh wrote to McCord: "It is your assignment to creatively administer the FmHA programs in Iowa to achieve optimal performance from your staff. However, we must not sacrifice the quality of our service, or the integrity of FmHA's employees in our zeal to carry out the intent of Congress."

McCord said last week that Cavanaugh's point about "quality of service and the integrity" is the very thing McCord is concerned about.

"We're going to build them right or we're not going to build them at all," he said.

McCord for about 30 years has been a private home builder, and has handled federal housing projects in the state. He has been involved in about 1,200 new dwellings of various types.

One FmHA official told McCord at the recent Washington meeting that he can't operate the same way working for a federal agency as he did when running his own housing firm.

"I was told that government operates differently," McCord related. "And that if there is a problem, then it takes time to work things out where in private life I could just issue an order and things would be taken care of."

"Government," they said, "doesn't work that way."

The contractor, who built the Milo homes said in an interview that he doesn't feel he is at fault.

He said he followed FmHA's rules and specifications in building the four homes at a cost of $120,000.

Dunn, of the regional FmHA office, has recommended that "a formal demand on the builder for corrections" be presented by McCord and the home owners.

"Further pressure may be placed upon him [the builder]," Dunn wrote, "If evidence of misconduct exists. . . . the homeowner may introduce legal action to recover losses. The state director [of the Iowa FmHA] may initiate debarment proceedings against the contractor."

Debarment of a contractor means that no future FmHA work can be approved for that builder.

Dunn indicated in his memo to Cavanaugh that "Both Mr. McCord and Mr. [Darrell] Grove [the Iowa chief of FmHA rural housing] feel that sufficient evidence is available to warrant debarment proceedings that are now in process."

If negotiation or litigation do not provide satisfactory results for the FmHA homeowners, the agency will provide assistance by a "rehabilitation loan" to correct the housing defect, or relocate the family in other FmHA housing as soon as possible, according to Dunn.

The Iowa incident has caused a special directive to be issued by the federal FmHA administrator, according to Dunn.

He said Cavanaugh has issued, or will issue, a reminder to the field staff of the USDA agency that "all inspections should be conducted in a timely manner with qualified inspectors."

Dunn indicated that federal FmHA officials are drafting new regulations "to authorize payment for construction defects when a builder fails to make the necessary corrections."

He said the providing of escrow accounts has been discussed by FmHA officials, so that monies are held back until FmHA officials are satisfied that the terms of the contract have been met by the builder.

"We are considering efforts which would insure that problems do not recur," Dunn said.

FmHA ADMITS 7 HOMES NOT INSPECTED RIGHT

(By Don Muhm)

Seven instances where government-financed/rural homes were not inspected have voluntarily been brought to the attention of Iowa Farmers Home Administration officials, the agency confirmed Wednesday.

In each case, the FmHA construction inspector was not on hand to inspect the footings of the dwelling as required by government regulations.

Iowa FmHA director Max McCord, an experienced home builder, said he has written to the "appropriate" parties advising them to make known to the buyers of the seven homes that this phase of the inspection procedure was not followed. He did not identify the homes.

McCord said he trusts the integrity of the contractors building the government-financed FmHA homes, but added he also "wants to make sure the buyer (of the home) is aware that our inspector did not see the (reinforcement rods) in the footings and we are assuming that they were installed as required."

McCord has instructed that copies of his letter be placed in local FmHA offices concerning the matter, and added, "I think it would be wise if you would advise the new owner of this home that it did not receive a first inspection."

McCord has made it known he is concerned about the work load of FmHA and his staff. He pointed out that one inspector covers 15 Iowa counties, and is expected to make sure the proper inspections are made of all units built with FmHA supervision and financing.

Last year, there were 685 new housing loans handled in Iowa. This year state FmHA officials expected about 500 new homes to be financed and built according to the U.S. Department of Agriculture agency's specifications.

"A major farm credit bill pending in Congress was amended this week to call for more manpower in FmHA field offices. Representative Berkley Bedell (Dem., Ia.) sponsored the amendment.

McCord earlier this month issued an administrative memo to county FmHA supervisors concerning housing inspections. In that directive, McCord said he was "not doubting the integrity of any builder," but warned that he expected to see inspection reports written up at each stage of the building of FmHA units.

This involves a first inspection (of the footings), a second inspection (the rough-in stage of the unit) and a final inspection.

In the case of title, for use in preventing wet basements, McCord said evidence must be received that such materials were on hand and installed as required.

McCord said Wednesday his agency can order a contractor to rip into footings if first inspections are not made property.

"This is costly (to the contractor), and it would get their attention that we mean to do things right," he said. "We just cannot permit contractors to go ahead on things without following our (government) procedures. But I do want home owners to be fully aware when our rules have not been followed, as was the case with these seven homes."

Mr. CLARK. The management pressures on Farmers Home Administration are very serious. The programs are large and Congress has increased them rapidly. They cover a broad range of objectives. Some of these are farm programs—loans for farm ownership and farm operation. Some are for housing. Others are for communities, including water and sewer systems and for other public facilities. Still others are for private businesses through the business and industrial loan program.

In addition, there are emergency loan programs that follow drought and other emergencies, and which must take precedence over the ordinary loan programs.

These programs are designed to make the Farmers Home Administration the central rural development agency. In addition, they are designed to make FmHA the lender of last resort for farm loans and for housing loans for both farmers and all other rural residents. This is a big job, and it is rapidly growing both bigger and more complex.

The Farmers Home Administration is almost unique in the requirement that it service its loans and grants. Not only must complex determinations be made about the capacity of borrowers to repay the loans and about their need for the

money, the agency is also charged with helping borrowers operate their farms and businesses so that they are better off at the end of the loan period than they were at the beginning.

Servicing is an extremely valuable effort, Mr. President. It is part of the reason for the astonishingly good repayment record Farmers Home borrowers have. It is essential if a program is to work well as a provider of credit of last resort without huge losses.

But loan servicing is expensive. It takes a great deal of time to provide all the inspections needed to insure proper construction of a new house. It takes time to compile all the information needed to insure that a farming operation is on the way to an adequate level of profit so that a farm family can repay their loans and count on a reasonable profit.

It is these requirements for people and money that this administration and previous administrations have refused to request or authorize. It is these people for managing the program in the field that this amendment is designed to provide.

Mr. President, the management crisis in FmHA is not new.

Certainly, those of us who serve on the Rural Development Subcommittee and the Agriculture Committee have become familiar with it over the last several years. But it is worse today than in the past, and it is rapidly growing even worse as programs grow larger.

As chairman of the Subcommittee on Rural Development of the Committee on Agriculture, Nutrition, and Forestry, we have had a number of hearings and discussions about the need for additional personnel. In our oversight hearings in 1974, we found serious management problems in FmHA caused by personnel shortages. We have found similar problems ever since then, and we have repeatedly called upon the administration to increase FmHA personnel. Three years ago, Congress approved 1,100 more full-time staff for FmHA. The administration increased the FmHA staff by 400 full-time hands—not nearly enough.

Mr. President, the stakes in the effective operation of these programs are enormous. There are $22.5 billion in loans outstanding. Annual program levels are around $9 billion.

While the effects of insufficient staffing have been experienced nationwide, let me give some examples from my home State. The impact upon Iowa is especially illustrative. In Iowa 51 FmHA offices serve 99 counties. In 1977, lending reached $259.2 million. In 1962, the lending level was $8.8 million. Since then, the workload has increased more than 29 times, while the number of people available to service the programs has increased only from 89 to 177—about twice. The result is that programs are not being serviced as they should be and borrowers are not receiving the assistance Congress intended.

A similar agency, the Production Credit Association, says that the maximum number of loans that one loan officer and one clerk can handle is 75 to 80. Many FmHA county offices are servicing 3 times that number. One office in northwest Iowa has three loan officers, one clerk, one part-time clerk, and 664 loans to service. I do not think the Iowa example is untypical of the rest of the Nation.

Mr. President, these programs are too important to rural America to permit ineffective operation. They simply need more people than they now have. I hope my colleagues in the Senate will join me in support of this amendment.

Mr. President, I reserve the remainder of my time.

Mr. ALLEN. Mr. President, I yield myself such time as I may require.

I agree with the end sought to be achieved by the distinguished Senator from Iowa (Mr. CLARK). Unquestionably, the Farmers Home Administration is a fine agency and does an effective job in making loans to the farm community. Its inventory of loans has gone up a great deal in recent years. Back in 1972, the total number of loans outstanding in principal amount was $9.5 billion. It increased then, in 1973, to $11.5 billion; in 1974, to approximately $13 billion; in 1975, to $16 billion; in 1976, to $19 billion; and in 1977, to $23 billion.

Additions have been made in the personnel of the Farmers Home Administration. What I object to is the approach of the amendment, and it provides that the additional administrative costs can be paid out of the very funds—and I think I would be justified in saying the very trust funds—that the Farmers Home Administration is charged with administering. There are three revolving insurance funds that are, in effect, operated by the Farmers Home Administration: The agricultural credit insurance fund, the rural housing insurance fund, and the rural development insurance fund. This amendment would allow the Farmers Home Administration to reach into the rural development insurance fund for overhead expenses.

The proper approach, as I see it and as the committee would see it, is that if additional overhead is needed, or additional personnel is needed, then an effort should be made to have funds appropriated for that purpose.

These funds are maintained and new money is brought into the funds by the sale of participation certificates to the investing public, in an inventory of loans which Farmers Home Administration has made, then when they sell these beneficial certificates, they have money to make additional loans with.

But if we are going to eat up the substance, it would not be long before we would not have money enough to continue this process by which loans are made, beneficial certificates sold, and the money used again to make additional loans.

But if we start depleting that fund by paying administrative costs out of it, we will soon have the fund depleted.

I think the proper approach is to get OMB to approve an appropriation request for sufficient money to add additional personnel. I do not like the approach of circumventing the role of OMB.

Conceded, additional personnel is needed. Let us not use up the very fund that is allowing these farm loans to be made.

So I do not believe this is the proper approach. Speaking for the committee, as I understand its view to be, I would have to ask that the amendment not be agreed to.

Mr. YOUNG. Will the Senator yield?

Mr. ALLEN. I yield to the distinguished Senator from North Dakota.

Mr. YOUNG. I agree with the distinguished Senator from Iowa that the Farmers Home Administration has not been given enough funds to adequately and properly administer their programs. But this is a matter for the Appropriations Committee to deal with. It would be a bad mistake, I think, to automatically let any department of Government use their own funds for administration purposes. The Appropriations Committee should have jurisdiction. Then they have the responsibility to see that money is not wasted on unnecessary big staff.

If we applied this principle to all the programs, then we would have no jurisdiction left. I think we should appeal to the Appropriations Committee, of which I am a member, to appropriate adequate funds, rather than give this kind of authority. As I said before, it would establish in a new program an already bad practice.

Mr. ALLEN. I certainly agree with the distinguished Senator from South Dakota and I appreciate his comments. I appreciate his reasoning. I appreciate his attitude that more administrative personnel is needed, but that this is not the proper approach.

Mr. President, I understand the distinguished Senator from Iowa (Mr. CLARK) wishes a rollcall vote on his amendment and there has been a unanimous-consent agreement entered that there be no rollcall votes today.

So if the distinguished Senator from Iowa is through with his discussion, or at the conclusion of the discussion, I will ask unanimous consent the amendment be laid aside for a vote at the proper time on tomorrow.

The PRESIDING OFFICER. Is there objection?

Mr. CLARK. Reserving the right to object, is it possible to get unanimous consent to have a rollcall vote at a certain time tomorrow?

I think we would have to wait until we get an adequate number of Senators on the floor to get the yeas and nays, then to ask to have the vote at a certain hour.

The PRESIDING OFFICER. The Senator can ask for the yeas and nays tomorrow. He can set his amendment aside today and get the yeas and nays on it tomorrow.

Mr. ALLEN. I would have no objection if the distinguished Senator from Iowa made a unanimous-consent request that when the bill is laid down for consideration on tomorrow, the distinguished Senator's amendment be the first amendment to be called for a vote. I understand there would be no further discussion on amendments, but that the vote could come as the very first vote, if the Senator would make that request.

and at that time the yeas and nays could be requested.

Mr. CLARK. Mr. President, I ask unanimous consent that the pending amendment be laid aside until S. 2146 becomes the pending business tomorrow, at which time the amendment will then be in order, not for further debate, but for purposes of gaining the yeas and nays.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. CLARK. Mr. President, since the amendment has now been set aside, will the Senator from Alabama yield just 2 or 3 minutes on the bill for further discussion of the amendment?

Mr. ALLEN. I yield such time as the distinguished Senator wishes.

Mr. CLARK. Mr. President, in answer to the distinguished Senator from Alabama and the distinguished Senator from North Dakota with regard to the amendment that has just been set aside, I agree with them completely. A better approach to the administrative problem would be for the administration to request more people, and for the Appropriations Committees to grant that request.

Unfortunately, we tried this approach for several years, with no success. We have seen in hearings as early as 1974 that we had a real problem in this regard. Yet, under the Nixon administration, the Ford administration, and now the Carter administration, no change takes place.

We went the route of authorizing and appropriating the funds. Indeed, the Appropriations Committee appropriated adequate funds for 1,100 additional personnel. The administration refused to use it. They added 400 personnel.

So I do not find that particular approach to be the best approach, or the most effective approach. Indeed, I would far prefer to see us do it in the normal way. Unfortunately, to date, and after several years of attempts, that has not occurred.

We believe that this is an effective method of adding additional personnel.

Now, if I thought it would deplete the resources of the funds, some of which I think have up to $0.5 billion, then I would be very much opposed to the amendment I offered. But I am confident that if this amendment is adopted and additional personnel are hired that we will see OMB and the administration come in with a larger requests for Farmers Home Administration personnel. This problem will be solved. I do not think we should attempt to pay any large share of Farmers Home Administration personnel out of revolving funds, loan funds. I would find that quite unattractive myself.

But I think is a way, really, of achieving what we hope to achieve, namely, that we get the Office of Management and Budget to approve the requests that are normally sent to them by the Farmers Home Administration for badly needed additional personnel.

I thank the Senator for yielding me this time.

● Mr. EAGLETON. Mr. President, I am opposed to this amendment. It is backdoor spending in its purest form, and would permit expenditures to be made for salaries and expenses notwithstanding whether or not they have been properly justified and reviewed by the Appropriations Committee.

I might add that I have been very supportive in the past of efforts to provide proper staffing for Farmers Home Administration. The Subcommittee on Agriculture, Rural Development and Related Agencies appropriations added $20 million and 1,000 aditional staff positions above the President's budget request last year, based on my recomendation. Although a portion of this increase was deleted in conference, there was an increase.

Also, I would direct my colleagues to the report of the Appropriations Committee providing views and estimates with respect to the first concurrent resolution. On page 5 of that report, you will see that the Agriculture Subcommittee made the following tentative recommendation.

An increase of $.05 billion (above the budget request) for Farmers Home Administration (FmHA) rural development programs and a moderate increase in FmHA staffing.

We are already thinking along these lines. I strongly suspect that when we report out the agriculture appropriations bill, we will recommend additional staffing. But we will be doing it consciously, based on a detailed review of requirements, and we will be financing it directly, not through the "back door."

I urge defeat of this amendment.●

Mr. PERCY. Mr. President, I will vote in favor of Senator CLARK's amendment to S. 2146, the Agricultural Credit Assistance Act of 1978, which would provide additional staff support to Farmers Home Administration programs in the field. These administrative costs would be taken from the revolving fund.

I will vote in favor of this amendment because Farmers Home Administration does not have enough staff to adequately handle their case load—they are experiencing lengthy delays in making loans. Furthermore, they are unable to supervise the loans after they are made.

I understand that Senator CLARK's amendment circumvents the appropriations process. I support this process, but will vote for this amendment as an expression of my conviction that the Farmers Home Administration needs additional staff. If we are going to appropriate funds for programs to help farmers and rural residents, we must also appropriate adequate funding for staff to carry out these programs without costly delays and indecision.

The PRESIDING OFFICER. Who yields time?

Mr. ALLEN. Mr. President, in the absence of other Senators who wish to offer amendments, I am forced to suggest the absence of a quorum and ask unanimous consent that the time be equally charged to both sides.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. ALLEN. Mr. President, I ask unanimous consent that the order for the quroum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECESS UNTIL 1:30 P.M.

Mr. ALLEN. Mr. President, I ask unanimous consent that the Senate stand in recess until 1:30 this afternoon.

There being no objection, the Senate, at 12:58 p.m., recessed until 1:30 p.m., whereupon, the Senate reassembled when called to order by the Presiding Officer (HARRY F. BYRD, JR.).

Mr. ALLEN. Mr. President, in view of the absence of Senators who have amendments, I suggest the absence of a quorum, and I ask unanimous consent that the time be charged equally against both sides.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ALLEN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 1252

Mr. BENTSEN. Mr. President, I call up my amendment and ask that it be stated.

The PRESIDING OFFICER. The clerk will state the amendment.

The assistant legislative clerk read as follows:

The Senator from Texas (Mr. BENTSEN) proposes unprinted amendment No. 1252.

On page 35, line 8, strike the word "and".

On page 35, line 14, strike the period at the end of the sentence and insert in lieu thereof the following: ", and".

On page 35, immediately after line 14, add the following: "(3) in section 2 inserting after the words 'bonafide farmers and ranchers' the following: ', including bona fide farmers or ranchers owning livestock that are fed in custom feedyards,' ".

Mr. BENTSEN. Mr. President, this amendment makes no substantive change. What we are trying to do is clarify the Emergency Livestock Credit Act that was passed in 1974.

At that time, cattle feeders had just been hit by low prices. Cow-calf producers had not yet felt the effect of the "four-year wreck," a term cattlemen use to describe their disaster from 1974 through 1977. So the Emergency Livestock Credit Act of 1974 was passed to assist cattle feeders and other livestock producers.

To assure that emergency loans were not made to outside investors and to large corporate-type feedyards, the term "bona fide farmers and ranchers" was used. The Farmers Home Administration interpreted this to exclude owners of cattle who send their cattle to custom feedyards to be finished, even though many of these are small operators who are full-time cattlemen.

This method of raising cattle is often used by the small producer, so that is who was hurt by the interpretation of the Farmers Home Administration.

This act was not intended to assist outside investors and I am not proposing that. It was intended to assist small operators who are primarily dependent upon livestock for their livelihood, regardless of where they may keep their livestock.

In Texas, many small cattle feeders keep their cattle in custom feedyards in order to gain the economies of scale. While the custom feedyard looks like a large operation; it actually is a congregation of small operators who hire someone else to feed and care for their livestock—much like a Midwestern farmer-feeder would have a hired man to help feed and care for his cattle.

So this amendment is intended to clarify the act and include only those smaller operators who are owners of livestock that are fed in custom feedyards.

I ask the committee to accept this amendment, which I think will be of help, particularly to the small cattleman.

Mr. ALLEN. Mr. President, I yield myself such time as I may require.

When a similar amendment was offered on the floor of the House, the distinguished chairman of the House Agriculture Committee (Mr. FOLEY) asked the question of Mr. HIGHTOWER, who was the sponsor of the amendment, about the words, "persons owning livestock that are fed in custom feed yards," inasmuch as it followed the term "bona fide farmers and ranchers," and the amendment says "including persons owning livestock that are fed in custom feed yards."

Mr. FOLEY asked the question: "Does the gentleman intend that those persons owning livestock that are fed in custom feed yards must also be bona fide farmers and ranchers?"

The answer was: "That is correct."

So in order that the amendment be completely clear and not have to rely on the colloquy in the House for the legislative history, the distinguished Senator from Texas (Mr. BENTSEN) has made it abundantly clear by stating it, "including bona fide farmers and ranchers," instead of the word "persons." That would unquestionably eliminate the possibility that these loans would be available to people other than the farmers and ranchers.

The thought expressed by some was that this might open the door to investors who had no connection with cattle farming or ranching operations, but the distinguished Senator from Texas makes it abundantly clear that in order to qualify for the loan under this emergency cattleman program, the applicants would have to be bona fide farmers or ranchers. Is that not correct?

Mr. BENTSEN. That is correct. I say to the distinguished Senator from Alabama that we are both trying to achieve the same objective; the cyclical problem that hit livestock feeding and the cattlemen would not necessarily be shared by someone who had substantial income in other professions. That is why we put the words "bona fide" in there, so it has to be someone who actually owns cattle and is bona fide in the full interpretation of the act.

Mr. ALLEN. I thank the distinguished Senator from Texas.

Mr. President, the committee feels that this is a good amendment and is willing to accept it.

The PRESIDING OFFICER. Do the Senators yield back their time?

Mr. ALLEN. I yield back the remainder of my time, Mr. President.

Mr. BENTSEN. I yield back my time.

The PRESIDING OFFICER. All time has been yielded back.

The question is on agreeing to the amendment of the Senator from Texas (Mr. BENTSEN).

The amendment was agreed to.

Mr. MUSKIE. Mr. President, S. 2146, the Agricultural Credit Assistance Act of 1978, which is now before the Senate, is an important farm credit bill. It would authorize needed changes in several programs of the Farmers Home Administration, and it would make Federal loans and loan guarantees available to farmers and ranchers who are affected by a general tightening of agricultural credit.

The PRESIDING OFFICER. Will the Senator yield for a moment so I may ask who is yielding time?

Mr. ALLEN. I yield such time as the distinguished Senator from Maine may require on the bill.

Mr. MUSKIE. I thank the distinguished floor manager for his courtesy.

I support enactment of this bill, Mr. President. I want to make clear my reasons for supporting it, as well as raise questions I have about two of its provisions. I count myself, Mr. President, among those Senators who sense very keenly the plight of American farmers. For thousands of rural families, these have been dark and troubled times. Costs have risen. Prices have fallen. Crops have shriveled under widespread drought and severe storms. Many families in my own home State of Maine have been among those who have been hurt. Recent months have been particularly bitter for those many farmers who were encouraged by the boom years of 1973–75 to assume heavy debt burdens and invest in expensive land and machinery.

Mr. President, I do not believe anyone on this floor questions the need to preserve the family farm. The family farm is important for the food it produces and the way of life it preserves. I am particularly sensitive to this fact as a result of our experience in Maine. Only a few years ago, we had 5,000 potato farmers. Today there are not many more than 1,000. So I understand from experience in my own State the concerns that have been expressed during the past few months by farmers throughout the Nation.

We all realize that additional assistance to family farms is necessary because of the cost-price squeeze. In the past few months there has been considerable debate about what kinds of assistance should be provided. I have said previously that we must strive to assure our farmers of an adequate, stable income, avoiding the boom and bust cycle of the past few years. We must also maintain adequate levels of agricultural production.

Recently in this Chamber, Mr. President, we debated other legislation that purported to solve the farm problem. Unlike that other legislation, this bill deserves our support. Unlike other legislation, this bill would help not just a few, but a broad spectrum of the Nation's farmers. I have stated before that wheat and feed grain producers are not the only ones facing economic hardship. An acceptable solution to the farm problems must recognize that fact. And this bill does.

This bill makes significant improvements in the Farmers Home Administration loan programs, which benefit many farmers who are facing a difficult year. In fact, they are the only Federal agriculture programs that substantially benefit Maine potato growers. The bill increases lending limits to reflect today's cost of production and land prices. In addition, the bill permits loans to certain partnerships and corporations, which also is a wise response to the changing patterns of American agriculture.

So I am pleased to support this measure as thoughtful and reasonable legislation that will provide much needed aid to a broad spectrum of our farm community. This is the real Agricultural Assistance Act of 1978. This bill should be the centerpiece of the Federal Government's response to the needs of American farmers.

But now to raise my first question about the bill.

Mr. President, I note that section 104 of the bill would increase the authorization ceilings for farmers' home rural water and waste disposal grants by $700 million. I understand and share the concern for clean water that underlies this recommendation of the Agriculture Committee. I would like to point out, however, that this bill is about the only place where such a large increase in funding has been suggested for this program. This increase was not recommended in the Senate Agriculture Committee's March 15 report to the Budget Committee, nor did the Appropriations Committee anticipate such an increase in its report. Since no committee has recommended this increase, the fiscal year 1979 first budget resolution targets, which passed the Senate just last week, do not assume full funding of section 104.

I note that this level of funding would not be authorized by the House version of this bill and is not favored by the administration. It does not seem at all likely, therefore, that funding of rural water and waste disposal grants will be substantially above the levels assumed in the first budget resolution for fiscal year 1979. With that understanding, Mr. President, I do not feel compelled to oppose this section of the bill.

I wonder if the distinguished floor manager would want to comment on that point?

Mr. ALLEN. This raise was by amendment in the committee after the estimates had been made by the Agriculture Committee and furnished to the Budget Committee. It would, of course, require an appropriation, and inasmuch as the House figure is substantially lower, some 50 percent or more lower, I would not anticipate, even as to the authorization, that the figure would survive the conference, in my judgment.

Mr. MUSKIE. I appreciate the distinguished Senator's comment, and it is consistent with my own view of the situation.

While we are on the subject of water and waste disposal grants, Mr. President, I would like to point out the importance of eliminating overlap and competition among programs to improve waste water treatment and solid waste disposal. Where possible, consolidation of these programs should be encouraged.

There is potential overlap between the farmers home program and the waste water treatment construction grants program of the Environmental Protection Agency. The former addresses a variety of needs including water supply, waste water treatment, and solid waste disposal.

May I say that I have seen the benefits that these programs could bring to small rural communities in my own State, as well as the State of Alabama.

Mr. ALLEN. Yes.

Mr. MUSKIE. A State which is served so well by my good friend from Alabama.

EPA, of course, provides 75 percent grants for construction of waste water treatment facilities. Careful examination of the relationship between the programs should be made in the near future, with the view to eliminating overlap and competition that may develop.

I have earlier stated that such overlap and competition among programs is a prime source of Government waste. So this kind of rigorous analysis of ongoing programs is vital if we are to improve the efficiency with which Federal resources are used.

Mr. ALLEN. I certainly agree with the distinguished Senator from Maine, and that should be done. I feel that legislation is being proposed now that will consolidate and streamline many of these programs so that there will not be the overlaps the distinguished Senator points out.

Mr. MUSKIE. I thank my good friend again.

Mr. President, I get to the second question I have and it is a more troublesome question in many ways, so I would like to lay out my view of it and perhaps the distinguished floor manager would be kind enough to comment on it and to give me his view of it.

Mr. President, I support this bill. However, it now contains one provision which, it seems to me, is unnecessary, which would be very expensive, and which should be removed before this bill becomes law. Section 114 of the bill would make permanent a 3-percent interest rate for Farmers Home Administration emergency loans that was enacted less than a year ago as a special, temporary, emergency response to severe flooding in some parts of the country. That provision is not essential to this bill, and including it will seriously set back our attempts to reduce the deficit and balance the budget.

Prior to last August, Farmers Home emergency loans were made at an interest rate of 5 percent. Small Business Administration disaster loans were made at the Government's cost of money, or 6⅝ percent. In response to severe flooding in certain parts of our country, the Small Business Amendments of 1977 reduced these rates substantially. This law, enacted only last August, established low interest rates for SBA and Farmers Home disaster loans on an emergency, temporary basis.

Thus, during the last 8 months 3-percent loans up to $250,000 have been available for businesses, including farms, that have suffered physical damage from a declared disaster. This provision is due to expire on September 30 of this year and 3-percent rates would not be available for disasters occurring after that date.

Mr. President, with the market interest rates at their current level these 3-percent interest rates now provide disaster victims with benefits that are extremely high in comparison with past practice.

The history of disaster loan interest rates should be kept in mind. The FmHA emergency loan program was enacted in 1949. Interest rates were set at 3 percent, at the time, a rate that was substantially above the Government's cost of money. For short periods of time in 1951 and again in 1953, the Government attempted to set emergency loan interest rates at a level close to that charged by private lenders. This was done so the Government could offer loans for recovery from disasters but not encourage program abuse with excessive benefits.

The SBA disaster loan program was initiated in 1953. The program's 3-percent interest rates were also substantially above the Government's cost of money at that time. In fact, right up until the late 1960's, a 3-percent interest rate on disaster loans was very close to the Government's cost of money. Throughout this period, therefore, the subsidy to borrowers and the costs to the taxpayers were very low.

In the late 1960's, the private market interest rates rose sharply, and the fixed 3-percent disaster loan interest rates began to provide very attractive benefits to borrowers and heavy costs to the Government. To correct problems resulting from that situation, the Disaster Relief Act of 1970 raised the FmHA emergency loan rates, beginning in 1972, to a rate close to the Government's cost of money.

In 1972, low-interest rates, loan forgiveness and other benefits were enacted in response to Hurricane Agnes. The widespread abuses that resulted led Congress in 1973 to increase the SBA and FmHA rate to 5 percent. In 1975, SBA rates were further raised to the Government's cost of money.

To sum up, Mr. President, Congress has generally kept interest rates for disaster loans close to the Government's cost of borrowing to finance them.

From time to time, it has been argued that the Federal Government should make low-interest-rate loans available to victims of a disaster. Of course, that argument appears on the surface to have merit. Those who have lost much in a disaster would find it easier to get back on their feet with subsidized loans than with a market-rate loan.

Mr. President, I am certain that no one in this Chamber would argue against providing Federal assistance to help needy victims recover from the effects of unforeseeable natural disasters. However, Mr. President, I am convinced that deeply subsidized interest rates are precisely the wrong way to offer that aid. Fixed, deeply subsidized interest rates create serious problems for the Federal Government. I would like to highlight a few of those problems.

First, at any given volume of Federal loans, the lower the interest rates, the more the public has to pay. This 3-percent interest rate can be very costly indeed. In fact, the disaster loans expected to be made in fiscal year 1978 alone will cost the taxpayers about $.2 billion each year for the next 7 years. That $1.4 billion is the actual cost to the taxpayers just for 1 year's loans, assuming every one of those loans is repaid. I do not believe we can sustain those costs. Indeed, the drain these heavy subsidies make on budgetary resources reduces the funds available for other lending of the Farmers Home Administration for farm ownership and operation.

Second, the subsidy costs tend to create even greater subsidy costs. Deep subsidies encourage even those who do not really need the emergency loans to apply for them. Moreover, such subsidies create strong incentives for those eligible, especially those who ordinarily use credit, to borrow as much as possible under a Federal disaster program. Just to note one illustration, on a $50,000, 7-year loan, a 3-percent interest rate provides large savings over a loan at the Government's cost of money—savings that are equivalent to a $5,000 outright grant. In fact, at 3 percent any eligible borrower could make money by borrowing under the disaster loan program and putting the proceeds in his local bank.

Mr. ALLEN. Mr. President, will the Senator yield at that point?

Mr. MUSKIE. I yield.

Mr. ALLEN. The Senator realizes, of course, that this 3 percent money that is available for disaster loans is available only to persons who are unable to obtain credit elsewhere. So I would doubt that someone unable to obtain credit would be able to borrow money at 3 percent and then put it in the bank at 5, 6, or 7 percent. It is only available to those who are unable to get credit elsewhere. I call that to the attention of the Senator.

The PRESIDING OFFICER. The time of the proponents of the bill has expired.

Mr. ALLEN. I yield an additional 15 minutes on the bill.

The PRESIDING OFFICER. The time on the bill for the proponents has expired. Do the opponents wish to yield time? The opponents have 16 minutes remaining.

Mr. ALLEN. I ask unanimous consent that there be an additional 30 minutes for the proponents of the bill.

The PRESIDING OFFICER. If the Senator will withhold that temporarily, the Chair points out to the Senator from Maine that he would have 2 hours on the amendment.

Mr. ALLEN. He has not offered an amendment.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Alabama?

Mr. CURTIS. Mr. President, reserving the right to object, how much time does the minority have?

The PRESIDING OFFICER. Sixteen minutes.

Without objection, it is so ordered.

Mr. MUSKIE. I say to the distinguished floor manager that I am aware that the "no credit elsewhere" test is applicable. But past history indicates that it is a test that is easily met. There is pressure on banking institutions to cooperate with applicants in meeting that test; and the deeper the subsidy, the greater the pressures on banking institutions to cooperate with banking customers.

The second point I would make is that the proceeds of such loans are easily substituted for other funds in a borrower's total financial program. In other words, if an applicant is eligible for the subsidized credit, he cannot effectively be limited on the amount he borrows. It is extremely difficult to insure that the proceeds of the disaster loan will not be used for purposes unrelated to the disaster needs for which he may apply for the credit.

I will make this final point, as a wrap-up: The deeper the subsidy, the greater incentive one creates to use the Government credit rather than conventional private credit, and the more pressure there is to abuse the program. I think past experience demonstrates this to be fact. That is my concern, I say to the Senator.

Mr. ALLEN. On that point, I believe the Senator will notice, however, that the 3 percent would apply only to borrowers who cannot obtain credit elsewhere at reasonable rates and terms up to the amount of the actual loss. Other borrowers would be required to pay an interest rate not in excess of the cost of money to the Government plus not to exceed 1 percent. For all borrowers, the interest rate for loans in excess of the actual loss is the prevailing private market interest rate.

So there would not be an opportunity there there for a borrower to borrow at 3 percent money that he does not need.

I think that would allay some of the fears of the distinguished Senator.

Mr. MUSKIE. There is always the temptation to overstate the need.

I do not know how rigid one can make the test of need administratively to avoid overborrowing on the Government's credit. When it is possible for the subsidy to produce the equivalent of a $5,000 outright grant on a $50,000 7-year loan, the pressures to get the full advantage of that subsidy or the credit are bound to be very great. I think the best safeguard against opening up those abuses is to reduce the amount of the subsidy. I believe our experience demonstrates that over the years.

I do not question the Senator's and the committee's concern about those possible abuses. I do take notice of the fact that these attempted safeguards have been written in. But I must say, in all honesty, that in my judgment the most effective safeguard would be to limit the amount of the subsidy.

There would be some subsidy at the 5-percent rate, or even at the Government's cost of credit. So we are not talking about offering unsubsidized loans. We are talking about limiting the size of the subsidy.

Our past experience, as I have recited in the course of these remarks, indicates that over the years we have learned that the prudent course is to keep the interest rate as close as possible to the Government's cost of money.

This year, I say to the Senator, the total of loans of FHA and SBA was $5.8 billion compared to an average of about $900 million in preceding years.

So, obviously, this 3-percent program is enormously attractive. When you have that kind of money available on these attractive terms, I am concerned that writing this interest rate into law as a permanent feature is a long-term commitment that we should not take at this time. And I say that in all candor and with full appreciation of what the committee has tried to do to safeguard against the abuses to which I referred.

Mr. ALLEN. I thank the distinguished Senator.

Mr. MUSKIE. So, based on what we already know, Mr. President, we have a clear warning that these deeply subsidized rates should not be established as permanent policy.

No wonder one expert in agricultural credit said anyone would be a very poor businessman not to borrow as much as he could for as long as he could at those rates. The Government should not create that kind of incentive for abuse, and the taxpayers should not be asked to pay for it.

Based on what we already know, we have a clear warning that these deeply subsidized rates should not be established as permanent policy.

A strong case can be made that these loans should be made at an interest rate no lower than the Government's cost of money. The rate at which the Federal Government borrows is, of course, much lower than the rate that private borrowers must otherwise pay. So Federal loans made at the Government's cost of money provide large benefits to borrowers.

The issues related to disaster loans deserve much more careful attention from Congress and the administration than they have been given. Unfortunately, Mr. President, we do not yet have a comprehensive, long-term national policy for responding to disasters.

Indeed, the Government does not now accurately estimate how the Federal budget will be affected by changes in interest rates and other elements of Federal disaster loan programs. Senator BELLMON and I have asked CBO to develop improved procedures to estimate those costs. That work, is of course, extremely important to our efforts to control the budget.

I strongly support the broad review of all disaster assistance that has been scheduled over the next months. We should consider how the interest rates for disaster loans should be set—fixed rates tend to produce fluctuating and unanticipated benefits when inflation and other factors drive up private market rates. We should consider ways to make sure that benefits go only to those who really need Federal assistance and only for those purposes that involve the national interest.

For several decades national disaster policy has emerged as a patchwork of hasty, ad hoc reactions to past disasters. It has been made clear to us for at least the last 8 months, how that approach can interfere with responsible budgeting of our scarce resources. I note that the administration, just this past Friday, submitted to the Congress its proposal for comprehensive crop insurance. I expect the President's plan for reorganizing Federal disaster assistance programs to be submitted early in June. I hope, Mr. President, that these proposals will be solid steps toward the comprehensive disaster policy that is so badly needed.

Perhaps, in the long run, the Government's cost of money should be adopted as the interest rate for both SBA and Farmers Home disaster loans. The administration, I understand, favors uniform rates for Farmers Home and SBA disaster loans with a 5 percent rate on loans for losses to primary dwellings and personal property and a rate equal to the cost of Treasury borrowing for losses to income producing properties, both farm and nonfarm. The administration favors imposing a test of credit elsewhere for disaster loans that are to be used for income producing property.

I note that the House version of this bill would allow rates for Farmers Home emergency loans to return to the 5 percent levels that will be in effect under current law. At the very least, the final bill should permit the Farmers Home rates to return levels in effect prior to last August. Therefore, I urge the Senate conferees to accept the House position on Farmers Home emergency loan rates.

I yield the floor.

Mr. ALLEN. Mr. President, I yield myself such time as I may require.

I commend the distinguished Senator from Maine for his very competent analysis of these provisions and assure him that I appreciate his watchdog role here in the Senate, and I feel that he has been a strong force for good in seeking to see that the Federal Government adopts a sound fiscal policy.

We all recall that emergency legislation for farmers did pass the Senate some weeks ago. It was threatened with a veto and was defeated in the House of Representatives. We do know that our farmers are in serious economic difficulties.

We do not feel that now would be the time to cut back greatly on the low interest rate for disaster loans because as to a farmer, already beset by economic troubles in his farming operations, where everything that goes into the production of the crop has gone up greatly in price and the amount that the farmer receives for his crops has gone down in recent months, we would hate to add additional burdens to the farmer.

I point out that in a number of these programs of the Farmers Home Administration raises have been made in the interest rate on a number of programs, and the only program where there has been a continuation of a low rate has been on the disaster loans.

I recall when the law was that in case of loans for natural disasters there would be a $5,000 forgiveness on the loans. That has been abandoned. But it has been felt or was at the time Congress went to the 3-percent rate those farmers, who had a natural disaster and were unable to get loans elsewhere, would be extended the 3-percent loan rate on the actual amount of their loss and it would be the cost of money on amounts above the actual loss.

But I heard the amount argued here on the floor the other day between the distinguished occupant of the chair, Mr. HARRY F. BYRD, JR., and the distinguished chairman of the Budget Committee on the appropriations that we are making to international banks and IDA, and the billions of dollars that we invest in these international financial institutions. We all know that IDA makes loans where the first 10 years all they pay is about seven-eighths of 1 percent for service charge and no one, I assume, thinks there is a great deal of prospect of getting the principal back much less the interest. So I am not shocked at the idea of a 3-percent loan to farmers where they have a natural disaster.

Then on the programs where the interest rate has been raised, I ask unanimous consent, Mr. President, that a table I have had prepared having to do with the interest rates on various loans be inserted at this point in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

INTEREST RATES

Loan type	Current law		S. 2146	
	Insured	Guaranteed	Insured	Guaranteed
Farm real estate:				
Farm Ownership	5 percent	5 percent to borrower, 8 percent to lender.	5 percent	Negotiated between borrower and lender.
Soil and water	do	do	Cost of money plus up to 1 percent	Do.
Recreation	do	do	do	Do.
Grazing association	do	5 percent	do	Do.
Irrigation and drainage	do	do	do	Do.
Indian land acquisition	do	do	5 percent	Do.
Farm operating	8 percent (cost of money plus up to 1 percent).	8 percent	Not more than cost of money plus up to 1 percent.	Negotiated rate between borrower and lender.
Water and waste disposal	5 percent		5 percent	
Emergency livestock (all guaranteed loans).		Negotiated rate between borrower and lender.		No change.
Community facilities	5 percent		5 percent	
Emergency disaster:				
Actual loss loans after July 1, 1976.	3 percent on 1 $250,000 of loss 5 percent on excess of $250,000, 1 percent on 1 $10,000 on, residential loss, 3 percent on next $30,000, 5 percent on loss above $40,000.		Actual loss loans: 3 percent—unable to obtain other credit. Cost of money plus up to 1 percent when able to obtain other credit. Loans in excess of actual loss—prevailing market rate.	2-tiered System:
Actual losses occurring before July 1, 1976 and after October 1, 1978.	5 percent			
Business and industry loans	Adjusted to prevailing market rates	Negotiated between borrower and lender.	Same	Same.
Housing:				
Subsidized housing	As low as 1 percent		Not in bill.	
Above moderate	8¾ plus ½ percent		do	
Unsubsidized housing	8¼ percent		do	
Rental housing	do		do	
Low income housing				
Repair loans	1 percent		Not in bill	
Farm labor housing	do		do	
Site development	8¼ percent		do	
Self-help site development loans	3 percent		do	
TITLE II				
Emergency Agricultural Credit Adjustment Act.				
Economic disaster loans (no current program).			Guaranteed—negotiated rate between borrower and lender. Insured—cost of money plus up to 1 percent.	

Mr. ALLEN. If the distinguished Senator does not have a copy, we furnished his staff with a copy of this, and I would like to have him examine that.

Mr. MUSKIE. Mr. President, will the Senator yield for a question?

Mr. ALLEN. I yield.

Mr. MUSKIE. On the basis of the questions that trouble me and which also have troubled the committee, because the committee has undertaken to establish some safeguards, I wonder if the Senator would consider putting a time period, that is, make the policy the bill proposes, say, a year so that we can get another year's experience of evaluating these programs and the potential for abuse, while we address ourselves to the broader question of disaster loans and policies that ought to implement them, and which would give us another trial period? It would not nail us down to an indefinite policy that might prove unwise and, I think, the Senator might think well of that.

Mr. ALLEN. Yes, I am prepared to answer that.

As I understand, the Senator is suggesting another year at the 3 percent, and then going to 5 percent; is that correct?

Mr. MUSKIE. Yes, unless we should again within the year decide to extend it.

Mr. ALLEN. I think that is a very fair proposal, and certainly I would be willing to recommend that to the committee.

Mr. MUSKIE. May I then work with the Senator's staff in putting together an amendment of that kind?

Mr. ALLEN. Yes, that would be 1 year from September 30, of course——

Mr. MUSKIE. Yes.

Mr. ALLEN (continuing). Because it is already authorized up to that time.

Mr. MUSKIE. Yes. Let us try to put that together. I think that might be a happy compromise.

Mr. ALLEN. Of course, as the Senator points out, the House has got the 5-percent figure, and it is possible that somewhere in between there an agreement could be reached that might be even more satisfactory to the distinguished Senator.

Mr. MUSKIE. Yes. Well, I thank the Senator.

Mr. ALLEN. The Senator realizes that this particular section 114, does have a two-tier interest rate: as to those who have no credit, cannot get credit elsewhere, this low rate applies. But all farmers who have sustained a natural disaster would be able to apply to the Farmers Home at the cost of money to the Government, plus 1 percent.

Mr. MUSKIE. Yes.

Mr. ALLEN. So there would be no loss there to the Government. But that would be available to all farmers who sustain natural disasters.

Mr. MUSKIE. I understand.

Mr. ALLEN. I thank the distinguished Senator for his suggestions. The appeal he made here on the floor has been most effective, certainly has influenced the thinking of the committee, I can assure the distinguished Senator, and if that would be satisfactory to the distinguished chairman of the Budget Committee we will prepare an amendment giving this 3-percent interest rate life for an additional 1 year beyond September 30 of this year.

Mr. MUSKIE. I was sure, knowing the Senator's concern about budgetary prudence, that my argument might be appealing.

Mr. ALLEN. Yes. It affected me deeply, I will say to the distinguished Senator.

Mr. MUSKIE. I thank the Senator.

Mr. ALLEN. Mr. President, I mentioned a moment ago that the time when $5,000 forgiveness was allowed on Government loans to disaster victims, specifically the $5,000, was in effect the years 1973 to 1974, and prior to that time in 1970 and 1971 there had been a $2,500 forgiveness feature.

I suggest the absence of a quorum and ask unanimous consent that the time not be charged to either side.

The PRESIDING OFFICER (Mr. SARBANES). Is there objection? The Chair hears none, and it is so ordered. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. MUSKIE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 1253

Mr. MUSKIE. Mr. President, earlier, the distinguished floor manager of the bill (Mr. ALLEN) and I had a colloquy about a compromise of the interest rate issue with respect to disaster loans. We have worked out an amendment which would provide, in effect, that if an applicant for a disaster loan were unable to get credit elsewhere, he would be eligible for a loan at the rates provided by this amendment. Until October 1, 1979, that rate would be 3 percent; thereafter, it would be 5 percent. If the applicant were not eligible for this loan under other provisions of the bill pending before us, the interest rate would be the cost of money to the Government, as I understand it.

Mr. ALLEN. Plus 1 percent.

Mr. MUSKIE. Plus 1 percent.

This, I think, incorporates the understanding that the distinguished floor manager and I had earlier when we discussed this without the benefit of having language before us. This language, I think, adequately and fully implements what we discussed, so I offer the amendment at this time, Mr. President, as an amendment cosponsored by the distinguished floor manager of the bill.

The PRESIDING OFFICER. The clerk will state the amendment.

The second assistant legislative clerk read as follows:

The Senator from Maine (Mr. MUSKIE) for himself and Mr. ALLEN, proposes unprinted amendment numbered 1253.

On page 22, strike out lines 13 and 14, and insert in lieu thereof the following:

"of time, the interest rate shall be 5 per centum per annum: *Provided*, That all such loans covering losses from disasters occurring before October 1, 1979, shall be at a rate of 3 per centum per annum, and".

Mr. ALLEN. Mr. President, the committee will take this amendment. We believe it improves the bill and makes it a sounder and fairer bill. We recommend that the Senate agree to the amendment.

The PRESIDING OFFICER. Do the Senators yield back their time on the amendment?

Mr. MUSKIE. I yield back my time, Mr. President.

Mr. ALLEN. I yield back my time.

The PRESIDING OFFICER. All time is yielded back. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. MUSKIE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. ALLEN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ALLEN. Mr. President, I suggest the absence of a quorum, and I ask unanimous consent that the time not be charged to either side.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. ALLEN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. ZORINSKY). Without objection, it is so ordered.

The Senator from Alabama.

UP AMENDMENT NO. 1254

(Subsequently numbered amendment No. 1826).

Mr. ALLEN. Mr. President, I send to the desk an amendment and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Alabama (Mr. ALLEN) proposes an unprinted amendment numbered 1254.

Mr. ALLEN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 28, beginning with line 12, strike out all down through line 5 on page 29, and insert in lieu thereof the following:

"SEC. 203. Loans may be insured or guaranteed under this title for (1) refinancing outstanding indebtedness, including the making of installment payments of principal and interest on real estate or other debts that cannot be paid unless assistance is rendered pursuant to this title, or other debts that must be consolidated or restructured to provide adequate terms within the applicant's repayment ability, (2) reorganization of the farm or ranching operation, including changes in the nature or method of operation, necessary to provide an economically sound operating unit, (3) purchase of essential water rights, supplies, and irrigation facilities, (4) purchase of essential livestock, poultry, and farm equipment, (5) purchase of feed, seed, fertilizer, insecticides, and farm supplies and other essential farm operating expenses, including cash rent, (6) financing essential land and water development, use, and conservation, (7) other essential farm and home needs, including, but not limited to, family subsistence, and (8) loan closing costs. No loan may be insured or guaranteed under this section the purpose of which is to purchase or lease additional land."

Mr. ALLEN. Mr. President, I ask unanimous consent that as to those amendments that have been offered and carried over until tomorrow that were unprinted amendments, that they be ordered printed for the use of Senators on tomorrow.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

Mr. ALLEN. Mr. President, title II of this bill brings into play a new concept of loans based upon disaster.

Under the present law, the disasters must be natural disasters. But there are ways that farmers can undergo disasters that are not of a natural nature. They can be of an economic nature.

This bill in title II does make provision for farmers borrowing to cover economic disasters that they may have sustained in their farming operations.

In the committee, the distinguished Senator from Kansas (Mr. DOLE) had an amendment adopted by the committee that, in addition to the various items for which the loan could be obtained, loans to cover additional land could be made, or that in the loan provision could be made for buying additional land.

There are some eight different categories that may be put in one of these disaster loans and they cover practically everything imaginable except the concept of buying additional land.

The Farmers Home Administration has been most generous in all of its attitudes with respect to making higher

loans available at reasonable interest rates to farmers. But they do object to this provision of permitting a farmer who applies for an economic disaster loan to include in the loan additional money for the purchase of more land, feeling that if he is in economic distress as a result of his operations on the land that he has that it would not be good business to allow him to buy more land at the high rates for which land is selling at this time in an effort to come out of his economic distress.

Now, the bill as reported by the Agriculture Committee provides for such things as refinancing outstanding indebtedness, including the making of installment payments of principal and interest on real estate or other debts that cannot be paid unless assistance is rendered pursuant to this title, or other debts that must be consolidated or restructured to provide adequate terms within the applicant's repayment ability.

So it gives broad authority for making loans to cover not only a farm operation loan, the land obligation, but other debts that cannot be paid unless assistance is rendered pursuant to this title.

A reorganization of the farm or ranching operation, including changes in the nature or method of operation, necessary to provide an economically sound operating unit; purchase of essential water rights, supplies, and irrigation facilities; purchase of essential livestock, poultry and farm equipment; purchase of feed, seed, fertilizer, insecticides, and farm supplies and other essential farm operating expenses, including cash rent, financing essential land and water development, use, and conservation, other essential farm and home needs, including, but not limited to, family subsistence, allowing a farmer to put in there a provision for living expenses, family subsistence, and loan closing costs.

But they do object to the single item of allowing him to increase his land holdings as a means of working out from his economic difficulties.

So the Farmers Home Administration, as I say, has been very generous in this approval of the provisions in this bill, and since it disapproves of this one item for incorporation in the loan I feel that we should go along with the Farmers Home Administration in this regard.

Mr. President, I do not ask for a vote on the amendment at this time, because of the interest of the distinguished Senator from Kansas (Mr. DOLE) in the amendment. But I do offer it at this time, and I ask unanimous consent that when the amendment does come up for consideration before the Senate that Mr. DOLE be allowed not to exceed 10 minutes to discuss the amendment, and that I be allowed not to exceed 5 minutes to discuss the amendment further.

Mr. CURTIS. Reserving the right to object, the distinguished Senator has been very generous in his statement and in protecting the rights of Senator DOLE. But I think that we might consider a total of 15 minutes on this. I am sure we will have no difficulty in arriving at it.

Mr. ALLEN. Fifteen minutes for Mr. DOLE and 5 minutes for me.

Mr. CURTIS. Very well.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ALLEN. Mr. President, I will read from the letter to Chairman TALMADGE from the Department of Agriculture with respect to this amendment.

I ask unanimous consent that this letter from Alex Mercure be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. ALLEN. The agency states that there are only three issues which are of major concern to them at this time, and two of those amendments have not yet been introduced. One of those was this particular amendment that they ask.

Now, reading from the letter of the Department of Agriculture, they say:

In title II, the Emergency Agricultural Credit Adjustment Act of 1978, we believe it is essential that loans from this title not be used for acquisition of any new land. New land purchases can be accomplished through the regular farm ownership program with its increased limits. We oppose any language in Title II which would permit even limited land acquisition. The Administration's proposed language is attached.

That was the amendment I have offered.

WASHINGTON, D.C.

Hon. HERMAN E. TALMADGE,
Chairman, Committee on Agriculture, Nutrition and Forestry, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: We are pleased that the Senate will consider S. 2146 today. This legislation is important to many of the nation's farmers, as you have pointed out, and we believe it is a good bill.

There are differences between the Administration's proposals, the House passed bill and the package the Senate will consider today. There are only three issues which are of major concern to us at this time, and two of those are amendments which are yet to be introduced.

In Title II, the Emergency Agricultural Credit Adjustment Act of 1978, we believe it is essential that loans from this title not be used for acquisition of any new land. New land purchases can be accomplished through the regular farm ownership program with its increased limits. We oppose any language in Title II which would permit even limited land acquisition. The Administration's proposed language is attached.

The Administration along with many members of the Senate continues to be concerned with the Farmers Home Administration emergency disaster program and a similar program administered by the Small Business Administration. We have no amendment which is timely for consideration today. But we would recommend continuing with the present program until the FmHA/SBA problem is resolved and/or until the new crop insurance proposal, if enacted by the Congress, makes clear the appropriate role, if any, for a disaster loan program in FmHA.

The final item gives us the most serious problems. As you know, the House passed an amendment (Smith-Glickman) which basically says FmHA home loan guarantees will be made under terms and restrictions no less favorable to the borrower and in amounts at least equal to those offered by the Department of Housing and Urban Development.

There are at least four major differences between HUD and FmHA program:

1. FmHA remains a lender of last resort and thus requires a credit elsewhere test before making a loan;

2. The FmHA home mortgage limit is $33,000 and HUD's is $60,000;

3. There is no income limit on an individual working through HUD while FmHA's programs are limited to families with adjusted annual incomes of $20,000 and less;

4. FmHA still finances "modest" housing while HUD places no limitations on size or style of house to be financed.

The concern of many Members of Congress about the failure of FmHA to implement the above-moderate guarantee loan program authorized last year is certainly understandable and justified. As late as this morning, we once again explained to senior officials in the Office of Management and Budget the importance and need for an above-moderate guarantee program. While the immediate reasons for implementing such a program are obvious, we again pointed out that there is a lack of credit available for many middle-income families in rural America to purchase homes and that the current direction of the credit market is compounding the situation.

There have been no hearings, either in Agriculture or Housing committees, on the Smith-Glickman proposal and no evaluation of the additional cost, both in actual budget outlays and in personnel years, of the program. We feel most strongly that an amendment to S. 2146 similar to the House passed version by Smith-Glickman would jeopardize an otherwise sound, and vital piece of legislation.

Sincerely,

ALEX MERCURE,
Assistant Secretary.

Mr. CURTIS. I yield myself such time as I require, in opposition to the amendment.

Mr. President, the distinguished Senator from Kansas (Mr. DOLE) later will speak on this matter, but I wish to express some feelings I have about it at this time.

What is sought here is not the right nor the opportunity to borrow money under this disaster program, to set somebody up in farming, or to make material enlargement of their farming operations; but we also think it would be a mistake to have a prohibition that none of the funds could be used to buy land.

Suppose a farmer is suffering an economic disaster, and it is justified that FmHA make a disaster loan so the person can carry on his business and be self-producing. Suppose an examination of the farm indicates that his buildings and his feedlots should be moved to higher ground to avoid pollution and flood problems that have caused losses in the past. The only logical way is to buy an additional 20 acres, or whatever is required. The position of the Department of Agriculture would prohibit that from happening.

There could be many other situations in which to grant an economic disaster loan the farmer might have to acquire some additional land.

In some places in the United States, the underground water is not too plentiful, and you have to drill in a number of places to find an adequate supply of water. In the area in which I live, that is not true. We have an abundance of underground water. But there are sections where that is not quite the situation.

A disaster has hit, and a person needs to sink a new well. Those who are ready to put in the well say, "Your land is

not the proper place, but nearby, if you could acquire a few acres and get that in, you could set up and carry on."

I could go on and on and cite many examples in which, in order to carry out the intent of this bill, we should not have a provision that denies the right to spend any of the money for land.

The distinguished Senator from Kansas will speak for himself; but so far as I am concerned, as one member of the committee, I would be willing to have it understood, and write it into the RECORD, that this should be construed very narrowly, that it should not be used to enlarge one's operation, to set somebody up in farming who does not have any land now. That is what the other programs are for. Also, it should not be used for expansion of a person's operation.

The letter read by the distinguished Senator from Alabama says that these loans are available through the regular program. That indicates that often Washington is behind the times, that what they are talking about is quite unreal, when you are back out in the country where the farms exist.

The reason I say that is our existing programs are for lending money to buy land, whether it be desired to buy some additional land, to make an operation more economically feasible, or to finance a new farm, so that a person can buy some land and become not only a farm operator but also a landowner. Why can they not go to those programs and get the money in the cases I have cited? Because they are overcommitted now. In many places, it takes 12 months to be reached.

When a disaster hits, you are going to provide some emergency money to keep the farmer going. Speed is one of the important elements.

So it is not true, as claimed by the Department, that there is another avenue by which they could get the money to buy land in these cases where the need for land is tied directly to those activities related to meeting the disaster that occurred.

We are talking about instances in which the disaster results in economic loss. Throughout the Middle West, funds for farm ownership loans are in short supply in many States. It takes up to 1 year, and often longer than that, to get a loan. This is too long when you are dealing with a loss arising from an economic disaster.

We need to keep open the opportunity by which they could buy some land if, in the judgment of the administrators, that was the thing to do. Also, we must keep in mind that the administrators will have to administer this law in toto. It is not a farm ownership plan. It is not to put new farmers in or to expand others, but it is to meet the disaster situation. Therefore, by its very nature, it would be narrow.

Again I say that the distinguished Senator from Kansas will speak for himself on this matter. But I do believe it is well that the RECORD show at this time what some of us had in mind when we supported the amendment of the distinguished Senator from Kansas.

I yield the floor.

Mr. ALLEN. Mr. President, I ask unanimous consent that the amendment I have offered on behalf of the administration be carried over until tomorrow and that, when called up, the time thereon be divided—15 minutes to Mr. DOLE and 5 minutes to the manager of the bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 1255

Mr. ALLEN. Mr. President, I send to the desk an amendment on behalf of and at the request of Mr. ABOUREZK, who is unable to be in the Senate today.

The PRESIDING OFFICER. Without objection, the amendment is in order, and it will be stated.

The assistant legislative clerk read as follows:

The Senator from Alabama (Mr. ALLEN), for Mr. ABOUREZK, proposes an unprinted amendment numbered 1255.

Mr. ALLEN. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the bill add the following new section:

"SEC. —. The Secretary of Agriculture is authorized to make loans from the Farmers Home Administration Direct Loan Account created by section 338(c), and to make and insure loans as provided in section 308 and 309, of the Consolidated Farmers Home Administration Act of 1961, as amended (7 U.S.C. 1988(c), 1928, 1929), to any Indian tribe recognized by the Secretary of the Interior or tribal corporation established pursuant to the Indian Reorganization Act (25 U.S.C. 477), which does not have adequate uncommitted funds, to acquire land, buildings, or other improvements, or interests therein, and to improve land, including buildings, water development, conservation and pollution abatement or control practices, purchase livestock, equipment and other operating purposes, and refinance debts. Loan funds will be used on property or enterprises located within the tribe's reservation as determined by the Secretary of the Interior, or within a community in Alaska incorporated by the Secretary pursuant to the Indian Reorganization Act, for use of the tribe or the corporation or members of either. Such loans shall be limited to such Indian tribes or tribal corporations as have reasonable prospects of success in their proposed operations and as are unable to obtain sufficient credit elsewhere at reasonable rates and terms to finance the purposes authorized in this Act.".

Mr. ALLEN. Mr. President, I send to the desk a statement by Mr. ABOUREZK, and I ask unanimous consent that it be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

STATEMENT BY MR. ABOUREZK

S. 2146 has as its objective the improvement of Federal credit assistance to farmers, ranchers and rural communities. The reasons that such credit assistance is needed have been made all too clear in the past few months. Although I would like it to go further, I am a strong supporter of S. 2146. However, I feel that there is one important provision that is lacking.

Agriculture has a great impact on the American Indian. The economic survival of most Indians on reservations is dependent on agriculture. That is why I am offering this amendment.

Today I am introducing a brief amendment to P.L. 91–229. Its purpose is to alter Section 1 to provide for more practical loans to Indian Tribes.

As Chairman of the Indian Committee, the present structure of Agricultural loans to Tribes is of great concern to me. This issue was addressed by the American Indian Policy Review Commission. That Commission was a two-year commitment by Congress to investigate the real problems of past Indian policy and propose a consistent and well thought out policy for the future. The Joint Commission was ably served by Senator Hatfield and former Senator Metcalf from the Senate side.

The Act as it now stands only provides loans for Indian Tribes for the purpose of acquiring land or interests in land. As the Commission points out, this policy has been gravely inadequate in the past. It is of no help to Tribes to acquire useless land. They need to be able to buy seed and equipment and livestock to make economic use of the land. With such loans, Tribes could begin the first steps toward economic self-sufficiency.

South Dakota farmers and ranchers, like others throughout the country, are still caught in the legacy of the devastating drought that gripped the state for the past several years. While the drought cycle has been broken and the rains are coming once more, the economic losses that resulted from its severity and length still impose a huge burden on producers. Indian Tribal communities were especially hard hit and the long rebuilding process necessarily requires money for land improvement and new seed. The amendment I am offering today would enable recognized Indian Tribes to receive funding for the operating expenses that accrue in the day-to-day operation and rebuilding of their hard-hit farms and ranches. Without this assistance, many otherwise sound operations could flounder and fail.

Members of the Agriculture Department have indicated that the Act as it now stands does not allow for land improvement loans to Indian Tribes and Tribal corporations. This amendment would enable Tribes to get off the public dole and on to their feet.

Mr. ALLEN. Mr. President, this amendment by Mr. ABOUREZK has to do with the ability of recognized Indian tribes to borrow money or secure loans from the Farmers Home Administration.

The present law gives the Secretary authority, through the Farmers Home Administration, to make loans to recognized Indian tribes for the purpose of purchasing land. But valuable as land is, the land in the areas where the Indian tribes live, as well as land in any other section of the country, has little value unless it can be developed, unless water rights can be obtained, unless buildings can be erected, unless land can be built upon, unless livestock is able to be purchased, unless equipment can be purchased.

And this amendment merely extends the power and authority of the Farmers Home Administration to make loans to Indian tribes not only to purchase land but to build up the land and to get into farming or ranching operations. It does have the approval of the Farmers Home Administration and unless there is objection by some Senator I am going to ask that the Senate approve the amendment by voice vote.

I yield back the remainder of my time.

The PRESIDING OFFICER. Has all time been yielded back?

Mr. CURTIS. I yield back my time.

The PRESIDING OFFICER. The re-

mainder of time having been yielded back, the question is on agreeing to the amendment.

The amendment was agreed to.

Mr. ALLEN. Mr. President, I thank the Chair.

I suggest the absence of a quorum and ask unanimous consent that the time not be charged to either side.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ALLEN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER TO RESUME CONSIDERATION OF S. 2146 TOMORROW

TIME LIMITATION AGREEMENTS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that after the two leaders are recognized on tomorrow under the standing order the Senate resume its consideration of the now pending business, the Agricultural Credit Assistance Act, and that at that time Mr. EAGLETON be recognized to call up an amendment and that there be a time agreement on that amendment of 30 minutes to be equally divided; that upon the expiration of the time for debate on that amendment, the Senate proceed to the consideration of amendment by Mr. ALLEN, on which there be a time limitation of 20 minutes to be controlled as follows: 15 minutes by Mr. DOLE and 5 minutes by Mr. ALLEN.

Mr. President, be it further ordered that upon the expiration of these times and the hour of 2 o'clock having not yet arrived, that the bill be set aside temporarily, and the Senate proceed then to the consideration of the waterways bill, with the understanding that at 2 p.m. the Senate would return to the agricultural bill and that the votes which have been stacked up by that time then begin occurring, that they occur back-to-back, with the amendment, if there is a rollcall vote on the Eagleton amendment, it occur first; and that the rollcall vote, if ordered, on the amendment by Mr. ALLEN occur then subsequent thereto; and that the vote on the Clark amendment occur subsequent thereto; and, provided further, if there are amendments to amendments, that they occur in proper order.

That upon the disposition of the various amendments, the Senate then proceed to vote on the passage of the Agricultural Credit Assistance Act of 1978, with the proviso that paragraph 3 of rule XII be waived, and that upon the disposition of the agricultural credit assistance bill, the Senate then resume consideration of the waterways bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I would like to augment the earlier unanimous-consent request by asking unanimous consent that no further amendments beyond those that were specified in the unanimous-consent request on the Agricultural Credit Assistance Act of 1978 be in order on tomorrow.

Mr. BAKER. Mr. President, reserving the right to object, I wonder if the majority leader would withhold that request for a moment. I have been advised we have a number of Senators who are not here, some of whom are directly involved in agricultural legislation, and I would like to check with them.

Mr. ROBERT C. BYRD. Mr. President, I withdraw that request for the time being. I thought, may I say to the distinguished minority leader, that the staff had been contacted to ascertain whether or not there were other amendments.

Mr. BAKER. Mr. President, the Senator is correct. This is certainly no reflection, as the Senator knows, on him or on the majority staff, but rather this matter was just brought to my attention, and I think I ought to check.

Mr. ROBERT C. BYRD. Mr. President, I withdraw the request for now.

(Later the following occurred:)

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that on tomorrow when the Senate has disposed of the amendments that were earlier specified in connection with the agricultural bill, that if there be no further amendments—and if there be such, of course, there will be no debate on them under the order—or upon the disposition of such further amendments without debate, the Senate then proceed to third reading of the bill without further debate or motion, and that the Senate then proceed to the consideration of the companion House bill without further motion or debate, and that the final vote occur on the House bill, as amended, at that time without further debate.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that, with respect to the final vote on the House bill, which is a companion measure for the Senate agriculture bill, paragraph 3 of rule XII be waived.

The PRESIDING OFFICER. Without objection, it is so ordered.

AGRICULTURAL CREDIT ASSISTANCE ACT OF 1978

The Senate continued with the consideration of the bill.

Mr. MORGAN. Mr. President, there is an unquestionable need for the modernized farm financing that is embodied in S. 2146.

This legislation is a welcome and much-needed complement to other farm programs that have been previously discussed during the 95th Congress or will be enacted in the coming months.

There are two choices before us today. We can either bury our heads in sand like an ostrich or we can face up to current credit problems and try to devise rational solutions.

Since 1935, the Farmers Home Administration has served this Nation's farmers in an important and constructive manner. Without the FmHA's system of direct, guaranteed, and insured loans, we would have far fewer family farms in this great country.

As it is, we lost 26,000 family farms in 1977. This bill, which I cosponsor, will help reverse this alarming trend.

Some fear that S. 2146 will fuel land and production expense inflation. These individuals argue that making more Federal dollars available to farmers will contribute to still further increases in the cost of farming.

I do not believe the evidence supports this view. Farming has been greatly affected by inflation. Much of this inflation can be traced to the Arab oil embargo. Still more of the inflation can be attributed to poor fiscal and monetary policy management, including the increased Federal debt.

Generally, farming has become more expensive because of increased technology. The number of farmers and farmworkers in this Nation has decreased although in North Carolina the increase has not been as dramatic as it was for the rest of the Nation.

Technology has been necessitated by consumer demands for less expensive food. To drive down production expenses on a per-unit base, farmers have had to replace labor with expensive machinery.

While the cost of farming was accelerating, Federal financing efforts were stationary.

We must not forget that the FmHA was created during the depths of the Great Depression. When FmHA was spawned, farmers were literally turning over the operation of their homesteads to big city bankers.

Without the FmHA, the family farmer would not have survived.

Without some form of Federal financing, the family farm would disappear, to be replaced by corporate farming. With corporate farming, prices paid by consumers would increase dramatically because resources would be concentrated in the hands of a few who would make pricing decisions for 215 million American consumers.

Indeed, a Federal farm credit system is in the public interest.

Unfortunately, it is becoming increasingly evident that local financial institutions do not have the wherewithal to finance American agriculture. I would prefer adequate private financing. Due to the uncertainty inherent in farming because of weather, private financial institutions simply are not willing to underwrite any but the most wealthy farmers.

One of my disappointments with this bill today is that it may lack equity for rural America. I believe that our farmers should pay interest rates that are comparable to rates charged by the Department of Housing and Urban Development or the Small Business Administration. In my opinion, the interest rates available to farmers through FmHA are excessive in comparison to other Federal loan programs.

Mr. President, statistics from my home State will demonstrate how farm costs have increased. In just the past 5 years, productions costs have risen by 65 percent. Moreover, an acre of farm-

land that cost $396 in 1972 nearly doubled in value to $675 in 1977. During the same period of time, the average size farm was increasing from 106 to 113 acres.

The past 5 years have not been particularly bright for the farmers of North Carolina. During this period of time, the Tarheel State lost 19,000 family farmers. This loss could have been reduced, in my opinion, by more adequate Federal programs.

Mr. President, I would like to commend the distinguished floor manager of this bill, Senator ALLEN, for bringing to this Chamber a bill that is vitally needed by rural America. I strongly urge my fellow Senators to vote for this farsighted legislation which clearly is in the best interests of this great country.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that there now be a period for the transaction of routine morning business not to extend beyond 1 hour with statements limited therein to 10 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Chirdon, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

PROPOSED CONSTITUTION FOR THE TERRITORY OF GUAM—MESSAGE FROM THE PRESIDENT PM–171

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with an accompanying document, which was referred to the Committee on Energy and Natural Resources:

To the Congress of the United States:

In accordance with the provisions of Section 5 of the Act of October 21, 1976 (Public Law 94–584), I am hereby transmitting for the consideration of the Congress a proposed constitution for the Territory of Guam. The constitution, drafted by a territorial constitutional convention, was officially submitted to the Secretary of the Interior, who accepted it on my behalf, by the Honorable Ricardo J. Bordallo, Governor of Guam, on March 1, 1978.

Public Law 94–584 requires that I submit the constitution to the Congress, along with my comments. I am confident that the Congress will share my belief that the basic principles incorporated into the constitution provide a firm foundation upon which the people of Guam can assume greater responsibilities of local self-government in political union with the United States. Because it is their constitution, and must be respected as such, I shall confine my comments to those aspects of the document which relate directly and significantly to the territorial-Federal relationship. Accordingly, I would like to bring to the attention of the Congress the following aspects of the proposed constitution:

—Contrary to the express requirement of Section 2(b)(1) of Public Law 94–584 (the Enabling Act), the constitution does not explicitly recognize the sovereignty of the United States over Guam or the supremacy of its laws, a point noted by the Departments of State, Justice, and Interior in their reviews of the document. Accordingly, I ask the Congress to consider complications which could arise with respect to future claims of sovereignty and supremacy should it decline to take any of the corrective actions prescribed in Section 5 of the Enabling Act.

—Article IV, Section 1, of the constitution vests in the elected Governor responsibility for the faithful execution of the Constitution and laws of the United States applicable to Guam. In view of the Supreme Court's decision in *Buckley* v. *Valeo* (424 U.S. 1) that persons who enforce the laws of the United States must be appointed in the constitutionally prescribed manner, I ask the Congress to give careful consideration to this provision. Moreover, I suggest to the Congress that responsibility for the execution of Federal law is not a matter of local self-government and invite the Congress to consider whether the inclusion of such a clause, even if deemed constitutionally permissible, could lead to friction between the Governor and the Federal Government.

—Article V, Section 4(a), of the constitution provides for legislative apportionment on the basis of the number of registered voters in each district. I call to the attention of the Congress the Supreme Court's admonition in *Burns* v. *Richardson* (384 U.S. 73) and *Ely* v. *Klahr* (403 U.S. 108) that the use of voter registration as a basis may perpetuate underrepresentation of groups constitutionally entitled to participate in the electoral process and is permissible only if it produces a distribution of legislators not substantially different from that which would have resulted from the use of a permissible population basis.

—Article X, Section 4, of the constitution would amend the provision in Section 11 of the Organic Act of Guam (48 U.S. 1423a), which imposes public debt limitations on the territory. In light of the territory's fragile local economy and the continued financial responsibility of the Federal Government for Guam, I ask the Congress to give careful consideration to this provision.

In view of its responsibilities under the Territories Clause of the United States Constitution, the Congress may wish to review the proposed constitution for Guam on bases other than just the effect of its provisions on the territorial-Federal relationship to which I have limited my comments.

Specifically, the appropriate committees of the Congress may wish to examine whether certain provisions of the Guam constitution are drafted with sufficient clarity to avoid the type of litigation that could preclude effective government. For example, the elevation to constitutional status of certain rights in Article II of the proposed constitution could cause such a result. Under our own system, many of these same rights are provided for by statute, not by the Constitution itself.

Also, the amendment procedure contained in Article XIV of the proposed constitution does not provide for review by the Congress, a requirement which does pertain to the basic document. The Congress may wish to consider the friction which could arise between Guam and the Federal Government should the constitution be amended in a way which would conflict with United States law.

Accordingly, I have directed the Attorney General and the Secretary of the Interior to provide the appropriate committees of both Houses with such technical advice and assistance as may be required. Both Departments have conducted thorough analyses of the proposed constitution and can offer the Congress additional information and recommended changes in language should the Congress choose to take any of the corrective actions prescribed in Section 5 of the Enabling Act.

I trust these comments will be of use to the Congress in its review.

JIMMY CARTER.

THE WHITE HOUSE, *April 28, 1978.*

RECIPROCAL FISHERIES AGREEMENT BETWEEN THE UNITED STATES AND CANADA—MESSAGE FROM THE PRESIDENT PM–172

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with accompanying papers, which was referred to the Committee on Foreign Relations and the Committee on Commerce, Science. and Technology, jointly, by unanimous consent:

To the Congress of the United States:

I transmit herewith a Reciprocal Fisheries Agreement for 1978 between the Government of the United States and the Government of Canada, effected by an exchange of diplomatic notes dated April 10 and April 11, 1978.

The Agreement, which continues through 1978 the provisions of the 1977 Reciprocal Fisheries Agreement with a few modifications, protects important United States interests in our fisheries off Canada and maintains the opportunity for conclusion of long-term maritime arrangements on boundaries, hydrocarbons and fisheries resources, including salmon, between the United States and Canada.

As was the case with the 1977 Reciprocal Fisheries Agreement, positive Congressional action is required to bring the 1978 Agreement into force. I recommend that the Congress give favorable consideration to the Agreement at an early date to establish the legal basis for the continuation of reciprocal United States-Canadian fisheries during 1978.

JIMMY CARTER.

THE WHITE HOUSE, *May 1, 1978.*

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that a message received today from the President of the United States, including a reciprocal fisheries agreement between the United States and Canada, be jointly referred to the Committees on Commerce, Science, and Transportation and Foreign Relations.

The PRESIDING OFFICER. Without objection, it is so ordered.

PRESIDENTAL APPROVAL

A message from the President of the United States stated that on April 28, 1978, he had approved and signed the following enrolled act:

S. 2597. An act to amend title 28, United States Code, to move the place for holding court for the district court of the eastern district of New York to Brooklyn and Hempstead, and for other purposes.

MESSAGES FROM THE HOUSE

At 11:02 a.m., a message from the House of Representatives delivered by Mr. Berry, one of its reading clerks, announced that the House has passed the following bills and joint resolution in which its requests the concurrence of the Senate:

H.R. 8494. An act to regulate lobbying and related activities;

H.R. 11302. An act to authorize appropriations for environmental research, development, and demonstrations for the fiscal year 1979, and for other purposes;

H.R. 11504. An act to amend the Consolidated Farm and Rural Development Act, provide an economic emergency loan program to farmers and ranchers in the United States, and extend the Emergency Livestock Credit Act; and

H.J. Res. 859. A joint resolution making supplemental appropriations for the U.S. Railway Association for the fiscal year ending September 30, 1978, and for other purposes.

At 3:29 p.m., a message from the House of Representatives delivered by Mr. Hackney, one of its reading clerks, announced that the House has passed the following bills and joint resolutions, without amendment:

S. 917. An act to provide for conveyance of certain lands adjacent to the Gund Ranch, Grass Valley, Nev., to the University of Nevada;

S. 2220. An act to authorize the Secretary of the Treasury to designate an Assistant Secretary to serve in his place as a member of the Library of Congress Trust Fund Board;

S.J. Res. 106. A joint resolution to provide for the reappointment of A. Leon Higginbotham, Jr., as a citizen regent of the Board of Regents of the Smithsonian Institution.

S.J. Res. 107. A joint resolution to provide for the reappointment of John Paul Austin as a citizen regent of the Board of Regents of the Smithsonian Institution; and

S.J. Res. 108. A joint resolution to provide for the appointment of Anne Legendre Armstrong as a citizen regent of of the Board of Regents of the Smithsonian Institution.

HOUSE BILLS AND JOINT RESOLUTION REFERRED

The following bills and joint resolution were read twice by their titles and referred as indicated:

H.R. 8494. An act to regulate lobbying and related activities; to the Committee on Governmental Affairs.

H.R. 11302. An act to authorize appropriations for environmental research, development, and demonstrations for the fiscal year 1979, and for other purposes; to the Committee on Environment and Public Works.

H.J. Res. 859. A joint resolution making supplemental appropriations for the U.S. Railway Association for the fiscal year ending September 30, 1978, and for other purposes; to the Committee on Appropriations.

HOUSE BILL PLACED ON CALENDAR

The following bill was read twice by its title and placed on the calendar:

H.R. 11504. An act to amend the Consolidated Farm and Rural Development Act, provide an economic emergency loan program to farmers and ranchers in the United States, and extend the Emergency Livestock Credit Act.

REFERRAL OF S. 2939 TO THE COMMITTEE ON ARMED SERVICES

Mr. HARRY F. BYRD, JR. Mr. President, the Intelligence Committee has reported to the Senate, S. 2939, a bill authorizing appropriations for the Central Intelligence Agency and other intelligence activities for fiscal year 1979.

Section 3(b) of Senate Resolution 400, which established the Senate Select Committee on Intelligence, provides that if that committee reports legislation containing any matter otherwise within the jurisdiction of any standing committee, that bill may, at the request of the chairman of that standing committee, be referred to it for consideration for a period not to exceed 30 days.

Mr. President, since this bill contains authorization of appropriations for intelligence to act for the full committee of Defense, it falls within the longstanding jurisdiction of the Committee on Armed Services. Senator STENNIS, chairman of the committee, has asked me as chairman of the Subcommittee on Intelligence to act for the full committee on this matter. I, therefore, request that the bill be referred to the Armed Services Committee for 30 days.

The PRESIDING OFFICER. Pursuant to section 3(b) of Senate Resolution 400, 94th Congress, 2d session, the legislation shall be so referred for a period of not to exceed 30 days.

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. SPARKMAN, from the Committee on Foreign Relations:

William B. Edmondson, of Nebraska, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of South Africa.

(The above nomination from the Committee on Foreign Relations was reported with the recommendation that it be confirmed subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

POLITICAL CONTRIBUTIONS

Nominee: William B. Edmondson.

Contributions, amount, date, and donee:

1. Self: William B. Edmondson: None, except for nonpartisan Presidential Election Campaign Fund on Federal Income Tax Return.

2. Spoues: Donna K. Edmondson: None, except as above.

3. Children and Spouses: Barbara & husband Richard Schneider: None with same exception. Paul W. Edmondson: None.

4. Parents: Harold Edmondson: None. Laura S. Edmondson: None.

5. Grandparents: None living: None.

6. Brothers and Spouses: No siblings: None.

7. Sisters and Spouses: No siblings: None.

I have listed above the names of each member of my immediate family including their spouses. I have asked each of these persons to inform me of the pertinent contributions made by them. To the best of my knowledge, the information contained in this report is complete and accurate.

By Mr. SPARKMAN, from the Committee on Foreign Relations:

Davd Bronheim, of the District of Columbia, to be an Assistant Administrator of the Agency for International Development.

(The above nomination from the Committee on Foreign Relations was reported with the recommendation that it be confirmed subject to the nominee's commitment to respond to requests to appear and testify before and duly constituted committee of the Senate.)

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first time and, by unanimous consent, the second time, and referred as indicated:

By Mr. GRAVEL (for himself and Mr. STEVENS):

S. 3016. A bill to amend the Alaska Native Claims Settlement Act to provide clarifications and improvements in the provisions thereof; to the Committee on Energy and Natural Resources.

By Mr. WILLIAMS (for himself and Mr. JAVITS):

S. 3017. A bill to amend the Employee Retirement Income Security Act of 1974 and

the Internal Revenue Code of 1954 for the purpose of simplifying, clarifying, and improving Federal law relating to the regulation of employee benefit plans, to foster the establishment and maintenance of plans, and for other purposes; to the Committee on Finance and the Committee on Human Resources, jointly, by unanimous consent.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. GRAVEL (for himself and Mr. STEVENS):

S. 3016. A bill to amend the Alaska Native Claims Settlement Act to provide clarifications and improvements in the provisions thereof; to the Committee on Energy and Natural Resources.

ALASKA NATIVE CLAIMS SETTLEMENT ACT AMENDMENTS

● Mr. GRAVEL. Mr. President, today I am introducing legislation which would amend the Alaska Native Claims Settlement Act in a number of places to clear up many of vagaries and problems which have resulted in implementing the terms of this act.

The Claims Act which we passed in 1971 provided for what I still believe was an equitable and just settlement of aboriginal claims in Alaska. This act was literally made from scratch to deal with a host of unique problems and conditions found only in Alaska. What was forged was, indeed, a remarkable and creative piece of legislation reflecting the ideas and views of Native people in Alaska, State, and Federal Governments, various committees, and Members of Congress and many other concerned people. The resulting bill was necessarily complex and plowed much new ground for which many administrative rules, regulations, and policies had to be promulgated. Thus, despite several amendments over the past several years there still remain provisions of the bill which have remained unclear, have been interpreted in a manner not in keeping with the spirit and intent of the original act, have omitted terms or conditions necessary for swift implementation or to carry out the intent of the act, or which could result in future long-term problems.

This bill addresses the key problem areas which have been experienced or which are anticipated in the implementation of the Claims Act (ANCSA). All of these amendments represent the work and input of various village and regional Native corporations founded under the terms of NACSA and by the Alaska Federation of Natives. Although I think some of these amendments will require additional input and modifications, I am in strong support of the intent of virtually all of the amendments contained in this bill.

One amendment which I feel is especially important is the change in section 7(h)(3) of ANCSA contained in section 2 of this bill. Unless this amendment is enacted it is conceivable that after 1,991 Native corporations could be taken over by non-Native persons or corporations through the alienation of stock currently held by Native shareholders. Such an occurrence would be tragic. It is incumbent upon the Congress to uphold the original purposes of ANCSA in this matter. Although we obviously set up the corporations to exercise all the normal activities and options of any private corporation, we also intended that these corporations should function for the benefit of the Native people involved. Thus, although some shareholders may want to take advantage of their rights to sell their corporation shares, other persons wishing to continue their financial participation in the corporation should not be faced with the threat of usurption of Native control of the corporation by non-Native individuals or corporations.

There are many other provisions in this bill which are important and which are explained in the summary accompanying my remarks. Although most of these amendments I view as noncontroversial, I do recognize that there may be conflicts with some of these amendments. I am confident that some language changes or additions can be made in these amendments to reduce any conflicts equitably.

Many of the provisions of ANCSA have yet to be fully implemented. Only a fraction of the land entitlement of the corporations has been conveyed after 7 years since we passed this legislation. Time is of the essence in making ANCSA fully "operational." Therefore, I would urge my colleagues to take fast action on this legislation.

Mr. President, I ask unanimous consent that this bill be printed in the RECORD, together with a summary of its provisions.

There being no objection the bill and the summary were ordered to be printed in the RECORD, as follows:

S. 3016

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Alaska Native Claims Settlement Act Amendments of 1978".

STOCK ALIENATION

SEC. 2. (a) Section 7(h)(3) of the Alaska Native Claims Settlement Act is amended to read as follows:

"(3)(A) On December 18, 1991, all stock previously issued shall be deemed to be cancelled, and shares of stock of the appropriate class shall be issued to each stockholder share for share subject only to such restrictions as may be provided by the articles of incorporation of the corporation if adopted by December 18, 1991, or agreements between corporations and individual shareholders.

"(B) Restrictions which may be provided by amendment to the articles of incorporation include, in addition to any other legally permissible restrictions—

"(i) the denial of voting rights to any holder of stock who is not a Native or a descendent of a Native, and

"(ii) the granting to the corporation, or to the corporation and a stockholder's immediate family, on reasonable terms, the first right to purchase a stockholder's stock (whether issued before or after the adoption of the restriction) prior to the sale or transfer of such stock (other than a transfer by inheritance) to any other party, including a transfer in satisfaction of a lien, writ of attachment, judgment execution, pledge or other encumbrance.

"(C) Notwithstanding any provision of Alaska law to the contrary—

"(i) any amendment to the articles of incorporation of a Regional Corporation to provide for any of the restrictions specified in clause (i) or (ii) of subparagraph (B) shall be approved if such amendment receives the affirmative vote of the holders of a majority of the outstanding shares entitled to be voted of the corporation, and

"(ii) any amendment to the articles of incorporation of a Regional Corporation which would grant voting rights to stockholders who were previously denied such voting rights shall be approved only if such amendment receives, in addition to any affirmative vote otherwise required, a like affirmative vote of the holders of shares entitled to be voted.".

(b) Section 8(c) of such Act is amended to read as follows:

"(c) The provisions concerning stock alienation, annual audit, and transfer of stock ownership on death or by court decree provided for Regional Corporations in section 7, including the provisions of section 7(h)(3), shall apply to Village Corporations; except that audits need not be transmitted to the Committee on Interior and Insular Affairs of the House of Representatives or to the Committee on Energy and Natural Resources of the Senate.".

(c) At the end of section 1696(h)(1) of title 43, United States Code, insert immediately before the period the words: "or by a stockholder who is a member of a professional organization, association, or board which limits the ability of that stockholder to practice his profession because of holding stock issued under this Act."

VESTING DATE FOR RECONVEYANCES

SEC. 3. (a) Section 14(c)(1) of the Alaska Native Claims Settlement Act is amended by inserting "as of December 18, 1971" after "title to the surface estate in the tract occupied".

(b) Section 14(c)(2) of such Act is amended by inserting "as of December 18, 1971" after "title to the surface estate in any tract occupied".

(c) Section 14(c)(4) of such Act is amended by inserting ", as such airport sites, runways, and other facilities existed as of December 18, 1971" after "safe approaches to airport runways".

RECONVEYANCE TO MUNICIPAL CORPORATIONS

SEC. 4. Section 14(c)(3) of the Alaska Native Claims Settlement Act is amended by inserting before the semicolon at the end thereof a colon and the following:

"*Provided further*, That in the case of a Native Village which is located within an organized borough or unified municipality in which the Village Corporation will be subject to planning, zoning, and platting laws regarding the use and subdivision of lands, the Village Corporation need not make any such conveyance to any Municipal Corporation or to the State in trust for any Municipal Corporation, but such Village Corporation shall reconvey to such borough or unified municipality the surface estate in any land upon which improvements belonging to such organized borough or unified municipality are constructed, together with so much of the space about such improvements as is required for the convenient use or occupation of such improvements, upon payment of an amount not in excess of fair market value of such surface estate, determined as of the date of initial occupancy and without regard to such improvements.".

ATTORNEY FEES IN ACTION BROUGHT BY OR AGAINST THE UNITED STATES

SEC. 5. (a) The Alaska Native Claims Settlement Act is amended by inserting after section 20 the following new section:

"ATTORNEY FEES IN ACTION BROUGHT BY OR AGAINST THE UNITED STATES

"SEC. 20A. (a) In any action or proceeding under this Act brought by or against the United States, any agency thereof, or any official thereof acting in his official capacity, the court shall award the prevailing party,

other than the United States, such agency or such official, such sum as will in the opinion of the court reimburse such party for the reasonable costs, disbursements, and expenses, including reasonable attorney and professional fees, actually incurred by such prevailing party on account of the action or proceeding.

"(b) A claim for reimbursement of actual costs, disbursements, and expenses, including attorney and professional fees, which were incurred prior to the date of enactment of this section, may be submitted by any corporation established pursuant to the provisions of this Act, or by any individual entitled to receive title to land to be conveyed pursuant to this Act, to the Court of Claims for determination of the amount to be paid to such corporation or individual by the United States for expenses incurred by such corporation or individual in connection with—

"(1) any action under this Act brought by or against the United States, any agency thereof or any official thereof acting in his official capacity, in which the corporation or individual is the prevailing party; or

"(2) the adoption of any regulation or order issued or promulgated to carry out the purposes of this Act.

"(c) The Court of Claims of the United States shall have jurisdiction to hear and determine all claims arising pursuant to this section and to enter a final judgment or decree thereon. Any claim under this section must be filed with the Clerk of the Court of Claims within two years from the date of enactment of this section, and shall be in such form and contain such information as may be required by the rules of the Court. Any claim not so filed shall be forever barred.

"(d) A direct appeal to the Supreme Court may be made by any party from a final judgment or decree entered by the Court of Claims on a claim brought under this section.".

(b)(1) Section 1255 of title 28, United States Code, is amended by striking out the period at the end thereof and inserting in lieu thereof a semicolon and the following new paragraph:

"(3) By direct appeal by any party from a final judgment or decree entered by the Court of Claims on a claim brought under the provisions of section 20A of the Alaska Native Claims Settlement Act.".

(2) The heading of section 1255 of title 28, United States Code, is amended by adding at the end thereof "; direct appeal".

(3) The item relating to section 1255 in the table of contents of chapter 81 of title 28, United States Code, is amended by adding before the period at the end thereof "; direct appeal".

BASIS IN THE LAND AND RESERVES FROM LAND

SEC. 6. Section 21(c) of the Alaska Native Claims Settlement Act is amended to read as follows:

"(c)(1) The receipt of land or any interest therein pursuant to this Act or of cash in order to equalize the values of properties exchanged pursuant to subsection 22(f) shall not be subject to any form of Federal, State, or local taxation. The basis for computing gain or loss on subsequent sale or other disposition of such land or interest in land for purposes of any Federal, State, or local tax imposed on or measured by income shall, at the option of the recipient, be—

"(A) the fair value of such land or interest in land at the time of receipt; or

"(B) the amount realized on the sale or other disposition of such land or interest in land adjusted, by means of the Price Deflator Index for the Gross National Product published by the United States Department of Commerce, to the time of receipt of such land or interest in land;

adjusted as provided in section 1016 of the Internal Revenue Code of 1954 (relating to adjustments to basis).

"(2) All rents, royalties, profits, and other revenues or proceeds derived from real property interests received pursuant to this Act shall be taxable to the same extent as such revenues or proceeds are taxable when received by a non-Native individual or corporation: *Provided*, That with respect to any such revenues or proceeds received by a Native individual, Native group, or village or regional Corporation with respect to which a deduction for depletion would otherwise be allowable under section 611 of the Internal Revenue Code of 1954 (relating to allowance of deduction for depletion) or any corresponding provision of State and local law, the amount of such deduction shall be the greater of:

"(A) an amount equal to the deduction as determined by such section 611, using as the basis on which the depletion is to be allowed with respect to any property that basis provided in section 21(c) of this Act for purposes of computing the gain or loss on subsequent sale or other disposition of such property; or

"(B) an amount equal to the amount of such revenue adjusted, by means of the Price Deflator Index for the Gross National Product published by the United States Department of Commerce, to the time of receipt of the property interest from which the revenue is derived; or

"(C) an amount equal to the deduction computed pursuant to section 613 of the Internal Revenue Code of 1954 (relating to percentage depletion).".

LAND TAXATION

SEC. 7. Section 21(d) of the Alaska Native Claims Settlement Act is amended to read as follows:

"(d) Real property interests conveyed, pursuant to this Act, to a Native individual, Native group, or village or regional Corporation shall be exempt from State and local real property taxes for a period of twenty years after the date of receipt by such individual, group, or corporation of ninety percent of the interests to be conveyed to such individual, group, or corporation: *Provided*, That, for so long as any portion of such an interest is being developed for purposes other than exploration, any municipal taxes, local real property taxes, or local assessments may be imposed upon such portion within the jurisdiction of any governmental unit under the laws of the State: *Provided further*, That any holder of a leasehold or similar interest may be taxed in accordance with State and local law."

TAXATION ON EXCHANGED LAND

SEC. 8. Section 21 of the Alaskan Native Claims Settlement Act is amended by adding at the end thereof the following new subsection:

"(g) Any unimproved real property interest acquired in exchange for a real property interest which is exempt from real property taxes, shall be deemed to be a property interest conveyed pursuant to this Act and shall be exempt from taxation as if conveyed pursuant to this Act."

SELECTION OF GOVERNMENT SURPLUS LAND

SEC. 9. Section 22(f) of the Alaska Native Claims Settlement Act is amended by adding at the end thereof the following new sentence: "Upon the termination of withdrawn or reserved status, or upon the declaration of surplus status, any withdrawals, reservations, or other public lands excepted from Native selection by section 3(e) or 11(a), which are located within the village withdrawal area established under section 11(a), or within the area of a former withdrawal or reserve for the benefit of the Native village or its inhabitants, shall be made available to the Village Corporation on the basis of an acre-for-acre exchange for other selections or selection rights of the Corporation: *Provided*, That any such withdrawals or reservations not acquired by the Village Corporation shall be made available to the Regional Corporation on the basis of an acre-for-acre exchange for other selections or selection rights of the Corporation: *Provided further*, That the election of such exchange by a Village or Regional Corporation shall be made without regard to the requirements of the Federal Property Management Regulations with respect to the utilization and disposal of real property, and if the exchange is made by a Village Corporation, shall have the relative priority afforded section 12(a) selections."

SUPPLEMENTAL APPROPRIATION FOR NATIVE GROUPS

SEC. 10. The Secretary of the Interior shall pay, by grant, $100,000 to each of the corporations established pursuant to section 14(h)(2) of the Alaska Native Claims Settlement Act and certified by the Bureau of Indian Affairs as an eligible Native Group.

LAND ALLOTMENTS

SEC. 11. (a)(1) All Alaska Native allotment applications pending before the Department of the Interior on December 18, 1971 are hereby approved. The Secretary of the Interior shall cause such allotments to be surveyed and shall issue trust patents therefor: *Provided*, That this section does not apply to applications for land which is of present economic mineral value (excluding value derived from deposits of sand and gravel) or land which was reserved at the time of application.

(2) Where a conflict between two or more Native allotment applications exists due to overlapping claims, an agreement among the parties adjusting the boundaries to resolve the conflict shall be accepted as an amendment to each application, and, upon request, the Secretary of the Interior shall provide technical assistance to applicants in their attempts to resolve boundary conflicts.

(3) Where a conflict between two or more applicants is not resolved by amendment, this section shall not apply.

(4) This section shall not apply whenever a Native Village Council files with the Secretary of the Interior a protest stating a claim based upon material fact conflicting with the allotment application. Any such protest must be filed within one year of the effective date of this Act.

(b) Any and all withdrawals and reservations for powersite purposes applicable to the Federal lands and interests therein within the boundaries of a conservation system unit in Alaska are hereby rescinded to the extent of such applicability. The Secretary of the Interior is authorized to grant any application for a Native allotment for land within any withdrawal or reservation for powersite purposes in Alaska, including land which was segregated or reserved at the time of entry, and to make an appropriate conveyance of such land to the applicant, if such applicant has complied with applicable statutes. Such land shall not be subject to the provisions of section 24 of the Federal Power Act of 1920, as amended, (16 U.S.C. 818).

PERSONAL HOLDING COMPANY ACT EXEMPTION

SEC. 12. No Corporation created pursuant to the Alaska Native Claims Settlement Act shall be considered to be a personal holding company within the meaning of section 542 (a) of the Internal Revenue Code of 1954 prior to January 1, 1992.

ESCROW ACCOUNTS

SEC. 13. (a) Section 2(a) of Public Law 94–204 is amended by striking out "From and after the date of enactment of this Act, or January 1, 1976, whichever occurs first" and inserting in lieu thereof "From December 18, 1971".

(b) Section 2 of such Public Law is further amended by adding at the end thereof the following new subsection:

"(e) Congress is authorized to appropriate such sums as may be necessary to carry out the purposes of this section.".

CHENEGA VILLAGE SELECTIONS

SEC. 14. (a) Within ninety days after the date of enactment of this Act, the corporation created by the enrolled residents of the Village of Chenega may file selections upon any of the following described lands:

Seward Meridian—

Township 3 South, range 2 west, sections 22–27 and 33–3C;

Township 4 south, range 2 west, sections 2–5, 8–11, 15–17, 20–22, 27–29, and 32–3C.

(D) The Secretary of the Interior shall receive and adjudicate such selections as though they were timely filed pursuant to section 12 (a) of the Alaska Native Claims Settlement Act and were withdrawn pursuant to section 11 of that Act.

(c) The Secretary of the Interior shall convey such lands selected pursuant to this authorization which otherwise comply with the applicable statutes and regulations. This section shall not be construed to increase the entitlement of the corporation of the enrolled residents of Chenega or to increase the amount of land that may be selected from the National Forest System. The subsurface of any land selected pursuant to this section shall be conveyed to the Regional Corporation for the Chugach Region pursuant to section 14 (f) of the Alaska Native Claims Settlement Act.

ENGLISH BAY VILLAGE SELECTIONS

SEC. 15. (a) Within ninety days after the date of enactment of this Act, the corporation created by the enrolled residents of the Village of English Bay may file selections upon any of the following described lands:

Seward Meridian—

Township 12 south, range 14 west, sections 1–7, 17–21, and 28–33;

Township 12 south, range 15 west, sections 1–10, 12, 15–17, and 24–25.

(b) The Secretary of the Interior shall receive and adjudicate such selections as though they were timely filed pursuant to section 12 (a) of the Alaska Native Claims Settlement Act and were withdrawn pursuant to Section 11 of such Act for selection by English Bay.

(c) The Secretary of the Interior shall convey such lands selected pursuant to this authorization which otherwise comply with the applicable statutes and regulations. This section shall not be construed to increase the amount of land that may be selected from lands withdrawn under section 11(a)(2) of the Alaska Native Claims Settlement Act. The subsurface of any land selected pursuant to this section shall be conveyed to the Regional Corporation for the Chugach Region pursuant to section 14(f) of the Settlement Act.

CHUGACH NATIVES, INC. LAND SELECTIONS WITHIN CHUGACH NATIONAL FOREST

SEC. 16. (a) Within ninety days after the date of enactment of this Act, the Regional Corporation for the Chugach Region shall be entitled to select lands under section 14(h)(8) of the Alaska Native Claims Settlement Act from within the Chugach National Forest.

(b) The Secretary of the Interior shall receive and adjudicate such selections as though they were timely filed pursuant to section 14(h)(8) of the Alaska Native Claims Settlement Act and such lands were available for selection under such provision.

(c) The Secretary of the Interior shall convey such lands selected pursuant to this authorization which otherwise comply with the applicable statutes and regulations. This statute shall not be construed to increase the amount of land which Chugach is entitled to select under section 14(h)(8) of the Alaska Native Claims Settlement Act.

"CORNERING" TOWNSHIPS

SEC. 17. Selections made pursuant to the Alaska Native Claims Settlement Act by a Village Corporation in a township which the Village Corporation contended, at the time of such selection, was withdrawn by reason of section 11(a) of such Act, but which township the Secretary of the Interior contended was not withdrawn by such section 11(a), are hereby validated. The Secretary of the Interior shall proceed to patent the lands to the extent the selection is otherwise valid under such Act if—

(1) the Native Village contended that the township in which the disputed selections lie was a township described in section 11(a)(1)(C);

(2) such township is generally North or South of, and next to the East or West of, any other township which the Secretary contended withdrawn by section 11(a)(1)(C); and

(3) the dispute involved the effect of survey correction lines upon the term "cornering" as used in section 11(a).

CONVEYANCES TO VILLAGES FOR LAND IN WILDLIFE REFUGES

SEC. 18. (a) Section 22(g) of the Alaska Native Claims Settlement Act is amended to read as follows:

"SEC. 22(g)(1) If a conveyance is issued to any Village Corporation for land within a unit of the National Wildlife Refuge System, the conveyance shall reserve to the United States the right of first refusal if the land is ever sold by the Village Corporation. Notwithstanding any other provision of this Act, every conveyance issued by the Secretary pursuant to this Act of lands within the boundaries of a unit of the National Wildlife Refuge System which existed on the date of enactment of this Act shall contain a provision that such lands remain subject to the laws and regulations governing use and development of such Refuge System unit: *Provided*, That the Secretary shall review such such conditions as set forth in the conveyance and shall determine whether the restrictions therein imposed remain necessary for the purpose of the Wildlife Refuge System unit.

"(2) If, at any five-year interval, the Secretary determines that the lands conveyed to a Village Corporation remain essential to the needs of the Wildlife Refuge System unit, the Village Corporation may elect to require the Secretary to exchange such lands for equal acreage without restrictions, elsewhere within the Region, preferably in the vicinity of the Village Corporation affected, and of a character similar to the lands on which the Village is located.

"(3) If the Secretary determines that suitable for an exchange so requested by a Village Corporation, there shall be paid to the affected Village Corporation an amount equal to the fair market value for lease of such lands. Such payment shall be made on a yearly basis."

(b) There are authorized to be appropriated such sums as may be necessary to carry out the purposes of this section.

TECHNICAL CORRECTIONS IN SECTION 15(a) OF PUBLIC LAW 94–204

SEC. 19. Section 15(a) of P.L. 94–204, 89 Stat. 1154–1155, is amended as follows:

(1) Strike the description beginning with "Township 36 south, range 52 west;" through "Township 41 south, range 53 west, sections 1, 2, 11, 12, 13, S.M., Alaska, notwithstanding;" and insert in lieu thereof the following:

"Township 36 south, range 52 west, all;

"Township 37 south, range 51 west, all;

"Township 37 south, range 52 west, all;

"Township 37 south, range 53 west, sections 1 through 4, 9 through 16, 21 through 24, and the North one-half of sections 25 through 28;

"Township 38 south, range 51 west, sections 1 through 5, 9, 10, 12, 13, 18, 24 and 25;

"Township 38 south, range 52 west, sections 1 through 35;

"Township 38 south, range 53 west, sections 1, 12, 13, 24, 25 and 36;

"Township 39 south, range 51 west, sections 1, 6, 7, 16 through 21, 28 through 33, and 36;

"Township 39 south, range 52 west, sections 1, 2, 11 through 15, and 22 through 24;

"Township 39 south, range 53 west, sections 33 through 36, and the south one-half of section 26;

"Township 49 south, range 51 west, sections 2 and 6;

"Township 40 south, range 52 west, sections 6 through 10, 15 through 21, and 27 through 36;

"Township 49 south, range 53 west, sections 1 through 19, 21 through 28, and 34 through 36;

"Township 49 south, range 54 west, sections 1 through 34;

"Township 41 south, range 52 west, sections 7, 8, 9, 16, 17 and 18;

"Township 41 south, range 53 west, sections 1, 4, 5, 8, 9, 11, 12 and 16;

"Township 41 south, range 54 west, section 6;

(2) Strike the initial word "The" in the line immediately following the description, and insert "notwithstanding the."

SUMMARY—ALASKA NATIVE CLAIMS SETTLEMENT ACT AMENDENTS

Section 2. Stock Alienation.—On December 18, 1991 the restrictions against stock alienation and non-Native voting expire, and, under current the current section 7(h)(3), new stock is to be issued "without restrictions required by this Act". The amendment to section 7(h)(3) clarifies that the corporations nevertheless may provide for appropriate voting and stock alienation restrictions by amendment to their articles of incorporation. Non-voting stock and restrictions on stock alienation are quite common, and the stockholders of each ANCSA corporation would be able to decide which such restrictions, if any, they wish to continue, in order to keep the corporation under Native control.

This section would also provide for special situations wherein individuals could alienate their stock prior to 1991 to enable members of a specialized profession such as certified public accountants to practice their profession for corporations in which they may be shareholders.

Section 3. Vesting Date for 14(c) Reconveyances.—This amendment clarifies the vesting date for land reconveyance rights under section 14(c). The vesting date would be December 18, 1971.

Section 4. Reconveyance to Municipal Corporations.—Section 14(c)(3) of ANCSA provides that at least 1280 acres of lands conveyed to Village Corporations be reconveyed to Municipal Corporations or to the State in trust for future Municipal Corporations for community expansion and needs and public rights-of-way. Because some villages are located within Boroughs having planning, zoning, and platting laws, the amendment would provide that there need not be any conveyance to Municipal Corporations or to the State in these cases where public needs can be taken care of under existing law.

Section 5. Attorney Fees.—This amendment is intended to compensate Native Corporations for the extraordinary legal expenses incurred in trying to obtain a just implementation of the Settlement Act. The amendment provides for reimbursement of expenses for successful legal endeavors.

Section 6. Basis in the Land and Reserves from Land.—The intent of this amendment is to provide a means for determining the basis of land and resources when that value is unknown at the time of conveyance. Presently ANCSA provides that the value of land is the fair value at the time of receipt. In

most cases land values are not known because land transactions have not taken place in most of rural Alaska and most resource values are unknown.

The amendment gives the owning corporation the option of using the fair market value at the time of receipt or the amount of money received for the sale or other disposition of land discount back to the date of conveyance using the Price Deflator Index of the U.S. Department of Commerce. The amendment also provides three options for determining deductions for depletion when Native Corporations develop their resources.

Section 7. Land Taxation.—ANCSA provided for a real property tax exemption for Native corporation lands until 1991. The intent was that the Native corporations be given 20 years to "get on their feet" and develop an economic base for their corporation prior to taxation. The conveyance of the corporation's largest asset, land, has largely not occurred yet, however. Thus, this amendment extends the tax exemption for undeveloped land to 20 years from the date 90 percent of a corporation's land is actually received. The amendment also permits resource exploration to proceed without endangering the tax exemption.

Section 8. Taxation on Exchanged Land.—This amendment would extend the tax exemption to any lands exchanged. This will greatly facilitate land consolidation as contemplated by the Act by removing the doubt about the taxable status of what is received in exchange for Native corporation lands.

Section 9. Selection of Government Surplus Land.—Many federal reserves or reservations located within Native selection areas were not available for selection by corporations under the terms of ANCSA. However, some of these lands may become surplus to federal needs in the coming years. This amendment would allow the corporations to select such surplus lands in exchange for lands already selected or conveyed to them.

Section 10. Supplemental Appropriation for Native Groups.—The amendment provides for $100,000 to be paid to certified Native Groups. Although these corporations were set up under ANCSA, no provisions were made for funds to be paid to these Groups for the purpose of running the corporations. If not adopted, most of the Groups will remain corporations on paper only and will be forced to put up some of their lands as soon as they are received to secure the necessary capital with which to function.

Section 11. Native Allotments.—The processing of Native Allotments has been extremely slow and frought with problems. The amendment would expedite conveyance of Allotment applications. It would also give Allotment applications priority over powersite withdrawals.

Section 12. Personal Holding Company Act Exemption.—The amendment provides that no corporation would be considered a personal holding company. The provision would protect Village corporations which might face a tax penalty because the shareholders of the corporation are closely related and have placed their money in securities and other passive investments.

Section 13. Escrow Accounts.—The amendment would make escrow accounts effective as of the date of the passage of ANCSA.

Section 14. Chenega Village Selections.—With an enrollment of less than one hundred stockholders, the Chenega Corporation is entitled to 69,120 acres of land under ANCSA. If the Regional Corporation distributes its 12(b) allocation on a per capita basis, the Chenega Corporation is entitled to receive another six or seven thousand acres under this provision. However, there is ceiling of 69,120 acres which is allowed any one village to select from National Forest lands under ANCSA. If the ceiling also applies to 12(b) selections, Chenega will have no withdrawal from which to select its entitlement as only National Forest lands are available around the village. The amendment would provide additional lands in the area from which to select all of the corporation's entitlement.

Section 15. English Bay Village Selections.—English Bay has a shortfall in its 12(a) selection of some six to nine thousand acres out of its entitlement of 69,120 acres. The Village Corporation was unable to select the balance of their entitlement from lands surrounding the village when some lands became unavailable for selection by them through a series of confusing and unfortunate circumstances. The amendment would again make these lands available for selection.

Section 16. Chugach Regional Corporation Selections with Chugach National Forest.—Chugach regional corporation's entitlement under section 14(h)(8) will probably be 35,000 to 40,000 acres. However, there are virtually no suitable lands in the region available from which to select this entitlement due to geography of the region and the presence of the Chugach National Forest. The amendment would allow the regional corporation to select its 14(h)(8) entitlement within Chugach National Forest.

Section 17. "Cornering" Townships.—In a few instances the presence of correction range lines in village selection areas has resulted in a reduced selection area because full townships assumed to be withdrawn for selection did not physically touch adjacent withdrawn townships because of intervening slivers of townships due to correction lines in the survey system. The amendment would make these full townships available as was the intent of ANCSA.

Section 18. Conveyances to Villages for Land in Wildlife Refuges.—While most Village corporation lands were conveyed without restrictions, lands selected by villages within existing wildlife refuges are required by ANCSA to be used in a manner consistent with the refuge rules and regulations. To provide all villages with an equal opportunity to develop land uses which they may desire, the amendment would provide that a village could receive other comparable lands outside the refuge system unit if the lands were found by the Secretary to be necessary for the purposes of the refuge.

Section 19. Technical Corrections in Section 15(a) of P.L. 94-204.—The amendment would correct mistakes which were made in the description of lands to be made available for selection by the Kodiak regional corporation under the terms of the previous amendment to ANCSA.●

By Mr. WILLIAMS (for himself and Mr. JAVITS):

S. 3017. A bill to amend the Employee Retirement Income Security Act of 1974 and the Internal Revenue Code of 1954 for the purpose of simplifying, clarifying, and improving Federal law relating to the regulation of employee benefit plans, to foster the establishment and maintenance of plans, and for other purposes; to the Committee on Finance and the Committee on Human Resources, jointly, by unanimous consent.

ERISA IMPROVEMENTS ACT OF 1978

Mr. WILLIAMS. Mr. President, today I am introducing the ERISA Improvements Act of 1978.

My bill amends the Employee Retirement Income Security Act of 1974 (ERISA) and certain provisions of the Internal Revenue Code of 1954 in order to foster and encourage the establishment and maintenance of private sector employee benefit plans, promote improvements in those plans, and streamline the Government's regulatory activities over them.

In the 3½ years since ERISA's enactment, I have closely observed its implementation by the Labor Department, Internal Revenue Service, and Pension Benefit Guaranty Corporation, and its effects on employee benefit plans and their participants. In the main, I am convinced that ERISA is a sound law and that its effects have been salutory.

The bill I introduce today will improve upon the regulatory framework Congress established in 1974, resolve certain problems that have arisen since ERISA's enactment, and spur the growth and improvement of private pension and welfare plans.

AGENCY JURISDICTION

Under ERISA, three Federal agencies are involved in regulating private employee benefit plans. This has resulted in confusion and delay for the public, and in duplication and overlap by the agencies. Furthermore, the division of agency responsibilities has hindered the development of a coherent Federal policy respecting the role of the private sector in providing retirement income.

My bill provides for the consolidation in one new agency, a five-member Employee Benefits Commission, of all the responsibilities under ERISA and most of the responsibilities under the Internal Revenue Code relating to the regulation of most private sector employee benefit plans.

I am convinced that the present and future role of private employee benefit plans in supplying retirement income and health care coverage, and in generating investment capital, is so important that it demands the full-time attention of a separate agency. But it is also clear that private employee benefit plans and their regulation are matters having important labor relations and tax revenue implications.

Accordingly, both the Chairman and the Vice Chairman of the new Employee Benefits Commission will have roles that embody close and continuing links to the Departments of Labor and the Treasury. The Commission Chairman will be a special liaison to the Secretary of Labor, will regularly apprise the Secretary of the Commission's activity, and will be expected to apprise the Commission of the views of the Secretary of Labor regarding the relationships between labor law, labor relations, collective bargaining, and employee benefit plans.

The Vice Chairman of the Commission will perform a similar function respecting the Secretary of the Treasury, and will also be expected to apprise the Commission of the views of the Secretary of the Treasury regarding tax policy and interpretation of the Internal Revenue Code as it relates to employee benefit plans.

The new Commission's primary enforcement mechanisms will be its civil, equitable relief authority and its power to certify a retirement plan as being eligible or ineligible for favorable tax treatment on a prospective basis. The draconian nature of the retroactive dis-

qualification penalty, in my opinion, far outweighs its usefulness as an enforcement device. It is, and should be recognized as, an undesirable holdover from the days before ERISA when no other effective compliance tool was available. So my bill provides that retroactive disqualification may be imposed only where the failure of the plan to meet applicable standards is willful.

In addition to avoiding the adverse impact on innocent employees that is inherent in retroactive disqualification, this and other changes my bill makes should greatly diminish the need for most retirement plan sponsors to obtain a favorable determination letter every time a plan is established or amended, and paperwork and costs will be reduced accordingly.

ERISA TITLE I CHANGES

Numerous changes in title I of ERISA are made by the ERISA Improvements Act of 1978. While preserving ERISA's present conceptual framework, the bill simplifies and clarifies many provisions.

REPORTING AND DISCLOSURE

In the reporting and disclosure area, for example, the summary annual report has been eliminated. In my judgment, the cost of preparing, printing and distributing this document every year clearly outweighs its usefulness. All plan participants will, of course, continue to have ready access to a copy of the complete annual return/report (form 5500) that must be filed each year by the plan.

Other changes are made to avoid disruptive and costly duplications of professonal services and to further reduce paperwork burdens.

MINIMUM STANDARDS

Certain revisions in the minimum participation and vesting rules have been made to clarify or otherwise change the application of these rules to multiemployer plans. Certain other changes have been made to codify interpretations of the administering agencies. For example, it has been made clear that a plan may make amendments to conform to final regulations which have interpreted a statutory minimum standard provision differently than did a predecessory temporary regulation.

Also, subject to certain safeguard conditions, the permissibility of elapsed time systems for measuring service is made clear.

A major change has been made in the joint and survivor rules. Under the present provisions, a nightmare tangle of regulations has created complexity and costs for plans and has even caused some plans to discontinue use of the annuity form of benefit. In these cases, the rules of ERISA, as implemented by the regulations, have had precisely the opposite effect as was intended. The new joint and survivor annuity provision is simpler and gives greater assurances that surviving spouses of deceased plan participants will receive retirement income.

FIDUCIARY RESPONSIBILITY

Several significant changes have been made in the fiduciary provisions.

For example, to reduce and clarify the scope of ERISA's prohibited transaction provisions, my bill makes several changes in the definition of party in interest.

Also, the scope of the cofiduciary responsibility rules has been narrowed slightly to reflect the realities of business organization. The present rule places a responsibility on institutional and other large fiduciaries which cannot be met without elaborate, expensive, and burdensome reporting and communication rules.

A new exemption from the prohibited transaction rules has been added to remove doubt about the permissiblity under those rules of transfers of assets between plans pursuant to reciprocity arrangements.

PREEMPTION

Changes are made in ERISA's preemption provision to clarify congressional policy in certain areas that have been highlighted since ERISA was enacted. In an abrupt change of a position of more than 40 years' standing, the Securities and Exchange Commission has begun to interpret the antifraud provisions of the Securities Act of 1933 and the Securities Exchange Act of 1934 as being applicable to what has been termed the "interest" of an employee in certain types of employee benefit plans.

In my view, Mr. President, this application of these securities acts provisions creates an intolerable situation for most employee benefit plans. Federal regulation of these plans is the subject of ERISA, the Internal Revenue Code and, for collectively bargained plans, the Labor-Management Relations Act. It was in these laws (and, before ERISA, in the Welfare and Pension Plans Disclosure Act) that Congress directed its attention to the regulation of private sector plans, to the rights of employees under these plans, and to the relationship between employees, their plans and the plan sponsors.

From the time of the ERISA oversight hearings that were held by the Labor Subcommittee of my Human Resources Committee in October of 1977 until January of this year, I engaged in a continuing dialog with officials of the Securities and Exchange Commission, attempting to understand the rationale for the SEC's position, and, at the same time, trying to see whether the SEC understood the policy implications of its new position.

What I have learned and observed during this time has not been encouraging. In short, I see no practical way to reconcile the present position of the SEC with the regulatory system for private sector employee benefit plans that was so carefully worked out by the Congress. Instead, I see the specter of yet another agency applying yet another body of law to private employee benefit plans, occurring not as the result of congressional action taken after careful deliberation but as the result of agency and private interpretations of law.

And I see the possibility of potentially enormous liabilities imposed on plans and plan sponsors due to claim relating to events that occurred in the past, at a time when it was justifiably believed that the Securities Acts did not apply.

In this regard, I note the Supreme Court of the United States has recently addressed a very similar retroactive liability issue. In *City of Los Angeles, et al*, v. *Manhart, et al.*, No. 76–1810 (April 25, 1978), the court considered the impact on pension plans of an interpretation of title VII of the 1964 Civil Rights Act, recognized that "conscientious and intelligent administrators of pension funds" might well have interpreted the law differently than the court was now interpreting it, and reversed lower court rulings which had granted retroactive relief against the retirement plan in question. In an especially pertinent footnote to its opinion, the court took special notice of the importance placed by the Congress, in ERISA, on "making only gradual and prospective changes in the rules that govern pension plans."

To remove any doubt about congressional intent in this area, the ERISA preemption provision would be revised by my bill to insure that the Federal Securities Acts and similar State laws will not be applied in the future to the interest of an employee in an employee benefit plan which is subject to ERISA, and the civil enforcement section of ERISA would be revised to insure that no employee benefit plan and no sponsor, fiduciary, and so forth, of such a plan shall be subjected to liability of any sort due to a claim that the interest of an employee in the plan is a security.

To preclude the imposition of retroactive liabilities, another change would remove from the jurisdiction of the Federal courts any past, present, or future claim in which it is or has been asserted that the interest of an employee in an employee benefit plan is a security.

The only exception to these rules is for plans in which participation is wholly voluntary and which are profit-sharing, stock bonus and similar-type plans designed (and permitted under ERISA) to invest heavily in securities issued by the employer who maintains the plan.

TAX LAW CHANGES

It is my view that private retirement plans are and must continue to be a critical component in America's system of providing retirement income. Yet, even after 25 years of spectacular growth of these plans in the years following the Second World War, private pension plans in 1974 covered only about half of the private sector, non-agricultural work force. Since ERISA's enactment in 1974, growth of the private system has slowed, and the past 3½ years have been a time of an increased incidence of terminations, and a decreased incidence of new plan starts, accompanied, however, by steady growth of the size of the work force.

I myself believe that there are several causes for the recent failure of private retirement plans to sustain their earlier rate of growth. The requirements of ERISA (and the changes made by ERISA in the Internal Revenue Code) are unquestionably responsible to some extent. ERISA's minimum standards, paperwork, and other compliance costs have raised the price of plan maintenance for virtually all plans.

Many plan sponsors have been able to meet these burdens and costs without undue strain. In the main, these are larger, corporate employers which have within their organizations the financial, professional, and technical resources that are requisite to the establishment, maintenance, and sound funding of an employee benefit plan that meets Federal standards.

For small employers, and especially for very small employers, however, the adjustments have been more difficult, the burdens heavier, and the added costs more difficult to bear.

Finally, particularly for the very small employers, the availability of individual retirement accounts has been a factor in the termination of some plans or in the decision not to establish a plan.

But the changes made by ERISA alone clearly are not solely responsible for the slowing of the rate of growth of private pension plans. The past few years have been a time of economic uncertainty, bringing, as it always does, a certain reluctance on the part of managers to make new, long-term, commitments. Also, statistics on private pension plan coverage show that, by 1974, most employees working for larger employers were covered by already existing plans.

The large remaining gaps in coverage exist largely among employees working for smaller employers. Even if ERISA had not been enacted, the rate of growth of the private pension system probably would have slowed anyway because the tax, economic, and other incentives (such as collective bargaining) that spur pension plan establshment and growth are less powerful respecting many small employers.

The slowing of the rate of growth is, in any event, very disturbing. And it may be calamitous in light of demographic trends which indicate a future increase in the proportion of the population that consists of retirees compared to the proportion of the population that consists of active workers. These trends, which consist largely of the maturing of the baby boom of the late 1940's and 1950's, the present low birth rates, the ever-increasing longevity figures, and the increased use of optional early retirement, may not all persist. Or, they may be offset by other trends, such as larger than predicted numbers of women entering the work force. But it is more likely that we are entering on a period, that is likely to last for a good many years, which has been described as "the graying of America." Indeed, the battle cry of youth during the 1960's, "don't trust anyone over 30!" may well be echoed in 1990 by, "don't trust anyone under 60!"

The likelihood, then, is that our society must be prepared in the coming years to supply adequate retirement income to an enlarged proportion of the population. Regarding the private sector work force, that income can be supplied in one or more of three ways: Private, individual savings; social security; and private pension plans.

Private, individual savings are not sufficient to provide retirement income in most cases because most individuals will not or cannot set aside sufficient amounts over their working careers and because private savings are often drawn upon in times of need before retirement.

Respecting social security, three things seem very apparent. First, it is unlikely that social security benefits will ever provide more than a floor of retirement income. Second, even if the recently enacted social security financing increases are maintained, it is unlikely that the system will ever be advanced-funded in any meaningful sense; it is and is likely to remain an intergenerational income transfer mechanism. Finally any reserves that the social security system may accumulate are invested in Treasury paper and are not available as are private pension assets as broadly applicable investment capital.

If we are to meet increased retirement income needs, the best and most painless way to do it is by expanding coverage of our private sector retirement plans. We need to increase the number of plans and the number of employees covered under them.

We cannot achieve 100 percent coverage and we should not attempt to do so, because some proportion of the "working" population has so tenuous an attachment to the workforce that the costs of coverage would far outweigh the benefits that might be provided. But we can make significant inroads towards covering the 50 percent or so of the private, non-agricultural workforce that is not now covered by private plans.

To the extent we do so, we will not only assure adequate levels of retirement income, we will also make available additional billions of dollars of investment capital.

Therefore, in addition to the simplifying and clarifying changes I have proposed, many of which should lower plan costs, the ERISA Improvements Act of 1978 would bring about three significant changes in the Federal tax laws to foster and encourage the establishment and maintenance of private pension benefits plans.

TAX CREDITS FOR PLAN ESTABLISHMENT AND PLAN IMPROVEMENT

First, a tax credit, which could be taken by a plan sponsor in addition to the present deduction for contributions, is proposed for the establishment of new plans that meet ERISA and Internal Revenue Code standards. This credit, which would phase out over a period of years, would be available only to smaller employers. I am proposing that this credit be an amount equal to 5 percent of the deductions allowed to an employer for the first year of plan maintenance, 3 percent for the second and third years, and 1 percent for the fourth and fifth years.

Also, a credit is proposed for the sponsor of any plan which satisfies certain requirements that will be established by the Employee Benefits Commission. A plan meeting these requirements will be known as an "improved plan."

In general, an improved plan will be one which has substantially earlier participation and substantially faster vesting rules than the ERISA minimums, or which offers an equivalently better benefit structure, as determined by the Commission. The additional credit available for each plan year during which the plan is maintained in its improved form will be 5 percent of the amount of allowable deductions for contributions made to the plan for that year.

DEDUCTIONS FOR EMPLOYEE CONTRIBUTIONS TO TAX-QUALIFIED PLANS

Under present law, a person who is not an active participant in a tax-qualified retirement plan may contribute to an individual retirement account (IRA) and take a deduction for the lesser of $1,500 or 15 percent of compensation. Investment earnings of the account are not taxable and taxation occurs when the individual retires and begins to draw out of the account. The IRA was designed to permit individuals not covered by employer-sponsored plans to obtain the same tax advantages as are available to employees covered by tax-qualified pension plans. Viewed from that perspective alone, the IRA is not objectionable. But there are several problems associated with IRA's.

Because an IRA may be established by an owner of a business, the IRA has in some cases been used as a substitute for a tax-qualified pension plan, depriving employees of the protections offered by the Internal Revenue Code rules prohibiting discrimination in favor of the highly compensated. Also, because IRAs are available only to persons who are not active participants in tax-qualified plans, IRA's may not be used by employees who are involuntarily covered by their employers' plans but who do not continue employment with one employer long enough to vest.

There are a number of ways to deal with these problems. I believe the best way is to offer a tax deduction for employee contributions to tax-qualified plans. As with employee contributions under present law, all such contributions would be 100 percent vested when made, and, if an employee should terminate service with an employer before retirement age, the employee could "cash out" of the plan and roll his contributions over to the plan of his new employer or into an IRA.

Thus, the employee covered by a plan having low benefit levels could supplement the employer's contributions with his or her own 100 percent vested contributions. The transient employee could do the same thing and, if service were terminated before vesting in the employer contributions, the terminating employee could withdraw the entire account balance derived from his or her own contributions and roll the balance over into an IRA or into the plan of the new employer.

Under my proposal, a deduction would be available for employee contributions to tax-qualified plans for up to the lesser of 10 percent of compensation or $1,000, reduced by 20 percent of the amount by which adjusted gross income exceeds $30,000. All tax-qualified plans would have to accept employee contributions, and treat them as individual accounts, but only in amounts up to $1,000 per employee per year. Thus, the employee

earning annual compensation of: $8,000 could deduct $800 for an $800 contribution; $10,000 could deduct $1,000 for a $1,000 contribution; from $10,000 to $30,000 could deduct $1,000 for a contribution of $1,000; and $32,000 could deduct $600 for a contribution of from $600 to $1,000.

To preclude the use of IRA's as a substitute for nondiscriminatory, tax-qualified plans, I am proposing that owner-employees, such as sole proprietors and partners, and corporate employees who occupy analogous positions, not be permitted to utilize IRA's for themselves. Linked to my other proposals, this change should not be objectionable, and it will further stimulate the establishment of tax-qualified plans.

SPECIAL MASTER AND PROTOTYPE PLANS

For many years, master and prototype plans have been utilized by smaller employers as a way to provide a retirement program for themselves and their employees which does not involve the employer in complicated plan design and investment problems.

My special master plan proposal is designed to permit an employer to provide retirement income for himself and his employees, under a plan which meets or exceeds Internal Revenue Code and ERISA standards, with virtually none of the burdens presently associated with plan installation and maintenance. Under this proposal, the designer of the special master plan would be a person capable of providing both administrative and investment services respecting a retirement plan. These "master sponsors," who could be, for example, insurance companies, banks, or investment companies, would submit one or more special master plans or prototype plans to the Employee Benefits Commission for approval.

The Commission would approve only those plans which, in design and operation, meet the applicable requirements of ERISA (including the new rules relating to special master plans) and the Internal Revenue Code. Once approval is obtained, the master sponsor will make the special master plan available to employers. To keep complexity at a minimum, special master plans will have to be defined contribution plans.

Under a special master plan, the adopting "employer sponsor's" sole affirmative obligation under the substantive rules of ERISA will be to make such contributions and payments, and furnish such work force data and other information, as are required under the terms of the plan.

In all other respects, the applicable responsibilities of Federal law relating to plan sponsorship will be assumed by the master sponsor. So, for example, the master sponsor will be responsible for required disclosure to participants and filings of annual and other reports with the Commission, for compliance with ERISA's fiduciary responsibilities, and for handling benefits claims.

The Employee Benefits Commission will promulgate regulations to insure that no special master plan is made available for adoption by employers unless the plan, in design and operation, will satisfy the applicable requirements of ERISA and the Internal Revenue Code. Among other things, this will eliminate the need for adopting employers to seek advance determination letters.

To facilitate the adoption and operation of these special master and prototype plans, certain changes, applicable only to such plans, have been made respecting ERISA's prohibited transaction provisions, and reporting and disclosure requirements. Also certain safeguard mechanisms are present, and the Employee Benefits Commission is, among other things, directed to study the feasibility of extending the special master plan concept to defined benefit plans and to report to the Congress on its findings.

Special master plans will be eligible for the new tax credits I have proposed.

I believe that my special master plan proposal is workable, economically feasible from the standpoint of both investment managers and employers, and will offer greatly expanded opportunities for the creation of new, sound retirement plans covering large numbers of employees.

Mr. President, although the ERISA Improvements Act of 1978 is broad in scope and incorporates certain new concepts, it is not intended to be comprehensive and it does not address all of the problems I have observed over the past 43 months. Because the Congress will receive a comprehensive report from the Pension Benefit Guaranty Corporation (PBGC) on or before July 1 of this year regarding the problems of multiemployer plan termination insurance under title IV of ERISA, and because I believe that report will contain implications respecting the single employer insurance program as well, I have deliberately not addressed certain title IV problems of which I am aware. I will develop appropriate proposals in these areas, if necessary, after I have assessed the PBGC report.

Also, I have never been satisfied about our inability in 1974 to develop a feasible portability program, and I am working now on a portability proposal which I hope to have ready in the near future.

In addition, Mr. President, my bill is designed to stimulate public discussion and debate respecting the ways our society presently supplies income to retirees and the various ways we may do so in the future.

Especially as regards the future, it is my view that we face a choice that must be made soon. We can shrug off the looming problem of the need to supply increased amounts of retirement income and do nothing to encourage growth of private retirement plans. The likely result of that choice will be to place enormous demands on general revenues and FICA taxes.

Or we can act now to ease the problems associated with private pension plan creation and maintenance and to foster more and better plans. The simplifying and clarifying ERISA amendments, consolidation of agency responsibilities, special master plan concept, and Tax Code changes embodied in the ERISA Improvements Act of 1978 represent a set of ideas to implement this choice, which I believe is the one we must make.

In this regard, the specific amounts of the tax credits and employee deduction proposed in my bill may be too high or too low, and technical changes may be desirable to assure equitable application and avoid tax abuse. I look forward to comments from the public and from my colleagues on the Finance Committee, with which the Human Resources Committee shares jurisdiction respecting private pensions plans, on these and other aspects of my legislation.

Mr. President, in a short time I will announce hearings to be conducted by the Labor Subcommittee of the Committee on Human Resources respecting the ERISA Improvements Act of 1978. I am looking forward to those hearings as an opportunity to learn the views of interested persons regarding this legislation and the important issues of retirement income security it addresses.

I ask unanimous consent, Mr. President, that the full text of the ERISA Improvements Act of 1978 and its accompanying section-by-section analysis be included in the Record at the conclusion of our remarks, and that the ERISA Improvements Act of 1978 be referred jointly to the Committee on Human Resources and the Committee on Finance.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JAVITS. Mr. President, the bill I am introducing today with Senator WILLIAMS is an important measure with long-term implications for this Nation. I view this bill, the ERISA Improvements Act of 1978, as the next major step toward the development of a national retirement income policy.

My involvement in retirement income matters goes back many years. My first thrust into the private pension area occurred over a deceade ago when I introduced the first pension reform bill. My persistent efforts to protect employee benefit plan participants and beneficiaries reached fruition in 1974 when, in partnership with Senator WILLIAMS, the Employee Retirement Income Security Act of 1974 (ERISA) was enacted into law.

I feel very strongly about ERISA and about the enormous good it has achieved. American workers can now rest assured that they have firmly established legal rights with respect to their benefit plans and that the promises of employers to pay pension or welfare benefits are binding, legal commitments with assurance of payment. No longer will employers be able to extract long years of continuous service from an employee and avoid paying a promised pension at retirement time solely because of a 20-year vesting rule, for example. If an employer's defined benefit pension plan terminates, the participants and beneficiaries will not lose their guaranteed benefits because Federal termination insurance will pay their benefits.

Convinced as I am of the essential merit of the ERISA program, I am not blind to the fact that there are certain problems with the law. With so mammoth and complex a statute, I would have been surprised if some problems had not arisen in its implementation.

The bill I am introducing today is in-

tended in part to deal with the problems which have arisen with ERISA. The bill makes changes in the areas of reporting and disclosure, minimum standards, funding, fiduciary responsibility, and enforcement—which includes the overruling of the Daniel decision. The general purpose of these amendments is to make ERISA easier to live with for those who are charged with running employee benefit plans. I should add, however, that essential participant protections are not impaired by these changes.

To further ease the burden which ERISA has caused for some, my bill eliminates the tripartite administration of ERISA by establishing a new regulatory agency. This new entity, the Employee Benefits Commission, will take over all of the present ERISA-related responsibilities of the Labor Department and the Pension Benefit Guaranty Corporation, and most of such duties of the Internal Revenue Service. Establishment of this new Commission will solve the dual jurisdiction problem and will result in better policy coordination and enforcement. Most importantly, it will become, over the long run, the key mechanism for the development and implementation of a national retirement income policy.

By making ERISA easier to live with, these amendments should encourage employers to maintain their existing plans and to establish new plans. I believe, however, that further encouragements and incentives are necessary in order to expand the numbers of workers covered by private pension plans.

A recent Social Security Administration study indicates that in 1975 only 46.2 percent of all wage and salary workers were covered by retirement plans. This percentage represents 30.3 million wage and salary employees. Although these figures compare favorably to those of 1950 in which only 22.5 percent or 9.8 million such employees were covered by private retirement plans, they make painfully clear that too many workers are still not covered by private retirement plans. As the study notes, in recent years the trend has been more toward providing broadened protections to workers already covered than toward expanding coverage to greater numbers of new groups of workers.

My bill takes a number of bold new steps to encourage increased coverage of workers by private pension plans. First, it permits financial institutions such as banks, insurance companies, and investment companies to establish special master plans, participation in which will be available to all employers.

The duties of an employer sponsor under a special master plan will be limited to making timely contributions and furnishing necessary workforce data. The financial institution will be responsible for complying with the other requirements of ERISA and the tax code, including handling paperwork, dealing with Federal agencies, processing claims, and managing plan assets. An employer who wants to provide pension coverage for his employees but who is deterred from so doing by the imposition of legal duties will be able to join a special master plan.

Second, my bill grants tax credits for five years to small employers who establish new qualified pension plans. The credit will be equal to 5 percent of the deduction allowed for the first year of plan maintenance, 3 percent for the second and third years, and 1 percent for the fourth and fifth years. This tax incentive is available only to small employers because it is thought that major growth in coverage will be achieved only if small employers adopt plans.

Third, in order to reduce the incentive for employers to set up IRA's for themselves and to neglect the retirement needs of their employees, deductions for contributions to IRA's will be made unavailable only for owner-employees, corporate officers and 10 percent or more shareholders. This change in no way affects the rights of all other employees to set up IRA's.

In addition to expanding coverage of the workforce by retirement plans, my bill also aims at increasing the rights and benefits of those employees covered by employee benefit plans. In order to assist workers who are in low-benefit pension plans or who change jobs frequently, my bill permits a tax deduction for employee contributions to qualified pension plans. The maximum amount of the annual deduction will be the lesser of 10 percent of compensation or $1,000, reduced by 20 percent of the amount by which the adjusted gross income exceeds $30,000.

The bill also provides a tax credit for any employer who establishes an "improved plan." Such a plan must have significantly earlier participation and significantly more rapid vesting rules than ERISA's minimum standards or must offer some other equivalently, significant improvement as determined by the Commission. The amount of the credit, which will be available for each year the improved plan is maintained, will be 5 percent of the annual allowable deduction for contributions to the plan.

To further increase benefits of employees and their beneficiaries who are covered by plans (and also to reduce burdensome compliance rules) I am proposing an improvement in the present joint and survivor annuity requirements. Under present law, the spouse of a 45-year-old worker with a fully vested benefit based on 20 years of service could, under the terms of a plan, fail to receive any benefit if the working spouse dies.

To overcome this shortcoming, my bill requires with respect to a 50 percent or more vested participant who dies before the annuity starting date that a plan provide a survivor's annuity for the participant's spouse which begins on the annuity starting date. A plan will be permitted to pay benefits actuarially equivalent to such survivor's annuity earlier than the annuity starting date, for example, in the form of a death benefit. A pension plan which does not provide an annuity form of benefit will be required with respect to such an employee to provide for a lump sum distribution of the account balance to the surviving spouse not later than 60 days after the end of the plan year in which the participant died.

With respect to cost of living increases, which can be extremely expensive to provide, my bill requires a Federal 2-year study of the feasibility of requiring pension plans to provide cost of living adjustments to benefits payable under such plans.

Although not increasing benefits of employees under welfare plans, a provision in my bill does provide greater protection for participants in certain uninsured welfare benefit plans whose participants have no commonality of interest respecting terms or conditions of employment other than their participation in such plan. This section requires that such uninsured welfare plans shall be subject to such solvency and reserve standards as the new Commission shall require by regulation. This requirement is aimed at the use of self-funded multiple employer trusts (MET's) by small employers to provide welfare benefits for employees. A number of these MET's have gone bankrupt, leaving millions of dollars of unpaid claims. The establishment of Federal solvency standards will improve the present situation and partially fill a regulatory void which has developed because of ERISA's preemption of State statutes regulating welfare plans.

Another provision of the bill which provides greater protection of participants in employee benefit plans proscribes any decrease of disability benefits being paid under a welfare plan because of an increase in the benefit levels or the wage base under the Social Security Act. The bill also forbids a pension plan from reducing benefits being paid to a vested participant who has separated from service because of any payment made by the employer as the result of a workers compensation award.

Mr. President, before turning in greater detail to the provisions of my bill, I want to note that this measure is not exhaustive and all-inclusive. There are many matters which have not been addressed at this time and which deserve legislative attention. For example, ERISA title IV matters relating to the plan termination insurance program have not been addressed because we are waiting for the recommendations of the Pension Benefit Guaranty Corporation which are due on July 1. A portability proposal has not been advanced because further work is necessary to develop a workable program.

My bill should also not be considered the final word on the subjects which have been addressed. I am open to constructive recommendations regarding the proposals I have made and will do my utmost to consider all sides as we work toward a fair and just resolution of the issues before us.

NEWS AGENCY

From a long-term perspective, one of the most important aspects of my bill is the creation of a new, centralized agency to administer ERISA. This new agency, the Employee Benefits Commission (EBC), will exercise all of the ERISA-

related powers of the Department of Labor and the Pension Benefit Guaranty Corporation and most of such powers of the Department of the Treasury. The EBC will start its operations 1 year after enactment of this legislation.

I have long advocated the centralized administration of ERISA. The current splintering of jurisdictions between three agencies was the unfortunate result of political compromise. I thought it was a mistake when ERISA was passed in 1974, and after 3½ years of experience, I am more firmly convinced than ever that it was a mistake. I believe that we in the Congress must put aside secondary concerns of committee jurisdiction and have the courage to do what is best for the Nation. And there is little doubt in my mind that a centralized and rationalized administration of ERISA will be in the best interests of this country .

The consolidation of ERISA functions will solve the current dual jurisdiction problem which has been so prominently illustrated in the prohibited transaction area. The centralization of functions will also result in better ERISA policy development which will transcend the limited institutional interests of the existing agencies. And of course, from the point fo view of plan participants and sponsors, one-stop shopping will reduce confusion and costs.

But, Mr. President, there is an even more important reason for the establishment of a centralized pension agency. Starting in about the year 2000, this country will probably be facing an unprecedented demand for retirement income. Based upon present demographic trends including low fertility rates, low mortality rates and the aging of the postwar baby boom, there will probably be early in the next century an inordinately large number of older people and comparatively few younger workers. If we do not make sure that adequate resources are built up now to provide retirement income in the future, we may not be able to provide adequately for all of our older citizens. Younger workers will resist shouldering greater tax burdens to provide for their more numerous elders, and intergenerational conflict will result, similar to but more severe than the present turmoil over increased social security taxes.

A centralized pension agency will be an essential tool for developing a national retirement income policy which will deal with the slowly ticking, retirement income time bomb. The agency which I have proposed in this bill deals only with private employee benefit plans and does not have jurisdiction over other elements of the retirement income continuous like Federal, State, and local pension systems or the social security system. As more attention is focused on these matters, it may be appropriate to propose such expanded jurisdiction in the future. For the present, however, I believe the establishment of the Employee Benefits Commission is a necessary first step in developing an administrative mechanism which will aid in formulating a national policy on retirement income and the related matters of capital formation and employee stock ownership.

Mr. President, the Commission which I am proposing will have five full-time members, two of whom will have ties with existing executive departments. The Chairman of the Commission will also be a special liaison officer to the Secretary of Labor and will be nominated by the President from a list of nominees prepared by the Secretary of Labor. The Chairman, like the four other members of the Commission, will be subject to Senate confirmation. The Commission's executive director and general counsel will be appointed by the Chairman.

The Vice Chairman of the Commission will be a special liaison officer to the Secretary of the Treasury and will be nominated by the President from a list prepared by the Treasury Secretary.

The other three Commission members will be nominated by the President from a list prepared by both the Secretaries of Labor and Treasury. The purpose for creating ties between the Commission and the two existing agencies is to assure that in carrying out its development of policy on employee benefits, the Commission will give due consideration to pertinent labor law and tax law considerations. I also believe that the maintenance of ties to the existing agencies is necessary for political reasons.

The Commission will administer ERISA title I (reporting and disclosure, minimum standards, funding, fiduciary responsibility, and enforcement) and title IV (plan termination insurance). It will also administer Internal Revenue Code sections 401 (tax qualification), 410 (participation), 411 (vesting and accruals), 412 (funding), 413 (collectively bargained plans), 414 (definitions and special rules), 6057 (annual registration) and 6058 (annual return) insofar as these sections relate to plans covered by ERISA. The Commission will have the power to certify to the Treasury Secretary that an ERISA-covered plan satisfies the code's section 401 conditions for tax qualification. The Commission will also have authority to certify to the Treasury Secretary that an "improved plan" which meets standards exceeding ERISA's minimum standards is eligible for a special tax credit.

My bill also eliminates the automatic excise taxes imposed for funding deficiencies (code section 4971) and prohibited transactions (code section 4975) with respect to plans covered by ERISA. It also provides that retroactive disqualification may be imposed only when the failure of a plan to meet code section 401's standards is the result of intentional failure or willful neglect. This last amendment should reduce the need to apply for new determination letters each time a plan is established or amended.

REPORTING AND DISCLOSURE

My bill's most far-reaching change in ERISA's reporting and disclosure sections is to grant the new Commission authority to exempt any employee benefit plan from any of the existing paperwork requirements or to modify any of these requirements. In order to grant an exemption or a waiver, the Commission must find that the change is appropriate and necessary in the public interest and consistent with the purposes of title I of ERISA.

This new authority will give the Commission needed flexibility in tailoring reporting and disclosure requirements to particular situations. The Commission will be able to exercise its discretion to reduce unnecessary paperwork which adds to the cost of plan administration and may not be essential to protecting the interests of participants and beneficiaries. It should be added, however, that this section is not intended to permit the wholesale abrogation of ERISA's requirements. The existing rules were imposed with specific purposes in mind and should not be waived or modified without good reason.

Consonant with the policy of tailoring paperwork requirements to particular situations, my bill requires the development of reporting forms and requirements which to the maximum extent feasible take into account the different types and sizes of plans. What may be appropriate for a large plan to report may be unnecessary with respect to a small plan.

My bill also eliminates a number of requirements which appear not to be cost-justified. The summary annual report, which must be distributed to participants each year and which must disclose, among other things, the plan's assets and liabilities as well as its annual receipts and disbursements, is eliminated because it is too costly in light of the information it provides. Participants who are interested in the fiscal condition of their plans can request a copy of the full annual report which must be provided by the plan administrator. To assure that this right is practically available, the bill provides that an administrator can charge no more than $10 for a copy of the full annual report.

If an employee is interested in the amount of his own accrued benefit, he can request such information from the administrator who, under newly combined ERISA sections 105 and 209, must provide such information. An administrator who fails to do so shall be liable to the requesting participant for up to $100 per day from the date of such failure.

The bill eliminates the requirement that an updated summary plan description be furnished every 5 years if amendments have been made. An administrator will simply be required to provide every 10th year a summary plan description which must be updated by integrating all plan amendments into the description. I believe it is important that there be some periodic reissuance of this important document whether or not amendments have been made.

For tax qualified plans covered by ERISA, my bill requires the consolidation of the plan description (EBS–1) and the determination letter application forms (forms 5300, 5301, and 5303). These forms require the reporting of essentially duplicative information, and should be merged into one document or series of documents.

Upon the separation from service or incurrence of a 1-year break in service by an employee, a plan administrator will be required to automatically disclose to the former participant his accrued benefit only if the benefit is vested. There is little point in requiring an administrator to bear the cost of notifying a former employee that he has no vested accrued benefit. It is intended, however, that such an employee will have the right to request information on his accrued benefit, whether vested or not, before the occurrence of a 1-year break in service.

My bill also attempts to cut down on unnecessary fees paid by plans to accountants and actuaries who may be, in some instances, doing duplicative work in preparing parts of a plan's annual report. The bill requires accountants to rely on the correctness of any actuarial matter certified to by an enrolled actuary and requires enrolled actuaries to rely on the correctness of any accounting matter as to which a qualified public accountant has expressed an opinion.

The bill also cuts down on apparently unnecessary auditing by accountants of the assets and liabilities of common or collective trusts, separate accounts or separate trusts of financial institutions such as banks or insurance companies which are regulated and subject to periodic examination by State or Federal agencies. Participants, of course, receive greater protection from a full audit which covers assets in such pooled trusts or accounts, but the cost of doing such an audit may not be justified where the institution is already subject to periodic examination by a governmental agency.

MINIMUM STANDARDS AND FUNDING

My amendments to parts 2 and 3 of ERISA's title I attempt both to overcome some of the difficulties which plans have experienced with the minimum standards and funding rules and to expand certain participant protections.

In order to facilitate portability and reciprocity among collectively bargained plans, the bill prevents ERISA's title I rulles from thwarting the transfer of contributions from a pension or welfare plan (away plan) to a similar plan in which the employee had previously become a participant (home plan). The transfer must be pursuant to a written agreement between the plans, and the Commission may establish conditions, variances, and exemptions to encourage such transfer arrangements. An appropriate prohibited transaction exemption is granted to avoid uncertainty regarding such transfers of contributions.

My bill also provides that rather than using the employment commencement date for measuring a year of service for purposes of eligibility, a plan may use the first day of the plan year for such purposes as long as rights and benefits under ERISA's part 2 are determined on the basis of all of an employee's service regardless of the date on which the employee commenced participation in the plan. The intent of this provision is to relieve plans of the extra recordkeeping and reporting and disclosure burdens which arise when service must be measured from a different date for each employee. The new rule will permit a plan to distribute a summary plan description, for example, within 90 days after the end of the plan year (assuming completion of a year of service) rather than 90 days after each participant completes an eligibility year of service. The trade off for permitting plans to use the plan year for this purpose is that vesting and benefit accruals, for example, will be determined on the basis of all an employee's service before as well as after his commencement of participation in the plan.

Under the bill, a multiemployer plan will be able to provide that a participant's accrued benefit upon his separation from the service is the sum of different rates of benefit accrual for different periods of participation as defined by one or more fixed calendar dates or by employment in different bargaining units. For purposes of the 3 percent accrual method or the fractional method, the accrued benefit may be determined by projecting the normal retirement benefit to which a participant would be entitled if he continued to accrue benefits at the average of the rates applicable to his period of actual participation.

The intent of this section is to tie a participant's benefit accruals for a given year of service to the maximum retirement benefit in effect during that year. If in year 1979 the maximum monthly benefit for 20 years of service is $200 per month and that benefit is increased to $300 per month for year 1980, under the proposed rule a participant in a 3 percent accrual plan will be entitled to an accrual of $6 in 1979 and $9 in 1980. If the employee separated from the service in 1981, his accrued benefit would be determined by adding the different rates of benefit accrual for the different periods of participation.

The bill also amends the multiemployer suspension of benefit rules upon reemployment. Multiemployer plans will be permitted to suspend the payment of benefits while an employee is reemployed in the same industry, trade or craft, and the same geographic area covered by the plan, as when such benefits commenced. The rule eliminates "industry" as an element separate from "trade or craft" to avoid problems which have arisen in the application of the existing rule.

Under the proposed rule, if a carpenter who worked in covered employment in a furniture factory retired and later returned to covered employment in housing construction in the same area, the plan could suspend benefit payments while the worker was reemployed. Under the existing rule, the plan may not be able to do so because the carpenter arguably was not reemployed in the same industry. The bill also permits the plan to impose a financial penalty on pensioners who fail to report their reemployment as required by a plan and also to prevent the periodic payment and suspension of benefits to employees who have not retired but who continue to work on an irregular basis.

Under the bill, the funding method may take account, and for plan years beginning after December 31, 1980, shall take account of all plan provisions, including provisions which have not yet affected participants as to entitlement to, or accrual of, benefits. If such a provision is not implemented as of the time specified when the provision was adopted, the funding standard account shall be appropriately adjusted in accordance with Commission regulations. The intent of this provision is to permit a plan which is having a funding shortfall to make a future benefit reduction but to take account of that reduction for present funding purposes. The Commission regulations with respect to the failure to implement such a provision are expected to deal with any possible funding abuses in this regard.

Two sections of this minimum standards package will expand the protections of plan participants and beneficiaries. The first of these expands the present joint and survivor annuity protection. With respect to a 50 percent or more vested participant who dies before the annuity starting date, a plan will have to provide a survivor's annuity for the participant's spouse which begins on the annuity starting date. Such an actuarially equivalent benefit could be in the form of a death benefit. A pension plan which does not provide an annuity benefit would be required to provide with respect to a participant just described a lump sum distribution of the account balance to the participant's surviving spouse not later than 60 days after the end of the plan year in which the participant died. The implementation of these changes would eliminate the complications caused by the present rules on electing joint and survivor coverage at the early retirement age.

The second minimum standards section in my bill which will help participants prohibits any decrease of disability benefits paid under a welfare plan because of an increase in the social security benefit level or wage base. A pension plan is also prohibited from reducing benefits being paid to a vested participant who has separated from service because of any employer payment as a result of a workers compensation award.

Other minimum standards amendments include: Clarification that 125 days of service in any maritime industry shall be the equivalent of 1,000 hours of service; permitting plans which complied with temporary regulations to alter their provisions so as to comply with final regulations; and explicitly permitting the use of the elapsed time method for measuring service.

The definition of "multiemployer plan" is amended to mean a plan which is collectively bargained and which has 10 or more contributing employers. A plan having more than one but fewer than 10 contributory employers will also be a multiemployer plan if the Commission determines that it is consistent with ERISA to so treat the plan.

FIDUCIARY RESPONSIBILITY

An important fiduciary change benefiting participants is made with respect to uninsured welfare plans whose participants have no commonality of interest respecting terms or conditions of employment other than their participation

in such plan. My bill imposes on such uninsured welfare plans those solvency and reserve standards which the Commission shall require by regulation. ERISA contains funding standards for pension plans, but contains no analogous provisions for such welfare plans. This absence of solvency standards for such welfare plans is compounded by ERISA's preemption of State statutes which may impose standards on such plans.

The legal vacuum which exists has permitted the unregulated growth of self-funded multiple employer trusts (MET's), two of which went bankrupt in California leaving at least $7 million in unpaid claims and leaving 40,000 participants without coverage. I believe it is essential that this situation be corrected as soon as possible.

In this regard, my bill will assist in determining whether MET's are ERISA employee benefit plans, by defining the term "employees' beneficiary association," which appears in the definition of "employee organization." An employee's beneficiary association is an association in which employees participate as members and in which eligibility for membership is based on a commonality of interest with respect to the members' employment relationship.

My bill requires employers who are obligated to contribute under the terms of a collectively bargained plan to make such contributions in accordance with the terms of the plan. The Commission will not be permitted to bring an action to enforce such employer duty, but a fiduciary who brings a successful action under this new section on behalf of a plan shall be entitled to recover from the defendant reasonable attorney's fees and costs of the action. The imposition of this new statutory duty will particularly help multiemployer plans collect delinquent employer contributions.

The scope of the party-in-interest definition is narrowed so that the breadth of ERISA's prohibited transaction provisions will be somewhat reduced. The service provider, employer, employee organization, and employee-officer-director elements of the definition are narrowed. Clarifying changes are made with respect to the fiduciary, relative, and joint venturer parts of the party in interest definition.

A modification is made in the cofiduciary liability rule which holds one fiduciary responsible for a breach of a duty by a second fiduciary if the first fiduciary knows of the breach and does not make reasonable efforts to remedy it. In large financial institutions, for example, it is very difficult to assure that such knowledge by one employee is communicated to the appropriate employee of that institution who could take appropriate action. Consequently, the amendment provides that with respect to a fiduciary who is not a natural person, "knowledge" means knowledge actually communicated (or knowledge which, in the normal course of business, should have been communicated) to the fiduciary's employee who is authorized to carry out the fiduciary's responsibilities regarding the matter to which the knowledge relates.

In order to make more types of insurance available to plans, the bill provides with respect to policies which insure benefits, including, but not limited to guaranteed benefit policies, that plan assets shall include such policies, but not the insurer's general account assets.

My bill also permits plans maintained by more than one employer to return an employer contribution within 1 year after the plan administrator knows that the contribution was made by a mistake of fact. The present rule requires the return of the mistaken contribution within 1 year after the payment of such contribution.

ADMINISTRATION AND ENFORCEMENT

One of the most troubling matters addressed by this bill is the Seventh Circuit's decision in *Daniel* v. *International Brotherhood of Teamsters*, 561 F. 2d 1123 (7th Cir., 1977), cert. granted 46 LW 3526 (Feb. 21, 1978). Daniel held that participation in a collectively bargained, compulsory, noncontributory pension plan involves the sale of a security to the employee-participant, subject to the antifraud disclosure requirements of the Securities Exchange Act of 1934. Because of the potentially disastrous effects Daniel may have on employee benefit plans, the bill will change the law in this area. However, I do reserve the right to seek to amend this provision, perhaps using as a point of departure the application of the antifraud provisions in cases where pension plans have already terminated.

The bill utilizes three means to negate Daniel. First, it provides that no person shall be subject to liability as the result of an action alleging that an employee's interest in an employee benefit plan is a security under Federal or State securities laws. Second, it removes jurisdiction from the Federal courts to decide any action instituted prior to, on, or after the date of enactment in which it is alleged that an employee's interest in such a plan is a security. Third, it provides prospectively that an employee's interest in an employee benefit plan shall not be a security under the 1933 and 1934 Federal securities acts and any State securities laws, and that ERISA supersedes such statutes in this regard. The only exception to the foregoing rules is for eligible individual account plans in which participation is voluntary.

I have mixed emotions about overruling Daniel. On the one hand, Mr. Daniel was the victim of an unfair break in service rule, and the securities laws, according to the Seventh Circuit, provide him with a remedy for the wrong he alleges. On the other hand, the application of the securities laws to interests in employee benefit plans creates the potential for the imposition of large unforeseen liabilities, the termination of certain pension plans, the imposition of disclosure requirements which duplicate those of ERISA, and the addition of another body of law and another regulatory agency to an already crowded legal landscape. A recent Labor Department study estimates potential Daniel liabilities under various hypothetical alternatives to range from $3.5 to $39.6 billion. These potential liabilities do not include legal fees and other costs of litigation, which might be very substantial. On balance, I must reluctantly conclude that Daniel should be overruled.

I must note that this bill does not deal with the many questions which exist with respect to the scope of ERISA's preemption provision. The matter is multifaceted, to say the least, and I believe further study is necessary to determine what the desirable breadth of Federal preemption should be.

A Federal study is mandated by my bill of the feasibility of requiring pension plans to provide cost-of-living adjustments to benefits payable under such plans. I favor some form of required cost-of-living adjustment to protect retirees' benefits from erosion by inflation. The high cost of such provisions, however, has convinced me that an in-depth study is required on how this objective can be achieved without imposing unacceptable economic burdens on pension plans and their sponsors.

My bill also designates one of the existing employer seats on the Labor Department Advisory Council as a small employer position. I believe this is necessary to assure that the problems of small employers receive adequate attention.

TAX CODE CHANGES

As I previously mentioned in discussing the new Commission, this Nation is facing a potentially tremendous future demand for retirement income, because of a progressively aging population. One important way to meet this coming demand is to foster the establishment of more private pension plans. In 1975 only 46.2 percent of all wage and salary workers were covered by retirement plans, so there is much room for improvement in pension plan coverage.

My bill seeks to encourage greater growth in coverage by, among other things, making two changes in the tax code. The first grants tax credits for 5 years to small employers who establish new qualified pension plans (new plan credit). A credit equal to 5 percent of the employer's deduction will be permitted for the first taxable year during which such plan is maintained. The credit will phase down to 3 percent for the second and third years of plan maintenance and to 1 percent for the fourth and fifth years. It will not be available in the sixth year. In determining the amount of the credit, any portion of the employer's deduction which is attributable to the transfer to or under the plan of employer securities will be disregarded.

The new plan credit, which is not available to employers who terminated their plans at any time after January 1, 1978, is intended to help small employers meet the costs of starting a plan. It is available only to small employers, because growth in coverage is likely to occur among this group of employers.

A second amendment to the tax code is intended to reduce the role IRA's play in causing employers, particularly small employers, to provide for their own re-

tirement while neglecting to provide for their employees' retirements. The bill provides that a deduction for contributions to IRA's will not be available to owner-employees described in section 401 (c)(3) of the tax code, corporate officers and 10 percent or more shareholders. This provision in no way affects the availability of IRA's to other employees.

My bill also proposes tax incentives to bring about greater rights and benefits for those employees covered by qualified plans. To assist workers who are in low-benefit pension plans or who change jobs frequently and, therefore, never vest, a tax deduction is provided for employee contributions to such plans. The maximum deduction will be the lesser of 10 percent of compensation or $1,000, reduced by 20 percent of the amount by which adjusted gross income exceeds $30,000. All tax qualified plans will be required to accept employee contributions of up to $1,000 per calendar year per employee. All employee contributions will be 100 percent vested and will be held in separate accounts.

I view my proposal of an employee deduction for contributions to qualified pension plans as an important step toward the development of a consistent tax policy for employee contributions to fringe benefit plans and tax favored deferred compensation arrangements. The tax treatment of "cafeteria" plans, cash, and deferred profit-sharing plans, nonqualified deferred compensation arrangements, and 403(b) annuities should be considered together with my proposal for a tax-deductible employee contribution to qualified pension plans.

In order to encourage the establishment of plan provisions superior to ERISA's minimum standards, a tax credit is granted to employers who establish "improved plans" (improved plan credit). Such a plan must have significantly earlier participation and more rapid vesting rules than ERISA's minimums or must offer an equivalently significant improvement as determined by the Commission. The improved plan credit will be equal to 5 percent of the annual allowable deduction for the employers' contribution to the plan. This credit will not be available to H.R. 10 plans.

My bill also makes two changes in Code section 402(e) dealing with lump sum distributions. These amendments are intended to solve problems which multi-employer plans have had with the administration of this section.

SPECIAL MASTER PLAN

To encourage further the growth of pension plan sponsorship, my bill makes possible the establishment of "special master plans." Under such plans, employers, particularly small employers, will be able to join plans sponsored by financial institutions such as banks, insurance companies, and investment companies and have a minimal number of responsibilities with respect to such plans. The financial institutions, for a fee, will be responsible for meeting most of the obligations imposed by ERISA on plan administrators.

The employer who joins a special master plan will be responsible to transmit tribution and workforce data as may be to the financial institution timely conrequired by the terms of the plan. The employer's plan, which is established by his signing of the special master plan joinder agreement, will automatically be tax qualified upon the signing of the joinder agreement if the special master plan is qualified.

Other responsibilities imposed by ERISA and the tax code will be placed on the financial institution sponsoring the special plan. The institution will be the plan administrator and named fiduciary for each employer's plan. The institution will handle reporting and disclosure matters, communication with the Federal agencies, claims by participants, and asset management. It is expected that the efficiencies of scale will permit the institutions to perform these functions much more cheaply and efficiently than a small employer.

My bill will enhance these efficiencies of scale by permitting the financial institution to file one annual report reflecting the assets of the special master plan as long as the report makes clear the proportion of special plan assets attributable to each participating employer's plan. My bill also permits the institution to prepare one plan description and one summary plan description for the special plan as long as a description of the variations from the common provisions are included.

Certain changes to ERISA's prohibited transaction provisions are made to facilitate the adopting of such special plans and the providing of services to such plans by investment managers. In addition, appropriate limits are placed on the responsibilities of the sponsoring institutions so that, for example, an institution will not be required to ascertain whether information required to be furnished by the employer is accurate or complete.

If an employer fails to meet his obligations under the special plan by, for example, failing to make timely contributions, he shall, in accordance with the terms of the plan, be deemed the plan administrator and shall consequently be responsible for performing functions previously handled by the financial institution.

The special master plan permitted by my bill will be of the defined contribution type. Because of the added complexity associated with defined benefit plans, the new Commission is directed to report back to Congress within 36 months on the feasibility of permitting defined benefit special master plans.

Mr. President, the special master plan concept contained in this bill is a variant of an idea I put forward in my ERISA speech of last August. In that floor statement, I stated that it may be advisable to establish federally sponsored master plans so that small employers will be encouraged to provide retirement benefits for their employees. The proposal in this bill is an attempt to accomplish through the private sector what I envisioned the Federal Government doing. I am optimistic that the financial institutions will be interested in marketing the new special master plans and that greater pension plan coverage among small employers can be achieved, particularly when the new tax credit for establishing plans is added to the equation. I encourage the financial institutions who may be interested in sponsoring such special plans to recommend how the providing of these plans can be facilitated.

If, for some reason, the special plan concept is not successful, a federally sponsored plan may be the only means left to encourage greater plan coverage.

CONCLUSION

In conclusion, Mr. President, the bill that is being introduced today embodies many of the ideas or variants thereof which I have been discussing publicly since last August. The bill will benefit plan participants and beneficiaries and will make ERISA easier to live with for those who run employee benefit plans. It will expand pension plan coverage and will start the development of the administrative tools this Nation needs to formulate a coordinated, national retirement income policy.

The basic policy of my bill is to strengthen the private pension system. Contrary to recent suggestions by a high administration official that private pensions might be scrapped in favor of an expanded social security system, I firmly believe that the private pension system should be revitalized and expanded. Private pensions have become an inherent element of our free enterprise system and serve bona fide needs of that system.

There are, of course, inequities in our present retirement income arrangement, but I believe these can be overcome better through coordination of the existing sources of retirement income. The answer is to coordinate these separate sources, not to merge them into one giant Federal program. I am firmly committed to the continuing health and growth of the private pension system, and I am opposed to the nationalization of the private pension system.

S. 3017

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled.

SECTION 1. SHORT TITLE AND TABLE OF CONTENTS.

(a) SHORT TITLE.—This Act may be cited as the "ERISA Improvements Act of 1978".

(b) TABLE OF CONTENTS.—

Sec. 1. Table of contents.
Sec. 2. Technical and conforming changes.
TITLE I—CONSOLIDATION OF FEDERAL AGENCY RESPONSIBILITIES FOR EMPLOYEE BENEFIT PLANS
SUBTITLE A—FINDINGS; DECLARATION OF POLICY
Sec. 101. Findings and declaration of policy.
SUBTITLE B—EMPLOYEE BENEFITS COMMISSION
Sec. 121. Special liaison officers for Labor and Treasury Departments.
Sec. 122. Employee Benefits Commission.
Sec. 123. Powers of Commission.
Sec. 124. Certification of certain improved plans.

Sec. 125. Termination of Treasury Department's jurisdiction over certain aspects of certain plans; Agency cooperation.
Sec. 126. Effective date and repeal.

TITLE II—AMENDMENTS TO THE EMPLOYEE RETIREMENT INCOME SECURITY ACT OF 1974

SUBTITLE A—DECLARATION OF POLICY DEFINITIONS

Sec. 201. Declaration of policy; Definitions.

SUBTITLE B—SIMPLIFYING AND CLARIFYING AMENDMENTS

Part 1—Reporting and Disclosure

Sec. 221. Disclosure of accrued benefits.
Sec. 222. Exemptions and modifications.
Sec. 223. Elimination of summary annual report.
Sec. 224. Consolidation of forms.
Sec. 225. Improvement of reporting requirements.
Sec. 226. Opinions of actuaries and accountants.
Sec. 227. Update of summary plan description.
Sec. 228. Scope of accountant's opinion.
Sec. 229. Effective dates.

Part 2—Minimum Standards

Sec. 231. Reciprocal agreements.
Sec. 232. Determining participation on a plan year basis.
Sec. 233. Special rule for 125 days of service in the case of a maritime industry.
Sec. 234. Summation of different benefit accrual rates.
Sec. 235. Suspension of benefits because of reemployment.
Sec. 236. Amendments to conform plans to final regulations.
Sec. 237. Reductions in retirement or disability benefits.
Sec. 238. Joint and survivor annuity.
Sec 239. Elapsed time.

Part 3—Funding

Sec. 251. Funding to take account of future amendments.

Part 4—Fiduciary Responsibility

Sec. 261. General asset account.
Sec. 262. Obligation of employer to pay contributions.
Sec. 263. Refund of mistaken contributions.
Sec. 264. Co-fiduciary responsibility.
Sec. 265. Exemption for reciprocity arrangements.
Sec. 266. Solvency standards for certain uninsured welfare plans.

Part 5—Administration and Enforcement

Sec. 271. Remedies.
Sec. 272. Advisory Council.
Sec. 273. Impact of inflation on retirement benefits.
Sec. 274. Preemption.

TITLE III—AMENDMENTS TO THE INTERNAL REVENUE CODE OF 1954

Sec. 301. Lump sum distributions; plans treated as single plan.
Sec. 302. Lump sum distributions; separation from the service.
Sec. 303. Deduction for certain employee contributions to qualified retirement plans.
Sec. 304. Credit for the establishment of qualified plans by small employers.
Sec. 305. Credit for the improvement of qualified retirement plans.
Sec. 306. Denial of IRA, etc., benefits to owner-employees; corporate officers and shareholders.
Sec. 307. Retroactive disqualification of plans.

TITLE IV—SPECIAL MASTER AND PROTOTYPE PLANS

Sec. 401. Special master and prototype plans.

SEC. 2. TECHNICAL AND CONFORMING CHANGES.

The Secretary of the Treasury and the Secretary of Labor shall, as soon as practicable but in any event not later than 90 days after the date of the enactment of this Act, submit to the Congress a draft of any technical and conforming changes in the Internal Revenue Code of 1954, and the Employee Retirement Income Security Act of 1974, respectively, which are necessary to reflect throughout such Code and Act the changes in the substantive provisions of law made by this Act.

TITLE I—CONSOLIDATION OF FEDERAL AGENCY RESPONSIBILITIES FOR EMPLOYEE BENEFIT PLANS

SUBTITLE A—FINDINGS; DECLARATION OF POLICY

SEC. 101. FINDINGS AND DECLARATION OF POLICY.

(a) The Congress finds that the free flow of commerce and the implementation of the provisions of the Employee Retirement Income Security Act of 1974 and the provisions of subchapters D and F of chapter 1 of the Internal Revenue Code of 1954 (insofar as they relate to such Act) have been restricted and hampered by administrative difficulties encountered by the Labor Department, the Internal Revenue Service, and the Pension Benefit Guaranty Corporation; that the implementation of such provisions and the free flow of commerce have been further hampered and restricted by assertions of applicability of Federal and State securities and other laws to certain employee benefit plans; that the paperwork burdens and compliance costs resulting from such Act and Code provisions and affecting employee benefit plans and persons sponsoring such plans can be reduced in certain respects without jeopardizing the interests of employees in such plans and in the integrity of the assets of such plans; and that present and future needs for retirement income can best be met by strengthening and improving private employee pension benefit plans and that it is in the national interest to do so.

(b) It is hereby declared to be the policy of this Act to consolidate the administration of the Employee Retirement Income Security Act of 1974 and certain provisions of the Internal Revenue Code of 1954 as relate to plans which are subject to such Act in a single agency; to clarify prospectively the extent to which Federal and State securities and other laws may affect employee benefit plans which are subject to such Act and to protect certain persons and plans and hold them harmless from liability due to certain types of past, present or future allegations under such Federal or State securities laws; to provide new incentives to foster the establishment and maintenance of private employee pension benefit plans; and to further improve such plans by clarifying, simplifying and otherwise improving such Act and the provisions of such Code.

SUBTITLE B—EMPLOYEE BENEFITS COMMISSION

SEC. 121. SPECIAL LIAISON OFFICERS FOR LABOR AND TREASURY DEPARTMENTS.

(a) LABOR DEPARTMENT OFFICER.—There is established within the office of the Secretary of Labor, the position of special liaison officer to the Employee Benefits Commission. The special liaison officer shall be appointed by the President, by and with the advice and consent of the Senate, from a list of nominees submitted to the President by the Secretary of Labor and shall serve for a term of years in accordance with the provisions of section 122(b). The special liaison officer shall serve as chairman of the Employee Benefits Commission and shall report regularly to the Secretary of Labor on the activities of the Commission.

(b) TREASURY DEPARTMENT OFFICER.—There is established within the office of the Secretary of Treasury the position of special liaison officer to the Employee Benefits Commission. The special liaison officer shall be appointed by the President, by and with the advice and consent of the Senate, from a list of nominees submitted to the President by the Secretary of the Treasury and shall serve for a term of years in accordance with the provisions of section 122(b). The special liaison officer for the Treasury shall serve as vice-chairman of the Employee Benefits Commission and shall report regularly to the Secretary of Treasury on the activities of the Commission.

SEC. 122. EMPLOYEE BENEFITS COMMISSION.

(a) ESTABLISHMENT.—There is established, as an independent agency within the executive branch of the Government, the Employee Benefits Commission. The Commission is composed of—

(1) the special liaison officer for the Secretary of Labor appointed under subsection (a) of section 121,

(2) the special liaison officer for the Secretary of the Treasury appointed under subsection (b) of section 121, and

(3) 3 additional members appointed by the President, by and with the advice and consent of the Senate, selected from a list of nominees submitted jointly by the Secretary of Labor and the Secretary of the Treasury.

(b) TERMS OF OFFICE.—

(1) NUMBER OF YEARS.—Members of the Commission shall serve for terms of 6 years, except—

(A) the special liaison officer for the Secretary of the Treasury first appointed after the date of enactment of this Act shall serve for a term of 3 years, and

(B) of the three members of the Commission initially appointed under paragraph (3) of subsection (a), one shall serve for a term of 2 years, one shall serve for a term of 4 years, and one shall serve for a term of 6 years.

(2) SERVICE BEYOND EXPIRATION DATE.—A member of the Commission may serve as a member of the Commission after the expiration of his term until a successor has taken office as a member of the Commission.

(3) VACANCY APPOINTMENTS.—An individual appointed to fill a vacancy occurring other than by the expiration of a term of office shall be appointed only for the unexpired term of the member such individual succeeds.

(4) POLITICAL AFFILIATION.—Not more than three members of the Commission may be affiliated with the same political party.

(c) COMPENSATION.—Members of the Commission shall receive compensation equivalent to the compensation paid at level III of the Executive Schedule.

(d) FUNCTIONS.—The Commission shall—

(1) formulate a policy respecting Federal laws which now or may hereafter relate to employee benefit plans described in section 3(3) of the Employee Retirement Income Security Act of 1974,

(2) administer and enforce titles I and IV of such Act, and

(3) administer and seek to obtain compliance with sections 401, 410, 411, 412, 413, 414, 6057, and 6058 of the Internal Revenue Code of 1954 insofar as such sections relate to employee benefit plans (as defined in section 3(3) of the Employee Retirement Income Security Act of 1974) described in section 4(a) of such Act and not exempt under section 4(b) of such Act.

(e) RULES, ETC.—The Commission shall prepare written rules for the conduct of its activities, shall have an official seal which shall be judicially noticed, and shall have its principal office in or near the District of Columbia (but it may meet or exercise any of its powers anywhere in the United States).

(f) ADMINISTRATIVE AUTHORITY.—

(1) STAFF DIRECTOR; GENERAL COUNSEL.—The Commission shall have a staff director and a general counsel who shall be appointed by the Chairman. The staff director and the general counsel shall be paid at a rate not

in excess of the rate in effect for level IV of the Executive Schedule. With the approval of the Chairman, the staff tirector may—

(A) appoint and fix the compensation of such additional personnel as he considers necessary, and

(B) procure temporary and intermittent services to the same extent as authorized by section 3109(b) of title 5, United States Code.

(2) USE OF OTHER AGENCIES' RESOURCES.—In carrying out its responsibilities, the Commission may avail itself of the assistance, including personnel and facilities, of other agencies and departments of the United States Government. The heads of such other agencies and departments may make available to the Commission such personnel, facilities, and other assistance, with or without reimbursement, as the Commission may request.

SEC. 123. POWERS OF COMMISSION.

(a) IN GENERAL.—The Commission has powers expressly granted to the Secretary of Labor and the Pension Benefit Guaranty Corporation under the Employee Retirement Income Security Act of 1974 and, in addition, has the power—

(1) to require, by special or general orders, any person to submit in writing such reports and answers to questions as the Commission may prescribe, and such submission shall be made within such reasonable period of time and under oath or otherwise as the Commission may require;

(2) to administer oaths or affirmations;

(3) to require by subpoena, signed by the chairman or the vice chairman, the attendance and testimony of witnesses and the production of all documentary evidence relating to the execution of its duties;

(4) In any proceeding or investigation, to order testimony to be taken by deposition before any person who is designated by the Commission and has the power to administer oaths and, in such instances, to compel testimony and the production of evidence in the same manner as authorized under paragraph (3);

(5) to pay witnesses the same fees and mileage as are paid in like circumstances in the courts of the United States;

(6) to initiate (through civil actions for injunctive, declaratory, or other appropriate relief), defend, or appeal from a decision in, any civil action in the name of the Commission for the purpose of enforcing the provisions of titles I and IV of the Employee Retirement Income Security Act of 1974, through its general counsel;

(7) to develop such prescribed forms and to make, amend, and repeal such rules, pursuant to the provisions of chapter 5 of title 5, United States Code, as are necessary to carry out the provisions of this Act and of titles I and IV of the Employee Retirement Income Security Act of 1974;

(8) to conduct investigations and hearings, to encourage volumtary compliance, and to report apparent criminal law violations to the appropriate law enforcement authorities; and

(9) to certify to the Secretary of the Treasury that an employee benefit plan described in section 122(d)(3) of this Act—

(A) satisfies or does not satisfy (or has or has not satisfied) the requirements of sections 401, 410, 411, 412, 413, 414, 6057, or 6058 of the Internal Revenue Code of 1954, or

(B) satisfies or does not satisfy (or has or has not satisfied) the requirements of sections 44C and 44D of the Internal Revenue Code of 1954.

(b) ENFORCEMENT OF ORDERS OF THE COMMISSION.—Any United States district court within the jurisdiction of which any inquiry is carried on may, upon petition by the Commission in case of refusal to obey a subpoena or order of the Commission issued under subsection (a), issue an order requiring compliance therewith. Any failure to obey the order of the court may be punished by the court as contempt.

(c) TRANSFER OF FUNCTIONS.—All functions of the Secretary of Labor under the Employee Retirement Income Security Act of 1974 are transferred to, and shall be carried out by, the Commission. All functions of the Pension Benefit Guaranty Corporation under such Act are transferred to, and shall be carried out by, the Commission. All functions of the Secretary of the Treasury under sections 401, 410, 411, 412, 413, 414, 6057, and 6058 of the Internal Revenue Code of 1954, insofar as such sections relate to employee benefit plans described in section 122(d)(3) of this Act, are transferred to, and shall be carried out by, the Commission.

(d) TRANSFER PROVISIONS.—

(1) PERSONNEL, ETC.—All personnel, liabilities, contracts, property, and records determined by the Director of the Office of Management and Budget to be employed, held, or used primarily in connection with the functions of the Secretary of Labor under the Employee Retirement Income Security Act of 1974, of the Pension Benefit Guaranty Corporation under such Act, and of the Secretary of the Treasury under sections 401, 410, 411, 412, 413, 414, 6057, and 6058 of the Internal Revenue Code of 1954, insofar as such sections relate to employee benefit plans described in section 122(d)(3) of this Act, are transferred to the Commission.

(2) TRANSFER OF PERSONNEL.—

(A) Except as provided in subparagraph (B), personnel engaged in functions transferred under paragraph (1) shall be transferred in accordance with applicable laws and regulations relating to the transfer of functions.

(B) The transfer of personnel pursuant to paragraph (1) shall be made without reduction in classification or compensation for one year after such transfer.

(3) PROCEDURAL EFFECTS OF TRANSFER.—

(A) All laws and regulations relating to the functions transferred under this Act shall, insofar as such laws and regulations are applicable and not amended by this Act, remain in full force and effect. All order, determinations, rules, and opinions made, issued, or granted under such laws by the Secretary of Labor, the Pension Benefit Guaranty Corporation, or by the Secretary of the Treasury, which are in effect at the time of the transfer provided by paragraph (1), and which are consistent with the amendments made by this Act, shall continue in effect to the same extent as if such transfer had not occurred.

(B) The provisions of this Act shall not affect any proceeding pending before the Secretary of Labor, the Pension Benefit Guaranty Corporation, or the Secretary of the Treasury on the date of enactment of this Act.

(C) No suit, action, or other proceeding commenced by or against the Secretary of Labor, the Pension Benefit Guaranty Corporation, or the Secretary of the Treasury shall abate by reason of the transfer made under paragraph (1). The court before which such suit, action, or other proceeding is pending may, on motion or supplemental petition filed at any time within 12 months after the date of enactment of this Act, allow such suit, action, or other proceeding to be maintained against the Commission of the party making the motion or filing the petition shows a necessity for the survival of the suit, action, or other proceeding to obtain a settlement of the question involved.

SEC. 124. CERTIFICATION OF CERTAIN IMPROVED PLANS.

(a) GENERAL RULE.—The Commission shall, upon application made by an employer who maintains a qualified employer retirement plan (as defined in section 221(c)(3)(A) through (E) of the Internal Revenue Code of 1954), certify such plan to the Secretary of the Treasury as an improved plan for purposes of the credit allowed by section 44D of the Internal Revenue Code of 1954 if, for the plan year for which certification is requested—

(1) the Commission determines that there has been a substantial improvement in the employee benefits under the plan as compared with the preceding plan year, and

(2) rights of employees under the terms of the plan exceed the minimum requirements described in part 2 of title I of the Employee Retirement Income Security Act of 1974.

(b) MINIMUM IMPROVEMENT STANDARDS.—The Commission shall not certify any plan as an improved plan under subsection (a) unless, under the plan—

(1) the age and service requirements for participation in such plan permit significantly earlier participation than must be permitted under the age and service requirements of section 202 of the Employee Retirement Income Security Act of 1974, and

(2) the rate at which a participant's right to his normal retirement benefit becomes nonforfeitable is significantly more rapid than the least rapid rate permitted under section 203 of such Act, or

(3) the Commission determines that there is some other significant improvement in a participant's benefits and rights under the plan which is at least equivalent to an improvement which would satisfy the requirements of paragraphs (1) and (2).

SEC. 125. TERMINATION OF TREASURY DEPARTMENT'S JURISDICTION OVER CERTAIN ASPECTS OF CERTAIN PLANS; AGENCY COOPERATION.

(a) TERMINATION OF TREASURY JURISDICTION.—Except as provided in subsections (b) and (c), the Secretary of the Treasury shall not administer, seek to obtain compliance with, or otherwise exercise responsibility or power respecting sections 401, 410, 411, 412, 413, 414, 6057, 6058, 4971, and 4975 of the Internal Revenue Code of 1954 insofar as such sections relate to an employee benefit plan (as defined in section 3(3) of the Employee Retirement Income Security Act of 1974) described in section 4(a) of such Act and not exempt under section 4(b) of such Act.

(b) CERTIFICATIONS BY COMMISSION.—Certifications made by the Employee Benefits Commission to the Secretary of the Treasury pursuant to section 123(a)(9) of this Act shall be treated by the Secretary as if he had made such certifications himself.

(c) COOPERATION.—Pursuant to procedures they shall jointly formulate and establish, the Employee Benefits Commission, the Secretary of Labor, and the Secretary of the Treasury shall make arrangements for—

(1) notification by the respective Secretaries to the Commission regarding information which concerns the Commission's functions under section 122(d), and

(2) notification by the Commission to the Secretaries regarding information which concerns their respective functions under laws relating to employee benefit plans.

SEC. 126. EFFECTIVE DATE AND REPEAL.

This title shall take effect one year after the date of enactment of this Act. Subtitle A of title III of the Employee Retirement Income Security Act of 1974 is repealed on such effective date.

TITLE II—AMENDMENTS TO THE EMPLOYEE RETIREMENT INCOME SECURITY ACT OF 1974

SUBTITLE A—DECLARATION OF POLICY; DEFINITIONS

SEC. 201. DECLARATION OF POLICY; DEFINITIONS.

(a) DECLARATION OF POLICY.—Section 2 of the Employee Retirement Income Security

Act of 1974 is amended by adding at the end thereof the following new subsection:

"(d) It is hereby further declared to be the policy of this Act to foster the establishment and maintenance of employee benefit plans sponsored by employers, employee organizations, or both.".

(b) Section 3 of the Employee Retirement Income Security Act of 1974 is amended by—

(1) redesignating paragraph (4) as paragraph (4)(A) and by adding at the end thereof the following new subparagraph:

"(B) For purposes of this paragraph, the term 'employees' beneficiary association' shall mean an association in which employees participate as members and in which eligibility for membership is based on a commonality of interest with respect to the members' employment relationships.";

(2) striking out subparagraphs (A), (B), (C), (D), (H), and (I) of paragraph (14) and inserting in lieu thereof, respectively, the following subparagraphs:

"(A) any fiduciary, counsel, or employee of such plan;

"(B) a person providing professional services to such plan, or a person providing nonprofessional services on a continuous basis to such plan;

"(C) an employer any of whose employees are covered by such plan, if the employees of such employer constitute five percent or more of all employees covered by the plan;

"(D) an employee organization any of whose members are covered by such plan, if the members of such employee organization constitute five percent or more of all employees covered by the plan;

"(H) an officer, director (or an individual having powers or responsibilities similar to those of officers or directors), a 10 percent or more shareholder, or a highly compensated employee (earning 10 percent or more of the yearly wages of an employer) or a person described in subparagraph (d) (D), (E), or (G); or

"(I) a 10 percent or more (in capital or profits) partner, or joint venturer with, a person described in subparagraph (C), (D), (E), or (G).";

(3) inserting in paragraph (15) "brother, sister," immediately before "spouse,";

(4) striking out "The" in paragraph (20) and inserting in lieu thereof "Except as otherwise provided in section 514 (d) (2), the";

(5) (A) striking out clauses (i), (ii), and (iii) of subparagraph (A) of paragraph (37) and inserting in lieu thereof the following:

"(i) which is maintained pursuant to one or more collectve bargaining agreements between an employee organization and more than one employer.

"(ii) to which ten or more employers contribute, or to which more than one and fewer than ten employers contribute if the Secretary finds that treating such a plan as a multiemployer plan would be consistent with the purposes of this Act, and",

(B) redesignating clauses (iv) and (v) of paragraph (37)(A) as clauses (iii) and (iv), respectively, and

(C) striking out subparagraph (B) of paragraph (37) and inserting in lieu thereof the following new subparagraph:

"(B) For purposes of this paragraph, all corporations which are members of a controlled group of corporations (within the meaning of section 1563(a) of the Internal Revenue Code of 1954, determined without regard to section 1563(e)(3)(C) of such Code) shall be deemed to be one employer.".

SUBTITLE B—SIMPLIFYING AND CLARIFYING AMENDMENTS

PART 1—REPORTING AND DISCLOSURE

SEC. 221. DISCLOSURE OF ACCRUED BENEFITS.

Section 105 of the Employee Retirement Income Security Act of 1974 is amended to read as follows:

"REPORTING OF PARTICIPANT'S BENEFIT RIGHTS

"SEC. 105. (a)(1) Each administrator of an employee pension benefit plan shall furnish to any plan participant or beneficiary who so requests in writing a statement indicating, on the basis of the latest available information—

"(A) the total benefits accrued, and

"(B) the nonforfeitable pension benefits, if any, which have accrued, or the earliest date on which benefits will become nonforfeitable.

"(2) In no case shall a participant or beneficiary be entitled under this subsection to receive more than one report described in paragraph (1) during any one twelve-month period.

"(3) If an administrator furnishes an annual statement which contains the information required by this subsection, the furnishing of such annual statement shall satisfy the requirements of this subsection.

"(4) This subsection shall apply to a plan to which more than one unaffiliated employer is required to contribute only to the extent provided by regulations prescribed by the Commission.

"(b)(1) Each administrator of an employee pension benefit plan shall report, in such manner and at such time as may be provided in regulations prescribed by the Commission, to each plan participant who during a plan year—

"(A)(i) terminates his service with the employer, or

"(ii) has a 1-year break in service, and

"(B) is entitled to a deferred vested benefit under the plan as of the end of such plan year, and

"(C) with respect to whom retirement benefits are not paid under the plan during such plan year.

The report required under this subsection shall inform the employee of the nature, amount, and form of the deferred vested benefit to which such participant is entitled, and such other information as the Commission may require.

"(2) Not more than one report shall be required under paragraph (A)(ii) with respect to consecutive one year breaks in service.

"(c)(1) Except as provided by paragraph (2) of this subsection, each employer shall, in accordance with regulations prescribed by the Commission, maintain records with respect to each of his employees sufficient to determine the benefits due or which may become due to such employees. The employer shall furnish the plan administrator information necessary for the administrator to make the reports required by subsections (a) and (b).

"(2) If more than one employer adopts a plan, each such employer shall, in accordance with regulations prescribed by the Commission, furnish to the plan administrator information necessary for the administrator to maintain the records and make the reports required by subsections (a) and (b). Such an administrator shall maintain the records and, to the extent provided under regulations prescribed by the Commission, make the reports, required by subsections (a) and (b).

"(3) If any person who is required under this section (other than under subsection (a)(1)) to furnish information or to maintain records fails to comply with such requirements, he shall pay to the plan a penalty of $10 for each employee with respect to whom such failure occurs, unless it is shown that such failure is due to reasonable cause.".

SEC. 222. EXEMPTION FOR REPORTING AND DISCLOSURE REQUIREMENTS.

(a) In General.—Section 110 of such Act is amended to read as follows:

"EXEMPTIONS AND MODIFICATIONS

"Sec. 110. The Secretary may by regulation exempt any employee benefit plan or person, or any class of employee benefits plans or persons conditionally or unconditionally from any requirement of this part or may modify any such requirement if he determines that such exemption or modification is—

"(1) appropriate and necessary in the public interest, and

"(2) consistent with the purposes of this title.".

(b) Conforming Changes.—Section 104(a) of such Act is amended—

(1) by striking out paragraphs (2) and (3), and by redesignating paragraphs (4) and (5) as (2) and (3), respectively, and

(2) by striking out "paragraph (4)" in paragraph (3) (as redesignated) and inserting in lieu thereof "paragraph (2)".

SEC. 223. ELIMINATION OF SUMMARY ANNUAL REPORT.

Section 104(b) is amended—

(1) by striking out paragraph (3) and redesignating paragraph (4) as (3), and

(2) by inserting before the period at the end of the last sentence of such paragraph a comma and the following: "but the charge for furnishing a copy of the latest annual report may not exceed $10".

SEC. 224. CONSOLIDATION OF FORMS.

Not later than eighteen months after enactment of this Act, the Commission shall, with respect to employee benefit plans described in section 122(d)(3) of this Act, prescribe a single form (or a single series of forms) which shall be used to satisfy the requirements of section 102(a)(2) of the Employee Retirement Income Security Act of 1974 and such additional reporting requirements as the Commission deems necessary for the reporting of information presently reported on Internal Revenue Service Forms 5300, 5301, and 5303.

SEC. 225. IMPROVEMENT OF REPORTING REQUIREMENTS.

In order to avoid the reporting of unnecessary information, the Commission shall develop reporting forms and requirements for employee benefit plans described in section 122(d)(3) of this Act which, to the maximum extent feasible and consistent with the purposes of this Act and the Employee Retirement Income Security Act of 1974, take into account the different types and sizes of employee benefit plans. Not later than 18 months after the date of enactment of this Act, the Commission shall report to the Congress on the actions taken and proposed to be taken to implement this directive. Not later than 24 months after the enactment of this section, the Commission shall submit to the Congress its final written report on the implementation of this section.

SEC. 226. OPINIONS OF ACTUARIES AND ACCOUNTANTS.

Section 103(a) of the Employee Retirement Income Security Act of 1974 is amended—

(1) by inserting ", except to the extent required by subparagraph (B)," in paragraph (3)(A) after "Such examination shall be conducted in accordance with generally accepted auditing standards,",

(2) by striking out "may" in paragraph (3)(B) and inserting in lieu thereof "shall",

(3) by striking out "if he so states his reliance" in such paragraph,

(4) by striking out "may" in paragraph (4)(D) and inserting in lieu thereof "shall", and

(5) by striking out "if he so states his reliance" in such paragraph.

SEC. 227. UPDATE OF SUMMARY PLAN DESCRIPTION.

Section 104(b)(1) of the Employee Retirement Income Security Act of 1974 is amended to read as follows:

"(1) The administrator shall furnish to each participant, and each beneficiary receiv-

ing benefits under the plan, a copy of the summary plan description, and all modifications and changes referred to in section 102 (a)(1)—

"(A) within 90 days after he becomes a participant, or (in the case of a beneficiary) within 90 days after he first receives benefits, or

"(B) if later, within 120 days after the plan becomes subject to this part.

Not less frequently than every tenth year after the plan becomes subject to this part, the administrator shall furnish to each participant and to each beneficiary receiving benefits under the plan, the summary plan description described in section 102 which shall be updated by the integration into the summary plan description of all plan amendments, if any, made within such 10-year period. If there is a modification or change described in section 102(a)(1), a summary description of such modification or change shall be furnished not later than 210 days after the end of the plan year in which the change is adopted to each participant and to each beneficiary who is receiving benefits under the plan.".

SEC. 228. SCOPE OF ACCOUNTANT'S OPINION.

Section 103(a)(3)(C) of the Employee Retirement Income Security Act of 1974 is amended by striking out "need" and inserting in lieu thereof "shall".

SEC. 229. EFFECTIVE DATES.

The amendments made by sections 222 and 227 shall be effective, and the amendments made by sections 223, 226, and 228 shall apply with respect to plan years beginning on and after the date of enactment of this Act. Sections 224 and 225 shall be effective 12 months after such enactment date. The amendments made by section 221 shall be effective 18 months after such enactment date.

PART 2—MINING STANDARDS

SEC. 231. RECIPROCAL AGREEMENTS.

Section 209 of the Employee Retirement Income Security Act of 1974 is amended to read as follows:

"RECIPROCAL AGREEMENTS

"SEC. 209. Notwithstanding any other provision of this title, the contributions made with respect to the employment of an employee pursuant to a collective bargaining agreement and payable to a pension or welfare plan maintained pursuant to that agreement (hereinafter in this section referred to as the 'away plan') may be transferred to a similar pension or welfare plan established pursuant to another collective bargaining agreement under which the employee had previously become a participant (hereinafter referred to in this section as the 'home plan') if such transfer is pursuant to a written agreement between the administrator of the away plan and the administrator of the home plan. In any case where contributions received with respect to the employment of an employee are transferred from an away plan to a home plan in accordance with this section, such employment shall be considered as employment under the jurisdiction of the home plan for purposes of computing the accrued benefit and vesting of such employee, but the employer who contributed to the away plan on behalf of such employee shall not be deemed to be an employer maintaining the home plan solely because of such transferred contributions. The Secretary may by regulation establish additional conditions, and such variances and exemptions as are consistent with the purposes of this Act, in order to facilitate such transfer arrangements in the interest of portability and to protect the pension and welfare benefits of employees who become employed under two or more collective bargaining agreements associated with different pension or welfare plans.".

SEC. 232. DETERMINING PARTICIPATION ON A PLAN YEAR BASIS.

The second sentence of section 202(a)(3)(A) of the Employee Retirement Income Security Act of 1974 is amended by inserting "(i)" after "first day of a plan year" and by inserting after "date his employment commenced" the following: "or (ii) in the case of a plan where rights and benefits under this part are determined on the basis of all of an employee's service without regard to the date on which the employee's participation in the plan commenced".

SEC. 233. SPECIAL RULE FOR 125 DAYS OF SERVICE IN THE CASE OF A MARITIME INDUSTRY.

Section 204(b)(3)(F) of the Employee Retirement Income Security Act of 1974 is amended by striking out "a 1 year of participation" and inserting in lieu thereof the following: "1,000 hours of employment".

SEC. 234. SUMMATION OF DIFFERENT BENEFIT ACCRUAL RATES.

Section 210(a) of the Employee Retirement Income Security Act of 1974 is amended by adding at the end thereof the following new paragraph:

"(4) a multiemployer plan may provide that the accrued benefit to which a participant is entitled upon his separation from the service is—

"(A)(i) the sum of different rates of benefit accrual for different periods of participation as defined by one or more fixed calendar dates, or

"(ii) the sum of different rates of benefit accrual for different periods of participation, as defined by employment in different bargaining units, and

"(B) determined, for purposes of subparagraphs (A) and (C) of subsection 204(b)(1), by projecting the normal retirement benefit to which a participant would be entitled if he continued to accrue benefits at the average of the rates applicable to his period of actual participation.".

SEC. 235. SUSPENSION OF BENEFITS BECAUSE OF REEMPLOYMENT.

Section 203(a)(3)(B) of the Employee Retirement Income Security Act of 1974 is amended—

(1) by striking out "in the same trade" in clause (ii) and inserting in lieu thereof ", trade,", and

(2) by striking out "'employed'," in the last sentence and inserting in lieu thereof the following: "which may, with respect to clause (ii), include self-employment. The permissible period of benefit suspension shall include a period determined pursuant to regulations promulgated by the Commission in addition to the months in which the employment occurs to the extent necessary to prevent the periodic payment and suspension of pension benefits to workers who have not retired but who continue to work on an irregular basis. The imposition of a financial penalty on a pensioner who fails to report his employment as required by the rules of a plan shall not be deemed a violation of the vesting requirements of this section. The amount of the financial penalty permitted by the preceding sentence shall be determined pursuant to regulations promulgated by the Commission but in no event shall the penalty exceed an amount equal to one year's benefit.".

SEC. 236. AMENDMENTS TO CONFORM PLANS TO FINAL REGULATIONS

Section 204 of the Employee Retirement Income Security Act of 1974 is amended by redesignating subsection (h) as (i) and inserting after subsection (g) the following new subsection:

"(h) Any plan amendments adopted prior to January 1, 1980, which comply with final regulations issued under this Act shall not be deemed to violate any provision of this title by reason of the fact that such amendment changes or revises any amendment adopted after September 2, 1974, and prior to issuance of such final regulations, unless such amendment has the effect of decreasing vested rights or accrued benefits under such plan as in existence on September 2, 1974.".

SEC. 237. REDUCTIONS IN RETIREMENT OR DISABILITY BENEFITS.

Section 206 (b) of the Employee Retirement Income Security Act of 1974 is amended—

(1) by inserting after "plan" in paragraph (1) the following: "or is receiving disability benefits under a welfare plan",

(2) by inserting immediately after "this Act" the following: "(or, in the case of a participation or beneficiary who is receiving disability benefits under a welfare plan, the date of enactment of the ERISA Improvements Act)", and

(3) by adding at the end thereof the following new sentence: "A pension plan may not reduce pension benefits being received by a participant or beneficiary or pension benefits in which a participant who is separated from the service has a nonforfeitable right by reason of any payment made to the participant or beneficiary by the employer maintaining the plan as the result of an award made under a workers compensation law.".

SEC. 238. JOINT AND SURVIVOR ANNUITY.

(a) Section 205 of the Employee Retirement Income Security Act of 1974 is amended—

(1) by inserting "(1)" after "(a)" in subsection (a), and by adding at the end of such subsection the following new paragraph:

"(2) If a pension plan does not provide for the payment of benefits in the form of an annuity, with respect to any participant who under the plan has a nonforfeitable right to not less than 50 percent of his accrued benefit derived from employer contributions and who dies before receiving such percentage of his benefit which is nonforfeitable, such plan shall provide that the participant's account balance shall be distributed in the form of a lump sum to the participant's surviving spouse not later than 60 days after the end of the plan year in which the participant died.".

(2) by striking out subsection (b) and inserting in lieu thereof the following:

"(b)(1) A plan which provides for the payment of benefits in the form of an annuity shall not be treated as satisfying the requirements of this section unless, with respect to any participant who under the plan has a nonforfeitable right to not less than 50 percent of his accrued benefit derived from employer contributions and who dies before the annuity starting date, the plan provides a survivor's annuity for the participant's spouse—

"(A) which begins on the annuity starting date (determined as if the participant had lived until his earliest retirement age, or his actual date of death if later, and had retired on such date prior to his death), if the spouse is living on such date, and

"(B) the payments under which are not less than the payments which would have been made under the survivor's annuity to which such spouse would have been entitled if the participant had terminated employment on his date of death, had survived and retired on such annuity starting date, and had died on the day following such date.

"(2) A plan shall not be treated as not satisfying the requirements of subsection (a) and paragraph (1) if the plan provides for the payment of benefits actuarially equivalent to the survivor's annuity required by paragraph (1) to a surviving spouse beginning not later than the annuity starting date specified in paragraph (1).",

(3) by striking out subsection (c) and subsection (h) and by redesignating subsections (d), (e), (f), and (g) as (c), (d), (e), and (f), respectively,

(4) by striking out "(whether or not an election has been made under subsection (c))" in subsection (c) (as redesignated under paragraph (3)), and

(5) by striking out "subsection (c) or (e)" in subsection (e) (as redesignated under paragraph (3)) and inserting in lieu thereof "subsection (d)".

(b) Effective Date.—The amendments made by this section shall apply with respect to plan years beginning on or after the date which is 24 months after the date of enactment of this Act.

SEC. 239. ELAPSED TIME.

Section 211 of the Employees Retirement Income Security Act of 1974 is amended by inserting immediately after subsection (e) the following new subsection:

"(f) Notwithstanding anything to the contrary in this part, the Secretary may prescribe by regulation one or more systems of measuring service for purposes of sections 202, 203, and 204 which are based upon measurement of the elapsed time of an employee's service. Any such regulations shall include safeguards to assure that employees whose service is measured in terms of elapsed time are, in the aggregate, not disadvantaged by the use of such system of measurement when compared to employees whose service is measured in the manner prescribed in sections 202, 203, and 204.".

PART 3—FUNDING

SEC. 251. FUNDING TO TAKE ACCOUNT OF FUTURE AMENDMENTS.

Section 302 (c) (1) of the Employee Retirement Income Security Act of 1974 is amended by adding at the end thereof the following: "The funding method may take account, and for any plan year beginning after December 31, 1980, shall take account, of all provisions of the plan, including provisions which have not yet affected any participant as to entitlement to, or accrual of, benefits. In the event any such provisions is not implemented at the time specified when the provision was adopted, the funding standard account shall be appropriately adjusted in accordance with regulations prescribed by the Secretary. A provision adopted but contingent on a future event shall be deemed not to be in effect as a provision of the plan prior to the occurrence of that event.".

PART 4—FIDUCIARY RESPONSIBILITY

SEC. 261. GENERAL ASSET ACCOUNT.

Section 401(b) of the Employee Retirement Income Security Act of 1974 is amended by striking out paragraph (2) and inserting in lieu thereof the following:

"(2) In the case of a plan the benefits of which are insured, the assets of the plan shall include the policy under which the benefits are insured but shall not, solely by reason of the issuance of such policy, include the assets of the insurer issuing the policy except to the extent that such assets are maintained by the insurer in one or more separate accounts and do not constitute surplus in any such account. For purposes of this paragraph, the term 'insurer' means an insurance company, insurance service, or insurance organization, qualified to conduct business in a State.".

SEC. 262. OBLIGATION OF EMPLOYER TO PAY CONTRIBUTIONS.

(a) Section 402 of the Employee Retirement Income Security Act of 1974 is amended by adding at the end thereof the following new subsection:

"(d) Every employer who is obligated under the terms of a collectively bargained plan (or under the terms of a collective bargaining agreement related to such plan) to make periodic contributions to the plan shall, to the extent not inconsistent with law, make such contributions in accordance with the terms and conditions of such plan or such agreement.

SEC. 263. REFUND OF MISTAKEN CONTRIBUTIONS.

Section 403(c)(2)(A) of the Employee Retirement Income Security Act of 1974 is amended by inserting before the period at the end thereof the following: "or, in the case of a plan maintained by more than one employer, within one year after the plan administrator knows that the contribution was made by a mistake of fact.".

SEC. 264. CO-FIDUCIARY RESPONSIBILITY

Section 405 of the Employee Retirement Income Security Act of 1974 is amended by adding at the end thereof the following new subsection:

"(e)(1) In the case of a fiduciary other than an individual, the term 'knowledge' in subsection (a)(3) shall mean knowledge actually comunicated (or knowledge which, in the normal course of business, should have been communicated) to the fiduciary's officer or employee who is authorized to carry out the fiduciary's responsibilities, obligations, or duties (or who in fact carries out such responsibilities, obligations or duties) regarding the matter to which the knowledge relates.

"(2) In the case of an employer who is a fiduciary and who fails to satisfy the requirement of section 402(d), subsections (a) (2) and (3) shall not apply to any cofiduciary of such employer respecting such failure.".

SEC. 265. EXEMPTION FOR RECIPROCITY ARRANGEMENT.

Section 408(b) of the Employee Retirement Income Security Act of 1974 is amended by adding at the end thereof the following new paragraph:

"(10) Any transfer of contributions between plans pursuant to section 209, if a plan to which the contributions are transferred pays not more than a reasonable charge for any administrative expenses reasonably incurred by a plan transferring such contributions.".

SEC. 266. SOLVENCY STANDARDS FOR CERTAIN UNINSURED WELFARE PLANS.

(a) IN GENERAL—Part 4 of subtitle B of title I of the Employee Retirement Income Security Act of 1974 is amended by redesignating section 413 and 414 as 414 and 415, respectively, and by inserting after section 412 the following new section:

"CERTAIN UNINSURED WELFARE PLANS

"SEC. 413. (a) Every uninsured welfare plan described in subsection (b) shall be subject to such solvency and reserve standards as the Secretary shall require by regulation.

"(b) The term 'uninsured welfare plan' means a welfare plan (or portion of a welfare plan) under which the benefits are not funded by insurance under a policy issued by an insurer (as defined in section 401(b)(2)) and the participants of which have no commonality of interest respecting terms or conditions of employment other than their participation in such plan.

"(c) Regulations promulgated by the Secretary under this section shall take effect not later than 18 months after the date of enactment of the ERISA Improvements Act.".

(b) Clerical Amendments.—The table of contents for such Act is amended by redesignating the items relating to sections 413 and 414 as relating to sections 414 and 415, and by inserting after the item relating to section 412 the following new item:

"SEC. 413. Uninsured welfare plans.".

PART 5—ADMINISTRATION AND ENFORCEMENT

SEC. 271. REMEDIES.

Section 502 of the Employee Retirement Income Security Act of 1974 is amended by—

(1) striking out "105(c)" in subsection (a)((4) and inserting in lieu thereof "105";

(2) striking out subsection (b) and inserting in lieu thereof the following:

"(b) The Commission shall not bring an action to enforce section 402(c).";

(3) striking out subsection (g) and inserting in lieu thereof the following:

"(g)(1) Except as provided in paragraph (2), in any action under this title by a participant, beneficiary, of fiduciary, the court in its discretion may allow a reasonable attorney's fee and costs of the action to either party.

"(2) In any action under this title by a fiduciary on behalf of a plan to enforce the provisions of section 402(d) and in which a judgment in favor of the plan is awarded, the court shall allow a reasonable attorney's fee and costs of the action, to be paid by the defendant.";

(4) striking out subsection (i) and redesignating subsections (j) and (k) as subsections (i) and (j), respectively; and

(5) inserting a new subsection (k), to read as follows:

"(k)(1) Nothwithstanding any provision of law to the contrary, in the case of an employee benefit plan other than an eligible individual account plan (as defined in section 407(d)(3) of this Act) in which participation is voluntary under the terms of the plan—

"(A) no person or employee benefit plan shall be subject to liability or punishment, civil or criminal, or be required to reimburse or pay money or any other thing of value, as the direct or indirect result of a cause of action explicitly or implicitly alleging that the interest of an employee in such a plan is, or ought to be characterized as or deemed to be, a security within the meaning of the Security within the meaning of the Securities Act of 1933, the Securities Exchange Act of 1934, or any law of any State which regulates securities; and

"(B) no court of the United States shall have jurisdiction of an action or proceeding at law or in equity, whether instituted prior to or on or after the date of enactment of the ERISA Improvements Act of 1978, to the extent such action or proceeding involves a cause of action explicitly or implicitly alleging that the interest of an employee in such a plan is, or ought to be characterized as or deemed to be, a security within the meaning of the Securities Act of 1933, the Securities Exchange Act of 1934, or any law of any State which regulates securities.

"(2) For purposes of this subsection and section 514(d)(2), participation is not voluntary under the terms of a plan—

"(A) if, as an incident of employment with the employer or employers maintaining the plan or as an incident of membership in one or more employee organizations, the members of which are covered under the plan, and upon satisfaction of the plan's age and service requirements, if any, an employee becomes a participant in the plan, and

"(B) even if a provision of the plan permits an employee, subject to approval by the plan administrator, to waive participation in the plan.".

SEC. 272. ADVISORY COUNCIL.

Paragraph (3) of section 512(a) of the Employee Retirement Income Security Act of 1974 is amended by striking out "(at least one of whom shall be representative of employers maintaining or contributing to multiemployer plans)" and inserting in lieu thereof the following: "(one of whom shall be representative of employers maintaining or contributing to multiemployer plans and

one of whom shall be representative of employers maintaining small plans)".

SEC. 273. IMPACT OF INFLATION ON RETIREMENT BENEFITS.

Section 513 of the Employee Retirement Income Security Act of 1974 is amended by adding at the end thereof the following new subsection:

"(d) The Secretary shall conduct a study of the feasibility of requiring employee pension benefit plans to provide cost-of-living adjustments to benefits payable under such plans. The Secretary shall compile data and analyze the effect inflation is having and may be expected to have on retirement benefits provided by private pension plans. The Secretary shall submit the study required by this subsection to the Congress no later than 24 months after the date of enactment of the ERISA Improvements Act.".

SEC. 274. PREEMPTION.

Section 514 of the Employee Retirement Income Security Act of 1974 is amended by—

(1) striking out "subparagraph (B)," in subsection (b)(2)(A) and inserting in lieu thereof "subparagraph (B) and subsection (d)(2),";

(2) striking out "nothing" where it appears in subsection (d) and inserting in lieu thereof "(1) Except as provided in paragraphs (2) and (3), nothing"; and

(3) adding at the end of subsection (d) the following new paragraphs:

"(2) Notwithstanding any provision of law to the contrary, the interest of an employee in an employee benefit plan described in section 4(a) and not exempt under section 4(b) is not, and shall not be characterized as or deemed to be, a security within the meaning of the Securities Act of 1933, the Securities and Exchange Act of 1934, or any law of any State which regulates securities, unless such plan is an eligible individual account plan (as defined in section 407(c)(3) of this Act) in which participation is voluntary under the terms of the plan.

"(3) Notwithstanding any provision of law to the contrary, an interest or participation—

"(A) in a single or collective trust maintained by a bank or in a separate account maintained by an insurer, and

"(B) issued to an employee benefit plan or plans described in section 4(a) and not exempt under section 4(a).

is not, and shall not be characterized as or deemed to be, a security within the meaning of the Securities Act of 1933, the Securities Exchange Act of 1934, or any law of any State which regulates securities, and such a single or collective trust or separate account is not, and shall not be characterized as or deemed to be, an investment company within the meaning of the Investment Company Act of 1940 or any law of any State which regulates investment companies. For purposes of this paragraph, the term 'insurer' shall have the meaning given in section 401(b)(2).".

TITLE III—AMENDMENTS TO THE INTERNAL REVENUE CODE OF 1954

SEC. 301. LUMP SUM DISTRIBUTIONS: PLANS TREATED AS SINGLE PLAN.

(a) GENERAL RULE.—Section 402(e)(4)(C) of the Internal Revenue Code of 1954 (relating to aggregation of certain trusts and plans) is amended to read as follows:

"(C) AGGREGATION OF CERTAIN TRUSTS AND PLANS.—For purposes of determining, the balance to the credit of an employee under subparagraph (A)—

"(i) all trusts which are part of a plan shall be treated as a single trust,

"(ii) in the case of a multiemployer plan (as defined in section 3 (37) of the Employee Retirement Income Security Act of 1974), all defined benefit plans maintained by an employer shall be treated as a single plan, and all defined contribution plans maintained by an employer shall be treated as a single plan.

"(iii) in the case of any plan not described in subsection (ii), all pension plans maintained by an employer shall be treated as a single plan, all profit-sharing plans maintained by an employer shall be treated as a single plan, and all stock bonus plans maintained by the employer shall be treated as a single plan, and

"(iv) trusts which are not qualified trusts under section 401(a) and annuity contracts which do not satisfy the requirements of section 404(a)(2) shall not be taken into account.".

(b) EFFECTIVE DATE.—The amendment made by this section shall apply to taxable years beginning after the date of enactment of this Act.

SEC. 302. LUMP DISTRIBUTION; SEPARATION FROM THE SERVICE.

(a) GENERAL RULE.—Section 402(e)(4) of the Internal Revenue Code of 1954 (relating to definitions and special rules) is amended by adding at the end thereof the following new subparagraph:

"(M) SEPARATION FROM THE SERVICE.—For purposes of subparagraph (A), in the case of any multiemployer plan (as defined in section 3 (37) of the Employee Retirement Income Security Act of 1974), a separation from the service shall be deemed to have occurred in the case of any employee if such employee has not worked in service covered by the plan for a period of 6 consecutive months after severing his employment relationship with any employer maintaining the plan.".

(b) EFFECTIVE DATE.—The amendment made by this section shall apply with respect to plan years beginning after the date of enactment of this Act.

SEC. 303. DEDUCTION FOR CERTAIN EMPLOYEE CONTRIBUTIONS TO QUALIFIED RETIREMENT PLANS.

(a) IN GENERAL.—Part VII of subchapter B of chapter 1 of the Internal Revenue Code of 1954 (relating to additional itemized deductions for individuals) is amended by redesignating section 221 as 222, and by inserting immediately after section 220 the following new section:

"SEC. 221. CERTAIN EMPLOYEE CONTRIBUTIONS TO QUALIFIED RETIREMENT PLANS

"(a) GENERAL RULE.—In the case of an individual who—

"(1) has not attained age 70½ before the close of the taxable year, and

"(2) is an active participant in a qualified employer retirement plan,

there is allowed as a deduction an amount equal to the sum of the amounts contributed by the individual as an employee to or under such plan for the taxable year.

"(b) MAXIMUM AMOUNT OF DEDUCTION.—

"(1) IN GENERAL.—The amount allowable as a deduction under subsection (a) to any individual for the taxable year shall not exceed the lesser of—

"(A) an amount equal to 10 percent of the compensation includible in the individual's gross income for such taxable year, or

"(B) $1,000.

"(2) REDUCTION OF DEDUCTION BASED ON ADJUSTED GROSS INCOME.—The amount of the deduction allowable under subsection (a) for a taxable year after the application of paragraphs (1) and (2) shall be reduced by 20 percent of the amount by which the adjusted gross income of the taxpayer exceeds $30,000 ($15,000 in the case of a married individual making a separate return).

"(c) DEFINITIONS; SPECIAL RULES.—

"(1) RECONTRIBUTED AMOUNTS.—No deduction shall be allowed under this section with respect to a rollover contribution described in section 402(a)(5), 403(a)(4), 408(d)(3), or 409(b)(3)(C).

"(2) AMOUNTS CONTRIBUTED UNDER ENDOWMENT CONTRACT.—In the case of an endowment contract described in section 408(b), no deduction shall be allowed under this section for that portion of the amounts paid under the contract for the taxable year which are properly allocable, under regulations prescribed by the Secretary, to the cost of life insurance.

"(3) QUALIFIED EMPLOYER RETIREMENT PLAN.—The term 'qualified employer retiremeant plan' means—

"(A) a plan described in section 401(a) which includes a trust exempt from tax under section 501(a),

"(B) an annuity plan described in section 403(a),

"(C) a qualified bond purchase plan described in section 405(a),

"(D) a plan established for its employees by the United States, by a State or political subdivision thereof, or by an agency or instrumentality of any of the foregoing,

"(E) any plan under which amounts are contributed by an individual's employer for an annuity contract described in section 403(b) (whether or not such individual's rights in such contract are nonforfeitable), and

"(F) a group retirement trust maintained by a labor organization described in section 501(c)(5) which is financed exclusively by assessments of employees who are members of such labor organization, which was established prior to January 1, 1974, and in which the assessments paid to the trust by any participant are 100 percent nonforfeitable.

"(4) COMPENSATION.—For purposes of this section, the term 'compensation' includes earned income as defined in section 401(c)(2).

"(5) MARRIED INDIVIDUALS.—In the case of an individual who is married (as determined under section 143(a)), the maximum deduction under subsection (b) shall be computed separately for each individual, and this section shall be applied without regard to any community property laws.

"(6) TIME WHEN CONTRIBUTIONS DEEMED MADE.—For purposes of this section, a taxpayer shall be deemed to have made a contribution to or under a qualified employer retirement plan on the last day of the preceding taxable year if the contribution is made on account of such taxable year and is made not later than 45 days after the end of such taxable year.".

(b) CLERICAL AMENDMENT.— The table of sections for such subpart is amended by striking out the last item and inserting in lieu thereof the following:

"Sec. 221. Certain employee contributions to qualified retirement plans.
"Sec. 222. Cross references.".

(c) CONFORMING AMENDMENT.—Paragraph 10 of section 62 of such Code (relating to retirement savings) is amended—

(1) by striking out "and" and inserting in lieu thereof a comma, and

(2) by inserting "the deduction allowed by section 221 (relating to deduction for certain employee contributions to qualified retirement plans)" before the period at the end of such paragraph.

(d) ACCEPTANCE OF EMPLOYEE CONTRIBUTIONS.—Section 401 of such code (relating to qualified pension, profitsharing, and stock bonus plans) is amended by redesignating subsection (k) as (l), and by inserting after subsection (j) the following new subsection:

"(k) EMPLOYEE CONTRIBUTIONS.—A trust shall not constitute a qualified trust under this section unless the plan of which such trust is a part accepts employee contributions for which a deduction is allowable under section 221 (as determined without regard to the limitation of subsection (b)(1) of such section) of up to $1,000 per calendar year per employee and treats such contributions as separate accounts.".

(d) Effective Date.—The amendments

made by this section shall apply with respect to taxable years and plan years beginning after December 31, 1978.

SEC. 304. CREDIT FOR THE ESTABLISHMENT OF QUALIFIED PLANS BY SMALL EMPLOYERS.

(a) IN GENERAL.—Subpart A of part IV of subchapter A of chapter 1 of the Internal Revenue Code of 1954 (relating to credits allowed) is amended by inserting immediately before section 45 the following new section:

"SEC. 446. ESTABLISHMENT OF NEW SMALL BUSINESS EMPLOYER RETIREMENT PLANS

"(a) GENERAL RULE.—In the case of a small business employer who maintains or makes contributions to or under a qualified employer retirement plan, there is allowed as a credit against the tax imposed by this chapter for the taxable year an amount equal to a percentage (determined under subsection (b)) of the amount allowable for the taxable year to such employer as a deduction under section 404.

"(b) DETERMINATION OF PERCENTAGE.—The percentage applicable under subsection (a) for a taxable year is—

"(1) 5 percent for the first taxable year for which a deduction under section 404 is allowable to the taxpayer.

"(2) 3 percent for each of the succeeding 2 taxable years, and

"(3) 1 percent for each of the 2 taxable years succeeding the 2 taxable years referred to in paragraph (2).

"(c) DEFINITIONS; SPECIAL RULES.—For purposes of this section—

"(1) QUALIFIED EMPLOYER RETIREMENT PLAN.—The term 'qualified employer retirement plan' has the meaning given to such term by section 221(c)(3)(A) through (E).

"(2) SMALL BUSINESS EMPLOYER.—The term 'small business employer' means an employer (within the meaning of section 404) which is a small business (as determined by the Administrator of the Small Business Administration under section 112 of the Small Business Act (15 U.S.C. 632)).

"(3) DISREGARD FOR AMOUNTS ATTRIBUTABLE TO EMPLOYER SECURITIES.—In determining the amount of the credit allowable under subsection (a) for any taxable year, any portion of the deduction allowed for such year which is attributable to the transfer to or under the plan of employer securities (as defined in section 407(d)(1) of the Employee Retirement Income Security Act of 1974) shall be disregarded.

"(d) APPLICATION WITH OTHER SECTIONS.—The amount of the deduction allowable under section 404 for any taxable year shall not be reduced because of the allowance of a credit under this section for the taxable year. The credit allowable under subsection (a) for any taxable year shall not be allowed if the taxpayer claims the credit allowable by section 44D for the taxable year.

"(e) TERMINATIONS.—No credit is allowable under subsection (a) in the case of an employer who terminates a qualified employer retirement plan (or successor to such an employer) at any time after January 1, 1978.".

(b) CLERICAL AMENDMENT.—The table of sections for such subpart is amended by inserting immediately before the item relating to section 45 the following new item:

"Sec. 44C. Establishment of new small business employer retirement plans.".

(c) EFFECTIVE DATE.—The amendments made by this section shall apply with respect to taxable years beginning after December 31, 1978.

SEC. 305. CREDIT FOR THE IMPROVEMENT OF QUALIFIED RETIREMENT PLANS.

(a) IN GENERAL.—Subpart A of part IV of subchapter A of chapter 1 of the Internal Revenue Code of 1954 (relating to credits allowed) is amended by inserting immediately before section 45 the following new section:

"SEC. 44D. IMPROVED QUALIFIED EMPLOYER RETIREMENT PLAN CREDIT.

"(a) GENERAL RULE.—In the case of an employer who maintains an improved qualified employer retirement plan (other than such a plan which is described in section 401 (d)), there is allowed as a credit against the tax imposed by this chapter for the taxable year an amount equal to 5 percent of the amount allowable for the taxable year to such employer as a deduction under section 404.

"(b) LIMITATION BASED ON TAX LIABILITY; CARRYOVER OF EXCESS CREDIT.—

"(1) LIMITATION. The amount of the credit allowed under subsection (a) for the taxable year shall not exceed the liability of the taxpayer for tax under this chapter for the taxable year.

"(2) CARRYOVER OF EXCESS AMOUNT.—If the amount of the credit determined under subsection (a) for the taxable year exceeds the amount of the limitation imposed by paragraph (1) for such taxable year (hereinafter in this paragraph referred to as the 'unused credit year'), such excess shall be a credit carryover to the taxable year following the unused credit year, and, subject to the limitation imposed by paragraph (1), shall be taken into account under subsection (a) in such following taxable year.

"(c) DEFINITION OF IMPROVED QUALIFIED EMPLOYER RETIREMENT PLAN.—For purposes of this section, the term 'improved qualified employer retirement plan' means a qualified employer retirement plan (as defined in section 221(c)(3) (A) through (E)) which is certified by the Employee Benefits Commission as an improved plan under section 124 of the ERISA Improvements Act.

"(d) APPLICATION WITH OTHER SECTIONS.—The amount of the deduction allowable under section 404 for any taxable year shall not be reduced because of the allowance of a credit under this section for the taxable year. The credit allowable under subsection (a) for any taxable year shall not be allowed if the taxpayer claims the credit allowable by section 44C for the taxable year.".

(c) CLERICAL AMENDMENT.—The table of sections for such subpart is amended by inserting immediately before the item relating to section 45 the following new item:

"Sec. 44D. Improved qualified employer retirement plan credit.".

(c) EFFECTIVE DATE.—The amendments made by this section shall apply with respect to taxable years and plan years beginning after December 31, 1978.

SEC. 306. DENIAL OF IRA, ETC., BENEFITS TO OWNER-EMPLOYEES; CORPORATE OFFICERS AND SHAREHOLDERS.

(A) IN GENERAL.—

(1) RETIREMENT SAVINGS.—Subsection (b) of section 219 of the Internal Revenue Code of 1954 (relating to limitations and restrictions) is amended by inserting after paragraph (6) of such subsection the following new paragraph:

"(7) No deduction is allowed under subsection (a) in the case of an owner-employee (as defined in section 401(c)(3)) or an officer or 10 percent or more stockholder directly or indirectly of a corporation.".

(2) RETIREMENT SAVINGS FOR MARRIED INDIVIDUALS.—Subsection (b) of section 220 of such Code (relating to limitations and restrictions) is amended by inserting after paragraph (7) the following new paragraph:

"(8) No deduction is allowed under subsection (a) in the case of an owner-employee (as defined in section 401 (c)(3)) or an officer or 10 percent or more stockholder directly or indirectly of a corporation.".

(b) EFFECTIVE DATE.—The amendments made by this section shall apply with respect to taxable years beginning after December 31, 1978.

SEC. 307. RETROACTIVE DISQUALIFICATION OF PLANS.

In the administration of part I of subchapter D of chapter 1 of the Internal Revenue Code of 1954, the Secretary of the Treasury shall not treat an employee benefit plan described in section 122 (d) (3) of the ERISA Improvements Act of 1978 as not meeting the requirements of such part for any taxable year or plan year preceding the year in which the Employee Benefits Commission determines that the plan does not meet such requirements unless the Commission has also determined that the failure to meet such requirements in such preceding year was a result of intentional failure or willful neglect on the part of the person or persons maintaining the plan.

TITLE IV—SPECIAL MASTER AND PROTOTYPE PLANS

SEC. 401. SPECIAL MASTER AND PROTOTYPE PLANS.

(a) IN GENERAL.—Subtitle B of title I of the Employee Retirement Income Security Act of 1974 is amended by adding at the end thereof the following new part:

"PART 6—SPECIAL MASTER AND PROTOTYPE PLANS

"SPECIAL MASTER AND PROTOTYPE PLANS

SEC. 601. (a) For purposes of this section—

"(1) 'special master plan' means a master or prototype individual account employee pension benefit plan which has been approved by the Commission in accordance with subsection (d), all of the assets of which are controlled by one or more investment managers,

"(2) 'investment manager' means an investment manager described in section 3 (38) (A) and (B) (without regard to the parenthetical clause) and in the case of an investment adviser to a regulated investment company (as defined in section 851 of the Internal Revenue Code of 1954), shall include the principal underwriter of such investment adviser,

"(3) 'master sponsor' means an investment manager who is the sponsor of a special master plan, and

"(4) 'employer sponsor' means an employer any of whose employees are covered under a special master plan, an association of such employers, or an employee organization, any members of which are covered under such a plan.

"(b) Notwithstanding any other provisions of this Act or the Internal Revenue Code of 1954 to the contrary, in the case of a special master plan—

"(1) except as provided in subsection (e), the responsibilities, duties, and obligations of an employer sponsor under parts 1, 2, 3, and 4 of this title shall be limited to making such timely contributions and payments, and furnishing such timely, complete, and accurate information, as may be required under the terms of the plan; and

"(2) the requirements of sections 401 and 410, 411, 412, 413, and 414 of the Internal Revenue Code of 1954 which are applicable to the plan of the employer sponsor shall be deemed to be initially satisfied as of the date the employer sponsor and master sponsor execute the special master plan joinder.

"(c) Notwithstanding any other provisions of this ttile or the Internal Revenue Code of 1954 to the contrary, in the case of a special master plan—

"(1) except as provided in subsection (e), the master sponsor shall be the administrator and named fiduciary of each employer sponsor's plan for the purposes of this title;

"(2) the requirements of section 102(b), if otherwise satisfied, will not be violated if—

"(A) the plan description includes plan provisions common to the plans of all employer sponsors adopting the special master plan, together with a description of each type of variation from such common provisions that is permitted under the terms of approval by the commission, and an identification, by name of employer sponsor, employer sponsor identification number, name of plan, and plan identification number, of the employer sponsors who have adopted each such type of variation, and

"(B) the summary plan description of each employer sponsor's plan describes provisions common to the plans of all employer sponsors adopting the special master plan, together with a description of any provisions of such employer sponsor's plan which vary from such common provisions, with appropriate cross-references;

"(3) the requirements of section 103, if otherwise satisfied, will not be violated merely because data in the annual report reflect the aggregate assets of the special master plan, if the annual report also includes an identification, by name of employer sponsor, employer sponsor identification number, name of plan, and plan identification number, of the percentage of total special master plan assets attributable to each employer sponsor's plan;

"(4)(A) the exemption described in section 408(b)(2) shall be applied as if any investment manager sponsoring a special master plan and any investment manager providing services to such a plan were a party in interest respecting such plan for a reason other than by virtue of such investment manager's being a fiduciary, and

"(B) the term 'bank or similar financial institution' in section 408(b)(6) shall be deemed to mean any investment manager who is a master sponsor, and the term 'sound banking and financial practice' in such section shall, in the case of an investment manager other than a bank, be deemed to mean 'sound fiduciary practice';

"(5) no master sponsor shall have a responsibility, obligation, or duty under sections 404 or 405—

"(A) to ascertain whether information required to be furnished to the master sponsor by an employer sponsor pursuant to the terms of a special master plan is accurate or complete, or

"(B) due to the failure of an employer sponsor to satisfy the requirements of subsection (b)(1); and

"(6) the special master plan shall be deemed to be the employee benefit plan referred to in section 503, and the term 'person' in section 504 shall not be deemed to exclude any investment manager, master sponsor or employer sponsor described in subsection (a).

"(d)(1) The Commission shall prescribe such regulations, and furnish such rulings, opinions, forms, and other types of guidance as are neecssary to implement this section. To the greatest extent consistent with the purposes of this Act, such regulations and other types of guidance shall be designed to facilitate the establishment of special master plans and their adoption by employer sponsors.

"(2) The Commission shall approve a special master plan only if it determines that the plan of an adopting employer sponsor, in design and in operation, will satisfy the requirements of this section, other applicable requirements of this Act, and the requirements of section 401 of the Internal Revenue Code of 1954 (to the extent that such Act and Code are not inconsistent with this section).

"(3) Approval of special master plans and amendments to such plans shall be accomplished by a process carried out in the national office of the Commission, until such time as the Commission may establish procedures for field office approval under which uniformity of treatment by field offices is assured.

"(4) Upon approval by the Commission of a special master plan, or of any amendment to such a plan for which approval is required, a special master plan certificate shall be issued to the master sponsor by the Commission. Except as provided in paragraph (5), for a period of 60 months from the date of adoption of the plan by an employer sponsor or from the effective date of an amendment for which approval is required, a duly notarized copy of such certificate shall be prima facie evidence in any administrative or judicial proceeding that the terms of the plan meet the requirements of this section, this title, and the requirements of sections 401, 410, 411, 412, 413 and 414 of the Internal Revenue Code of 1954.

"(5) The Commission, after notice and hearing, shall revoke the certificate described in paragraph (4)—

"(A) respecting the plan of any employer sponsor, if the Commission finds that there has been a failure on the part of the employer sponsor to observe the terms of the plan and that such failure has been detrimental to the rights of any plan participant under the terms of the plan or this title, and

"(B) respecting the special master plan, if the Commission finds that there has been a failure to observe the terms of the plan or the provisions of this section on the part of the master sponsor and that such failure has been detrimental to the rights of plan participants under the terms of the plan or this title.

"(6) Upon the request of a master sponsor, the certificate issued by the Commission upon the approval of a special master plan, or upon the approval of an amendment to such a plan for which approval is required, shall specify those plan amendments or types of amendments for which, in the discretion of the Commission, approval need not be obtained.

"(7) The Commission shall study the feasibility of permitting defined benefit special master plans and shall report to the Congress regarding such study not later than 36 months after the effective date of this section.

"(e) Any employer sponsor who fails to make such timely contributions and payments or who fails to furnish such timely, complete and accurate information as may be required under the terms of a special master plan shall, in accordance with the terms of such plan, be deemed to be the plan administrator of the plan (to the extent the plan covers the employees of such employer sponsor), as of the time, not earlier than the date of such failure, specified in such plan, and as of such specified date the master sponsor shall cease to be the administrator and named fiduciary of such employer sponsor's plan.".

(b) The table of contents for the Employee Retirement Income Security Act of 1974 is amended by inserting immediately after the item relating to section 514 the following:

"PART 6—SPECIAL MASTER AND PROTOTYPE PLANS

"SEC. 601. Special master and prototype plans.".

(c) The amendments made by this section shall take effect 18 months after the date of enactment of this Act.

THE ERISA IMPROVEMENTS ACT OF 1978
SECTION BY SECTION ANALYSIS

SEC. 1. Short title and table of contents.

This section designates the Act as the ERISA Improvements Act of 1978, and sets out the table of contents.

SEC. 2. Technical and conforming changes.

The Secretaries of Labor and the Treasury are directed to submit to the Congress within not more than 90 days after enactment of the ERISA Improvements Act of 1978, a draft of technical and conforming changes to the Employee Retirement Income Security Act and the Internal Revenue Code of 1954 necessary to reflect in ERISA and the Code the changes in substantive provisions of law made by the ERISA Improvements Act of 1978.

TITLE I—CONSOLIDATION OF FEDERAL AGENCY RESPONSIBILITIES FOR EMPLOYEE BENEFIT PLANS

SUBTITLE A—FINDINGS; DECLARATION OF POLICY

Sec. 101. Findings and declaration of policy.

This section states the Congressional findings which underlie the ERISA Improvements Act and the policy of the Act.

SEC. 121. Special liaison officers.

These provisions establish new positions in the offices of the Secretary of Labor and the Secretary of the Treasury. They provide for a special liaison officer to the Secretary of Labor, and that this official shall also be Chairman of the Employee Benefits Commission established by section 122. The special liaison officer will be nominated by the President from a list of nominees prepared by the Secretary of Labor, and shall be subject to Senate confirmation.

Similarly, the special liaison officer to the Secretary of the Treasury will be the new Commission's vice chairman, will be nominated by the President from a list of nominees prepared by the Secretary of the Treasury, and will be subject to Senate confirmation.

These provisions will ensure that the Employee Benefits Commission will have close, high-level, and continuing links to the Departments of Labor and of the Treasury, so that the views of those Departments respecting labor law and policy and tax law and policy, respectively, regarding employee benefit plans will be known and considered by the Commission as it carries out its responsibilities, and so that the two Secretaries will be continuously apprised of the Commission's policymaking.

Sec. 122. Employee benefits commission.

This section establishes a new Employee Benefits Commission and describes its structure. In addition to the chairman and vice-chairman, the Commission will have three other members who will be nominated by the President and subject to Senate confirmation. The President will make his selections from a list of nominees prepared jointly by the Secretary of Labor and the Secretary of the Treasury. Commission members will serve staggered terms of six years.

The functions of the Commission will be to administer and enforce titles I and IV of ERISA, and to administer and effect compliance with sections 401, 410 through 414, 6057 and 6058 of the Internal Revenue Code, insofar as those sections relate to employee benefit plans covered under ERISA. In addition, the Commission will develop policy respecting all Federal laws which relate to all employee benefit plans.

Sec. 123. Powers of the commission.

A full range of powers necessary for the Commission to carry out its responsibilities is included in this section. Among other things, the Commission is given the power to certify to the Secretary of the Treasury that a plan subject to ERISA satisfies or does not satisfy the Internal Revenue Code requirements for tax qualification. Also, the Commission will be empowered to certify to the Secretary of the Treasury regarding whether a plan satisfies the proposed Internal Revenue Code rules respecting the eligibility of an employer for the special tax credits (described in title III of the Act).

This section also contains provisions dealing with the transfer of functions, person-

nel, records, etc. from the Departments of Labor and of the Treasury, and from the Pension Benefit Guaranty Corporation, to the Employee Benefits Commission, and with the effect of such transfers on regulations, rulings, opinion, etc., and on pending litigation.

Sec. 124. Certification of improved plans.

This section and section 305 describe a new procedure and rules under which retirement plans meeting certain standards which exceed the minimum participation, vesting and related standards described in part 2 of ERISA may be certified by the Commission as eligible for one of the special tax credits described in title III of the Act.

Under the provisions of section 124, the Commission is directed to certify as an improved plan (the employer sponsor of which will be eligible for the improved plan tax credit described in section 305), a plan which has been substantially improved compared to the immediately preceding plan year and under which rights of employees under the terms of the plan significantly exceed the minimum standards provisions of part 2 of title I of ERISA (relating to participation, vesting, benefit accrual, etc.). Certain criteria are established to guide the Commission in its determinations.

Sec. 125. Termination of Treasury Department jurisdiction; agency cooperation.

This section provides that the Secretary of the Treasury shall not administer the tax qualification functions that have been transferred to the Employee Benefits Commission, insofar as plans subject to ERISA are concerned.

It also provides that certifications made by the Commission to the Secretary of the Treasury (relating to plan satisfaction of the Internal Revenue Code rules respecting tax qualification, employee deductions and tax credits) shall be treated by the Secretary as if he had made them himself.

Finally, section 125 requires that the Commission and the Secretaries of Labor and of the Treasury make arrangements for notification by the Secretaries to the Commission regarding information that relates to the Commission's functions, and for the Commission to similarly notify the respective Secretaries regarding information that concerns their continuing functions under laws relating to employee benefit plans.

Sec. 126. Effective date and repeal.

The effective date of the provisions of title I will be one year after enactment. Subtitle A of title III of ERISA, relating to coordination between the Secretaries of Labor and the Treasury, is repealed as of this effective date.

TITLE II—AMENDMENTS TO THE EMPLOYEE RETIREMENT INCOME SECURITY ACT OF 1974

SUBTITLE A—DECLARATION OF POLICY AND CLARIFYING DEFINITIONS

Sec. 201. Declaration of policy and definitions.

This section amends section 2 of ERISA to declare that a policy of ERISA is to foster the establishment and maintenance of employee benefit plans sponsored by employers and employee organizations.

Also, section 201 makes a number of changes in the definitions contained in section 3 of ERISA.

A definition of the term "employees' beneficiary association" is added to section 3(4) of ERISA in order to clarify that such an association is one in which employees participate as members and in which eligibility for membership is based on a commonality of interest with respect to the members' employment relationship. The purpose of introducing this definition is to assist the Commission and the courts in determining whether so-called "multiple employer interests" are employee benefit plans subject to ERISA.

The term "party in interest" in section 3(14) of ERISA is clarified (by removing the parenthetical clause in subparagraph (A)), and is narrowed in several respects to remove from party in interest status those persons who are highly unlikely to be in a position to influence the actions of a plan or of plan officials.

The term "relative" in section 3(15) of ERISA is changed to include brothers and sisters. The omission of these relatives has proven to be inconsistent with the purposes of ERISA.

The definition of "security" has been revised to avoid any possible confusion respecting the changes made by sections 271 and 274 of the ERISA Improvements Act of 1978.

The definition of "multiemployer plan" has been substantially revised. A plan will be a multiemployer plan under ERISA if it is collectively bargained and has 10 or more contributing employers. A collectively bargained plan having more than one but fewer than 10 contributing employers will also be a multiemployer plan if the Employee Benefits Commission finds that it would be consistent with the purposes of ERISA to so treat it.

SUBTITLE B—SIMPLIFYING AND CLARIFYING AMENDMENTS

PART 1—REPORTING AND DISCLOSURE

Sec. 221. Disclosure of benefit information.

This section combines and slightly modifies present sections 105 and 209. It requires plan administrators not more than once per year to furnish participants who so request in writing a statement of the total benefits accrued, and the vested benefits, if any, or the earliest date on which benefits will become nonforfeitable. Administrators may satisfy this duty by furnishing annual statements containing appropriate information.

This section also requires administrators to communicate the nature, amount and form of the vested accrued benefit to participants who terminate service or incur a one-year break in service, and to whom retirement benefits are not paid during the plan year.

Employers are required to maintain appriate records prescribed by the Commission so that benefits can be determined. If more than one employer adopts a plan, each employer must furnish the administrator information necessary for the maintenance of appropriate records.

A monetary penalty is imposed on any person who is required to furnish information or to maintain records and who fails to do so. The penalty on the responsible person is the payment to the plan of $10 for each employee with respect to whom such failure occurs, except that the penalty for an administrator who fails to comply with a request for a statement of benefit accruals shall be liable to the participant who made the request, under the terms of ERISA section 502(c), for a civil penalty up to $100 per day from the date of such failure.

Sec. 222. Exemptions.

This section amends ERISA section 110 so that the Secretary may exempt any employee benefit plan or person or any class of plans or persons conditionally or unconditionally from any of the reporting and disclosure requirements of part 1 of title I or may modify any such requirement. To grant an exemption or modification, the Secretary must find that such alteration is appropriate and necessary in the public interest and consistent with the purposes of title I of ERISA.

Sec. 223. Elimination of summary annual report.

This provision eliminates the requirement that an administrator must furnish a summary annual report to each participant and each beneficiary receiving benefits under the plan. In order to facilitate the availability of the full annual report, a limit of $10 is placed on the fee which can be charged by an administrator for a copy of the full annual report.

Sec. 224. Consolidation of forms.

Under this section, the Commission is required not later than 18 months after the date of enactment to combine the plan description (EBS–1) and the determination letter application forms (form 5300 series). This merging of forms will be applicable only to tax-qualified employee benefit plans subject to the Commission's authority.

Sec. 225. Improvement of reporting requirements.

In order to avoid the reporting of unnecessary information, the Commission is required to develop reporting forms and requirements which to the maximum extent feasible take into account the different types and sizes of plans. The Commission is required to report back to the Congress on its progress in this regard 18 months and again 24 months after the enactment of this section.

Sec. 226. Opinions of actuaries and accountants.

In order to elminate unnecessary duplication of efforts by actuaries and accountants under ERISA's annual reporting requirements, an enrolled actuary is required to rely on the correctness of accounting matters as to which a qualified public accountant has expressed an opinion. Correspondingly, a qualified public accountant is required to rely on the correctness of any actuarial matter certified to by an enrolled actuary.

Sec. 227. Update of summary plan description.

This section modifies the present requirement that an administrator furnish an updated summary plan description every five years if amendments have been made and a summary plan description every 10 years, whether or not amendments have been made.

The new requirement is that an administrator must furnish to each participant not less frequently than every tenth year a summary plan description which shall be updated by the integration into the document of all plan amendments, if any.

Sec. 228. Scope of accountant's opinion.

With respect to the accountant's opinion which is included in a plan's annual report, this section provides that the accountant shall not express an opinion regarding statements of assets and liabilities of common or collective trusts maintained by a bank or similar institution or of a separate account maintained by an insurance carrier or of a separate trust maintained by a bank as trustee. The statement with respect to which the accountant shall not express an opinion must be prepared by a bank or similar institution or insurance carrier regulated and subject to periodic examination by a State or Federal agency and be certified by the financial institution as accurate.

SEC. 229. Effective date.

This section establishes various effective dates for the provisions of sections 221–228.

PART 2—MINIMUM STANDARDS

SEC. 231. Reciprocal agreements.

In order to promote portability and reciprocity, this section provides that ERISA's existing rules shall not interfere with the transfer of contributions from a collectively bargained pension or welfare plan (away plan) to a similar plan in which the em-

ployee previously participated (home plan). Such transfer must be pursuant to a written agreement between the away plan and the home plan. The Secretary may by regulation establish additional conditions, and such variances and exemptions as are consistent with the purposes of ERISA, in order to facilitate such transfer arrangements.

SEC. 232. Determining participation on a plan year basis.

Present law requires that the 12-month computation period for determining years of service for purposes of becoming a participant in a plan generally starts on the date on which the employee's employment commences.

The amendment provides that the computation period may start on the first day of a plan year in the case of a plan where vesting and accrual rights, for example, are determined on the basis of all of an employee's service without regard to the date on which the employee's participation in the plan commenced.

SEC. 233. Maritime industry—125 days.

Under ERISA, 125 days of service in any maritime industry is treated as a year of participation for benefit accrual purposes.

The amendment clarifies the service requirements in the maritime industry for accrual purposes. It states that 125 days of service in any maritime industry shall be the equivalent of 1,000 hours of service, and codifies an interpretation already made by the Secretary of Labor.

Sec. 234. Summation of different benefit accrual rates.

This amendment permits a multiemployer plan to provide that the accrued benefit to which a participant is entitled upon his separation from the service is the sum of different rates of benefit accrued for different periods of participation as defined by one or more fixed calendar dates or by employment in different bargaining units.

The accrued benefit may be determined for purposes of the three percent accrual method or the fractional method by projecting the normal retirement benefit to which a participant would be entitled if he continued to accrue benefits at the average of the rates applicable to his period of actual participation.

Sec. 235. Suspension of benefits because of reemployment.

ERISA permits a multiemployer plan to suspend benefit payments while an employee is employed in the same industry, in the same trade or craft, and the same geographic area covered by the plan, as when such benefits commenced.

The amendment reduces the three element test to two elements; namely, reemployment in the same industry, trade or craft, and the same geographic area as when benefits commenced. The amendment also applies the suspension rule to self-employment.

In addition, it is provided that the permissible period of benefit suspension shall include a period determined pursuant to Commission regulations in addition to the months in which employment occurs to the extent necessary to prevent the periodic payment and suspension of benefits to employees who have not retired but who continue to work on an irregular basis.

The amendment permits the plan to impose a financial penalty on a person who fails to report his reemployment as required by the plan. The amount of the penalty shall be determined pursuant to Commission regulations but in no event shall exceed an amount equal to one year's benefit.

Sec. 236. Amendments to conform plans to final regulations.

This section provides that any plan amendments adopted prior to January 1, 1980 which comply with final regulations shall not violate ERISA's title I because such an amendment alters an amendment adopted after ERISA was signed into law and prior to the issuance of such final regulations. Such amendments adopted prior to January 1, 1980, though, may not decrease vested rights or accrued benefits in existence on the date ERISA was signed into law.

Sec. 237. Reduction in retirement or disability benefits.

ERISA provides that if a participant is receiving benefits under a pension plan, or is separated from the service and has a vested benefit, a plan may not decrease benefits by reason of any benefit increase under Social Security or the Railroad Retirement Act of 1937, or any increase in the Social Security wage base.

The amendment provides that the same rule applies to a participant receiving disability benefits under a welfare plan as of the date of enactment of such amendment.

This section also provides that a pension plan may not reduce pension benefits which are being paid to a participant or in which a participant who is separated from the service has a vested right as the result of a workers compensation award.

Sec. 238. Joint and survivor annuity.

Under ERISA, a plan which provides benefit payments in the form of an annuity, must provide such payments in a form having the effect of a qualified joint and survivor annuity. If a plan provides for the payment of benefits before the normal retirement age, the plan is not required to provide annuity payments in a form having the effect of a qualified joint and survivor annuity during the period beginning on the participation commencement date and ending on the later of (1) the date the employee reaches the earliest retirement age or (2) the first day of the 120th month beginning before the date on which the employee reaches normal retirement age. From the later of these two dates to the date on which the employee reaches normal retirement age, a plan must permit a participant to elect joint and survivor annuity coverage.

The amendment expands joint and survivor annuity coverage by requiring with respect to a participant who has not less than a 50 percent vested benefit and who dies before the annuity starting date that the plan provide a survivor's annuity for the participant's spouse which begins on the annuity starting date. A plan will be permitted to pay benefits actuarially equivalent to such survivor's annuity earlier than the annuity starting date.

A pension plan which does not provide for the payment of benefits in the form of an annuity shall, with respect to a participant who has not less than a 50 percent vested benefit and who dies before receiving such benefit, provide that the participant's account balance be distributed in the form of a lump sum to the surviving spouse not later than 60 days after the end of the plan year in which the participant died.

These changes in the joint and survivor annuity shall apply with respect to plan years beginning two years after the date of enactment of this section.

Sec. 239. Elapsed time.

This provision permits the Secretary to prescribe by regulation a one or more systems of measuring service for participation, vesting and accrued purposes which is based upon measurement of the elapsed time of an employee's service. Such regulations shall include safeguards to ensure that employees are not, in the aggregate, disadvantaged by the use of elapsed time measurement.

PART 3—FUNDING

Sec. 251. Funding to take acount of future amendments.

This amendment provides that the funding method may take account, and for plan years beginning after December 31, 1980 shall take account, of all plan provisions, including provisions which have not yet affected participants as to entitlement to, or accrual of, benefits. The funding method may thus take into account a future benefit reduction.

In the event any such provision is not implemented as of the time specified when the provision was adopted, the funding standard account shall be appropriately adjusted in accordance with Commission regulations. A provision adopted but contingent on a future event shall be deemed not to be in effect as a provision of the plan prior to the occurrence of that event.

PART 4—FIDUCIARY RESPONSIBILITY

Sec. 261. General asset account.

ERISA provides that in the case of a plan to which a guaranteed benefit policy is issued by an insurer, the assets of such plan shall include such policy, but shall not, solely by reason of the issuance of such policy, include any assets of the insurer.

This amendment broadens this provision by providing that in the case of a plan the benefits of which are insured, the plan assets shall include the insurance policy but shall not, solely by reason of the issuance of such policy, include the assets of the insurer except to the extent such assets are maintained by the insurer in one or more separate accounts and do not constitute surplus in any such account.

Sec. 262. Obligation of employer to contribute.

Under this new section, every employer who is obligated under a collectively bargained plan (or under a collective bargaining agreement related to such a plan) to contribute periodically to such a plan is required, in accordance with applicable law, to make the agreed-upon contributions.

Sec. 263. Refund of mistaken contributions.

ERISA section 403 provides that plan assets shall never inure to the benefit of any employer except as permitted under statutory exceptions, which include the permissible return of a contribution within one year after the payment of such contribution by a mistake of fact.

This amendment permits a multiemployer plan to return an employer contribution within one year after the plan administrator knows that the contribution was made by a mistake of fact.

Sec. 264. Cofiduciary responsibility.

ERISA section 405 presently provides that a fiduciary with respect to a plan shall be liable for a breach of fiduciary responsibility of another fiduciary with respect to the same plan if he has "knowledge" of a breach of such other fiduciary, unless he makes reasonable efforts under the circumstances to remedy the breach.

This amendment provides that in the case of a fiduciary who is not an individual, the term "knowledge" shall mean knowledge actually communicated (or knowledge which, in the normal course of business, should have been communicated) to the fiduciary's officer or employee who is authorized to carry out the fiduciary's responsibilities (or who does so in fact) regarding the matter to which the knowledge relates.

This amendment also limits the responsibility of any cofiduciary respecting the failure of an employer who is a fiduciary to make contributions to a collectively bargained plan.

Sec. 265. Exemption for reciprocity arrangements.

In order to avoid confusion or uncertainty regarding the permissibility of transfers of contributions from one collectively bargained plan to another, this section adds to section 408(b) of ERISA a prohibited

transaction exemption, with appropirate safeguards, regarding transfers of contributions between such plans pursuant to section 131.

Sec. 266. Solvency standards for insured welfare plans.

This section requires that every uninsured welfare plan which is a multiple employer trust (MET) shall be subject to such solvency and reserve standards as the Secretary shall require by regulation. Such regulations shall become effective not later than 18 months after the date of enactment of the ERISA Improvements Act of 1978.

PART 5—ADMINISTRATION AND ENFORCEMENT

Sec. 271. Remedies.

This section makes several changes in section 502 of ERISA.

Subsection (a) of section 502 is revised to conform with the changes made by section 221 of this Act.

Subsection (b) is revised to conform to the changes made by title I of this Act, and to preclude the Employee Benefits Commission from initiating suits to collect contributions owing to a plan.

Subsection (g) is amended to provide that where a judgment has been awarded in an action to collect contributions owing to a plan, the court shall allow a reasonable attorney's fee and costs of the action, to be paid by the defendant.

Subsection (i) is deleted to conform to changes made by title I of this Act.

Subsections (j) and (k) are redesignated as subsections (i) and (j), respectively, and a new subsection (k) is added to provide that, concerning any employee benefit plan other than an eligible individual account plan in which participation is voluntary, no person or employee benefit plan shall be subject to liability of any sort as the direct or indirect result of a cause of action explicitly or implicitly alleging that the interest of an employee in such a plan is a security under Federal or State securities laws. With respect to such plans, no court of the United States shall have jurisdiction of an action, whether instituted prior to or on or after the date of enactment of this section, to the extent that it is alleged that the interest of an employee in such a plan is a security under Federal or State securities laws.

New subsection (k) also makes it clear that participation is not voluntary under the terms of a plan if, as an incident of employment or as an incident of membership in an employee organization the members of which are covered under the plan and upon satisfaction of the plan's participation requirements, an employee becomes a participant in the plan, notwithstanding the existence of a plan provision permitting an employee, subject to approval by the plan administrator, to waive participation in the plan.

Sec. 272. Advisory council.

This amendment changes ERISA section 512 to provide that one of the members representing employers on the Advisory Council on Employee Welfare and Pension Benefit Plans shall be a representative of employers maintaining small plans.

Sec. 273. Impact of inflation on retirement benefits.

This section amends section 513 of ERISA to direct the Secretary to conduct a study of the feasibility of requiring pension plans to provide cost of living adjustments to benefits payable under such plans. The Secretary (Commission) is required to submit this study to the Congress no later than 24 months after the date of enactment of this section.

Sec. 274. Preemption.

This amendment revises section 514 to clarify the applicability of other Federal and State laws to plans which are subject to ERISA. First, it provides that ERISA supercedes Federal and State securities laws to the extent that such laws might be applied to the interest of an employee in an employee benefit plan. This change makes it clear that the interest of an employee in an employee benefit plan described in section 4(a) and not exempt under section 4(b) of ERISA is not a security within the meaning of Federal or State securities laws unless such plan is an eligible individual account plan in which participation is voluntary.

Second, this section also makes it clear that the interest or participation of an employee benefit plan subject to ERISA in a single or collective trust maintained by a bank or in a separate account maintained by an insurance company is not to be considered a security within the meaning of Federal or State securities laws, and that such single or collective trusts and separate accounts are not to be considered investment companies for purposes of Federal and State laws.

TITLE III—INTERNAL REVENUE CODE AMENDMENTS

Sec. 301. Lump sum distributions; plans treated as single plan.

This provision amends section 402 of the Internal Revenue Code of 1954 to provide that in the case of a multiemployer plan, defined benefit plans shall be considered separately from defined contribution plans for purposes of determining the balance to the credit of an employee under the lump sum and distribution rules.

Sec. 302. Lump sum distributions; separation from the service.

This section amends section 402 of the Internal Revenue Code to permit a multiemployer plan to deem an employee who has not worked in service covered under the plan for six months as having separated from the service for purposes of the lump sum distribution rules.

Sec. 303. Deduction for employee contributions to qualified plans.

This section amends the Internal Revenue Code to permit a deduction from taxable income for contributions made by employees to qualified retirement plans. The deduction is similar in many respects to the deduction that is presently permitted for contributions to Individual Retirement Accounts, but the deductible amounts are lower to take employer contributions into account. In general, the maximum deduction permitted is the lesser of 10 percent of compensation or $1,000. However, the allowable deduction is reduced by 20 percent of the amount by which adjusted gross income exceeds $30,000.

Under these provisions, every qualified retirement plan will be required to accept employee contributions, and several special conditions are included to avoid undue complications and paperwork.

First, all plans will treat the employee contributions as individual accounts.

Second, there will be no setoff against employee contributions and therefore no need to engage in complicated calculations under a defined benefit plan to determine the value of the employer's contribution respecting each contributing participant.

Third, the maximum annual contribution that any plan will be required to accept from any employee will be $1,000.

Sec. 304. Credit for establishment of small plans.

This section adds to the Internal Revenue Code a new section providing a tax credit for small employers who establish retirement plans that meet ERISA's requirements. The credit, which would be available in addition to the deduction for allowable employer contributions, would be based on a percentage of those contributions and would phase downward over a period of five years from the year in which the employer establishes the plan. The allowable credit would be 5 percent for the first year of plan maintenance, 3 percent for each of the following two years, and 1 percent for each of the next two years.

The credit would not be available for a small employer establishing a plan which is a successor plan to a plan previously maintained by the employer and terminated any time after December 31, 1977.

Sec. 305. Credit for the improvement of qualified plans.

This section would amend the Internal Revenue Code to provide a tax credit of 5 percent of an employer's allowable deduction for contributions to a qualified plan (other than an H.R. 10 plan) for any year in which the Employee Benefits Commission determines, under section 124 of the Act, that the plan is an improved plan.

Sec. 306. Denial of IRA benefits to owner-employees.

This section amends the Internal Revenue Code to prohibit employers (sole proprietors, 10 percent or more partners, and officers or 10 percent or more corporate shareholders) from establishing Individual Retirement Accounts for themselves.

Sec. 307. Retroactive disqualification of plans.

This section prohibits the retroactive disqualification of a plan which is subject to ERISA unless the Employee Benefits Commission determines that the past failure to meet the qualification standards was a result of intentional failure or willful neglect on the part of the plan sponsor.

TITLE IV—SPECIAL MASTER OR PROTOTYPE PLANS

Title IV of the bill adds a new part 6 to title I of ERISA to encourage the creation of a new type of master or prototype plan, called a "special master plan," which could be adopted by employers who wish to provide sound retirement income programs for themselves and their employees, without being subjected to the paperwork and other burdens commonly associated with maintenance of a private pension plan.

Section 601(a) defines the terms used in the section and provides that special master plans must be individual account (defined contribution) plans.

Subsection (b) describes the very limited duties under ERISA and the relevant Internal Revenue Code provisions which will be the responsibility of an employer who chooses to adopt a special master plan.

Subsection (c) describes the broader duties under ERISA and the relevant Internal Revenue Code provisions that will be the responsibility of the special master plan sponsor, who will be an investment manager, such as an insurance company, bank, investment company, etc. Under these provisions, it is made clear, for example, that the annual return/report required by ERISA and the Internal Revenue Code may reflect the assets of the entire special master plan, so long as the return/report identifies the proportion of special master plan assets attributable to each adopting employers' plan, and that the summary plan description for each adopting employer's plan may describe the standard provisions of the special master plan, so long as it also includes any different or additional provisions which apply to the plan of the adopting employer, and contains appropriate cross-references.

Subsection (d) directs the Employee Benefits Commission to develop regulations and other forms of guidance to facilitate the wide use of special master plans and establishes a mechanism for the approval of such plans. Also, the Commission is directed to study the feasibility of extending the special master plan concept to defined benefit plans.

Subsection (e) provides that upon the failure of an employer to meet his limited

responsibilities in connection with the adoption and maintenance of a special master plan, the employer becomes the plan administrator and thereby becomes subject to all of the rules and regulations applicable to plan administrators under ERISA.

ADDITIONAL COSPONSORS

S. 2729

At the request of Mr. BARTLETT, the Senator from Montana (Mr. PAUL G. HATFIELD) was added as a cosponsor of S. 2729, a bill to amend chapter 55 of title 10, United States Code, to establish a ceiling for payments to physicians under CHAMPUS, and for other purposes.

S. 2764

At the request of Mr. TOWER, the Senator from Missouri (Mr. DANFORTH) was added as a cosponsor of S. 2764, a bill to amend the Export-Import Bank Act of 1945 to stipulate the ratio of credit and financing extended by the Bank for agricultural exports.

S. 2978

At the request of Mr. MCCLURE, the Senator from Louisiana (Mr. JOHNSTON) was added as a cosponsor of S. 2978, a bill to amend the Occupational Safety and Health Act of 1970 to prohibit restrictions on work rules in locations in which there is hunting, fishing, or shooting sports, and for other purposes.

S. 2990

At the request of Mr. CHURCH, the Senator from California (Mr. CRANSTON), the Senator from Iowa (Mr. CLARK), the Senator from South Dakota (Mr. MCGOVERN), and the Senator from Kansas (Mr. PEARSON) were added as cosponsors of S. 2990, the Sugar Stabilization Act of 1978.

SENATE CONCURRENT RESOLUTION 79

At the request of Mr. MCCLURE, the Senator from Florida (Mr. CHILES), the Senator from Pennsylvania (Mr. SCHWEIKER), the Senator from New Mexico (Mr. SCHMITT), the Senator from California (Mr. HAYAKAWA), the Senator from Georgia (Mr. TALMADGE), the Senator from Virginia (Mr. SCOTT), and the Senator from Oklahoma (Mr. BARTLETT) were added as cosponsors of Senate Concurrent Resolution 79, disapproving proposed regulations of the Department of the Treasury requiring centralized registration of firearms and other matters.

AMENDMENT NO. 1815

At the request of Mr. STEVENSON, the Senator from Illinois (Mr. PERCY) was added as a cosponsor of amendment No. 1815, intended to be proposed to H.R. 8309, the Navigation Development Act.

SENATE CONCURRENT RESOLUTION 81, SENATE CONCURRENT RESOLUTION 82, SENATE CONCURRENT RESOLUTION 83, AND SENATE CONCURRENT RESOLUTION 84—SUBMISSION OF CONCURRENT RESOLUTIONS OF DISAPPROVAL FOR THE ARMS SALES TO EGYPT, ISRAEL, AND SAUDI ARABIA

Mr. PROXMIRE submitted the following concurrent resolutions, which were referred to the Committee on Foreign Relations:

S. CON. RES. 81

Resolved by the Senate (the House of Representatives concurring), That the Congress objects to the proposed sale of 50 F–5 aircraft to Egypt (transmittal number 78–32 transmitted to Congress on April 28, 1978).

S. CON. RES. 82

Resolved by the Senate (the House of Representaitves concurring), That the Congress objects to the proposed sale of 15 F–15 aircraft to Israel (transmittal number 78–33 transmitted to Congress on April 28, 1978).

S. CON. RES. 83

Resolved by the Senate (the House of Representatives concurring), That the Congress objects to the proposed sale of 75 F–16 aircraft to Israel (transmittal number 78–34 transmitted to Congress on April 28, 1978).

S. CON. RES. 84

Resolved by the Senate (the House of Representatives concurring), That the Congress objects to the proposed sale of 60 F–15 aircraft to Saudi Arabia (transmittal number 78–35 transmitted to Congress on April 28, 1978).

Mr. PROXMIRE. Mr. President, today I have submitted four resolutions of disapproval for the proposed sales of sophisticated aircraft to Egypt (1), Israel can establish lasting peaceful rela- everyone in this body is aware, this issue is a vital one for the future of the explosive Middle East as well as for the role of the United States in that area. The United States enjoys good and growing relations with all three of the countries in question and my resolutions should not be read in any sense to reflect negatively on our important bilateral relations with each.

I need not review those relations at length. My views were spelled out in my speech of April 6. Israel, to which we have a long and unalterable relationship lays special claim to our attention and support. We continue to be dedicated to the prospering of that Middle East nation, in peace with its neighbors. The recent peace initiatives of President Sadat of Egypt have stirred the hopes of all Americans that, finally, after all the wars and bloodshed of the past 30 years, there is some prospect that Egypt and Israel can establish lasting peaceful relations.

We certainly want to support this bold initiative of the Egyptians. As for the Saudis, I need not detail for my colleagues the growing role the Saudis play in our economy, as our major supplier of imported oil as well as a substantial consumer of our manufactured products. Our long and intimate relations with Saudi Arabia are as they should be, strong and warm.

Where I disagree with the administration is that it has apparently decided that in order to maintain our close bilateral relations as well as to enhance our role as mediator in the ongoing peace negotiations, these arms sales are somehow essential. That, as I understand it, is the gist of the administration argument. There are other arguments, but they are secondary to this basic premise.

Mr. President, I do not see how rational men can believe that massive sales to both sides in this explosive confrontational area, which has a long and bloody history of use of all arms available, can support the peace process. If so, it is not the peace of the negotiation tables but the peace of the grave. How can it be argued that further (in the case of Israel) and new (in the case of Saudi Arabia) supplies of very sophisticated aircraft will not one day be put to use? After all, that is their purpose.

No one is in the position to guarantee what arms will or will not be used in times of national emergency and emotional upheaval—in the event of another military confrontation between the Arabs and Israel. Even the Egyptian supplies of relatively unsophisticated F–5s can only mean an added potential for conflict and bloodshed.

The administration argument is that more arms equals more self-confidence equals a willingness and ability to make peace. These is a theoretical appeal to this argument. But the reality of the history of the region is such that this conclusion cannot be drawn. Rather, in every case, almost every available weapon of death has been used by both sides in their desperate attempts to gain military superiority over the other. When the stakes involved are as high as they are seen to be by the participants—racial, ethnic, religious survival—paper commitments regarding limitations on uses of weapons quickly go by the board. We have seen this in other areas of the world, where emotions were less strong and history less grim.

My opposition to these sales is based on the assessment that the military security of each of the nations involved would be damaged. Further, if these sales are approved, it is virtually certain that more urgent requests will be made for more and better armaments. Each of the countries involved, all our friends, will need further reassurances of American support. This sale will not quench that thirst. Rather, it will whet that appetite for more and more. I am not being critical of Egypt, Israel, or Saudi Arabia when I say this. I am simply stating a fact. The arms spiral, once started, gains a momentum of its own and each new level of armament breeds new insecurity.

What is needed to change that situation is the kind of bold initiative taken by President Sadat in December. The key to eliminating regional insecurity is, as President Sadat and Prime Minister Begin stated in Jerusalem, to change the psychology of the relations between Israel and her Arab neighbors by establishing peace.

How can peace be established? Among other steps which must be taken, all parties must break out of the historical cycle of fear and mistrust. In my view, arms lead directly to those fears and that mistrust—and rightly so. So not only must the nations of the region make the psychological leap out of the traps of their past, but so must we. We must consciously decide not to fuel anxieties by further arms transfers and we must energetically press our Western European allies and the Soviet Union to show similar restraint.

In this latter regard, the administra-

tion's record is not good; some attempts to persuade the British and the French and the Soviets were made toward the end of 1977. These did not seem to lead anywhere. One reason for that is that we hardly appeared to be speaking in credible terms. After all, we are the leading arms merchant in the world. Some restraint from us also is in order. Then we can, with enhanced credibility, actively attempt to convince other potential suppliers to show similar restraint. I recognize that this will be anything but easy, but it is essential if we are serious about peace in the region.

For all these reasons, I have submitted four resolutions of disapproval—two for Israel, one for Egypt, and one for Saudi Arabia. If the sales are halted, the administration could revitalize the negotiation process. We would signal the nations involved that we support the peace process but that we want to make a break with the past policy of unlimited arms supplies in the region.

There is an Orwellian quality to the theory that more arms brings more security and that arming all sides equally promotes the cause of peace. What historical examples can be given that prove this case? Where have arms been accumulated and not eventually used? Will arms buy peace?

Mr. President, let us seize the initiative. Only a cutback in the Middle East arms race can contribute to a reduction in tensions. Combined with a forceful diplomatic intervention with our allies and the Soviet Union to resist filling the gap, we can measurably increase the prospects for peace.

AMENDMENTS SUBMITTED FOR PRINTING

AGRICULTURAL CREDIT ASSISTANCE ACT OF 1978—S. 2146

AMENDMENT NO. 1825

(Ordered to be printed.)

Mr. CLARK proposed an amendment to the bill (S. 2146) to amend the Consolidated Farm and Rural Development Act, as amended.

AMENDMENT NO. 1826

(Ordered to be printed.)

Mr. ALLEN proposed an amendment to the bill (S. 2146), to amend the Consolidated Farm and Rural Development Act, as amended.

SENATE SENIOR CITIZEN INTERNSHIP PROGRAM—SENATE RESOLUTION 219

AMENDMENT NO. 1827

(Ordered to be printed and to lie on the table.)

Mr. CURTIS submitted an amendment intended to be proposed by him to Senate Resolution 219, establishing a senior citizen internship program in the Senate.

NAVIGATION DEVELOPMENT ACT—H.R. 8309

AMENDMENT NO. 1828

(Ordered to be printed and to lie on the table.)

Mr. DANFORTH (for Mr. LONG) submitted an amendment (for himself, Mr. EASTLAND, Mr. EAGLETON, and Mr. DANFORTH) intended to be proposed by them, jointly, to the bill (H.R. 8309) authorizing certain public works on rivers for navigation, and for other purposes.

● Mr. DANFORTH. Mr. President, on behalf of the Senator from Louisiana (Mr. LONG) I submit an amendment for him, Mr. EASTLAND, Mr. EAGLETON, and myself.

I ask unanimous consent that a statement by Senator LONG, together with a letter referred to in the statement be printed in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR LONG

For many months, both the Senate and the House have wrestled with the difficult issue of imposing user charges on commercial cargo vessels on the inland and intracoastal waterways. Last June, the Senate adopted an amendment offered by Senator Domenici to H.R. 5885 which provided an extraordinarily complicated and burdensome system of charges on waterway users designed to recover 100% of navigation-related operations and maintenance costs and 50% of new construction costs. This bill proved totally unacceptable to the House, and the Senate amendment to H.R. 5885 was never acted on by the House. Instead, the House passed H.R. 8309, which imposed a fuel tax of 6 cents a gallon (after a two year phase-in period of 4 cents a gallon) on commercial cargo vessels on the shallow draft segments of 26 specified waterways, covering all of the major inland and intracoastal waterways. It is this bill which is now before us, and I think it is fair to say that the House approach of a fuel tax is the only kind of user charge that both bodies are going to find acceptable. But there remain the questions of how much tax, how it is to be applied, and under what conditions.

Along with Senators Eastland, Eagleton and Danforth, I have now proposed a compromise which addresses these questions—a compromise which is built upon proposals made by the Department of Transportation. We have not accepted everything requested by the Administration, but we have gone a long way towards meeting their suggestions, particularly with respect to the amount of the tax that they believe should be levied on waterway users. The last fuel tax figure that the Department of Transportation brought to us was 10 cents per gallon, and we have accepted that figure. The compromise that we propose would phase in a permanent tax of 10 cents per gallon on the fuel used by shallow draft commercial vessels on the major inland and intracoastal waterways specified in H.R. 8309. So this is a fair and reasonable compromise we are proposing, and one which, if enacted, I believe the President can and will sign.

I intend to explain the particulars of our proposed compromise on user taxes, but first I should comment on another aspect of this legislation—the authorization of a replacement for Locks and Dam 26 on the Mississippi River at Alton, Illinois. Replacement of Locks and Dam 26 is long overdue. The existing structure was built 40 years ago on wood pilings driven into sand and it has deteriorated badly. The river bed has been scoured out nearly to the depth of the foundation pilings and the concrete is crumbling. Moreover, the lock capacity is far too small—an important factor since it is located at the critical intersection of the inland waterway system.

Fortunately, both the House and the Senate have agreed, in separate bills, to authorize construction of a replacement lock and dam. The compromise amendment we are proposing contains the exact authorization language that both houses have separately agreed upon, for a replacement dam about two miles downstream from the present Locks and Dam 26 with a single 1,200 foot lock. We agreed on this last year, and I trust that we can ratify that agreement as proposed in our compromise amendment.

Turning again to the issue of user charges, Mr. President, I want to impress on my colleagues the historic significance of the waterway tax I am proposing. Since the founding of our nation, we have adhered to a strong tradition that the country's waterways should be free from tolls. It was a policy that made a great deal of sense as a growing nation expanded westward, following the rivers, the natural arteries for commerce and settlement. It was a policy that made a great deal of sense as the heartland of the United States was developed, aided in large part by our magnificent system of navigable rivers that facilitated the transportation of the raw materials and the finished products of agriculture and industry. And, frankly, Mr. President, the policy of toll free rivers is one that makes a great deal of sense to me today, for I fear that the imposition of new and unprecedented taxes will inhibit development in the interior of the country and stimulate inflation, as increased shipping costs are tacked onto the prices paid by farmers, manufacturers and consumers of thousands of products ranging from food to electric power.

But changing times call for changing policies, and it appears that a majority of the Congress, along with the Administration, is prepared to abandon the historic policy of free traffic on the rivers. Accordingly, the compromise amendment that we propose would, as I have said, impose a tax of 10 cents per gallon on fuel used for commercial navigation on the waterways specified in the House-passed bill, H.R. 8309. I should point out that the reason for specifying the waterways to which the tax is applicable is to insure that it only is limited to the shallow draft segments and will not affect ocean-going vessels. However, the list of 26 waterway segments does cover the major rivers used for commercial navigation in the contiguous United States, along with the intracoastal waterways.

The proposed fuel tax would be introduced in four phases, beginning at 4 cents per gallon for the first two years after the effective date, then going to 6 cents a gallon for another two years, then going to 8 cents a gallon for two years, and then reaching the permanent level of 10 cents a gallon. This process is consistent with the recommendation of the distinguished former Assistant Secretary of the Treasury, the late Laurence N. Woodworth, who testified before the House Ways and Means Committee that: "One way to deal with problem [of imposing a sizeable fuel tax] would be to phase in coverage over a period of years."

Make no mistake about the significance of the level of taxation we are proposing. It will mean that the cost of diesel fuel will go up by about 25%, and since fuel cost represents about 40% of river transportation costs, there is going to be a very substantial impact on the cost of shipping goods by water. What we are talking about is raising about $90 million in taxes a year from an industry that has gross annual revenues of about $900 million a year—in other words, a 10 cents per gallon fuel tax will take 10% of the industry's total annual income.

And that in an industry that has profit margins well below 10%. I do not see how the tax could be set any higher without permanently crippling the nation's system of water transportation. Surely Congress does not intend that result.

There may be those who still call for an even higher level of taxation on water trans-

portation, difficult though it may be to understand their reasoning. To them I say: Wait until we get the facts about the impacts of this tax. Our amendment calls for a thorough study of the consequences of this tax, along with an assessment of the levels of Federal assistance to all modes of freight transportation, to be undertaken jointly by the Secretary of Commerce and the Secretary of Transportation, in consultation with other federal agencies. Their report and policy recommendations will be made in 1981. Our amendment provides that within one year after receipt of that study, Congress shall either enact legislation based on these policy recommendations, or reject it by concurrent resolution. Thus, our amendment provides not only for a study, but also for a vote on the outcome of the study.

The Department of Transportation has suggested that a moratorium be declared on all river construction during the pendency of this study. We find that suggestion totally unacceptable. It would deauthorize projects that Congress has already approved—projects that I am sure many of my colleagues have already announced to their constituents. It will bring to a halt vital rehabilitation projects that are needed to maintain our existing water transportation system. It would allow that system to deteriorate. We rejected this proposal and I feel confident that the entire Senate will do so as well.

There is, however, another DOT recommendation that we have adopted by including in our amendment the provision drafted by the Senator from Wisconsin (Mr. Nelson) to provide for the development of a master plan for the Upper Mississippi. While I have some reservations about the need for such a provision, inasmuch as a similar effort is already under way, I have accepted the Nelson Amendment in the spirit of compromise and conciliation which characterizes our amendment.

Finally, Mr. President, I would like to explain the effective date provisions of our amendment. It is clear that the fate of a replacement for Locks and Dam 26 is inextricably linked to the waterway user charge. This important project has been held hostage to the user charge issue. Resolution of that issue as we propose today should clear the way for authorization of a new lock and dam. Unfortunately, however, there is another barrier that must be cleared before construction can begin. For some time there has been pending a lawsuit over the environmental impact statement on the new lock and dam. That case is presently before a U.S. District Judge here in Washington and appears destined to find its way to the Court of Appeals. It may be disposed of there, or it may be remanded for further proceedings in the District Court. In any case, it may stretch out over a period of time beyond the contemplated effective date of the proposed fuel tax of October 1, 1979.

It seems manifestly unfair to require the farmers, shippers and other waterway interests who have fought to replace this antiquated facility for so long to pay additional transportation charges in the form of a fuel tax in order to clear the legislative roadblock in the way of the lock and dam authorization, and then for them to be faced with an indefinite delay in the project because of court proceedings. Accordingly, our amendment provides that the new waterway fuel tax shall take effect either on October 1, 1979, or at the beginning of construction of a new lock and dam, whichever is later. A procedure is provided for the Secretary of the Army to notify the Secretary of the Treasury that construction has gotten started and tax collection should begin.

Mr. President, this is the amendment that we believe provides a fair and equitable disposition of this difficult issue. It is by no means easy to take the steps that will reverse a two-centuries-old policy of toll free waterways. Nor is it a move calculated to gain universal acceptance among waterway users. I understand that a letter urging support for H.R. 8309 without amendment has been sent to all Senators, signed by a number of representatives of labor, industry, farm groups, port authorities and other interested parties, as well as by several governors and mayors. I ask that a copy of this letter and a list of the signatories to it be appended to the conclusion of my remarks.

I wish that it were possible to accede to the wishes of those who signed this letter, but it is my judgment, and that of my cosponsors, that a compromise is necessary. We have gone a far distance by meeting the Department of Transportation's request for a 10 cents per gallon fuel tax, by calling for a study of its effects, with provision for Congressional action on the outcome of the study, and by accepting the Nelson Amendment, as DOT also requested.

I urge that the Senate adopt our compromise, and dispose of this dispute which has occupied us for too long.

NATIONAL WATERWAYS ALLIANCE,
Washington, D.C., April 13, 1978.

The PRESIDENT,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: The purpose of this letter is to eliminate any misunderstanding as to the position of waterway-related interests on the question of waterway user charges. The undersigned officials of businesses, industries, trade associations, organized labor, port authorities, development commissions, state and local governments, agricultural organizations, water carriers, electric power companies and cooperatives, waterway terminals, and river basin associations representing the overwhelming majority of directly affected interests are unanimous in their conviction that H.R. 8309, which authorizes replacement of Locks and Dam 26 and imposes a waterway fuel tax, constitutes a fair and reasonable limit of compromise for a complex issue having profound ramifications.

The fuel tax which this legislation would levy on shallow-draft waterway commerce is substantial and in line with the Federal fuel tax paid by private automobiles, highway trucks, business aviation and recreational boating. When it is fully operational, the 6¢ commercial navigation tax coupled with the 4¢ tax paid by recreational craft will produce revenues in excess of $100 million annually.

Any increase in waterway taxation above the levels provided in H.R. 8309 would tend to pre-judge the very issues which require in-depth examination as to regional impact, job losses, dislocation of industry, trade balances, inflationary pressures, and diversion of traffic to less safe and less efficient modes—all of which are matters which we believe must be considered carefully and objectively before the Nation is committed to a user charge program exceeding the levels specified in H.R. 8309. In the absence of a full study of all relevant aspects, the shippers, farmers and consumers who would bear the added cost of any waterway imposition cannot reasonably be expected to pay higher fees.

Consideration of H.R. 8309—which was passed by the House of Representatives by an overwhelming majority—has been seriously delayed in the Senate, where opposing forces have sought to gain votes for higher level and restrictive charge plans, with insufficient attention to potential economic and regional impacts and to the need for an adequate inland waterway system.

As a result of the lingering controversy over the level of user charges, many business planning and investment decisions are being delayed and large segments of the labor force and agricultural community are being kept in doubt as to future prospects.

Notwithstanding the conviction of the overwhelming majority of affected waterway interests that continuation of historic American toll-free navigation policy is in the national interest, particularly in light of the energy efficiency and bulk-carrying capacity of the inland waterway fleet, in a sincere effort to resolve this issue, we have agreed to support the fuel tax of 4 cents rising to 6 cents per gallon embodied in H.R. 8309. We have endorsed the House compromise, which was passed with the aid and endorsement of the Democratic leadership.

In view of the continuing uncertainties over this legislation in the Senate, we call upon the Administration and the Congress to recognize the seriousness of the issues involved in imposing charges on American waterways for the first time in our history and to join with us in rejecting any proposal for charges above the levels of H.R. 8309 as premature, dangerous and lacking in sound factual basis. Furthermore, we trust that the Administration and the Congress will concur in our views and acknowledge the reasonableness of our position in order that the user charge dilemma can be settled in an acceptable manner.

So that we may share with you our strong convictions on the subject—as well as factual information regarding prospective effects of high-level waterway levies on our millions of members, employees, customers, farmers and citizens generally—we respectfully request the privilege of meeting personally with you and your policy advisors, perhaps including the Secretary of Transportation, at the earliest convenient date.

Sincerely yours,

J. C. TURNER,
(and 114 others).

AMENDMENT NO. 1829

(Ordered to be printed and to lie on the table.)

Mr. DOMENICI (for himself and Mr. STEVENSON) submitted an amendment intended to be proposed by them, jointly, to the bill (H.R. 8309), supra.

● Mr. DOMENICI. Mr. President, the distinguished Senator from Illinois (Mr. STEVENSON) and I are today submitting a compromise waterway user charge amendment to H.R. 8309.

While the distinguished Senator from Illinois (Mr. STEVENSON) and I were on the opposite sides of this issue in the past, we have always shared a desire to bring greater equity to national transportation. Our disagreements have been on the approach, not the philosophy.

This compromise, as my colleagues know, has the full support of the Carter administration, which has stated that it will veto anything less effective.

Our compromise proposal contains four essential ingredients:

First. It authorizes construction of locks and dam 26 on the Mississippi River.

Second. It phases in a fuel tax on barge traffic, starting at 4 cents a gallon on October 1, 1979, then increasing gradually to 12 cents a gallon on October 1, 1984.

Third. It directs a comprehensive DOT-Corps of Engineers inland waterways study, to be sent to Congress in 1981.

Fourth. And in addition to the tax, it establishes an interim cost-recovery level of 10 percent on any new construction on the inland waterways, a provision

that would expire as soon as Congress enacts legislation adopting, modifying or rejecting the study recommendations.

Let me reiterate the key differences between this proposal and alternatives that I understand will be presented to the Senate.

Our amendment clearly establishes the principle of percentage cost recovery, long built into other water resources and transportation programs. That is a principle that is essential if we are to assure that an economic incentive exists for the barge industry to work with the taxpayers for a most cost-effective system of improvements, not the most grandiose.

It sets a date certain for the start of the tax, not leaving that, in effect, to the discretion of the barge industry and the Corps of Engineers.

And it covers the entire inland waterway network, not simply the 40 percent or so of the waterway mileage covered by the House bill and the the alternate proposals.

Mr. President, I believe this represents a fair solution to a very difficult problem. It represents an approach that President Carter will sign into law. While, of course, it is not as substantial as I would have liked it, it represents a fair and reasonable resolution. I am hopeful that the Senate will adopt it.

Before closing, let me explain how we reached this point. Several months ago, at the urging of several colleagues, I began to explore ways to reach a middle ground with the barge industry on the issue of waterway user charges. I shall not bore you with a full list of the various options I developed, or the frustrations I encountered. The options ranged from a waterways trust fund, to various levels of percentage cost recovery, to a mixture of studies and a moritorium on work until Congress could act on the studies.

In each case, my suggestions and alternatives were greeted by flat rejection. The constant response from the barge industry was that it would accept only a token tax and a cosmetic study designed to demonstrate that user charges were a creation of the devil. I do not believe that would be an adequate way to begin to right the imbalance in transportation. Neither did Secretary of Transportation Adams nor President Carter.

So after making a few "final" suggestions—and never receiving an answer—I went to my good friend, the Senator from Illinois who knows and understands this issue as well as anyone. The result is that while Senator STEVENSON and I were on opposite sides of this issue last June, we decided to put together a package that represents a fair compromise and would serve as the only way to get this issue resolved.

Thus, when the issue of waterway user charges is raised later this week, the Senate will have a clear choice—whether to enact an amendment that will truly offer a resolution to this issue, or to pass an amendment that will probably drag this issue, unresolved, along in the 96th Congress.

Mr. President, I ask unanimous consent that our amendment be printed at this point in the RECORD, together with a chart showing the key differences between it and other proposals.

There being no objection, the amendment and table were ordered to be printed in the RECORD, as follows:

AMENDMENT NO. 1829

On page 2, beginning on line 6, delete all through line 5 on page 17 and insert in lieu thereof the following:

"(b) The Secretary of the Army, acting through the Chief of Engineers, is authorized and directed to replace, at Federal expense as a part of project costs authorized in subsection (a) terrestrial wildlife habitat inundated as a result of the construction of the project on an acre-for-acre basis in the respective States of Missouri and Illinois and to manage such lands as are thus acquired by the Secretary for wildlife mitigation purposes. The Secretary is further authorized to provide project-related recreation development on or in the vicinity of Ellis Island, Missouri, that requires no separable project lands and includes facilities such as roads, parking lots, walks, picnic areas, a boat launching ramp, and a beach, at an estimated cost of $4,000,000 to be cost shared with the State of Missouri and administered in accordance with the provisions of the Federal Water Project Recreation Act (Public Law 89–72) and undertaken independently of the navigation features of the project.

"(c) The channel above Cairo, Illinois, on the Mississippi River shall not exceed nine feet, and neither the Secretary of the Army nor any other Federal official shall study the feasibility of deepening the navigation channels in the Minnesota River, Minnesota; Black River, Wisconsin; Saint Croix River, Minnesota and Wisconsin; the Mississippi River north of Cairo, Illinois; the Kaskaskia River, Illinois; and the Illinois River and Waterway, Illinois, unless specifically authorized by a future Act of Congress.

"(d) There are authorized to be appropriated to the Secretary of the Army such sums as are necessary to carry out the provisions of subsections (a) and (b) of this section for fiscal year 1978 and succeeding fiscal years. Any funds which have been allocated to a replacement project for locks and dam 26, prior to enactment of this Act, shall be available for the project authorized in this section and shall remain available until expended.

"SEC. 103. (a) There is hereby created an Upper Mississippi River System Council (hereinafter referred to as 'Council') consisting of the Secretary of Transportation, the Secretary of Agriculture, the Secretary of the Army, the Secretary of the Interior, the Administrator of the Environmental Protection Agency, the Chairman of the President's Council on Environmental Quality, and Governors of the States of Wisconsin, Minnesota, Iowa, Missouri, and Illinois. The Secretary of the Interior shall serve as Chairman of the Council.

"(b) The Congress hereby authorizes and directs the Council to prepare a comprehensive master plan for the management of the Upper Mississippi River System in cooperation with the appropriate Federal, State, and local officials. A preliminary plan shall be prepared by July 1, 1981, and take into account any appropriate recommendations in the report authorized by Section 301 of this Act The plan shall be subject to public hearings in each affected State. The Council shall review all comments presented at such hearings and submitted in writing to the Council and shall make any appropriate revisions in the preliminary plan, and shall, by July 1, 1982, submit to the Congress for approval a final master plan. Public participation in the development, revision, and enforcement of said plan shall be provided for, encouraged, and assisted by the Council. The Council shall, within one hundred and fifty days of enactment of this Act, publish final regulations in the Federal Register specifying minimum guidelines for public participation in such processes. Approval of the final master plan shall be granted only by enactment of the Congress. Changes to the master plan proposed by the Council shall require enactment by the Congress to become effective. All related activities inconsistent with the master plan or guidelines shall be deemed unlawful.

"(c) The master plan authorized under subsection (b) of this section shall identify the various economic, recreational, and environmental objectives of the Upper Mississippi River System, recommend guidelines to achieve such objectives, and propose methods to assure compliance with such guidelines and coordination of future management decisions affecting the Upper Mississippi River System, and include any legislative proposals which may be necessary to carry out such recommendations and objectives.

"(d) For the purposes of developing the comprehensive master plan, the Council is authorized and directed to conduct such studies as it deems necessary to carry out its responsibilities under this section, with provision that it utilize, to the fullest extent possible, the resources and results of the Upper Mississippi River resources management (GREAT) study conducted pursuant to section 117 of the Water Resources Development Act of 1976 (Public Law 94–587) and of other ongoing or past studies. The Council shall request appropriate Federal, State, or local agencies to prepare such studies, and any Federal agency so requested is authorized to conduct any such study for the purpose of this section. Studies conducted pursuant to this section shall include, but not be limited to the following:

"(1) Secretary of the Interior shall undertake a study to determine the long- and short-term systemic ecological impacts of: (A) present and any projected expansion of navigation capacity on the fish and wildlife, water quality, wilderness, and public recreational opportunities of said rivers, (B) present operation and maintenance programs, (C) the means and measures that should be adopted to prevent or minimize loss of or damage to fish and wildlife, and (D) a specific analysis of the immediate and systemic environmental effects of any second lock at Alton, Illinois, and provide for the mitigation and enhancement of such resources and shall submit his report containing his conclusions and recommendations to the Congress and the Secretary of the Army.

"(2) The Council, acting through the Secretary of Transportation, is directed to immediately initiate a specific evaluation of the need for a second lock at Alton, Illinois, and the direct and indirect systemic effects and needs for such a second lock at Alton, Illinois.

"(3) Studies and demonstration programs, including a demonstration program to evaluate the benefits and costs of disposing of dredge spoil material in contained areas located out of the floodplain. Said program shall include, but shall not be limited to, the evaluation of possible uses in the marketplace for the dredge spoil studies and demonstration programs to minimize the environmental effects of channel operation and maintenance activities.

"(4) Development for the Upper Mississippi River system of a computerized analytical inventory and system analysis to facilitate evaluation of the comparative environmental effects of alternative management proposals.

"(e) Guidelines developed pursuant to this section shall include, but not be limited to, guidelines for channel maintenance, minimization of dredging volumes, alternate uses of

dredged material, barge fleeting, protection of water quality, fish and wildlife protection and enhancement, wilderness preservation, and management of the wildlife and fish refuges within and contiguous to the Upper Mississippi River System.

"(f) To carry out the provisions of this section, there are authorized to be appropriated to the Council $20,000,000. The Council is authorized to transfer funds to such Federal, State, or local government agencies as it deems necessary to carry out the studies and analysis authorized in this section.

"(g) The Upper Mississippi River System consists of those river reaches containing commercial navigation channels on the Mississippi River main stem north of Cairo, Illinoise; the Minnesota River, Minnesota; Black River, Wisconsin; and the Saint Croix River, Minnesota and Wisconsin.

"(h) Except for the provision of section 102 of this Act, and necessary operation and maintenance activities, no replacement, construction, or rehabilitation that expands the navigation capacity of locks, dams, and channels shall be undertaken by the Secretary of the Army to increase the navigation capacity of the Upper Mississippi River System, until the master plan prepared pursuant to this section has been approved by the Congress.

"(i) The lock and dam authorized pursuant to section 102 of this Act shall be designed and constructed to provide for possible future expansion. All other construction activities initiated by the Secretary of the Army on the Upper Mississippi River System shall be initiated only in accordance with the guidelines set forth in the master plan.

"TITLE II—TAX ON FUEL USED IN COMMERCIAL TRANSPORTATION ON INLAND WATERWAYS

"SEC. 201. Imposition of Tax.

"(a) Chapter 31 of the Internal Revenue Code of 1954 (relating to special fuels) is amended by adding at the end thereof the following new section:

" "SEC. 4042. TAX ON FUEL USED IN COMMERCIAL TRANSPORTATION ON INLAND WATERWAYS.

" "(a) IN GENERAL.—Notwithstanding any other provision of law, there is hereby imposed a tax upon any liquid used during any calendar quarter by any person as a fuel in a vessel in commercial water transportation.

" "(b) AMOUNT OF TAX.—The tax imposed by subsection (a) shall be—

" "(1) in the case of a use after September 30, 1979, and before October 1, 1981, 4 cents a gallon, or

" "(2) in the case of a use after September 30, 1981, and before October 1, 1982, 6 cents a gallon, or

" "(3) in the case of a use after September 30, 1982, and before October 1, 1983, 8 cents a gallon, or

" "(4) in the case of a use after September 30, 1983, and before October 1, 1984, 10 cents a gallon; or

(5) in the case of a use after September 30, 1984, 12 cents a gallon.

" "(c) EXEMPTIONS.—

" "(1) DEEP-DRAFT OCEAN-GOING VESSELS.—The tax imposed by subsection (a) shall not apply with respect to any vessel designed primarily for use on the high seas which has a draft of more than 12 feet.

" "(2) PASSENGER VESSELS.—The tax imposed by subsection (a) shall not apply with respect to any vessel used primarily for the transportation of paying passengers.

" "(3) USE BY STATE OR LOCAL GOVERNMENT IN TRANSPORTING PROPERTY IN A STATE OR LOCAL BUSINESS.—Subparagraph (B) of subsection (d)(1) shall not apply with respect to use by a State or political subdivision thereof.

" "(d) DEFINITIONS.—For purposes of this section—

" "(1) COMMERCIAL WATER TRANSPORTATION.—The term 'commercial water transportation' means any use of a vessel on any inland or intracoastal waterway of the United States—

" "(A) in the business of transporting property for compensation or hire, or

" "(B) in transporting property in the business of the owner, lessee, or operator of the vessel (other than fish or other aquatic animal life caught on the voyage).

" "(2) INLAND OR INTRACOASTAL WATERWAY OF THE UNITED STATES.—The term 'inland or intracoastal waterway of the United States' means any improved inland waterway of the United States, as defined by section 305 of the Inland Waterway Improvement and Cost Recovery Act of 1978.

" "(3) PERSON.—The term 'person' includes but is not limited to the United States, a State, a political subdivision of a State, or any agency or instrumentality of any of the foregoing.

" "(c) DATE FOR FILING RETURN.—The date for filing the return of the tax imposed by this section for any calendar quarter shall be the last day of the first month following such quarter."

"(b) Section 4293 of such Code (relating to exemption for United States and possessions) is amended by striking out "chapters 31 and 32" and inserting in lieu thereof "section 4041, chapter 32,".

"(c) The table of sections for chapter 31 of such Code is amended by adding at the end thereof the following new item:

" "SEC. 4042. TAX ON FUEL USED IN COMMERCIAL TRANSPORTATION ON INLAND WATERWAYS."

"(d) The amendments made by this section shall take effect on October 1, 1979, and shall remain in effect unless superseded by a system of waterway user charges enacted as a result of the recommendations of Section 301 of the Inland Waterway Improvement and Cost Recovery Act of 1978. The first proposed regulations under section 4042 of the Internal Revenue Code of 1954 shall be published in the Federal Register not later than the day which is 9 months after the date of the enactment of this Act.

"TITLE III—INLAND WATERWAYS STUDY AND COST RECOVERY

"SEC. 301. (a) The Secretary of Transportation (hereinafter referred to as the "Secretary"), in consultation with the Secretary of the Army, shall study

"(1) a comprehensive national program for the cost-effective management of the navigation system of the inland waterways of the United States, and

"(2) establishment, maintenance, and collection of a reasonable system of user charges (using either a fuel tax, or an increase or decrease thereof, any other user charge, or any combination thereof), to be paid by the commercial users of the inland waterways of the United States.

"In making his study, the Secretary is authorized and directed to ensure the effective coordination of and the necessary consistency between the waterways study authorized by Section 158 of P.L. 94-587 and any other related Executive Branch studies and to take all relevant findings there from in making his findings and recommendations. In addition, he shall conduct public hearings, review comments presented at such hearings and those submitted in writing, and shall, no later than January 15, 1981, submit to the Congress policy recommendations for a comprehensive national program for the cost-effective management of the inland waterways of the United States and the recovery from commercial users of that percentage of the costs of such program that is considered to be reasonable. Together with his report, the Secretary shall submit proposed legislation to implement his recommendations.

"(b) The study authorized by Subsection (a) of this section shall include, but not be limited to, a consideration of the following:

"(1) the effects of future inland waterway projects, with cost recovery, and the effects of any expansion of navigational capacity on the inland waterways of the United States on the establishment of a more balanced national transportation system.

"(2) The expected level of traffic growth on the inland waterways of the United States and on competing modes of transportation, without navigational cost recovery, with the level of cost recovery provided for in this legislation, and with cost recovery over and above the levels provided for in this legislation.

"(3) Sites on the inland waterways of the United States where cost-effective improvements are likely to be needed by the year 2000.

"(4) The economic impacts of any major navigation investments through the year 2000 on (i) carriers and shippers using the inland waterways of the United States, (ii) alternate modes that compete with carriers using the inland waterways of the United States, and the shippers using such competing modes, and (iii) the ultimate consumers of products, whether shipped on the inland waterways of the United States or not;

"(5) The cost impact of user charges on businesses and farmers dependent on water transportation;

"(6) Factors and standards that should be considered in determining the advisability to proceed with construction of any project on the inland waterways of the United States subsequent to enactment of this Act, and

"(7) the possible impact of Federally financed navigational projects in requiring off-setting subsidies to competing models.

"(c) The recommendations authorized by subsection (a) of this section shall identify:

"(1) Those segments on the inland waterways of the United States, together with their costs, that will require major rehabilitation or expansion by the year 2000,

"(2) Those improvements, together with their costs, for new segments that should be added to the inland waterways of the United States by the year 2000.

"(3) A cost recovery system that will provide for balance in national transportation policy and will, either on a system-wide, region-wide, or project-by-project basis, provide a realistic market test of the need for projects listed in paragraphs (1) and (2) of this subsection, and which can be reasonably paid by the prospective commercial users of projects on the inland waterways of the United States, and

"(4) Benefit and cost factors that should be utilized hereafter in evaluating projects on the inland waterways of the United States.

"(d) To carry out the provisions of this section, $8,000,000 is authorized to be appropriated to the Secretary and to remain available until expended.

"SEC. 302. Except for projects under construction at the time of enactment of this Act, including the project authorized by Section 102 of this Act, and necessary operation and maintenance activities, no project for replacement, construction, or rehabilitation increasing the capacity of the locks, and dams, and channels on the inland waterways of the United States or to be added to the inland waterways of the United States that primarily benefits commercial navigation shall be initiated, nor shall funds be so expended, by the Secretary of Army until the Secretary has, by regulations, established a system of user charges, including but not necessarily limited to license fees or tolls, sufficient to recover 10 percentum of

the capital cost of such project, including interest, over the initial 10 years of the project's operation. Notwithstanding any other provision of law, the Secretary shall initiate collection of such charges when the Secretary of the Army commences the operation of the project, and he shall deposit such charges in the general fund of the Treasury. Such charges may be established at the project or over a broader portion of the inland waterways of the United States, and, to the extent equitable and practicable, shall be distributed among users in such a manner as not to cause serious economic disruption on any segment of the inland waterways of the United States. The Secretary of the Army shall prohibit the use of such project by any commercial vessel that fails to pay such charge. This section is repealed upon enactment of any statute that either authorizes the recommendations of the Secretary required by Section 301 of this Title, or that rejects or modifies such recommendations.

"SEC. 303. No later than January 15, 1981, and each year thereafter, the Secretary of the Treasury shall report to the Congress on the monies received under Title II of this Act during the preceding fiscal year, identifying the percentage that such monies represent out of all monies expended during such fiscal year by the United States for operations, maintenance, and construction on the inland waterways of the United States.

"SEC. 304. The Secretary of the Army, acting through the Chief of Engineers and in consultation with the Secretary of Transportation, shall within 180 days of the date of enactment of tihs Act, promulgate regulations in the Federal Register to minimize congestion on the inland waterways of the United States and thereby extend the useful economic life of locking facilities on such waterways. Such regulations shall include, but not be limited to, requirements covering barge configurations, lockage priorities, traffic scheduling, and lockage aids, such as switchboats.

"SEC. 305. As used in this Title, the term:

"(a) 'Inland waterway of the United States' means any improved waterway operated and maintained by the United States, the improvement to which are primarily for the use of commercial vessels other than ocean-going vessels, and does not include the Great Lakes, their interconnecting channels, and the Saint Lawrence Seaway, and

"(b) 'commercial users' means common, contract, or other carriers for hire and owners or operators of private shallow-draft cargo vessels.

"SEC. 306. This title may be cited as the 'Inland Waterways Improvement and Cost Recovery Act of 1978.'

IDENTIFICATION OF THE MAJOR DIFFERENCES IN VARIOUS PROPOSALS ON WATERWAY USER CHARGES

	Bill passed by Senate last June	House bill, H.R. 8309	Proposal advanced by the barge industry	Domenici-Stevenson proposal
Maximum fuel tax	No fuel tax	6 cents per gallon in 1981	10 cents per gallon reached at an uncertain date.	12 cents per gallon in 1984.
Date tax or charge begins	Oct. 1, 1979	Oct. 1, 1979; starting at 4 cents per gallon.	Uncertain; at discretion of the Corps; starting at 4 cents per gallon.	Oct. 1, 1979; starting at 4 cents per gallon,
Percentage cost recovery	100 percent of operations and maintenance, plus 50 percent of construction (phased in over 10 yr).	None	None	10 percent of new construction, recovered during initial 10 yr of a project's operation. Capital recovery does not apply to locks and dam 26.

● Mr. STEVENSON. Mr. President, Senator DOMENICI and I are today introducing a compromise amendment to H.R. 8309, the lock and dam 26 authorization and waterway user fee bill.

The amendment reflects concessions on all sides and is an effort to break an impasse that threatens to prevent replacement of locks and dam 26 on the Mississippi River at Alton, Ill., and many other worthy projects. Locks and Dam 26 is used by the commerce of the Upper Mississippi and Illinois Rivers. In its present condition, this 40-year-old facility is inadequate. Its replacement is critical to the welfare of the most highly developed agricultural and industrial region in the world.

Under this amendment the barge industry will be required for the first time to contribute a portion of what the Federal Government spends to build, operate and maintain the inland navigation system. This step is long overdue—and I commend Senator DOMENICI for his unrelenting efforts to win a contribution from the industry most benefited by this system.

Our compromise will:

First. Authorize a new lock and dam 26 with a single 1,200-foot lock, configured so it can accommodate a second lock if authorized by Congress.

Second. Authorize studies for the planned development and environmental protection of the Upper Mississippi River. The amendment also prohibits a 12-foot channel on the Upper Mississippi River and its tributaries and construction of any new navigation projects pending the study.

Third. Impose a 2-cent-per-gallon fuel tax in fiscal year 1980 and fiscal year 1981 for commercial users of the system, increasing to 12 cents in fiscal year 1985 and thereafter.

Fourth. Authorize a 3-year study by the Department of Transportation of a comprehensive system of user charges for the inland waterway system.

Fifth. Require recovery of 10 percent of the cost of any new construction on the inland system, with the exception of locks and dam 26. The 10 percent recovery will be spread out over the entire system during the first 10 years a new facility is in operation.

The 10-percent contribution would not produce revenues until long after the Congress has considered the DOT study recommendations. When this study is completed, Congress will have an opportunity to repeal or change the recovery formula before it becomes operative. If for any reason construction of lock and dam 26 is delayed, the Congress might well decide to repeal the 10-percent cost recovery before it takes effect. If it deferred action on the DOT user fee study, the 10 percent recovery would remain in effect.

This compromise is sound and workable. It has won the backing of the administration. It meets its "minimum" requirements with respect to recovery of operating and capital expenditures for the inland waterway system. Similarly, the administration has informed us that the House bill, which contains a lower fuel tax and no capital recovery formula, and the other known proposals circulating in the Senate do not meet the President's requirements and would not be approved.

The fuel tax in this amendment is modest; 12 cents is equal to the average State and Federal fuel taxes now paid by the trucking industry in the region and does not take full effect until 1985. By then 12 cents per gallon on marine diesel fuel will be lower than highway fuel taxes. The trucking industry also pays Federal excise taxes on tires, batteries, and other products; 12 cents per gallon would recover approximately 50 percent of the Federal Government's annual expenditures for operation and maintenance of the inland waterways.

The Senate earlier approved a provision supported by Senator DOMENICI and the administration that would have required the barge industry to pay the full operating and maintenance costs and half the capital costs of new construction. In the interest of getting action, they have made substantial concessions. I have relented in my opposition to recovery of an arbitrary percentage of construction costs. This is, therefore, a compromise. It is also a sound basis for action and little enough to ask of the waterway industry.

Senator DOMENICI and I have never disagreed on the need for user fees. We have not disagreed on the need for a new lock and dam. We disagreed on how to best achieve common goals. We are now of one mind, and I am optimistic that we will succeed with the Carter administration's support.

This amendment, if approved, would assure Midwest farmers transportation for their products at reasonable cost. It would assure city dwellers a means of receiving coal and other fuels. It offers equity to the American taxpayer. And it begins the process of balancing competing modes of transportation, so that the waterway users no longer enjoy an advantage which threatens the viability of other vital transportation modes.

This issue has been debated for 3 years. It is our last chance in this Congress to authorize replacement of locks and dam 26—and it is our last chance this year to enact user fees. This compromise has the backing of the adminis-

tration and will be signed. I urge its adoption.

Mr. President, I commend the administration for its cooperation and productive attention to this matter and I ask unanimous consent that a copy of Secretary Adams' letter to me of April 28 be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

THE SECRETARY OF TRANSPORTATION,
Washington, D.C., April 28, 1978.

Hon. ADLAI E. STEVENSON,
U.S. Senate,
Washington, D.C.

DEAR SENATOR STEVENSON: I am writing to advise you of the Administration's views on legislation now pending before the Senate concerning Lock and Dam 26 and waterway user charges.

When I last wrote you on the issue of waterway user charges, it was to uniform you of the President's intention to veto the House bill, H.R. 8309. We remain convinced that the 4c/6c tax recommended by the House is inadequate.

The Administration would still prefer legislation recovering 100 percent of the costs of operation and maintenance, and 50 percent of the costs of new construction of the inland waterway system. This year those costs are approaching the half-billion dollar level.

In order to expedite this matter, however, we will accept the compromise substitute for H.R. 8309 that has been offered by Senators Stevenson and Domenici. This substitute offers the minimum acceptable basis from which to develop an adequate House-Senate Conference bill.

In our view, the most important elements of the Stevenson-Domenici proposal are:

1) An adequate level of taxation implemented by a date certain. We support the Stevenson-Domenici proposal for a gradually phased-in fuel tax beginning no later than FY 1980, and reaching 12c per gallon by the end of FY 1984. This tax will still be proportionally much less, for example, than the dedicated highway taxes paid by the trucking industry. Based on extensive studies, we believe that this tax would impose no serious hardship for barge companies or their shippers.

2) The principle of cost recovery. Both this Administration and the Senate have supported full recovery of operation and maintenance costs and 50 percent recovery of the cost of new construction on the inland waterway system. While we remain convinced of the correctness of our position, we are willing to postpone implementation of this level of recovery pending the outcome of a comprehensive study to be carried out by the Department of Transportation and other agencies.

In the meantime, the fuel tax discussed above should be implemented. For any projects initiated prior to the enactment or rejection of the recommendations of the DOT study, a minimum of 10 percent of capital costs should be recovered, as proposed in the Stevenson-Domenici substitute.

3) Comprehensive planning for the inland waterway system. As the costs of the current waterway system have escalated, the need for a comprehensive review of waterway development policy has grown. The commercial waterway industry, according to a recent CBO study, receives the equivalent of 40 percent of its annual revenues in Federal subsidies in the form of free Federal waterway operation and construction; the equivalent Federal subsidy of other modes is 3 percent or less. The Stevenson-Domenici study proposal offers an opportunity to develop a coordinated approach to waterway costs within the context of a national transportation system.

This Administration very much wants to establish a fair system of waterway user charges along with the waterway improvements that are needed. However, the President has asked me to emphasize that our desire to establish this system does not mean that we will accept legislation involving insubstantial taxes which are indefinitely delayed. He has asked me to advise you that he will not sign legislation authorizing a new lock and dam at Alton, Illinois unless it establishes a firm time-table with an early commencement date for the implementation of a fuel tax which would recover a substantial portion of operating costs. Moreover, acceptable legislation would provide for some capital cost recovery on new waterway construction, pending Congressional enactment or rejection of the recommendations of the DOT study. The Stevenson-Domenici proposal meets these criteria as compared with other proposals that have been circulated recently in the Senate which do not, and would not be signed.

In addition the President has asked me to convey his hope that this bill will not be used as a vehicle for additional costly or extraneous amendments that could jeopardize final enactment of this needed legislation.

I hope that you will be able to support the Stevenson-Domenici substitute, and that we can finally resolve this difficult issue.

Sincerely,

BROCK ADAMS.●

AMENDMENT NOS. 1830 AND 1831

(Ordered to be printed and to lie on the table.)

Mr. GRAVEL submitted two amendments intended to be proposed by him to the bill (H.R. 8309), supra.

AMENDMENT NO. 1832

(Ordered to be printed and to lie on the table.)

Mr. GRAVEL (for himself and Mr. MAGNUSON) submitted an amendment intended to be proposed by them, jointly, to the bill (H.R. 8309), supra.

AMENDMENT NO. 1833

(Ordered to be printed and to lie on the table.)

Mr. RANDOLPH submitted an amendment intended to be proposed by him to the bill (H.R. 8309), supra.

EXPORT-IMPORT BANK ACT—S. 2520

AMENDMENT NOS 1834 AND 1835

(Ordered to be printed and referred to the Committee on Banking, Housing, and Urban Affairs.)

Mr. STEVENSON submitted two amendments intended to be proposed by him to the bill (S. 2520) to amend and extend the Export-Import Bank Act of 1945, as amended.

● Mr. STEVENSON. Mr. President, I am submitting today two amendments to S. 2520, a bill to amend and extend the Export-Import Bank Act. The purpose of the amendments is to insure that export credits funded by the U.S. Government consistently serve U.S. interests. The first amendment would specify criteria to be used by the President to determine the eligibility of countries for Eximbank credits and provide for congressional review of Presidential determinations of eligibility. The second amendment would facilitate congressional review of critical Bank transactions involving major national interests while removing unnecessary impediments to Bank decisions.

Present law offers an inadequate basis for determining whether foreign countries should be eligible for Eximbank credit. The Export-Import Bank Act requires national interest determinations to establish the eligibility of Communist countries only, and defines none of the factors to be used in such determinations. The Trade Act of 1974 has requirements with respect to emigration policies of nonmarket countries, but only for emigration and nonmarket economies.

National interest standing alone is too vague a concept to reconcile basic foreign policy concerns and commercial considerations. The right to emigrate is one of those concerns. Others include a country's relationship to the United States and countries friendly or hostile to the United States, and its policies and actions with respect to peaceful settlement of international and internal disputes.

Our relations with all countries should be assessed against sound criteria. At present our antiquated statutes encourage subsidized credits for some offenders against our interests, while precluding credits where they would serve us.

The amendments I propose would set global criteria for eligibility for Eximbank credit and apply those criteria globally. No country would be beyond their purview; no country or group of countries would receive special treatment.

The President would be required to submit to Congress a list of countries for which he had determined, having considered the factors specified in the law, that eligibility to receive Bank-supported exports is in the national interest. Congress would have 60 days to review the list and could disapprove it by a concurrent resolution to be considered under expedited procedures. If the list were disapproved, all countries previously eligible would remain eligible until a new list became effective. A list which passed muster before Congress would remain effective for 3 years. The President could submit to Congress a revised list at any time, and such revised list would be subject to congressional review as well. He could remove countries as well from the list of eligible countries.

Individual bank transactions which are presently subject to review by Congress for 25 days of continuous session before receiving final Eximbank approval would continue to be subject to review, but with the following changes: First, the threshold for review of loans and financial guarantees would be raised from $60 million to $100 million; second, during congressional adjournment the Bank could finalize transactions after 35 calendar days unless a Member of Congress raised objection; and third, Congress could disapprove such transactions by concurrent resolution considered under expedited procedures. This last provision is intended to enable controversial cases to be settled expeditiously and definitively by majority vote in the Congress.

The amendments would supersede the provisions of the Trade Act of 1974 with respect to Eximbank credits for exports to countries other than the Soviet Union.

Unfortunately, the state of relations between the United States and the U.S.S.R. makes any change in the Trade Act and the Export-Import Bank Act pertaining to the U.S.S.R. untimely. Accordingly, such provisions are unaffected by my amendments.

Mr. President, I ask unanimous consent that there be printed in the RECORD a description of the amendments, section-by-section analyses of the amendments and the amendments themselves.

There being no objection, the amendments and material were ordered to be printed in the RECORD, as follows:

AMENDMENT NO. 1834

At the appropriate place in the bill, insert the following:

SEC. . (a) Section 2(b)(3) of the Export-Import Bank Act of 1945 is amended—

(1) by striking out "No" in the first sentence and inserting in lieu thereof "Except as provided by the fourth sentence of this paragraph, no";

(2) by striking out "$60,000,000" in the first sentence and inserting in lieu thereof "$100,000,000";

(3) by inserting before the period at the end of the first sentence a comma and the following: "and the Congress has not, by an affirmative vote of a majority of those present and voting in each House, adopted a concurrent resolution pursuant to subsection (d) disapproving such loan, guarantee, or combination thereof"; and

(4) by adding at the end thereof the following: "If the Bank submits a statement to the Congress under this paragraph and either House of Congress is in an adjournment for a period which continues for at least 10 days after the date of submission of the statement, then any such loan or guarantee or combination thereof may, subject to the second sentence of this paragraph, be finally approved by the Board of Directors upon the termination of the 25-day period referred to in the first sentence of this paragraph or upon the termination of a 35-calendar-day period (which commences upon the date of submission of the statement), whichever occurs sooner, except that the 35-calendar-day period does not apply to any loan, guarantee, or combination thereof with respect to which a Member of Congress has submitted an objection in writing to the Chairman of the Board of Directors of the Bank.

(b) Section 2 of such Act is amended by adding at the end thereof the following:

"(d) CONGRESSIONAL PROCEDURES.

"(1) RULES OF HOUSE OF REPRESENTATIVES AND SENATE.—This subsection is enacted by the Congress—

"(A) as an exercise of the rulemaking power of the House of Representatives and the Senate, respectively, and as such it is deemed a part of the rules of each House, respectively, but applicable only with respect to the procedure to be followed in that House in the case of resolutions described in subsection (b)(3) and supersedes other rules only to the extent that it is inconsistent therewith; and

"(B) with full recognition of the constitutional right of either House to change the rules (so far as relating to the procedure of that House) at any time, in the same manner and to the same extent as in the case of any other rule of that House.

"(2) DEFINITION.—For purposes of this subsection, the term 'resolution' means only a concurrent resolution of the two Houses of the Congress, the matter after the resolving clause of which is as follows: 'That the Congress does not approve the _____ submitted by the Export-Import Bank on _____.', with the first blank space being filled with a description of the loan, financial guarantee, or combination thereof and the second blank space being filled with the appropriate date.

"(3) DISCHARGE OF COMMITTEES.—

"(A) If the committee of either House to which a resolution has been referred has not reported it at the end of 10 days after its introduction, it is in order to move either to discharge the committees from further consideration of the resolution or to discharge the committee from further consideration of any other resolution introduced with respect to the same matter, except no motion to discharge shall be in order after the committee has reported a resolution with respect to the same matter.

"(B) A motion to discharge under subparagraph (A) may be made only by an individual favoring the resolution, and is highly privileged in the House and privileged in the Senate; and debate thereon shall be limited to not more than 1 hour, the time to be divided in the House equally between those favoring and those opposing the resolution, and to be divided in the Senate equally between, and controlled by, the majority leader and the minority leader or their designees. An amendment to the motion is not in order, and it is not in order to move to reconsider the vote by which the motion is agreed to or disagreed to.

"(4) FLOOR CONSIDERATION IN THE HOUSE.—

"(A) A motion in the House of Representatives to proceed to the consideration of a resolution shall be highly privileged and not debatable. An amendment to the motion shall not be in order, nor shall it be in order to move to reconsider the vote by which the motion is agreed to or disagreed to.

"(B) Debate in the House of Representatives on a resolution shall be limited to not more than 10 hours, which shall be divided equally between those favoring and those opposing the resolution. A motion further to limit debate shall not be debatable. No amendment to, or motion to recommit, the resolution shall be in order. It shall not be in order to move to reconsider the vote by which a resolution is agreed to or disagreed to.

"(C) Motions to postpone, made in the House of Representatives with respect to the consideration of a resolution, and motions to proceed to the consideration of other business, shall be decided without debate.

"(D) All appeals from the decisions of the Chair relating to the application of the Rules of the House of Representatives to the procedure relating to a resolution shall be decided without debate.

"(E) Except to the extent specifically provided in the preceding provisions of this subsection, consideration of a resolution in the House of Representatives shall be governed by the Rules of the House of Representatives applicable to other resolutions in similar circumstances.

"(5) FLOOR CONSIDERATION IN THE SENATE.—

"(A) A motion in the Senate to proceed to the consideration of a resolution shall be privileged. An amendment to the motion shall not be in order nor shall it be in order to move to reconsider the vote by which the motion is agreed to or disagreed to.

"(B) Debate in the Senate on a resolution, and all debatable motions and appeals in connection therewith, shall be limited to not more than 10 hours, to be equally divided between, and controlled by, the majority leader and the minority leader or their designees.

"(C) Debate in the Senate on any debatable motion or appeal in connection with a resolution shall be limited to not more than 1 hour, to be equally divided between, and controlled by, the mover and the manager of the resolution, except that in the event the manager of the resolution is in favor of any such motion or appeal, the time in opposition thereto, shall be controlled by the minority leader or his designee. Such leaders, or either of them, may, from time under their control on the passage of a resolution, allot additional time to any Senator during the consideration of any debatable motion or appeal.

"(D) A motion in the Senate to further limit debate on a resolution, debatable motion, or appeal is not debatable. No amendment to, or motion to recommit, a resolution is in order in the Senate.

"(6) Special rule for concurrent resolutions.—In the case of a resolution described in paragraph (2), if prior to the passage by one House of a resolution of that House, that House receives a resolution with respect to the same matter from the other House, then—

"(a) the procedure in that House shall be the same as if no resolution had been received from the other House; but

"(b) the vote on final passage shall be on the resolution of the other House.

"(7) Special rule relating to Congressional procedures.—Whenever, pursuant to subsection (b)(3), a document is required to be transmitted to the Congress, copies of such document shall be delivered to both Houses of Congress on the same day and shall be delivered to the Clerk of the House of Representatives if the House is not in session and to the Secretary of the Senate if the Senate is not in session.

AMENDMENT NO. 1835

At the appropriate place in the bill, insert the following:

SEC. — (a) Section 2(b)(1) of the Export-Import Bank Act of 1945 as amended by inserting a period after "and employment in the United States" and striking the remainder of the paragraph.

(b) Section 2(b)(2) of the Export-Import Bank Act of 1945 as repealed.

(c) Section 2(b)(5)(A) is amended by striking the last sentence thereof.

(d) Section 2 of such Act is amended by adding at the end thereof the following:

"(d)(1) The Bank in the exercise of its functions shall not guarantee, insure, or extend credit, or participate in an extension of credit in connection with the purchase or lease of any product or service by any foreign country, including any agency or national thereof, unless such country is on the effective list of eligible countries referred to in paragraph (2). No foreign country may be included in the list of eligible countries referred to in paragraph (2) unless the President determines that inclusion of such foreign country in the list would be in the national interest. The President shall make a separate national interest determination with respect to each foreign country included on the list referred to in paragraph (2), and, in making such determination, shall take into account such factors as the country's relationship to the United States, its relationship to countries friendly or hostile to the United States, its internal stability and creditworthiness, and its policies and actions with respect to peaceful settlement of international and internal disputes, nuclear proliferation, environmental protection, human rights, including specifically policies regarding the right to emigrate, and such other factors as he may deem appropriate.

"(2) Within 60 days after the date of this enactment of this subsection, the President shall transmit to the House of Representatives and to the Senate a list of countries which he has determined, in accordance with paragraph (1), to be eligible for participation in the Bank's programs under this Act. Notwithstanding any other provision of law, and except as otherwise provided in paragraph (8) for the Union of Soviet Socialist

Republics, such list shall be the exclusive method for determining eligibility for participation in the Bank's programs under this Act and shall be valid and effective for a period of three years beginning on the day on which it is deemed effective under the procedures set forth in paragraph (5). At least 60 days prior to the expiration of any such list, the President shall transmit to the House of Representatives and to the Senate a new list of countries determined, in accordance with paragraph (1), to be eligible for participation in the Bank's programs under this Act.

"(3) The President may at any time issue an Executive Order (A) removing any country from the list referred to in paragraph (2), or (b) terminating the effectiveness of any such list, if, in light of the factors set forth in the third sentence of paragraph (1), he determines any such action to be in the naional interes. Any such Executive Order, toegther with a document setting forth the reasons therefor, shall be promptly transmitted to the House of Representatives and to the Senate.

"(4) The President may, at any time, add one or more countries to the list referred to in paragraph (2) if he makes a determination in accordance with paragraph (1) and transmits a document setting forth such determination, together with the reasons therefor to the House of Representatives and to the Senate.

"(5) Any list referred to in paragraph (2) and any determination referred to in paragraph (4) shall become effective after the close of the 60-day period beginning on the day on which the list referred to in paragraph (2) or the document referred to in paragraph (4), whichever is the case, is delivered to the House of Representatives and to the Senate, unless during such 60-day period the two Houses adopt, by an affirmative vote of a majority of those present and voting in each House, a concurrent resolution disapproving any such list referred to in paragraph (2), or any such determination referred to in paragraph (4), whichever is the case, under the procedures set forth in subsection (e).

"(6) Notwithstanding any other provision of this subsection, the President may disapprove any guarantee, insurance, extension of credit, or participation in an extension of credit by the Bank prior to approval by the Bank if, in light of the factors set forth in the third sentence of paragraph (1), he finds that such transaction would not be in the national interest.

"(7) Notwithstanding any other provision of this subsection, (A) until the first list of eligible countries referred to in paragraph (2) has become effective, the Bank may guarantee, insure, or extend credit, or participate in an extension of credit with respect to any foreign country, including any agency or national thereof, to the extent such country was eligible to participate in the Bank's programs on the day prior to the date of enactment of this subsection, and (B) if, at any time, a list referred to in paragraph (2) has expired and no new list has yet become effective, the bank, during any such period, may guarantee, insure, or extend credit, or participate in an extension of credit with respect to any foreign country, including any agency or national thereof, included on the most recently expired list, except as the President, in light of the factors set forth in the third sentence of paragraph (1), may otherwise direct in the national interest.

"(8) Notwithstanding any other provision of this subsection, the procedures established in this section for determining a country's eligibility for participation in the Bank's programs under this Act shall not waive or supersede in any way the provisions of either section 402 or 409 of the Trade Act of 1974 (88 Stat. 1978) as they apply in determining the eligibility of the Union of Soviet Socialist Republics for participation in the Bank's programs under this Act.

"(e) CONGRESSIONAL PROCEDURES

"(1) RULES OF HOUSE OF REPRESENTATIVES AND SENATE.—This subsection is enacted by the Congress—

"(A) as an exercise of the rulemaking power of the House of Representatives and the Senate, respectively, and as such it is deemed a part of the rules of each House, respectively, but applicable only with respect to the procedure to be followed in that House in the case of resolutions described in subsection (d)(5) and supersedes other rules only to the extent that it is inconsistent therewith; and

"(B) with full recognition of the constitutional right of either House to change the rules (so far as relating to the procedure of that House) at any time, in the same manner and to the same extent as in the case of any other rule of that House.

"(2) DEFINITIONS.—For purposes of this subsection, the term 'resolution' means only—

"(A) a concurrent resolution of the two Houses of the Congress, the matter after the resolving clause of which is as follows: 'That the Congress does not approve the list of countries eligible for participation in the Export-Import Bank's programs submitted by the President on ., with the blank space being filled with the appropriate date; or

"(B) a concurrent resolution of the two Houses of the Congress, the matter after the resolving clause of which is as follows: 'That the Congress does not approve the determination of the President submitted on , with respect to .'. with the first blank space being filled with the appropriate date and the second blank space being filled with the name of the country involved.

"(3) DISCHARGE OF COMMITTEES.—

"(A) If the committee of either House to which a resolution has been referred has not reported it at the end of 30 days after its introduction, it is in order to move either to discharge the committee from further consideration of the resolution or to discharge the committee from further consideration of any other resolution introduced with respect to the same matter, except no motion to discharge shall be in order after the committee has reported a resolution with respect to the same matter.

"(B) A motion to discharge under subparagraph (A) may be made only by an individual favoring the resolution, and is highly privileged in the House and privileged in the Senate; and debate thereon shall be limited to not more than 1 hour, the time to be divided in the House equally between those favoring and those opposing the resolution, and to be divided in the Senate equally between, and controlled by, the majority leader and the minority leader or their designees. An amendment to the motion is not in order, and it is not in order to move to reconsider the vote by which the motion is agreed to or disagreed to.

"(4) FLOOR CONSIDERATION IN THE HOUSE.—

"(A) A motion in the House of Representatives to proceed to the consideration of a resolution shall be highly privileged and not debatable. An amendment to the motion shall not be in order, nor shall it be in order to move to reconsider the vote by which the motion is agreed to or disagreed to.

"(B) Debate in the House of Representatives on a resolution shall be limited to not more than 20 hours, which shall be divided equally between those favoring and those opposing the resolution. A motion further to limit debate shall not be debatable. No amendment to, or motion to recommit, the resolution shall be in order. It shall not be in order to move to reconsider the vote by which a resolution is agreed to or disagreed to.

"(C) Motions to postpone, made in the House of Representatives with respect to the consideration of a resolution, and motions to proceed to the consideration of other business, shall be decided without debate.

"(D) All appeals from the decisions of the Chair relating to the application of the Rules of the House of Representatives to the procedure relating to a resolution shall be decided without debate.

"(E) Except to the extent specifically provided in the preceding provisions of this subsection, consideration of a resolution in the House of Representatives shall be governed by the Rules of the House of Representatives applicable to other resolutions in similar circumstances.

"(5) FLOOR CONSIDERATION IN THE SENATE.—

"(A) A motion in the Senate to proceed to the consideration of a resolution shall be privileged. An amendment to the motion shall not be in order nor shall it be in order to move to reconsider the vote by which the motion is agreed to or disagreed to.

"(B) Debate in the Senate on a resolution, and all debatable motions and appeals in connection therewith, shall be limited to not more than 20 hours, to be equally divided between, and controlled by, the majority leader and the minority leader or their designees.

"(C) Debate in the Senate on any debatable motion or appeal in connection with a resolution shall be limited to not more than 1 hour, to be equally divided between, and controlled by, the mover and the manager of the resolution, except that in the event the manager of the resolution is in favor of any such motion or appeal, the time in opposition thereto, shall be controlled by the minority leader or his designee. Such leaders, or either of them, may, from time under their control on the passage of a resolution, allot additional time to any Senator during the consideration of any debatable motion or appeal.

"(D) A motion in the Senate to further limit debate on a resolution, debatable motion, or appeal is not debatable. No amendment to, or motion to recommit, a resolution is in order in the Senate.

"(6) Special rule for concurrent resolutions.—In the case of a resolution described in paragraph (2), if prior to the passage by one House of a resolution of that House, that House receives a resolution with respect to the same matter from the other House, then—

"(A) the procedure in that House shall be the same as if no resolution had been received from the other House; but

"(B) the vote on final passage shall be on the resolution of the other House.

"(7) SPECIAL RULES RELATING TO CONGRESSIONAL PROCEDURES.—

"(A) Whenever, pursuant to subsection (d) a document is required to be transmitted to the Congress, copies of such document shall be delivered to both Houses of Congress on the same day and shall be delivered to the Clerk of the House of Representatives if the House is not in session and to the Secretary of the Senate if the Senate is not in session.

"(B) For the purpose of subsection (d), the 60-day period referred to in such subsection shall be computed by excluding the days on which either House is not in session because of an adjournment of more than 3 days to a day certain or an adjournment of the Congress sine die.".

DESCRIPTION OF PROPOSED STEVENSON AMENDMENTS TO EXIMBANK ACT

The amendments would establish a new procedure for determining the eligibility of countries to receive exports supported by the Export-Import Bank, and revise the present

25-day prenotification provision for the review of large Bank credits. The amendment would replace or supersede certain provisions currently contained in the Export-Import Bank Act of 1945 and the Trade Act of 1974.

The President would be required to submit to Congress a list of those countries for which he has determined that eligibility to receive Bank supported-exports is in the national interest, taking into consideration each country's relationship to the United States and to countries friendly or hostile to the United States, its internal stability and creditworthiness, and its policies and actions with respect to peaceful settlement of international and internal disputes, arms control, human rights, including specifically policies regarding the right to emigrate of its citizens, and other factors. During the 60 days following submission of the list, Congress would have the opportunity to review the list, and could, if necessary, disapprove the list by concurrent resolution of both Houses. If the list were disapproved, all countries previously eligible would remain eligible until a new list became effective.

The President could propose a revised list at any time, and such revised lists would be subject to the same Congressional review procedure as the initial list. The eligibility list procedure provided by the amendment would replace provisions in the current statute which require national interest determinations for Communist countries before the Bank can support exports destined for such countries and separate determinations for each such loan over $50 million.

The amendments would also raise the threshold for Congressional review of individual Bank transactions from the present $60 million to $100 million, and provide an opportunity for Congress to disapprove such transactions during a 25 legislative day review period. During Congressional adjournments such transactions could be approved within 35 calendar days unless a member of Congress raised an objection.

The amendments would supersede the provisions of the Trade Act of 1974 with respect to Eximbank credits for exports to countries other than the Soviet Union, but would not supersede provisions concerning m.f.n. treatment, or CCC credit Provisions of the Export-Import Bank Act pertaining to the U.S.S.R. would remain unchanged.

STEVENSON AMENDMENT RELATING TO COUNTRY ELIGIBILITY

SECTION-BY-SECTION ANALYSIS

Subsection (a) would repeal required human rights determinations for specific countries and loans in favor of including such criteria in the country eligibility determinations to be made by the President, and reviewed by the Congress, under subsection (d).

Subsection (b) would repeal Section 2(b)(2) of the Act which requires the President to specifically determine the eligibility of any Communist country for Bank credit, and which further requires specific Presidental determinations with respect to each transaction in which the Bank would extend $50 million or more in credit support for exports to a Communist country. This subsection is replaced by subsection d) which applies eligibility criteria to Communist and non-Communist countries alike on the basis of a uniform set of criteria.

Subsection (c) repeals a provision allowing the President to veto any Bank transactions to any country that he determines not to be in the national interest (undefined), in favor of a similar provision in the new subsection (d), which sets forth criteria governing the President's national interest determinations in this regard.

Subsection (d)(1) provides that the Bank cannot provide export credit assistance to any foreign country, including its agencies or nationals, unless it is on the effective list of eligibile countries provided for in paragraph (2). The President must make a separate national interest determination with respect to each country on the list, taking into account the country's relationship to the U.S., and countries friendly or hostile to the U.S., its internal stability and creditworthiness, and its policies with respect to peaceful settlement of international and internal disputes, environmental protection, nuclear proliferation, and human rights, including the right to emigrate, and such other factors as he deems appropriate.

Subsection (d)(2) requires the President, subject to the procedures of paragraph 5, to submit a list of eligible countries, within 60 days after the amendment's enactment. It further supersedes the provisions of the Trade Act of 1974 as they affect Eximbank credits, except it does not affect the Jackson-Vanik amendments with respect to the Soviet Union (see paragraph 8). The list is effective for three years, and the President is required to update the list in a timely manner.

Subsection (d)(2) gives the President the right at any time to take any country off the effective list, or terminate the list altogether, in light of the national interest factors prescribed in paragraph (2).

Subsection (d)(4) permits the President to add a country to the list at any time, subject to the national interest procedures of paragraph (5).

Subsection (d)(5) gives the Congress the right to disapprove within 60 days, by concurrent resolution, any list or particular country determinations submitted.

Subsection (d)(6) gives the President the right to disapprove any Bank transaction to a foreign country in light of the national interest factors prescribed in paragraph (1).

Subsection (d)(7) provides that until the list becomes effective, the Bank can continue to finance transactions to any country eligible for Bank credit on the day prior to the date of enactment of the amendment, but only to the extent then eligible. Should a list expire and a new list not yet become effective, countries on the expired list would remain eligible for the Bank's programs, unless otherwise directed by the President. This subsection thus serves to assure the continuity of Bank financing under all circumstances.

Subsection (d)(8) provides that the eligible procedures of this subsection do not supersede the Jackson-Vanik provisions of the Trade Act as they apply to the Soviet Union.

Subsection (e) sets forth detailed, antifilibuster procedures for expedited consideration of any resolution to disapprove the list of eligible countries, or the addition of any country to such list. The procedures are similiar to those now existing in the Trade Act.

STEVENSON AMENDMENT RELATING TO PRENOTIFICATION

SECTION-BY-SECTION ANALYSIS

Subsections (a)(1) and (2) would amend existing law by raising the threshold for review of Bank loans and guarantees from $60 million to $100 million.

Subsection (a)(3) would give the Congress the right to disapprove by Concurrent Resolution, under expedited procedures, any loan, guarantee, or combination thereof subject to the prenotification requirements. Such resolution would have to be passed within the time requirements provided in paragraph (4).

Subsection (a)(4) amends existing law to provide that if either House adjourns for a period of two days or more after the Bank has submitted a notification, the Bank may approve the transaction in question at the termination of the 25-day period currently in the statute, which period is tolled by an adjournment sine die and which excludes from its computation adjournments of more than 3 days to a day certain, or a 35 calendar-day-period which commences on date of submission. The thirty-five day period is tolled, however, if the Bank receives a written objection from a Member of Congress concerning the transaction.

Subsection (b) provides detailed, antifilibuster procedures for the consideration of any resolution to disapprove a transaction subject to the prenotification procedures.●

AMENDMENT NO. 1836

(Ordered to be printed and to lie on the table.)

Mr. DANFORTH (for himself and Mr. EAGLETON) submitted an amendment intended to be proposed by them, jointly, to the bill (H.R. 8309), supra.

NEW MADRID FLOODWAY PROJECT—ACQUISITION OF MITIGATION LANDS

● Mr. DANFORTH. Mr. President, following the devastating flood on the Mississippi River in 1927, the Congress of the United States passed the Flood Control Act of 1928, the purpose of which was to control flooding on the Mississippi River. The so-called Jadwin plan that was adopted by the Corps of Engineers envisioned:

(1) the creation of reservoirs in the tributaries of the Mississippi River;

(2) the creation of frontline levees on either side of the Mississippi River from the headwaters to the Gulf of Mexico; and

(3) the development of areas adjacent to the Mississippi which might be flooded in order to reduce the pressure on levees adjacent to certain metropolitan areas.

The Mississippi River Commission was designated to oversee the operation of the Corps of Engineers in carrying out the Jadwin plan.

In the bootheel area of Missouri, and particularly in the Mississippi and New Madrid County areas, levee construction began as early as 1913. St. Johns Levee and Drainage District and levee district No. 3 of Mississippi County, working with the U.S. Corps of Engineers, were responsible for the construction and maintenance of the frontline levee which extended from the hills at Commerce, Mo., southward along the Mississippi River to the city of New Madrid. Interior drainage was handled in the main through a series of ditches and natural drains dug by county court districts. In Mississippi County, interior drainage from south of the Big Lake area was channeled into the Ten Mile Pond area and down St. James Bayou to the Mississippi River. In New Madrid County, ditches were dug from the Sikeston area so that water drained toward the city of New Madrid, in a southerly direction.

The Federal Government constructed a setback levee diagonally through Mississippi County to the vicinity of New Madrid. The area between the frontline levee and the setback levee was to be used as a floodway in the event of high water, to relieve pressure on the city of Cairo, Ill., which is situated at the confluence of the Ohio and the Mississippi Rivers. Under the plan, the frontline levee could be breached by the Corps of Engineers allowing the water to flow between the two levees and to pour back into the river through a gap in the front-

line levee at a point near the city of New Madrid.

Since the beginning of construction of the setback levee, Mr. President, it has been anticipated that the gap in the frontline levee at New Madrid would be closed and gates and pumping stations installed so as to prevent the Mississippi River from unnecessarily backing into the floodway and damaging valuable cropland. This has never been accomplished and to this day this gap at New Madrid is the only gap in the frontline levee between Minneapolis and New Orleans.

In 1954, a plan for a closure structure was submitted to Congress. Congress approved the plan and appropriated initial funds to begin construction. However, inasmuch as no pumping station was provided for in the plan to take care of interior drainage, local support turned against the proposal and work on the project never commenced.

Local residents reviewed their needs and in 1975, in conjunction with the Corps of Engineers, devised an alternative proposal—the St. Johns Bayou Basin-New Madrid Floodway, Missouri project. This project has the unanimous support of all local interests in that it provides for a reopening of St. James Bayou and the installation of a pumping station where it crosses the frontline levee, and for the erection of gates and a pumping station at the New Madrid gap.

Under this proposal, the waters in Mississippi County would pass through Ten Mile Pond and down St. Johns Bayou into the Mississippi River as nature intended. St. Johns Diversion Ditch would be blocked at Barker's Ridge and all of the interior drainage west of the set-back levee in New Madrid, Scott and Mississippi Counties would flow through ditches to the present location of the New Madrid Gap where it would be pumped over the frontline levee.

The U.S. Fish and Wildlife Service and the Missouri Department of Conservation indicated that the new proposal would have adverse impacts on the fish and animal life in the vicinity of the project site. Therefore, both organizations suggested that mitigating lands be provided for in the proposal to offset any adverse effects on the environment. All parties involved agreed that the Ten Mile Pond area was the only feasible location for such mitigating lands and provisions to that effect were included in the proposal.

The Corps of Engineers filed its plan for the $24 million St. Johns Bayou Basin-New Madrid floodway project on September 26, 1975. Congress was asked to authorize the construction of the new project following the submission of the Corps' report. Due to a change in the law requiring all projects costing over $15 million to undergo a phase 1 advanced engineering and design study, Congress did not act upon the entire project. However, it did authorize on October 22, 1976, the phase 1 study at an estimated cost of $300,000. Congress appropriated $200,000 for the study in fiscal year 1978 and most likely will appropriate the funds needed for completion of phase 1 in fiscal year 1979.

Mr. President, my amendment would authorize phase II construction of the St. Johns Bayou Basin—New Madrid Flood Control Project. Normally, Congress would not authorize phase II construction until after the phase I study had been completed and reviewed. This is certainly a good general rule to follow. At times, however, circumstances do arise that dictate a suspension of the rules. Such circumstances have reared their heads with respect to the New Madrid Floodway Project.

The price of the proposed mitigation lands has risen to such an extent that local interests are seriously questioning their ability to pay their share of the costs of land acquisition. In its 1975 report to Congress, the corps estimated that the required 2,500 acres of land would cost $766,000. The corps revised that estimate upward to $1,030,000 in October of 1977. Finally, as a result of a 1978 reappraisal of the designated mitigation lands, the cost was set at $3,705,000.

The quadrupling of the cost has been due in large part to the activities of land speculators. Lehndorff Farms, Ltd.—a German-owned company—has purchased tracts of land surrounding the designated mitigation area and has expressed a very strong interest in purchasing additional tracts within the designated area. In addition, the company has begun to clear land adjacent to the mitigation lands—a practice which if not confined to those areas threatens to destroy the potential fish and wildlife refuge site. What the people in the New Madrid area are confronted with is not only the prospect of a prohibitively expensive project but also the possible loss of the key feature upon which the entire project depends.

By authorizing phase II construction, the Senate will enable the corps to acquire the designated mitigation lands before land speculators either drive up the costs even further or destroy the area altogether. Simultaneously, such action on the Senate's part will hasten the day when the 70,000 acres of rich delta bottomland, now subject to annual flooding, will be protected from the estimated $1.5 million in water damage now inflicted in the area every year.

I hope that my colleagues will support this very worthy and very long overdue flood control project.●

ADDITIONAL STATEMENTS

OUR INDOLENT PURSUIT OF FOREIGN TECHNOLOGY

● Mr. CHURCH. Mr. President, concern is growing in this country over the U.S. economy's lackluster export performance in nonagricultural products. Not only have U.S. exports failed to reap the anticipated gains in foreign markets from the dollar's rapid depreciation, but domestic producers are facing increasingly tough competition in the home market, as well, from foreign steel, automobiles, and home appliances, to mention just a few examples.

Industry has been quick to blame this situation on discriminatory import restrictions in foreign countries which keep out U.S. goods, and the use of dumping and other unfair marketing practices by foreign producers exporting to this country.

Some of these charges may well be true. But, as a recent article in the Washington Post by Daniel S. Greenberg points out, the fault may lie as much with American industrial practices.

American industry has grown accustomed to thinking of the United States as the sole birthplace of new technologies. As a consequence, while foreign manufacturers eagerly snap up new technological breakthroughs developed in the United States and adapt them for their own use, U.S. industry has largely ignored the innovative techniques being developed in other countries. This hurts our competitive position in the world market, for, as Greenberg points out, foreign research, "despite our ethnocentric notions of American scientific supremacy, actually accounts for well over half of the world's scientific and technological output."

U.S. Government policies have contributed to this state of affairs. The Government collects massive volumes of scientific and technical papers from both the private and public sectors in the United States and makes them available, through the National Technical Information Service, to anyone who is interested, including foreign manufacturers. But our Government agencies and our embassies abroad do little to collect and disseminate to U.S. industry, information about foreign non-military technical and scientific developments.

Instead of raising the walls of protectionism to keep out "unfair" foreign competition, let us seek to make our domestic industry more innovative and outward looking. That would be a far more positive and, ultimately, far more effective, way of eliminating the U.S. trade deficit.

Mr. President, I ask that Mr. Greenberg's article, "Our Indolent Pursuit of Foreign Technology," be printed in the RECORD.

The article follows:

[From the Washington Post, Apr. 10, 1978]

OUR INDOLENT PURSUIT OF FOREIGN TECHNOLOGY

(By Daniel S. Greenberg)

Listening in on the complaints that officials in industry, labor and government are making about foreign industrial competition, one gets the impression that some of them would rather curse the darkness than light a candle.

Consider, for example, one of the fastest-growing themes in the protectionist camp—namely, that foreign firms are scooping up the results of vast quantities of our taxpayer-financed research and using it to innovate products that outsell domestic goods.

Is that true? You can safely bet your Japanese-made television set that it's true. Which is why the president of the International Association of Machinists and Aerospace Workers charged last year that Japan has reaped $15 billion from the purchase of $1.5 billion of American technical know-how. It's why leaders of the American electronics industry have been pushing for curbs on the export of American scientific and technical knowledge. And it's why the White House

has included the export of such knowledge in a recently ordered governmentwide study of what ails industrial innovation in this country.

But before the drumbeat for technological protectionism gets any louder, it would be useful to take note of certain facts concerning foreign mining of American science and technology. Our industrial competitors work hard and systematically at keeping in touch with the output of American laboratories. And we make it extremely easy for them to do so. But in the meantime, there is scarcely an organized American effort to keep abreast of foreign research, which, despite our ethnocentric notions of American scientific supremacy, actually acounts for well over half of the world's scientific and technological output. Furthermore, when it comes to research of industrial value, our seemingly huge budgets are misleading. Half of the government's funds go into military projects, whereas Japan, for instance, devotes no more than 10 percent to that purpose.

In evaluating the calls for protectionism, however, the relevant point isn't who's doing more or less research, since great quantities of it are going on here and abroad. Rather, it's our indolence in matching the organized serious efforts that many nations make to exploit—as the protectionists correctly contend—American-financed research.

For example, the semigovernmental Japan Trade Center has technically trained representatives posted in New York, Los Angeles, San Francisco, Houston and Chicago. Their duties, according to a spokesman, "are to watch everything in American industry and gather information." The same monitoring role is carried on by representatives of many Japanese firms.

France, which follows a determined policy of keeping in touch with research in the major industrialized nations, keeps six science attachés in Washington, plus one each in Boston, Houston and San Francisco. Principal among their duties is following American science and technology at the laboratory level. The object is to know what's going on long before the rest of the world finds out through the traditionally slow process of scientific publishing.

The embassies of almost all the other industrialized nations are staffed for that purpose, though the intensity of the efforts varies. A staff member of the State Department science office points out, "Most of these people work for their ministries of commerce and industry, not for the foreign ministry, and their job is to watch the industrial area."

It's all open and aboveboard and, in fact, is greatly assisted by the U.S. government National Technical Information Service (NTIS), which offers for sale about 75 percent of all scientific and technical papers produced in the United States. Foreign sales are such a booming business—with Japan the biggest customer—that NTIS has contracted for foreign dealers to handle its publications in Japan, Britain, France and the Netherlands. Foreigners take 10 percent of NTIS sales. It is a unique window on a national research enterprise—immensely valuable, of course, to American researchers, but equally so to foreign competitors. Except for a small organization in the Netherlands, no other country has anything resembling NTIS.

The United States does maintain science attachés at 23 of our embassies. But unlike most of their foreign counterparts here, they're not in the business of collecting scientific and technical data for shipment back home. Rather, they're concerned with "policy matters"—whatever that means.

The military services, led by a longstanding Navy operation based in London, try to keep in touch with leading scientific centers abroad, but their interests are narrowly defined and are not geared to industrial purposes.

The imbalance in scientific and technological voyeurism is something that American industry is aware of. But with the government indifferent to the problem and pooled monitoring efforts barred by antitrust regulations, few companies do anything about it.

One major exception is General Electric, perhaps the most shrewdly and tightly managed of our big high-technology corporations, Monitoring of foreign science and technology is handled by two GE representatives in Zurich, two in London and one in Tokyo. According to Charles M. Huggins, GE's manager of international programs for corporate research and development, "We assume that 60 percent of all new science and technology is developed outside the United States."

American campaigners for technological protectionism should think about that.●

P. WILLIAM FILBY

● Mr. MATHIAS. Mr. President, the State of Maryland with its roots deep in our Nation's earliest colonial history has always reserved an honored role for the enshrinement of its heritage. Since 1844 the Maryland Historical Society has served as our link with this heritage, whether in preservation through art, sculpture and documentation, or in historic elaboration through scholarship, acquisition, or the encouraging of scholars and scholarly institutions.

For the past 13 years, P. William Filby has been the inspiring figure behind the society's expanded role in the life of the State, particularly in the steady growth of its museum and library.

I would like at this time, Mr. President, on the occasion of Bill Filby's retirement to place the following article from the publication of the society, "News and Notes of the Museum and Library of Maryland History," in the RECORD.

The article follows:

RETIREMENT OF DIRECTOR

On his sixty-sixth birthday in December 1977, P. William (Bill) Filby requested retirement as Director of the Maryland Historical Society. The Trustees and Council have, with a warm and heartfelt sense of appreciation, reluctantly acceded to this request. On behalf of the Society and its members they have expressed gratitude to Bill for all he has done for the Society and his willingness to continue as Director until his successor is selected.

Bill's decision to retire reflects his wish to have more time for many things he wants to do, including volunteer projects in the Society's Library, books he wants to write, masterminding an index of United States and Canadian periodicals related to genealogy and local history, the appraisal of books and manuscripts, and more time to travel and do the many things he enjoys doing with Mrs. Filby (Vera) and his children and grandchildren.

Bill Filby, a native of Great Britain with a Cambridge University Library background and a naturalized citizen of the United States, was already known to many members of our Society when he accepted the position of Librarian in 1965. He had served for eight years as Librarian and Assistant Director of Baltimore's Peabody Institute. It was during this period at the Peabody that Bill began his affectionate interest in Maryland and its history.

Those who have known and worked with Bill Filby look back with pleasure and appreciation upon the host of things which were done during his seven years as Librarian and Assistant Director and six years as Director of the Maryland Historical Society. During these thirteen years the Society realized a large number of the hopes and aspirations which had hitherto been long term goals.

Shortly after Bill became Librarian, the Society's President, The Honorable Frederick W. Brune, and Director Harold A. Manakee gave strong support to Bill's plans to solve long recognized problems. The Library was closed for six months, during which time an accumulated backlog of cataloguing almost two million manuscripts was completed; the Library was inventoried and evaluated; Manuscripts and Library were readied for use of additional, soon to be completed facilities in the Thomas and Hugg building. A rigorous program of manuscript and book restoration was undertaken. Following occupation of the Thomas and Hugg building, the Keyser Building Gallery was converted into a much needed and attractive rare book room.

By the time Bill became Director of the Society in March 1972 it was generally agreed that following the attainment of so many long-term Library goals, the next step should be a similar high-priority program for fuller realization of the potential of the Society's Museum. The result was the selection of Romaine S. Somerville as Curator. With strong support from Mr. Filby, similar to that which he had received from Mr. Manakee, Mrs. Somerville and the Museum staff successfully attained the Society's long-term hopes for increased meaningfulness of its Museum operations. Today our Library, Manuscripts and Museum operations are looked upon with regard by the public and highly viewed as helpful examples by professional people responsible for similar operations.

During Bill Filby's thirteen plus years at the Society, public participation in its activities and use of its Museum and Library have enjoyed steady growth. In addition to a high level of time and energy devoted to daily operations, Bill has averaged about 50 lectures a year, co-authored a definitive work on The Star Spangled Banner, published two books on genealogy, written many reviews and articles, taken part in producing Society publications and maintained close relations with historical societies throughout Maryland and the United States. In connection with some of his other interests, he is also President of the Manuscript Society, Council Member of the Bibliographical Society of America and member of the Grolier Club. The Society has been immensely benefited by Bill's great energy, ability and wide range of interests.

Bill's work and affection for the Maryland Historical Society way beyond the call of duty has been shared with Vera, his wife. Together they have enriched our Society with dedicated interest in its welfare. Their example will be long and happily remembered and honored by a grateful Society and all those who have enjoyed their friendship.

Mr. Filby will leave the Society on March 31, 1978.

SAMUEL HOPKINS,
President 1970–1975,
Treasurer 1956–1975.●

USDA REORGANIZATION

● Mr. MORGAN. Mr. President, today I read an interesting and important article that I would like to share with my distinguished colleagues. As everyone in this Chamber knows, the administration is committed to reorganization of the executive branch. Certainly, I believe that much of the Federal Government

needs modification or elimination. And, I intend to carefully review every reorganization proposal with an open mind. However, I believe that the test for supporting reorganization should not be reorganization for the sake of reorganization. Rather, the test should be whether agencies considered for reorganization have fulfilled congressionally prescribed responsibilities in an acceptable manner.

Mr. President, one of the Federal agencies with a truly commendable service record is the Rural Electrification Administration of the Department of Agriculture. Unfortunately, some reorganization technocrats in the Office of Management and Budget have decided that this program needs changing. Such a proposal, I believe, is shortsighted and will further disadvantage rural America. If any article can articulate my rationalization for such a conclusion, it is an article by Robert Partridge in the April issue of Rural Electrification entitled "USDA Reorganization a Power Grab." Mr. President, in the interest of sharing this worthy article with this body, I submit this article be printed in the RECORD.

The article follows:

USDA REORGANIZATION A POWER GRAB

Eleven years ago, one of the greatest friends this association and rural electrification ever had was featured on our annual meeting program in San Francisco.

In his speech, the Vice President of the United States, Hubert H. Humphrey, recounted the struggles people had gone through to bring electric power and lights to rural America.

"But the important thing is that those lights are on," he declared, "and that you have kept them burning brightly."

No one to my knowledge has ever accused Hubert Humphrey of being a man of few words, but in that short, simple statement he summed up the never-changing, yet urgent, singular goal of our efforts.

Hubert Humphrey is gone, so is Lee Metcalf. Other giants of our time like Congressmen Bob Poage and George Mahon are retiring from positions where they have done so much for the people who live and work in rural areas.

And with each announcement of this nature, the question of who will fill the void they leave looms larger and larger. For the truth is that without a continued strong and responsive rural electrification program, it will be difficult, if not impossible, to keep the lights burning brightly in rural America.

People often think of organizations like NRECA in terms of working for legislation on the congressional scene. We do. But the facts are that we spend as much or more time working against legislative proposals and government policies which would not be in our interests.

We have all heard of the study of the rural electrification program by the Office of Management and Budget and the Department of Agriculture. It has taken hundreds of hours of our time—mostly in defending the program.

But, if you've been following the news, you also know that we may be headed for another one of those battles it seems we have to go through every so often to keep the Department of Agriculture from being cut to pieces.

Every administration likes to reorganize the bureaucracies. Sometimes it's needed. The Department of Energy is a good example. It brought most of the government's energy agencies, previously widely dispersed, together under one department. But sometimes reorganization is just pure empire building. And that, in my judgment, appears to be what is behind HEW Secretary Joseph Califano's campaign to grab off the food inspection and nutrition functions of the USDA, and Interior Secretary Cecil Andrus' bid to add the forest service and soil conservation service to his department.

You'll recall in the early 1970s the Nixon administration was going to reorganize the USDA. We opposed it then because it didn't make any sense. I have told the Congress we haven't changed our minds in 1978.

We ought to be strengthening, rather than trying to weaken, USDA's capabilities to deal with rural America's crying need for expeditious and wisely planned economic and social development. We need to be doing more to meet the nearly $2-billion backlog in requests of towns and small cities for water and sewer loans and grants. We need to try harder to reach the rural housing goals established a decade ago. Rural America needs to get its fair share of the money earmarked for block grants under HUD's community development program.

I don't care what the *Wall Street Journal* or *Forbes* magazine or any other of the perennial backbiters of USDA say. The department must be kept intact if rural citizens are to have jobs and improve the quality of their lives.

While the threat to USDA is serious—and in turn has far-reaching implications for us, the USDA/OMB study of REA's electric program could easily overshadow it in importance.

Next to the termination of the direct loan program in December of 1972, this is the most critical threat to our financial security we have faced.

We have reported extensively on this study in the *Rural Electric Newsletter*, as you know, and the February issue of RURAL ELECTRIFICATION magazine will feature an in-depth discussion of its impact.

But the incredible thing to me is that the study was made at all. It defies political and economic logic. If our current program wasn't working well, it would make some sense. We are not unreasonable people; we have demonstrated our willingness to change in the past, and we will do so in the future when it is desirable and to our advantage to do so.

But our program is working exceedingly well, meeting our expanding needs for capital. And the cost to the government is hardly a pittance.

In fact by their own account, the Office of Management and Budget, in the official budget documents released two weeks ago; calculates that federal outlays for the entire REA loan program will be reduced to zero in 1979!

So—what prompted the study? We can only speculate. We know that the OMB has never looked upon our program with enthusiasm. We learned, in fact, that the agency made a narrowly based study of the program in 1976, but apparently decided to suppress it during the presidential election campaign.

President Carter has gone out of his way a number of times, to speak warmly and eloquently of rural electrification and its achievements. Yet, he ordered the study—although, you will recall, he directed that it be objective.

President Carter is our friend. I am convinced of that, and the officers of NRECA agree, based on our 35-minute conference with him last fall. Additionally, Secretary of Agriculture Bob Bergland, throughout his public career, has been one of our strongest supporters.

Nevertheless, the ultimate disposition of this study—which was premised on the OMB's anti-REA point of view, which sought and used biased data to try and prove its points and hypothetical conclusions—is still in question. And we dare not relax in our vigil and opposition until this matter is satisfactorily resolved.

I believe we never need fear an objective study of our program. That is clear. But objectivity was not the goal of the study team. The six-month effort, which originally was supposed to take closer to six weeks, produced a voluminous document that omitted:

Major revisions structured into the REA program by Congress in 1973;

Passage in 1975 of legislation cutting in half the number of borrowers entitled to 2 percent insured loans;

All the significant information showing reductions in insured loan levels and the reliance of G&T system borrowers on guaranteed financing which is cost free to the government;

The fact that the overall composite of the interest rates we pay exceeds the actual cost of government borrowings.

There was little or no mention whatsoever of the enormous social or economic benefits the country has derived from the program over the past 40 years.

One would have thought a group of program analysts would have been at least somewhat impressed with the outstanding loan repayment record our systems have achieved. But the study doesn't show it.

No operating rural electric cooperative has ever defaulted on an REA loan in the history of the program. But this fact was all but ignored. Instead, the study went to excess in emphasizing so-called "costs" of the present program—costs which are largely theoretical and contrived. There is no reflection of the actual federal cash outlay under the current program.

What finally emerged from this exercise in economic wizardry is a variety of suggestions called "options" that could be applied to change the REA loan program. There are five covering power supply, four dealing with the 2 percent insured loan program, and five with the 5 percent program.

On the distribution side, the options range from no change in the present program to higher interest rates, dropping the insured loan program altogether and converting REA to a private bank. The latter idea, you may recall, got short shrift ten years ago.

On the power supply side, the options run from no change to discontinuing insured loans for power supply purposes, and requiring G&T cooperatives to accumulate equity for financing by charging an interest override on new loans.

There is one general, overall observation you can make about the effect of the options: Except for the "no change" option, they would substantially increase costs to rural electric systems and increase rates to consumer-members.

To be specific, the option to eliminate the 2 percent criteria would result in electric cost increases of about 30 percent.

Applying the option to terminate insured loans would increase interest rates on all REA loans by 60 percent, which is the equivalent of a 23 percent boost in electric rates to rural electric consumers.

Obviously, the options are unacceptable. There is no sound, logical reason why we should even consider changing the program at this time. And we have a good reason to believe the Congress shares our views.

I must say to the bright (but misguided) people of the OMB—"You can find more useful work to do, much more fertile ground to probe, if you're really looking for costly programs to cut; just look around you."

As we meet here today, the Congress is still wrestling with the energy bill, trying to break the stalemate precipitated by the thorny questions of natural gas price deregulation and energy taxes.

A growing number of people feel that we'd be better off if Congress could scrap the whole thing and start over again. And I

must admit that while the odds are against it, the notion is certainly appealing.

It's impossible to say what the shape and content of the legislation that is eventually agreed upon will be. But there is little chance that it will be much more than a first step in tackling the tremendously complicated energy issue.

The thrust of the President's energy package is energy conservation—a concept which we support. I know that many of you are promoting and practicing energy conservation individually and through your rural electric systems. And it's important that we vigorously continue these actions.

But energy conservation is only part of the answer to our energy problem. Personally, I am troubled with the idea of employing high taxes and high prices as a method of forcing people to conserve. And this is the heart of the administration's legislative thrust.

Someone has tagged it as the "let the rich ride and the poor walk" approach. But the choice of walking or riding doesn't exist for rural residents who live miles from town. If they need medical attention or machinery parts or farm supplies, they ride—and they pay the price.

With the availability and cost of energy in all its forms largely determining the course of our lives—whether we shall be warm or cold in winter, cool or hot in summer—whether the factories will run or be idle, grocery store shelves amply supplied or empty—our national focus must be on energy supply and doing all we can to achieve energy abundance. The administration and Congress must deal with this problem—and soon.

The question of whether we have the national will and resolve to do the things we have to do legislatively and policywise is still unanswered.

I doubt that the deep conflict between resource development and resource preservation will ever be put to rest. But it has to be satisfactorily compromised or present and future generations will surely suffer the consequences of massive unemployment and economic chaos.

By the year 2000 another 28-million Americans will join the work force. They'll need jobs. By the year 2000 our natural gas and oil reserves will be virtually depleted unless today's usage rates are reduced.

By the year 2000 we'll need to build over 600 more one-million kw electric generating plants to meet estimated power requirements.

It can't be done unless licensing procedures are drastically shortened and the tactic of using every legal trick in the book to stop or delay construction is brought within reasonable bounds.

Statistics compiled by the national electric reliability council indicate that the utility industry will have to add 34,000 Mw annually to the nation's generating capacity for the period 1977–1978.

The Federal Power Commission, in a forecast released last fall, said that the country will need another 23,000 Mw a year after 1986 until we reach the turn of the century.

If the utility industry falls short of meeting the anticipated demands, it foredooms the possibility of electricity as an energy alternative, filling other energy gaps as they develop.

That would be bad news for the country—especially detrimental in our quest to cut back in our use of oil and gas.

From the utility industry standpoint, the energy crisis is related not only to fuel supply but to rapidly escalating costs in both fuel and construction.

Six years ago when we held our annual meeing here, oil was costing $2.40 a barrel and coal was selling on the average at $10 a ton. Now oil is six times higher and coal is up by four times.

Oil-fired generating plants back then were being built for around $200 a kilowatt. Gas-fired plants were even cheaper at $160 a kilowatt and coal-burning plants were costing $250 a kilowatt. Even nuclear plants were relatively cheap.

In 1972, the average cost of energy to our rural electric systems was slightly less than one cent per kilowatt-hour. Today it has more than doubled. And the impact of the high-cost, new plants hasn't even been felt yet.

To me, there is a clear message to the utility industry. It is "buckle up, there's rougher weather ahead." All you have to do is look at what's happening to powerplant construction costs today.

If you built an oil-fired plant, and of course that's taboo, it would cost at least $800 a kilowatt—up four times in six years.

Nearly everyone agrees that the great bulk of our future power must come from coal-fired and nuclear plants, and what's happened to the costs of building them is almost enough to make you sick.

Last year, Basin Electric Cooperative in North Dakota began construction of its 1.5-million kw Laramie River Station, which is coal-fired. It's going to cost at least $1,000 a kw by the time it's finished.

And if you started to build a plant like this one, starting today, it would cost between $1,200 and $1,500 per kw by the time it was completed. Add that to the high price of coal and you're soon up to 6 or 7 cents or more for power at the bus bar. And we haven't seen the end of this trend, by any means.

But let me sketch a few more pertinent details into the energy picture. It is not just a matter of having to build more plants to satisfy increased demand. We also have to replace millions of kilowatts of existing oil and gas-fired generating plants that must be phased out after 1990, under federal regulations.

That's only 12 years away. Not very long in terms of power planning. But before we reach that point, we have to talk about 1986 because that's the primary date power industry planners are presently targeting in setting their immediate goals.

Of the 303,000 Mw of new generation which they say will be needed by the end of that year, 136,000 is scheduled for coal-fired plants and 128,000 Mw for nuclear. The other 36,000 will be picked up by hydro, pumped storage, oil and some combinations.

Currently, coal-based generation takes as much as six to eight years to plan, license, and construct. Nuclear plants are averaging more than 10 years and in some cases over 12 years to complete.

With reasonable coordination between states and the federal government, these periods of time could be cut in half and still fully satisfy all reasonable public concerns.

I believe the President is trying very hard to meet the energy problems of our nation. It is by far the toughest political battle any administration could take on, as the current legislative situation demonstrates. There is no way that you can avoid a fight with the most powerful business and commercial entities of this country, if you are going to do the things that have to be done.

But having said that, I must add that I feel that the President has not had the best advice on energy matters. Nor are some government leaders under him acting as if they agree that the energy crisis is the "moral equivalent of war."

To fuel existing coal-fired plants and those coming on line by 1986, will require doubling the 665-million ton output of 1976. Roughly two-thirds of the 1.3-billion tons we'll need will have to come from new mines.

On the average, the coal industry has added no more than 10-million tons a year to its production for the past 25 years. Now, they must add 65–70 million tons annually to meet our needs.

But, is the interior department that controls leasing policy on western coal lands concerned? The best and most honest answer I can give you is that they're confused. They seem to have, at last count, three different positions.

One is that not much western coal, if any, will be needed beyond that which is under lease. Another, and to the contrary, is that some new leasing may be necessary. And the third one is that some long-standing government commitments for leasing and proving up permits may be voided.

That reminds me of an oft quoted statement by an old Dutch philosopher, who said he tried not to laugh at the acts of man, or to lament them, but to understand them.

All I can say is that I'm trying—but it's very difficult!

Many of you have asked me what the future holds for the Clinch River Breeder Reactor project. Nearly half of NRECA's members have contributed money to its support.

As of this moment, the future is very bleak. We fought hard last session to keep the project from getting the ax. We won our fight in Congress. But we lost it in the administration. And frankly I don't see that situation being reversed very soon, if at all. The administration's top officials show a new and decided interest in the development of some kind of breeder concept. This is progress. But there is nothing in the new budget for the Clinch River project, and they've said too much against the project to be able to pull back and save face.

But I believe as firmly as I believe that the sun will rise tomorrow, that some day we will have to turn to the liquid metal fast breeder reactor as a source of electric power—if we entertain any idea at all of achieving energy sufficiency.

You've heard me say it before, but I want to say it again: We can't turn our backs on the so-called nuclear "wastes" we're stockpiling—wastes that can be converted to nuclear fuel, an estimated $20-trillion worth, and talk convincingly about conservation and the wise utilization of our resources. The two positions are mutually incompatible!

To repeat—light water reactors can use only 15 pounds out of every ton of uranium. The rest goes to waste. And we have a very limited supply of high-grade uranium ore.

Some people claim Americans are energy wastrels because we use nearly a third of the world's oil production. What would the people of the world think, if they knew we were sitting on a fuel resource equal to 2½ times all the oil reserves of the OPEC countries and 11 times all the coal reserves in the U.S. and not using it?

Since the day NRECA was organized, we have never lacked for battles to fight or new goals to aim for. In this respect 1978 and the years ahead will be different. I think we'll be looking at energy bills each year as far ahead as you care to look.

I mentioned some of the immediate problems ahead. There is the possibility of still another. We may have to go to the mat with the Department of Energy if they try to arbitrarily increase the cost of hydro power from federal projects by the use of such devices as marginal costing in setting rates.

Frankly, such a move would be contrary to law. In authorizing the various projects, Congress specified the length of the repayment period, interest rates to be paid, amortization requirements—everything needed to recover costs. Now to run up the cost of federal power simply because a few economists think it ought to be higher makes no sense.

On a more positive note, the administration in its new budget has placed no limitations on the guaranteed loan program for REA and asked that a floor of $735-million and a ceiling of $885-million be approved to cover insured loans for the next fiscal year.

This is good news in the sense that it recognized the importance of the program. Our view at the moment, however, is that the top figure—$885-million—probably should be the floor. Our annual loan survey, just completed, indicates that $735-million would not be sufficient to meet our needs.

In terms of size, we may not represent more than a blip on the screen of the overall energy industry. But that isn't the mountain we set out to climb years ago.

Our concern has been with people—people who live on the quiet country roads from Maine to California and produce the food and fiber this nation and others depend upon—people who live in villages of Alaska and have no other choice but to build their cooperatives and serve themselves and their communities.

But though we aren't corporate giants, we occupy a unique position of leadership in America. We took on an obligation and responsibility in partnership with our government, and we have fulfilled it year after year.

And the continuation of that partnership is as important today as it was in 1936.

Without unity of purpose and hard work, without vision and the courage to fight for those things in which we believe, without the ability to remember who we are, what we are, and what our mission is, this program would not be what it is today. I firmly believe that.

And I also believe that these same qualities will serve us well as we face the problems ahead and work for programs in the interest of our country.●

AMERICAN POLICY IN THE MIDDLE EAST

● Mr. HEINZ. Mr. President, in the midst of the continuing controversy the administration's Mideast policy and the President's proposal to sell F–15's to Saudi Arabia, it is helpful to have a cogent critique of administration's policy. Such an analysis appeared in the April 23 New York Times in an advertisement signed by seven noted Americans: Cleveland Amory, Dr. Joseph Churba, Hon. Eugene P. Foley, Maj. Gen. George J. Keegan, Jr., retired, John P. Roche, Maj. Gen. D. A. Thompson, retired, and Adm. E. R. Zumwalt, Jr., retired. I ask that this article be printed at this point in the RECORD.

The article follows:

THE ADMINISTRATION'S CREDIBILITY AND THE NATIONAL INTEREST

THE PROMISE

In the course of his presidential campaign and after assuming office, President Carter repeatedly promised the American people that in order to restore credibility to the U.S. as a constructive force in world affairs, our foreign policy would be publicly debated and arrived at openly with the full understanding and support of the Congress and the American people.

It is disturbing, therefore, to observe this Administration manipulating the news, distorting issues of grave concern and suppressing vital information.

These tendencies become evident in a wide range of issues, such as: the misleading representations concerning the Panama Canal Treaties (which some of us favored), the selective "leaks" concerning Salt II, the flip-flops on Ethiopia-Somalia, the double standard on Human Rights, the Bert Lance Connections and the Marston Affair, and so forth. However, the threat to America's credibility is most critical in the Administration's posturing on the Middle East, violating its promise both in substance and style.

WHOSE "INTERESTS"?

The terms of reference under which U.S. interests in the Middle East currently are assessed by Administration spokesmen must be viewed as misleading. Increasingly, U.S.-Israeli relations are being portrayed as reflecting an alleged conflict between an undefined American "national interest" and a so-called "pro-Israel lobby", supposedly representing mere parochial interests. Israel's place in U.S. policy considerations is characterized, at best, in purely sentimental terms, while our concrete "interests" are presented as focusing upon Arab oil and money.

Even those mesmerized by petrodollars must have twinges of awareness that it is self-defeating to behave as if America's real adversary were not Moscow's neo-imperialist forces, armed to the teeth, but rather a small devotedly pro-Western State—namely, Israel, which happens also to offer the only secure logistical link between our other allies in Western Europe and the East.

Perhaps their predilections prevent oil and other business interests which profit from the flow of petrodollars from seeing Israel as it truly is: A matchless strategic asset for the West (indeed, for the few genuinely moderate forces in the region) against threats emanating from extremist Arab and non-Arab elements and against direct or surrogate military intervention by the U.S.S.R.—and at no cost to U.S. manpower and at a military supply expenditure amounting to less than 1 percent of the U.S. defense budget.

STRATEGIC BARGAIN

No combination of Arab regimes can match the strategic bargain that a strong Israel offers the West. Indeed, a recent interagency U.S. Government study on the world military balance concludes (New York Times, Jan. 6, 1978) that, in the event of a nonnuclear super-power conflict in the Middle East, Israel, by itself, "might deter Soviet combat forces intervention or prevent the completion of such deployment." The implication of the study is that, in case of such a crisis, no Arab regime could be relied upon to mobilize potent military ground and air units, or to make available secure access points. If our present self-defeating policy continues, the danger is that we might no longer have a strategically viable Israel to factor into the equation.

Thus, any weakening of Israel is, in effect, a weakening of the United States. Israeli strategic vulnerability would be an invitation to Soviet adventurism. In our own security interests, we should be doing all in our power to strengthen the only state in the region which can help deter direct Soviet intervention. The arms we provide, the air fields and naval stations we help to support, will be available for our use in any global or regional crisis. More importantly, the Israelis themselves are prepared to fight and risk their lives in defense of our common cause. Unfortunately, it is not realistic to make the same assumption about our present Arab associates and aid-recipients (from the one-man government of Egypt, which is the single largest annual recipient of U.S. economic assistance, totaling $4 billion since 1973, to the feudal monarchy of Saudi Arabia, not to mention the military dictatorship of Syria, which forms part of Moscow's forward base in the Middle East.)

In short, the most authoritative strategic analyses available make clear that it is Israel, and not any of the Arab regimes, which has demonstrated repeatedly the national will, the democratic societal cohesion, and the scientific and technological talent to perform as a reliable and effective ally in time of crisis.

In the face of these facts, some Administration sources, along with oil and other special interest spokesmen, persist in portraying Israel as a "burden" and are doing their utmost to convert her from a major strategic asset to a liability. This Administration's propensity to surrender to oil blackmail (even in the face of an oil glut) and sacrifice its allies is noted in Moscow and elsewhere.

THE GROMYKO-VANCE DECLARATION

On October 1, 1977, after nine months of claiming that it had "ousted" the Russians from the region, the Administration underwrote Moscow's prescription for the Middle East in the so-called Gromyko-Vance Declaration. This joint statement violated solemn U.S. moral and legal commitments to Israel to "consult fully and seek to concert its position and strategy at the Geneva Peace Conference", set down in the September 1975 Memorandum of Agreement that accompanied the Interim Agreement (Sinai II).

The Gromyko-Vance text reinstated Moscow as a major party in the Middle East political process and the U.S. recognized "the legitimate rights of the Palestinian people"—the Soviet/Arab code word for the creation of an Arafatist state dedicated to Israel's destruction.

By joining in that declaration, the Administration took a giant step toward imposing a pro-Arab settlement: it undermined free direct Israel-Arab negotiations, rewrote Resolution 242 (which made no reference to "Palestinians"), resuscitated the prestige of the PLO terrorist organization, hardened the Arab negotiating posture and encouraged those Arabs who say negotiations are unnecessary because the U.S. eventually will "deliver" Israel.

WHY SADAT WENT TO JERUSALEM

The joint declaration threatened to give extremist Arab elements effective control of the region's future. Sadat undertook direct contact with Israel in order to regain some control of the negotiating process.

Sadat's dramatic arrival in Jerusalem temporarily obscured these consequences of the Gromyko-Vance statement. It concealed the fact that Sadat's own negotiating options had been eroded; he could not demand less than the U.S., Israel's friend, had already offered. Consequently, he demanded Israel's acceptance of all his (and the U.S.S.R.'s) ultimative demands, including a Palestinian "entity" and total Israel retreat to the indefensible lines of June 4, 1967—the very terms every Israeli government had rejected for a decade.

Israel responded to the Sadat visit with unprecedented concessions to Egypt, including: Egyptian sovereignty over all of Sinai, full Palestinian Arab civil autonomy in the West Bank and Gaza for the first time in history, and participation of Palestinian Arabs in the negotiating process—all granted unilaterally in advance of actual negotiations.

But once Sadat rejected Israel's opening offer, the White House proceeded in short order to attack and undermine Israel's negotiating position: Politically, the same Carter Administration which had, in effect, rewritten Resolution 242 in the Gromyko-Vance declaration, castigated Israel for maintaining its own interpretation of that Resolution and aligned itself entirely with Egypt on the substance of a settlement. Militarily, the Administration agreed to transfer America's most sophisticated war planes to Egypt and Saudi Arabia—almost as if to reward Sadat's sudden and capricious suspension of the Jerusalem talks.

Now, more than ever, it is clear that any real progress toward peace in the Middle East will come in spite of rather than because of this administration's impatient, one-sided intrusion.

COMMITMENTS, OBLIGATIONS, PROMISES

President Carter cancelled the U.S. commitment for the balance of the CBU–72, the

only weapon effective against hardened military sites in which Arab attack planes are housed. He denied Israel permission to export the Kfir fighter jet on the pretext that it contains an American engine. He reneged on promised co-production licenses for weapons and communications systems. He excluded Israel from most-favored-nation access to sophisticated weapons in Presidential Review Memorandum 12.

In contrast, Maverick, Sidewinder and TOW missiles have been delivered to Saudi Arabia, and the U.S. has sold to Egypt (still officially at war with Israel) 20 C–130 transports, 12 Firebee aerial reconnaissance drones, 6 long-range photo reconnaissance camera systems and military vehicles worth approximately $350 million. In September 1977 the Administration agreed to refurbish with new engines, 200 Egyptian MiG–21 jets.

The current White House proposal to sell 60 F–15's to Saudi Arabia and 50 F–5E's to Egypt linked to the sale of 15 F–15's and 75 F–16's to Israel is the latest move in the deepening erosion of the military balance. This has been presented as a package deal, to make delivery of previously promised aircraft to Israel contingent upon delivery of war planes for Egypt and Saudi Arabia.

We must recall that under intense American pressure in 1975, Israel agreed to withdraw from strategic mountain passes in Sinai and the Abu Rodeis oil fields without comparable Egyptian concessions. In return, the U.S. undertook an obligation in the U.S.-Israel Memorandum of Agreement to maintain Israel's defense strength including, among other items, the modernization of the Israel Air Force on a one-for-one replacement basis.

In that document, Israel received a commitment for purchase of 50 F–15's, 25 of which were approved last year. Israel has been seeking to purchase the remaining 25; the Administration now proposes that Israel receive only an additional 15 of these aircraft. On the basis of the Memorandum of Agreement Israel originally expected to receive 250 F–16's but now is being offered only 75.

There was no mention in the 1975 Agreement that the planes to Israel would be approved only if Egypt and Saudi Arabia received similar aircraft. At a time when the Carter Administration is asking Israel to take additional risks for peace, it is backing away from yet another commitment to Israel. It is remarkable that the Administration expects Israel to trust future U.S. assurances when past ones are so easily repudiated.

STRAINED AND DECEPTIVE ARGUMENTS

The Administration's arguments for the sale of highly sophisticated war planes to Saudi Arabia are strained and deceptive. Officials argue that the transfer of 60 F–15's to Saudi Arabia is necessary to defend her oil wells against hypothetical attacks from Iraq.

If a threat to Saudi Arabia indeed emanates from Iraq, why are the Saudis, with U.S. assistance, building a major base for the F–15 at Tabuq, more than 1200 kilometers from Iraq, but only 6 minutes flying time from Israel?

Moreover, the Administration omits mention of the formidable Saudi force of 110 F–5E fighter-bombers. Combined with Arabia's mobile Hawk batteries, these aircraft are more than adequate for the defense of the oil fields and shipping lanes of the Persian Gulf.

In military intelligence circles, it is common knowledge that the Saudis are financing installation of a communications system for the joint command of Syrian, Jordanian, Iraqi and Saudi forces. While any Saudi move toward genuine moderation should be encouraged, it must be noted that contrary to Administration assertions, Saudi Arabia actively participated in the 1967 war, to a greater extent in the 1973 war, has openly committed its military resources to any new war against Israel and continues to finance terror operations of the PLO.

UNDERMINING THE CAUSE OF PEACE

The rationale for the F–5E sale to Egypt is no less tenuous. Dubious arguments are advanced that (1) Egypt's search for peace requires reward of arms, (2) the Soviet arms supply line has been cut and (3) the F–5E is needed to counter Soviet expansion into Ethiopia.

(1) With regard to the first argument, if the peace talks succeed, the need for arms would diminish; if they fail, then Washington would be fueling and escalating the weapons race between two recipients of U.S. arms. In addition, Washington was instrumental in: clearing the Suez Canal, inducing Israel's withdrawal from the Sinai passes, restoring Egyptian control to the Abu Rodeis oil fields and establishing an early warning system in the Giddi Pass. It is Egypt, not the U.S. that should offer proof of friendship.

(2) Repetition of the myth of a supposed Soviet Arms embarbo against Egypt does not turn it into fact. U.S. NATO and Israel published intelligence reports have confirmed that Egypt continued to receive extensive resupplies of Soviet weapons at least through 1977. Egyptian ground forces have already surpassed 1973 levels, and her inventory now contains more T–62 tanks, night vision equipment, missiles and missile-bearing helicopters. The Egyptian air force has been strengthened qualitatively by receipt of such sophisticated aircraft as improved Mig 21's, MiG 23's, Sukhoi 17's and Sukhoi 20's.

Moreover, France and Great Britain have joined the Soviet Union as major sources of advanced military equipment. President Carter now proposes to add American technology to the Egyptian war machine.

(3) The final argument that F–5E's are needed to counter the growing Soviet and Cuban involvement in the Horn of Africa is untenable. The vast Sudan separates Egypt from the nearest point in Ethiopia—800 miles away. Unlike Ethiopia, however, Israeli targets are well within the combat radius of these F–5E aircraft.

In short, all the arguments so far advanced by the Carter Administration to support these arms sales are demonstrably false or misleading.

Moreover, by initiating an offensive arms supply relationship with Egypt and by encouraging deeper Saudi involvement in the event of renewed hostilities, this radical move by the Administration may increase Arab confidence in the utility of the war option and undermines their incentive for mutual compromise. It undermines the cause of peace.

The Administration's arguments for the package deal of arms sales are so feeble, in fact, that it is hard to believe that Administration spokesmen take them seriously. Consequently, one is driven to the conclusion that this extraordinary departure simply reflects the dominant influence on current American policy of defeatist elements in the Administration and those few but influential sectors within the U.S. business and financial community which profit from their "special relationship" with Arab regimes. They advocate a Mideast "settlement" on Soviet/Arab terms despite the cost to U.S. national interests. In fact, of course, it is by maintaining the strategic balance in the Middle East, by meeting our commitment to Israel, that the broadest economic and political interests of the U.S. and the Western world are served.

FOR THE SURVIVAL OF FREEDOM

The pursuit of real peace in the Middle East poses difficult, complex and debatable issues. No longer debatable, however, is the Carter Administration's calculated effort to manipulate public opinion in support of its campaign to impose a settlement agreeable to uncompromising, hard-line Arab demands. In its orchestration of pressure against Israel, this Administration seems bent on obscuring the factual and analytical ground for legitimate public debate.

Our concern encompasses far more than the fate of Israel—however important that may be for America's own sense of itself and for its commitment to democratic ideals. At stake in the Middle East, as elsewhere in the world, is our ability to rally from a pervasive politics of defeat, to honor our national commitments, and to face the real challenges to the survival of freedom and human decency in those limited parts of the globe where they still prevail. It is ultimately our own survival as a free and democratic people that is in question.

"I believe that what is happening to American policy, not merely in the Middle East but in the world at large, is a gradual accommodation to the fact that the Soviet Union has not only become the equal of the U.S. in military power, but seems destined to surpass the U.S. Already in Washington, Administration spokesmen are saying just this behind closed doors. This, I believe, is the true explanation for the succession of events, large and small, overt and covert, by which the Administration has quietly given in to the long-sustained efforts of the Soviets to depict Israel as an outcast nation, an illegitimate nation."

Senator DANIEL PATRICK MOYNIHAN.●

APRIL 7, 1978.

STRONG SUPPORT FOR THE CONGREGATE HOUSING SERVICES ACT

● Mr. CHURCH. Mr. President, on March 8, I joined with my distinguished colleague, Senator HARRISON A. WILLIAMS, JR., in introducing S. 2691—the Congregate Housing Services Act of 1978. This bill is based on information developed in prior Committee on Aging hearings and reports which documented that thousands of frail elderly persons residing in federally assisted housing were living at-risk, or faced unnecessary placement in nursing homes, because they could not be provided with the supportive services which would assist them to remain independent.

S. 2691 would take the crucial first step in redressing this situation by providing funds directly from HUD to local public housing agencies for long-term congregate services programs designed for frail elderly and younger handicapped tenants. Traditional public housing currently provides shelter to more older Americans than all other HUD-assisted programs combined. Tragically, increasing numbers of them will be forced to enter medical care facilities prematurely, at great expense to local and national government, if adequate support services such as nutrition, housekeeping, and personal care assistance are not made available.

I am honored that 27 of our colleagues have already joined with Senator WILLIAMS and me to cosponsor S. 2691. Senator WILLIAMS deserves special credit for his long-standing role as an advocate for improved housing opportunities for low-income older Americans. He brought to the development of S. 2691 an exper-

tise developed both as chairman of the Senate Committee on Aging, and later as chairman of its Subcommittee on Housing for the Elderly, where hearings conducted in 1975 first demonstrated the need for and feasibility of this legislation. His devotions, and accomplishments, have rightly earned him the gratitude and affection of millions of the Nation's elderly.

I am also pleased to report that a hearing held by the Senate Subcommittee on Housing and Urban Affairs on April 13, chaired by Senator WILLIAMS, provided strong and expert endorsement of this bill. For my colleagues' information, I would like to briefly quote from that testimony:

Mr. John Martin, on behalf of the American Association of Retired Persons and the National Retired Teachers Association, stated:

Every test that we've made shows that older people do not want to go to nursing homes unless there is absolutely no alternative for them . . . The National Housing Act of 1970, which led in the direction of congregate housing, produced no results . . . The result has been that there has been a steady drift into nursing homes, largely because there were no alternative services . . . S. 2691 seems to us to be a very good and innovative approach to this whole problem.

The National Council of Senior Citizens, represented by Mr. William Hutton, testified:

Experience has shown that the fragmented, multi-governmental method of providing housing and congregate services is a miserable failure and that unless the housing and the integral service component are literally brought under one roof, the services simply are not delivered. The structure established in this bill to accomplish this goal is sound.

Mr. David Crowley appeared for the American Association of Homes for the Aging, and declared:

Our association strongly endorses the principles incorporated in S. 2691. We would point out: One, there is a demonstrated need for a major government commitment to providing congregate services in housing serving the elderly. Two, existing housing programs are falling far short of their potential to provide for a continuum of supports for the elderly and handicapped because of the lack of a service component. And three, these programs cannot be effective without the incorporation of congregate services.

Mr. Robert Notte expressed the view of the National Association of Housing and Redevelopment Officials that S. 2691 was—

A needed and workable method to meet the rapidly developing critical housing needs of "frail elderly" and of "handicapped" persons now in occupancy in public housing; and the many more such persons who could be served by future congregate housing development. . . . NAHRO views the passage of this bill, S. 2691, as equal in importance to the pioneering legislative provisions of 1956 which first authorized the admission of single elderly persons into public housing.

Mr. Perfecto Villarreal, a national expert on the management of housing for the elderly, and executive director of the San Antonio, Tex., Housing Authority, brought a special perspective:

The two primary reasons for our people moving out of our housing for the elderly is either because they die, or they are forced to move to a nursing home. . . . The cost in both human and monetary terms of not taking action to help stem this tide of elderly evictions is too great. . . . in San Antonio, the nursing home expense varies from $25 to $50 per day. . . . many elderly persons are forced to live in San Antonio State Hospital because there is no housing available which provides a basic package of support services. The average daily cost of caring for an elderly person in the state hospital is $59. . . . I estimate that providing a good basic package of supportive services in San Antonio would cost from $2 to $5 a day. . . . The monetary savings of a congregate housing program to the taxpayer would be very, very substantial.

James Sykes, of the Wisconsin Bureau on Aging declared:

Clearly it is the lack of stable services funding which has thwarted the development of this needed housing alternative. It is sad to think about the thousands of older people who today need some service to enable them to remain in their otherwise adequate housing—but for whom the Congregate Housing Services Act will be too late.

Dr. Matthew Tayback, who as Director of Aging for Maryland has had the experience of operating a State-subsidized congregate service program, told Senator WILLIAMS:

What you propose in Senate bill 2691 is feasible and, there is no question about it, that it is cost-effective. . . . in terms of the national strategy of minimizing institutionalization, of offering the widest possible opportunity for independent living for the disabled aged, this is a very momentous move and we endorse the legislation.

Finally, the National Association of Area Agencies on Aging, spoken for by Mr. Eugene Bartells, told the subcommittee:

We want to heartily endorse and support this legislation. We feel that it is a very positive step in offering another resource to local communities as an alternative to premature or inappropriate institutionalization of the elderly.

Mr. President, the testimony delivered at the Housing Subcommittee hearing establishes a solid buttress of evidence supporting the need for quick and favorable action on S. 2691. Some of the witnesses made useful suggestions for improving the bill, and these are being incorporated. Some expressed the hope that Federal support for congregate services would not stop with public housing. It is my belief that this bill is only a first step, although a very important one, and that the Congress must address as soon as practicable the means of facilitating similar supports to the residents of section 202 and other housing programs; and to the vast majority of older Americans who live in their own private homes and rental units. Only then can a national policy of providing options for independence, and alternatives to institutionalization, be truly effective.

But all witnesses came to the same basic conclusions. One, there is a growing number of elderly who require some support services to remain independent. Two, we have failed to effectively extend these services to the residents of federally assisted housing. Three, unless we begin to do so, the cost in human terms and in Government expenditures will be very dear. And four, the structure established in S. 2691 is a sound means of redressing this situation.

It is my hope that this bill will be enacted promptly. The Congress has delayed too long in backing its commitment to congregate public housing with an adequately funded means of implementation. The time to act is now, so that the service programs assisted by S. 2691 are sufficiently developed to provide participants in a 1981 White House Conference on Aging with the information required to assess the potential future role of congregate housing.

Mr. President, I urge my colleagues to support S. 2691 and I ask that the statements which Dr. Wilma Donohue and Marie McGuire Thompson submitted to the April 13 hearing be printed in the RECORD. Dr. Donohue, director of the International Center for Social Gerontology, organized the First National Conference on Housing for Older People in 1952, and served as Technical Director of the 1971 White House Conference on Aging. Ms. Thompson, Housing Specialist at the International Center, pioneered in setting design and administrative standards for elderly housing, and has served as Commissioner for the U.S. Public Housing Administration for 12 years. Their commentaries upon S. 2691 combine recognized expertise with a special sensitivity to the aging process.

The commentaries follow:

TESTIMONY OF WILMA T. DONAHUE, DIRECTOR, INTERNATIONAL CENTER FOR SOCIAL GERONTOLOGY ON S. 2691 CONGREGATE HOUSING SERVICES ACT OF 1978

Senator Williams, my name is Wilma Donahue, director of the International Center for Social Gerontology.

My colleagues—Dr. Marie McGuire Thompson and George Thomas Beall—and I appreciate the opportunity to testify in behalf of your well-crafted bill S. 2691, The Congregate Housing Services Act of 1978.

I shall speak about the general need. Dr. Thompson will discuss the provisions of the bill particularly as they related to public housing, a field in which she is the country's foremost authority. All three of us will then welcome questions.

This proposed legislation has been needed for 15 years, i.e., ever since 1963 when the first efforts were made to introduce services into the housing environments of low income elderly persons who needed some support and assistance. With each passing year and especially after the 1970 and the 1974 legislation that provided for congregate housing and called for services but did not include operating funds in support of the services, the situation has grown more acute. Enactment of S. 2691 will make the congregate housing legislation functional at last by providing a services subsidy for the vulnerable elderly needing assistance to maintain an independent life style in a residential setting.

The International Center for Social Gerontology has just completed a two-year study of a form of congregate housing defined by us as "assisted residential living". General population need, the potential market, and the current supply of congregate housing facilities were explored. Although there are no census or other precise data available on these points, it is possible by combining estimates of competent investigations to hazard some approximate figures.

On this basis, it appears that from 3 to 4 million elderly persons in the United States are impaired to the extent that, if they choose to live independently, they will require some combination of support services,

e.g., household help, personal aid, and meals. Of these 3 or 4 million, many will be able to purchase the needed services, many others will receive the needed assistance from family and friends. But there remain many others, perhaps as many as a million and a half, who need the services but lack the resources to obtain them. They represent a potential demand.

How much congregate residential housing with services is available? The supply has not been documented, but scattered evidence indicates that it falls far, far short of the projected demand.

The Congressional Budget Office, for example, projects a need of from 1.5 to 1.9 million congregate or sheltered housing units, but estimates the available supply to range from only 0.3 to 0.8 of a million units: an undersupply of a million or more units.

HUD, using among its criteria for congregate housing the serving of at least one meal a day, was able to report only 22,559 units in 151 projects that met this minimal criterion. The 1976 directory of the American Association of Homes for the Aging listed 55,366 congregate housing units. If the HUD and AAHA lists are combined and overlaps eliminated, the total number of units amount to only 71,059.

S. 2691 is directed to public housing of elderly persons. Traditionally such housing has been almost entirely limited to fully independent tenants. For example, the HUD congregate housing list included only two public housing sites, affording only 263 units between them. This circumstance results from lack of funds to purchase the needed services and from exclusion of those who became ill. Enactment of S. 2691 will, for the first time, make possible a comprehensive and systematic program of essential services for impaired and frail tenants of public housing.

In fact, S. 2691 has the potential to bring about a dramatic increase immediately in the congregate housing supply. There are currently (1977) approximately 293,500 public housing units occupied by persons aged 62 and over. Of this number, it can be predicted according to our studies that at least 12 percent (35,320) are sufficiently impaired or frail that the housing authorities judge they need special support services but do not need to live in a medical care setting. If, say, 20 percent of public housing units were set aside for occupancy by the tenants needing special services, 58,700 units would be added to the congregate housing stock. Of this number, 35,320 would be for the vulnerable already living in public housing but who are in danger of eviction unless services become available.

It is important to note that public housing authorities express a strong preference for mixed tenant population, i.e., of the fully able and the semi-independent as opposed to tenant bodies composed entirely of impaired frail older persons. They recognize that the latter circumstance would defeat the purpose of the congregate housing concept—independence in a residential setting—and would create just one more institutional model. The current public housing pattern of full apartments is entirely feasible for congregate housing with the addition of only a service component that will compensate for the limitations imposed on some tenants by reason of frailty and impairment.

I want to make one more point. Studies which I and others have made indicate that the public housing authorities are not only aware of the service needs of their tenants but are attempting to meet them as best they can from the fragmented and limited services available in their communities. It is proving, however, to be impossible to coordinate effectively these services when each comes into being from a separate and distinctive planning, program, and policy perspective. Mr. Beall has made a special study of the effect on the development of congregate housing with services resulting from the lack of a legislated union between shelter and services. His testimony in reply to any questions you may have will provide excellent support for S. 2691.

TESTIMONY OF MARIE MCGUIRE THOMPSON, HOUSING SPECIALIST INTERNATIONAL CENTER FOR SOCIAL GERONTOLOGY ON S. 2691 CONGREGATE HOUSING SERVICES ACT OF 1978

S. 2691, The Congregate Housing Services Act of 1978 will, at long last, provide a way to close the gap between housing for the elderly who can sustain completely independent living and, at the other end of the spectrum, institutional care for those who need it. Enactment of this bill will make it possible for local housing authorities to actively implement the congregate housing objectives originally set forth by the Congress in the 1970 Housing Act. While that legislation provided for a line item in the local housing authority budget to cover the costs of providing a central dining room, kitchen, and equipment to accommodate a meals service in congregate housing, it did not provide for assistance in covering the costs of the meals and other services to be delivered to those tenants who could not afford to pay the full cost. As I have said many times, this inability to pay for the services needed has been the first and primary reason for the lag in the production of conngregate housing which would fill the gap in our housing programs for older persons.

Now, I appear before you with high praise for S. 2691, which remedies this deficiency by providing service subsidies to eligible low income tenants residing in public housing or eligible for it. This legislation addresses the fact that since there has not been a Federal program that specifically combines shelter and services for frail, low-income elderly persons (with both the capital cost and the services costs assured over time), the only community alternative too often has been the socially and economically costly medical care institutions. The result has been tragic for many elderly persons and unnecessarily costly to government. For older persons, it has meant that community housing alternatives failed to relate to the realities of the aging process, and to reflect that anticipated decrements of aging come on gradually and, except for health crises, do not just jump over night from complete self-management and independence to the need for medical supervision. For many of us there is an extended period when all we need is to be relieved of the burden of household chores and some minor personal aid, but we do not need continuing medical care. For the Government, when nursing home costs are recognized to have risen from $1.8 billion ten years ago to $11 billion currently, and when it is recognized that 40 percent of the Medicaid dollar goes toward coverage of such costs, it is not a prudent expenditure of the public dollar to support nursing home care for older persons who do not need it. The concept embodied in S. 2691 represents a sensible, humane, and economical alternative. This concept and legislation has been too long in coming.

Many of the specific provisions of S. 2691 merit special mention as being especially sensitive to the goals and operations of a program of assisted residential living. In the time available, I can highlight only a few.

A particular strength of this legislation is its recognition that the two components of congregate housing—the shelter and the services—must be fashioned and controlled at the local level by the housing sponsor in cooperation with service agencies. Just as the individual is an inseparable whole, so too the housing-services components must be inseparable. Experience has shown that a housing program that requires the service component to be operational must have that component assured by the housing sponsor over time. It cannot be a stop and go situation. They cannot be effectively planned and implemented separately. However, the legislation does recognize that some service resources may be available in the community and requires that such resources be drawn upon by the housing sponsor to the extent of their availability, appropriateness and reasonable assurance of continuity. In so doing, the legislation provides that there be no overlap or duplication of services since housing authorities would generate only those services needed and not otherwise available, and HUD would only approve congregate services programs upon assurances of the unavailability of other resources.

By combining shelter with services, S. 2691 encourages the development of community living alternatives not only to the frail or impaired elderly, but also to those elderly tenants who are temporarily disabled and in need of the services for only a limited period of time. And, in recognition of current housing practices which encourage elderly and adult handicapped individuals to be residents of the same project, this bill sensibly makes provision for inclusion of adult handicapped tenants as potential recipients. Importantly, in relaxing the facilities requirements for existing public housing, this legislation rightfully ensures that steps can be taken immediately to respond to existing need for congregate housing services among elderly and handicapped tenants in residence today.

This legislation also recognizes that while eligibility criteria for housing for completely independent living requires only consideration of age and income, the functional levels of applicants and tenants needs to be an additional criteria for eligibility for congregate housing programs. Therefore, the legislation appropriately provides for the establishment of professional assessment committees composed of health personnel and other professionals, to judge functional competencies, to recommend levels of services required, and to assess the adequacy of services being delivered to sustain a continuing independent or semi-independent life style. This requirement not only will ensure responsiveness of the services program to the needs of the individuals in residence, but also—and equally important—it will prevent the housing from becoming institutional by admitting or maintaining in residence those persons who would be best served in medically supervised arrangements.

In keeping with its philosophical focus upon maintaining independence and options among the elderly, several additional elements of the bill merit praise. Rightfully, tenants are provided the opportunity to make input into planning for and assessing the adequacy of the services delivered to them under this program. The independent residential nature of their housing environment is further underscored in the legislation by the explicit recognition given to the fact that recipients of services under this program are deemed to be living in their own households, and not to be inmates of institutions. By specific prohibition, the services provided under this Act also cannot be treated as income for the purpose of determining eligibility under any other program or provision of State or Federal law, including SSI payments. Rather, the income received by a service recipient, regardless of its source, is taken into consideration in determining the fees which the tenant pays for the services delivered to him. The aim is clearly to direct the greatest assistance to those in greatest need, while allowing each tenant to main-

tain the dignity derived from helping to provide for oneself to the extent of one's financial and physical capabilities. This theme is also reflected in the provision made for older and handicapped tenants residing in the housing and capable of work, to help provide services to their fellow tenants, on a wisely imposed part-time basis, and to be paid for their work.

In summary, Mr. Chairman, this legislation correctly marries the shelter and the service components both of which are needed and represent two parts of a whole. It is a happy break with the tradition that older citizens must seek the help they need from a number of agencies organized according to governmental structures rather than the needs of the individual. Many of us have tried over the years to meld programs rather than strictly separate them into many segments which inevitably causes confusion and chaos, more costly delivery, protection of one's professional turf, and many other ills. The loser is the older person. But wisely, in this legislation, you have brought the shelter and the services together in a blissful union.●

ABORTION

● Mr. GARN. Mr. President, the Senate and the House will almost surely continue to be faced with the issue of abortion during the coming months and years. Abortion is an issue that will not go away, and one of the important reasons that it will not go away is the continuing insight into fetal life that new medical research provides. Fortunately, we live in a time of medical and scientific enlightenment. Hardly a month passes without the publication of an important, informative, and often fascinating study of life before birth. Unfortunately, our moral sensibilities are not keeping pace with our scientific advances—in fact our moral sense seems to react inversely to our scientific knowledge. The more we know about the pre-born human, the less care we take to protect him or her. This is a calamitous irony, because the more we learn about fetuses the more we realize that they are living human beings who are, like the rest of us, developing their faculties.

The popular myth that a fetus is an undifferentiated bunch of cells not dissimilar from a wart, for example, is gradually giving way I believe to an understanding of the biological facts. This educational process may take some years because it faces strong ideological opposition from those who are often more interested in advancing abortion for its own sake than in advancing informed decisions drawn from facts. The tragedy lies in the thousands of lives that are lost by each day of delay.

Mr. President, it is my earnest hope that the abortion ethic which now prevails in some sections of the country can be reversed, for it not only results in the death of millions of very young human beings who are unable to defend themselves but it traumatizes women and families as well. The best way to defeat the abortion ethic is through Constitutional amendment. The Supreme Court's decisions in 1973 make an amendment necessary. Until an amendment is adopted, however, it is the responsibility of this body and other governmental and private entities which are committed to the preservation and elevation of human life and dignity to take interim steps which will offer some help. I recognize all too clearly that these interim steps will offer small consolation to those preborn babies who are scraped, sucked, or salt-washed from their mother's womb, but we will take the steps that we can as quickly as we can and trust that we are doing the best that we can.

Today I am pleased to join the senior Senator from North Carolina (Mr. HELMS) in sponsoring S. 2614, the Alternatives to Abortion Act of 1978. Mr. HELMS is one of the ablest and most dedicated supporters of the right-to-life and with this bill he has proposed a much needed measure. It is one of those interim steps that I spoke about, but it is a necessary step.

S. 2614 will allow women who desire to abort their unborn children to be fully apprised of the realities and consequences. In the matter of abortion, when a woman makes the decision as to whether her child will live or die, is it too much to ask that she be fully informed? Is it too much to ask that when she exercises what has become known as the "right to choose" that she have the "right to an informed choice"? Is it unreasonable to require that women aborted or advised through the agencies of the Federal Government also be informed of alternatives to abortion? These questions must be answered, and the necessary answer is "no" to each question.

What is the effect of an uninformed decision to abort? Obviously, the effect on the fetus is death whether the decision is informed or not, but the effect on the mother manqué may depend on her knowledge and thousands of women are being tragically misled. For example, consider these personal histories taken from a Good Housekeeping article entitled "Are You Sorry You Had An Abortion?":

Cindy Phillips:

"[After an abortion in which she said she was 'ripped and lacerated,' she said] I've been going for treatment and it's believed I've been damaged internally so it's unlikely I'll ever become pregnant again. If I do, there's a very good chance I'll have a miscarriage. counselor] answered matter-of-factly. * * *

"Women who think abortion is nothing ought to think twice."

Julie Engel:

"* * * I asked the counselor, 'What does a three-month-old fetus actually look like?'

"'Just a clump of cells,' [the abortion counselor] answered matter-of-factly. * * *

"A year later at a friend's house someone was passing around pictures of fetuses in various stages of development. When I saw that a three-month-old 'clump of cells' had fingers and toes and was a tiny, perfectly formed baby, I became really hysterical.

"It's three years since I had the abortion and I haven't been able to conceive since. Some doctors tell me it's a hormonal imbalance that should eventually correct itself. But one physician has said my inability to become pregnant is probably abortion-connected.

"I'd been lied to and misled and I'm sure thousands of other women are being just as poorly informed and badly served. To prove it, John and I visited almost every clinic in Cleveland. I pretended I was pregnant and asked for guidance.

"What we heard was incredible. * * *"

Linda Viewegh:

"* * * One night, about a month after my [abortion], I started vomiting blood and wound up back in the hospital with bleeding ulcers. I'd never had any previous symptoms, but one doctor told me these could have been caused by repressed emotional feelings.

"Shortly after abortion was legalized I got a job as an admissions clerk in the hospital and my eyes were really opened. I was able to see new dimensions of suffering and agony, I'd never even imagined. There was no counseling, no birth-control information. It was simply a matter of walking in with the right amount of money and answering 'yes,' when the doctor asked, 'Do you want an abortion?' * * *

"I soon began having nightmares about my own abortion.* * *

"I've also had a problem with an infected tube since my abortion. The infection resists antibiotics and though I'm only 28 I've been advised to have a hysterectomy. I've remarried and plan to hold off having the operation as long as I can."

Georgia Denk:

"Shortly after returning home [from (apparently) a saline injection performed illegally] I lay on the couch in the living room, and that's where my baby was born—alive. It was a perfectly formed little boy about two inches in size. I could see his heart beating.

"My husband rushed the children, who had seen it all happen, out of the room. I screamed and shouted hysterically. I thought I was going out of my mind. It seemed like an eternity before the tiny little heart finally stopped.

"Oh, my God, I thought, I've just killed a baby and all it was supposed to be was some bloody tissue.

"I kept hemorrhaging and wound up in the hospital where I almost died.

"* * * I discovered nothing is worth the hell of abortion. It's an act of love to carry the child to term and give it up, if necessary, for adoption."

Some of these abortions were performed by competent professionals and some were not. The first two were performed in abortion clinics, the third by a gynecologist—apparently in his office—and the fourth was done by a registered nurse. So the physical and emotional problems of the first three women cannot be blamed on incompetent medical care; the problems can be blamed on the nature of the procedure and the ordinary medical care and attention that women can expect from licensed clinics and doctors. The experience of the fourth woman was not terrifying because she was aborted by a nurse, but because what she aborted was a "baby and all it was supposed to be was some bloody tissue." Going to a clinic would not have changed the facts of the abortion. It might have changed her perception of it by simply keeping the truth in a cardboard bucket, but hiding the truth is a terrible way to deal with any problem.

Women who are considering aborting the life within their womb must be made aware of facts in two areas: first, they need to know the nature of the being within them. They need to know that, in the words of Julie Engel:

A three-month-old "clump of cells" [has] fingers and toes and [is] a tiny, perfectly formed baby.

Women are not being informed of these facts and part of the tragedy lies in the

certainty that there are vested ideological and financial interests that profit from women's ignorance. Mrs. Engel continued:

I'd been lied to and misled and I'm sure thousands of other women are being just as poorly informed and badly served.

The second area in which women are not getting the facts is the medical area. The consequences of abortion include death, injuries to the cervix and uterus, infection, bleeding, fever, chronic inflammation, menstrual disorders, sterility, and psychological problems. Effects on subsequent pregnancies include extrauterine pregnancies, cervical incompetence which leads to spontaneous abortion, still births and premature births, and hemorrhaging. Are women being informed of these possible complications? Sadly, no.

Mr. President, women are submitting themselves to a serious and potentially fatal medical procedure without the basic information they need to make an informed judgment and consent. They do not know the facts of fetal development, either, and they are often shocked and shaken when the facts are brought to their attention. Senator HELMS proposal is an important step toward helping women make a choice about abortion. I submit for the RECORD an article by Mortimer G. Rosen, M.D., and director of obstetrics and gynecology at Cleveland Metropolitan General Hospital and professor at Case Western Reserve University, that appeared in the April 1978 edition of Harper's magazine. Dr. Rosen's article will provide some helpful information for those who are concerned about human development during its earliest stages.

The article follows:

THE SECRET BRAIN: LEARNING BEFORE BIRTH

(By Mortimer G. Rosen)

Perhaps because it is unseen and unnamed and has yet to establish demonstrable ties with parents or society, the fetus is rarely considered a person. Long before birth, however, the human brain is developing and influencing the future functions of both mind and body.

The "secret brain," while still in utero, is not the brain or mind that we recognize later in the adult. Yet this brain does function. The fetus can see, hear, and move, and respond to disturbances that occur around it.

As the fetal brain begins to function in a more orderly way and respond to its environment, the primitive foundation for adult behavior may be evolving.

A group of us at the University of Rochester began using electroencephalography (EEG) about ten years ago to study the brain of the newborn infant. EEG measures the electrical activity that the brain uses to communicate with the rest of the body, to respond to actions or stimuli, and to store information. By monitoring fetal brain-wave patterns with increasingly sophisticated techniques, we have learned a good deal about brain growth and fetal behavior before birth.

While it is almost impossible to study the early growth of a normal fetus in its uterine environment, some information can be obtained from fetuses that have been aborted or delivered prematurely. Between seven and eight weeks after conception (nine or ten weeks after the mother's last menstrual period), the primitive parts of the brain are recognizable. Nerves connect limbs, trunk, ears, and eyes with the brain, and they feed back environmental stimuli such as sound and light. The brain receives, records, and may respond to these stimuli. Even at this early stage, electrical activity exists in the brain of the human fetus, though that brain wave looks very different from the patterns we will see later in development.

At eight weeks of life, a tapping stimulus on the amniotic sac results in arm movements of the fetus. Whether this is a response to the sound or to the vibrations caused by the tapping, the fetus already perceives, albeit crudely, that something has disturbed the warm, moist, and dark world in which it lives. The primitive brain receives the stimulus, selects a response, and transmits the response as a signal to the fetal arm; the arm moves. In similar fashion, touching an eight-week-old fetus lightly near the mouth will produce movements of its head to the opposite side and backward.

These rudimentary responses suggest that the fetal brain is already developing a primitive form of behavior. As the central nervous system matures, the electrical pathways that carry messages to and from the brain are being used in a progressively ordered manner. Neural communication at this stage cannot be thought of as brain-directed, however. It comes closer to what we know as reflex activity.

After twenty weeks of gestation, the fetal nervous system has matured considerably. Specialized nerve endings in the skin make the fetus more sensitive to touch, temperature change, and pain. Taste perception may even be present, though this is less certain.

Although we have not yet learned to keep this twenty-week-old fetus alive outside the womb, the primitive life-support systems of respiration and heart-beating are already present and do respond to changes in the fetal environment. If deprived of oxygen, for instance, the premature fetus appears to gasp. An early form of sucking can also be observed, and the fetus will make grasping movements if an object is placed in its hand.

Infants delivered near term (between thirty-six and forty weeks) show a true "nursing reflex" that allows them to feed for their nourishment; when stroked on the cheek they turn toward the stroking finger, suck, and swallow. By this time the grasping response will also be well coordinated and almost powerful enough to lift the infant; chest-wall movements with coordinated changes in the heartbeat will enable the infant to breathe right after birth. It is clear that patterns of activity that will be vital for later survival are already being laid down in the brain of the twenty-week-old fetus. We might even say these activities are being learned in the womb.

After twenty-eight weeks, 55 to 80 percent of prematurely born fetuses can survive in special nurseries with intensive care. We have learned a great deal from these infants about how the human brain develops during the last third of a normal pregnancy. We know, for example, that the brain wave of the thirty-week-old fetus looks just the same ten minutes before birth as it does immediately after birth. This is important information, since it helps to demonstrate that the brain doesn't just "turn itself on" when the baby is delivered.

Also, after thirty weeks we can do electronic studies of the unborn fetus before the mother's labor begins. We know this fetus "hears" in the womb, since its heartbeat changes when it is exposed to loud noises (a ringing telephone) or to classical music. The fetal brain can now be seen to respond to other stimuli transferred from the mother—drugs she may ingest (including caffeine and alcohol) as well as her emotions. If the mother is excited or upset, the fetal heart may beat faster, just as hers does. Placing pressure on the mother's abdominal wall can cause a very quiet fetus to begin rolling and kicking (both brain-directed movements), almost as though it had been awakened.

Indeed, the fetus now shows cycles of activity, and its brain-wave patterns just prior to birth resemble a crude form of the sleep, awake, and "dreamlike" states of consciousness that we measure more accurately just after birth. Ongoing studies at our laboratories in Cleveland suggest that these patterns of fetal behavior may be present as early as thirty-two weeks after conception. From this point on, it appears that brain development follows the same path, whether the fetus is in the womb or outside in the world.

As the normal time for birth approaches, a real person has emerged. A mind, however primitive in form, is present. The behavioral patterns we observe immediately after birth have been imprinted, formatted, we may even say learned during the continuum of development that began with conception. By forty weeks, four-fifths-of-a-year old, the growth of mind has paralleled that of the body, and the infant we encounter at the moment of birth is distinct from all others, with a brain already different from all others.●

MR. BURWELL BATES SMALL BUSINESS PERSON OF THE YEAR FROM OKLAHOMA

● Mr. BARTLETT. Mr. President, as a member of the Senate Small Business Committee and as a former small businessman myself, I know how much work it takes to succeed as a small business person. Therefore, it is with a great deal of respect that I commend Oklahoma's Small Business Person of the Year—Mr. Burwell Bates.

Mr. Bates began his business career by forming a partnership, and entered the oil drilling industry with one rig in 1953. In 1961 Mr. Bates purchased the remaining interest in the company continuing with the name Johnson-Bates. The company grew in number of employees from 13, in 1953, to a present total of 80. From a zero sales position, in 1953, Johnson-Bates sales reached $5 million in 1977.

Mr. Bates has diversified his interests to include ranching, banking, insurance, and manuafcturing, all of which stemmed from the original business which began in 1953. He enjoys a position of leadership in his community by virtue of his deep interest and multitude of civic activities.

Born in Konawa, Okla., January 18, 1921, Mr. Bates has remained in the area most of his life. He attended Konawa public schools and graduated from the University of Oklahoma in 1942 with a BS degree in business administration. He later attended Columbia University and received a commission from the U.S. Navy Reserve in 1943. He has been married for 32 years to his wife, Elaine, and they have two children.●

A CRUEL HOAX

● Mr. TOWER. Mr. President, I wish to bring to the attention of the Senate

a matter that involves a fabricated White House memorandum which explicitly alleges that the major Hispanic organizations in the country conspired to reelect President Ford.

The Hispanic organizations named in that fraudulent memo already have suffered an injustice by what they perceive as a cruel hoax designed to discredit their organizations and leadership.

Unfortunately, there is a growing concern that officials perhaps even within the White House itself have treated the memo as if, in fact, it were authentic. That concern is understandable in view of the letter the White House sent recently to the National Council of La Raza, a Hispanic organization that had written earlier to the White House to request a full investigation.

Mr. President, the Hispanic community and the American public deserve better. The White House clearly has an obligation to investigate the circumstances surrounding such an ill-conceived effort, and I hope it would get on with that task without further delay.

In order that my colleagues may become familiar with the events surrounding this matter, I have attached two articles by John Geddie of the Dallas Morning News, along with copies of the letters that have been exchanged between the White House and National Council of La Raza to be printed in the RECORD.

The articles follow:

WHITE HOUSE SIDESTEPS AUTHENTICITY OF MEMO

(By John Geddie)

WASHINGTON.—The White House has told Hispanics that it would be "difficult to determine" the authenticity of a memorandum written on White House stationery and claiming that Mexican-Americans and Puerto Ricans were secretly in league with Republicans during the 1976 campaign.

The News learned Monday that the White House did not respond to the question of whether or not the Carter administration may have prepared an "enemies list" of major Hispanic figures on the basis of the memo, which the Hispanics say is a hoax.

In a letter made available to The News, White House deputy counsel Margaret McKenna told Hispanics simply that all documents from the previous administration have been moved to the Ford library in Michigan.

"It appears to us that the White House staff deliberately chose to ignore the essence of our request," the director of the National Council of La Raza, Raul Yzaguirre, said in a follow-up letter to Robert Lipshutz, counsel to the president.

"We know the 'White House' memo is a fabrication," said Yzaguirre, who received the White House response.

"What is important is the credence which may have been given to this memo by the current White House staff, and even more importantly, any actions taken by White House or other administration officers based on that credence. In other words, it is the possible adverse actions taken against our organizations by this administration that concerns us."

The "White House memo" circulated in Democratic circles purports to be a Ford administration report on a meeting at which Republicans discussed possible grants and contracts to Hispanic organizations in return for political help in the Hispanic community. Some Hispanics believe the memo was prepared by persons seeking political advantage from the Democrats by discrediting organizations named in it.

Sen. John Tower, R-Texas, said in an appearance before a Hispanic organization in Fort Worth last weekend that the memo is an "insult" to the Hispanic leaders and should be exposed by the White House.

Tower described the brief response from the White House as "bureaucracy at its worse."

According to the memo, participants in the GOP campaign-related meeting included leaders of the League of Latin American Citizens (LULAC), American GI Forum, SER, IMAGE, and other groups.

There have been reports that Carter administrations officials have made reference to the memo as if it were true. Some Hispanics have said they suspect they already are feeling the impact of the memo, citing problems with Hispanic appointments and threatened delays of funding for some Hispanic programs.

Yzaguirre's first letters to Lipshutz, with copies sent to presidential adviser Hamilton Jerdan and White House aide Joe Aragon, asked the White House to repudiate the memo and investigate its origin.

"We believe that officials within the White House may have acted as if these memos were true," Yzaguirre said.

In his response to what he called the "non-response" of deputy McKenna, Yzaguirre said it "seems to us that you would be interested in determining whether violations of U.S. laws were committed. . . ."

SOME HISPANIC LEADERS SAY MEMO'S EFFECTS SURFACING

(By John Geddie)

WASHINGTON.—Some Hispanic leaders fear they already are feeling the political effects of a "White House memo" claiming their organizations were in league with President Ford's 1976 election campaign.

The memo, branded a hoax by the leaders named in it, is supposed to be a report on a meeting in which Republicans discussed possible grants and contracts in return for campaign help in the Hispanic community.

The memorandum is on simple White House stationery—although no one is sure of its origin—and has been distributed widely in Hispanic and Democratic circles including the White House.

"It's hard to pin down whether or not there have been effects," a Hispanic source said last week, "but there have been little indications."

A Hispanic candidate recommended for a government advisory committee did not get the post.

A Carter appointee hinted that one of the Hispanic organizations might be "Republican oriented" and should be investigated before receiving funds for a project.

Another project originally funded during a Republican administration was to be cut off by the Carter administration—but pressure and help from a Democratic congressman extended the funding until next October.

A "very high Hispanic in the public sector" has discussed the memo as if he knew it were true, spreading the word across the country.

One Hispanic source said another apparent result has been a reluctance by the White House or Hispanic appointees to "be in touch" with leaders of the organizations named in the memo.

Ironically, a number of the organizations' members probably voted for Carter—although the groups are not allowed to participate in partisan politics. Hispanics were among the minorities who claimed credit for Carter's victory.

The theory of some Hispanics is that the memo was prepared by persons excluded from earlier White House conferences who saw an opportunity to gain influence under a new administration.

The "White House" memo is similar to and may have been based on other written reports that meeting participants claim are true.

Meetings were at the White House and the Hispanic leaders did attend, but these memos say the purpose was to funnel Hispanic issues to the Ford White House. They note that the meetings would be apolitical.

Only the "White House" version mentioned a direct connection to the Ford campaign. Republicans also have denied the contents.

Although the major organizations mentioned, including the League of United Latin American Citizens, American GI Forum, SER and IMAGE, cannot identify with political parties, their influence in the Hispanic community seldom is disputed. The memo raised questions of national influence and cast doubt on whether or not leaders were representing the best interests of their groups membership.

It is these questions that have stirred a controversy within the Hispanic community and resulted in demands from the Hispanic leaders for the White House to clear their names and organizations. In addition, they want to know if the Carter White House believes the memo.

"Specifically, we would want to know if there exists a so-called 'enemies list' and/or if other exclusionary policies have been developed by the White House against the named Hispanic organizations as a result of these memos," Raul Yzaguirre, director of the National Council of La Raza, wrote the White House.

The White House remained quiet on the subject. By late last week, Yzagurirre's letter remained unanswered despite the fact a copy was sent to Hamilton Jordan Carter's chief of staff. Robert Lipshutz, legal counsel to the president, and Joe Aragon, a Hispanic aide in the White House, did not return calls on the subject.

"They wish it would just go away," said one of the persons named in the memo, admitting that at least one of the Hispanic organizations also has decided not to push the issue.

However, other Mexican-Americans and Puerto Ricans interested in a full hearing on the memo expect the White House to respond, especially after Yzaguirre charged the memo may have violated the law.

Some believe a stronger reason is that Democrats will decide they cannot afford to alienate Hispanics if the president decides to seek re-election.

APRIL 6, 1978.

Mr. ROBERT LIPSHUTZ, Esq.,
Counsel to the President,
The White House,
Washington, D.C.

DEAR MR. LIPSHUTZ: On March 15 of this year I sent you some correspondence concerning some libelous memos that have been circulated by person or persons unknown to us. I received a non-response to my letter by Margaret A. McKenna of your staff dated March 28.

Specifically Ms. McKenna states that the authenticity of the "White House" memo in question "would be difficult to determine" because the files of the previous administration have been moved. It appears to us that the White House staff deliberately chose to ignore the essence of our request.

We know that the "White House" memo is a fabrication. It would be very useful if this question of fact would be as clear to you as it is to us. It would also be useful to determine the identity of the person or persons who fabricated said memo. It also seems to us that you would be interested in determining whether violations of U.S. laws were committed as outlined in our letter, and we believe that you have the resources to accomplish all this.

All of that, however, is of secondary importance to us. What is important is the cre-

dence which may have been given to this memo by the current White House staff, and even more importantly, any actions taken by White House staff or other administration officers based on that credence. In other words, it is the possible adverse actions taken against our organizations by this administration that concerns us.

Again, let me reiterate what we requested in my last letter:

"Identify for us, any and all White House actions taken against the Hispanic organizations identified by the "White House" memo as a consequence of such memo and/or other similar memos. Specifically, we would want to know if there exists a so-called "enemies list" and/or if other exclusionary policies have been developed by the White House as against the named Hispanic organizations as a result of these memos."

We would also ask that you forward to us any and all other documentation in your files that relate to this subject matter.

Please give this matter your utmost attention.

Sincerely,

RAUL YZAGUIRRE,
National Director.

NATIONAL COUNCIL OF LA RAZA,
March 15, 1978.

Mr. ROBERT LIPSHUTZ, Esq.,
Legal Counsel to the President,
The White House,
Washington, D.C.

DEAR MR. LIPSHUTZ: Attached please find copies of three separate memos. We believe these memos to have been widely circulated among numerous persons during the past few weeks. The memos include two internal, and taken alone, innocuous documents prepared by a sister national organization, the League of United American Citizens (LULAC). The memo on White House stationary has had the sender/recipient slots blocked out.

The latter memo, if a factual basis is established, explicitly asserts that a person or persons within the previous administration in combination with Hispanic organizational leaders conspired to engage in certain illegal activities. Specifically, if the actions mentioned in the memo were true, such acts would be in violation of Title 18 U.S.C. Sections 201–204 and Section 501(c)(3) of the 1954 Internal Revenue Code as amended, as well as perhaps other U.S. Statutory provisions too numerous to mention.

The "White House" memo is, in our estimation, a fabrication. If the facts can be ascertained to support this conclusion, then the person or persons who fabricated the memo may be guilty of misuse of government property, as well as libel.

We have reason to believe that personnel within the White House are aware of the existence of these memos, if not their origin. Furthermore, we believe that officials within the White House may have acted as if these memos were true. We also believe that some of the individuals and organizations mentioned in these memos have been adversely affected by the allegations as a result of the credence which may have been given to the memos by White House officials.

In view of the above, we request that you take the following action:

1. Advise us and the other aggrieved Hispanic organizations as to the authenticity of the "White House" memo.

2. Initiate an inquiry, through appropriate agencies, as to the authorship of the "White House" memo, its publication and subsequent distribution and prosecute the person or persons responsible, if warranted.

3. Identify for us, any and all White House actions taken against the Hispanic organizations identified by the "White House" memo as a consequence of such memo and/or other similar memos. Specifically, we would want to know if there exists a so-called "enemies list" and/or if other exclusionary policies have been developed by the White House as against the named Hispanic organizations as a result of these memos.

In the ten years of our existence, we have come to be recognized as a leader among sister Hispanic groups. Currently we are affiliated and working with more than 100 community-based local organizations. We believe we deserve a response to our present appeal for action.

At such time as you determine, as we know you will, that the "conspiracy" described in the "White House" memo is a cruel and vicious hoax, we would expect correspondence to that effect. We would also ask that you forward to us any and all other documentation in your files that relate to this subject matter.

I wish to impart to you the urgency of this matter. Our initial view that no reasonable person could possibly take seriously the annonymous memo has evidently proven to be incorrect. Continued festering of this issue will cause our organizations irreparable damage.

Sincerely,

RAUL YZAGUIRRE,
National Director.

MARCH 28, 1978.

DEAR MR. YZAGUIRRE: I am responding to your letter addressed to Mr. Lipshutz concerning the authorship of an alleged "White House" memo which discusses certain Hispanic organizations.

The Carter Administration has possession of files concerning White House activities only since January 20, 1977. All previous documents have been moved to the Ford Library in Michigan. Because of this it would be difficult to determine the authenticity of any memo.

Sincerely,

MARGARET A. MCKENNA,
Deputy Counsel to the President.●

THE MARYLAND COMMISSION ON MEDICAL DISCIPLINE

● Mr. MATHIAS. Mr. President, I want to bring to the attention of the Senate an article which appeared in the American Medical News describing the important work of the Maryland Commission on Medical Discipline. The March 27, 1978, article emphasizes the role of the commission in improving the standards of medical practitioners in Maryland through imposition of a variety of disciplinary and advisory remedies.

I submit the article be printed in the RECORD.

The article follows:

DOCTORS CAN DISCIPLINE THEMSELVES

(By Hugh C. Sherwood)

These days, partly because of increased publicity generated by the malpractice problem, the medical profession is continually admonished to police itself.

In many states medical organizations can do little more than rap the knuckles of the occasional bad doctor. The real clout—the authority to lift his license—remains with state licensing agencies.

Until 1969 that was the case in Maryland where only the Board of Medical Examiners possesed real disciplinary powers. Even that agency couldn't discipline an errant physician or revoke his license unless he was shown to be a narcotics addict, had been convicted of a crime involving moral turpitude, or was guilty of one of four other very specific offenses.

The Medical and Chirurgical Faculty of Maryland—the state society—was virtually toothless, with persuasion and the rarely imposed threat of expulsion from the society its only disciplinary devices. It had no leverage at all over non-members, many of whom never even bothered to answer its occasional letters of inquiry about questionable actions.

Moving to remedy this situation, the state medical society drew up an amendment to the state's Medical Practice Act and pushed it through the state legislature. That legistion, enacted in July, 1969, created a Commission on Medical Discipline as an arm of the state's Department of Health and Mental Hygiene. That arm serves as a kind of supreme court in cases in which Maryland's physicians face possible disciplinary action.

The commission consists of nine members. Two are the president and the chairman of the council of the state society. Three are members of the Board of Medical Examiners, which still retains the power to license physicians, among other functions. Four members are privately practicing physicians.

The commission has the legal power to subpoena physicians, patients, and other witnesses and to issue reprimands to doctors, to place them on probation, or to suspend or revoked their licenses. It may do so for any one of 18 reasons, including abandoning patients, grossly overcharging them, splitting fees, or professional, physical, or mental incompetence.

To prevent the commission from serving as both judge and prosecuting attorney, the legislature barred it from initiating investigations. When it receives complaints it must forward them to the state society or a county society. These organizations are charged with investigating the complaints and making recommendations to the commission. They must report back within 90 days.

Actually, reports Jerome J. Coller, MD, formerly the commission's chairman, at least 75% of all complaints are made directly to the state or a county society and resolved there. "Many complaints," he explains, "are not serious and can easily be handled at the society level."

The societies retain the right to buck up to the commission any cases they can't handle. Both Coller and other physicians believe this latent power has made the societies more effective in bringing physicians into line.

ADDICTS, FEE SPLITTERS

The state society now has three important committees to discharge its diciplinary responsibilities. The Drug Committee deals with physicians thought to be addicts or to be overprescribing or prescribing inappropriately. The Physician-Patient Relations Committee deals with patient complaints, fee splitting or overcharging, and unethical advertising and solicitation. The Peer Review Committee deals with all other disciplinary problems, particularly poor medical practice in the office.

Complaints about doctors come from many sources. Some are made by patients or physicians. The majority originate with state agencies or Blue Shield.

Whatever their source, most complaints are handled at the county society level. The exceptions involve those passed down by the commission, which the state Peer Review Committee is required to handle, those a county society refuses to investigate because of local politics, possible bias, or other factors, and those that are appealed from a county society to the state society.

As an aid in checking on physicians who are believed to practice medicine of poor quality, the Peer Review Committee has drawn up nearly a dozen detailed standards for reviewing office practice. These involve the quality of an office's physical facilities, equipment, and supplies, the talents and training of its ancillary personnel, and other factors.

Says Joseph I. Berman, MD, past chairman of the Drug Committee and present head of the Peer Review Committee: "When we run into a physician who is practicing poorly, we almost always find that, whatever else may be wrong, he keeps lousy records. They are usually poorly organized and they rarely describe clearly enough the nature of his patients' medical problems or his plans for treatment. They are simply insufficient if another physician should have to take over the patient's case."

What's the reaction of physicians brought before the Peer Review or some other committee?" "A few are very grateful," reports Berman. "They hadn't realized they'd let things get out of hand. This is often the case when their basic problem involves overprescribing drugs. Others are at least cooperative. Some, of course, come with a battalion of lawyers."

Cases that the state and county medical societies can't handle are passed on to the commission. When brought up before the commission, physicians are strongly encouraged to bring along lawyers because so much is at stake. A court reporter takes down all testimony during the proceedings, and the commission ultimately makes a decision.

Some doctors are exonerated, in which case all records of the hearing are expunged. Others, particularly older doctors, are persuaded to retire. Still others are disciplined in one fashion or another.

Sometimes the commission stays its own order, pending an attempt to rehabilitate the doctor. For example, a practitioner may be required to obtain psychiatric counsel or to work in a hospital under supervision for a period of time.

A MATTER OF PUBLIC RECORD

Whether the commission stays its own order or not, a physician may appeal its ruling to a court of law. "Most do not appeal except when revocation of license is involved," says Coller. "The perhaps 50 percent go over our heads. In most of these cases the courts have upheld the commission."

When the commission disciplines a physician it becomes a matter of public legal record, even if the physician is only put on probation. In addition, the state society reports the disciplinary decision to the AMA, Medicare, Medicaid, and various state agencies. What's more, a full report, including a summary of the charges, the testimony, and the final decision, is printed in the state medical journal. One recent report ran to almost three pages.

Rarely, however, do these reports reach the public press. John Sargeant, executive director of the state society, says newspapers believe that many cases, especially those involving sexual offenses, do not make for family reading.

Even if the reports did reach the public press, it's far from certain what impact they would have on a physician in terms of the number of patients he sees. Says Coller: "You'd be amazed at how many patients show up at some hearings to support their doctors."

Indeed, there's some uncertainty about how much good the commission is doing. Says Berman: "We have learned how little is available to reeducate the poor or borderline practitioner who wants to improve his practice. Hospitals with good residency programs don't want them. Continuing medical education courses are not geared specifically to their problems. And reading a medical journal or taking just a course or two won't necessarily change the habits of a doctor who prescribes poorly, keeps terrible records, and has otherwise become slipshod.

"The Univ. of Maryland's Department of Family Practice has tried to tailor programs to such doctors, but we're not yet certain how much is being accomplished."

Both the commission and the state society face other problems as well. Physicians are loath to report on practitioners who are alcoholics. The disciplinary bodies also find it difficult to deal with physicians whose patients virtually dictate their own treatment. Then, too, there is the problem of the repeat offender.

Coller says the commission or the state or local societies investigated some 300 physicians in both 1975 and 1976. Many were repeaters who had done little to straighten themselves out.

Still, the commission has accomplished a great deal. It has put some physicians out of business. It has helped improve the practices of others. More important, it has changed the whole medical climate in Maryland.

CHANGE IN CLIMATE

When the commission was new, there was intense opposition to it from certain doctors. Some erroneously viewed it as a punitive body. Says Coller: "The commission sees its role as one of protection, not punishment. It attempts to protect all citizens of the state, including physicians."

Gradually, opposition has withered. "All county societies now agree to investigate most cases brought to their attention," reports Coller. "And almost all do a good job. Most really want to police themselves."

One sign of the changing times: Today almost 100 physicians are waiting to get on the state society's Peer Review Committee. Not so many years ago most were reluctant to serve.

Why the change in climate? Opines Berman: "I think it's partly a result of a nationwide trend. Many physicians are concerned that poor practitioners may be contributing to the malpractice crisis. Also, the medical profession is feeling consumer pressure to keep its house in order. Finally, I think there may be more professionalism among doctors. They're exhibiting more desire to deal with impaired physicians."

Adds Sargeant: "Most Maryland physicians used to think that other physicians were like them. They were ethical so they couldn't believe that others weren't or that they were doing anything else that wasn't accepted practice. Now there's been a change. Almost everybody is aware that the problems we face are not confined to the cities. And physicians who have been on a committee like the Peer Review Committee for a while are less tolerant of bad practice than are newer members.

What can your state society do if it would like to copy Maryland's work?

Draft your own legislation, urges Sargeant, rather than let a state legislature do it. You know the problems and the tools you need. In this connection, Maryland's legislature passed the legislation the society sought almost without change.*

Make sure the law mandates medical society participation in investigating and solving disciplinary problems. This provision makes Maryland's law unique. Elsewhere medical societies become involved only when state agencies or disciplinary commissions wish them to. This can create fear or boredom among physicians, who may feel left out of the decision-making process.

Get the law updated as experience reveals gaps or flaws in it. For example, last year the commission asked hospitals to report physicians whom they had disciplined but received little cooperation. Beginning July 1, hospitals will be legally required to comply.

Educate your physicians about what your commission and various disciplinary committees are finding and doing. Berman and other members of the Peer Review Committee have apparently done yeoman service in getting around Maryland and explaining their work.

Choose commission and committee members with care. Berman emphasizes that they must be people with the time and desire to do the job. "The chairman," he adds, "is the real key. He can make a group go or not go."

WATERWAY USER CHARGES: THE ADMINISTRATION TAKES A STRONG POSITION IN SUPPORT OF THE AMENDMENT OFFERED BY SENATORS DOMENICI AND STEVENSON

● Mr. DOMENICI. Mr. President, over the weekend, each of us, I believe received a letter from Secretary of Transportation Brock Adams detailing the clear position of the Carter administration on the issue of waterway user charges and H.R. 8309.

Secretary Adams states that President Carter "has asked me to advise you that he will not sign legislation authorizing a new lock and dam at Alton, Ill., unless it establishes a firm timetable with an early commencement date for the implementation of a fuel tax which would recover a substantial portion of operating costs. Moreover, acceptable legislation would provide for some capital cost recovery on new waterway construction. * * *"

Mr. President, I ask that this important letter be printed in the RECORD.

The letter follows:

SECRETARY OF TRANSPORTATION,
Washington, D.C., April 28, 1978.

HON. PETE V. DOMENICI,
U.S. Senate, Russell Senate Office Building, Washington, D.C.

DEAR PETE: I am writing to advise you of the Administration's views on legislation now pending before the Senate concerning Lock and Dam 26 and waterway user charges.

When I last wrote you on the issue of waterway user charges, it was to inform you of the President's intention to veto the House bill, H.R. 8309. We remain convinced that the 4¢/6¢ tax recomended by the House is inadequate.

The Administration would still prefer legislation recovering 100 percent of the costs of operation and maintenance, and 50 percent of the cost of new construction of the inland waterway system. This year those costs are approaching the half-billion dollar level.

In order to expedite this matter, however, we will accept the compromise for H.R. 8309 that has been offered by Senators Stevenson and Domenici. This substitute offers the minimum acceptable basis from which to develop an adequate House-Senate conference bill.

In our view, the most important elements of the Stevenson-Domenici proposal are:

1. An adequate level of taxation implemented by a date certain. We support the Stevenson-Domenici proposal for a gradually phased-in fuel tax beginning no later than FY 1980, and reaching 12¢ per gallon by the end of FY 1984. This tax will still be proportional much less, for example, than the dedicated highway taxes paid by the trucking industry. Based on extensive studies, we believe that this tax would impose no serious hardship for barge companies or their shippers.

2. The principle of cost recovery. Both this Administration and the Senate have supported full recovery of operation and maintenance costs and 50% recovery of the cost of the new construction on the inland water-

way system. While we remain convinced of the correctness of our position, we are willing to postpone implementation of this level of recovery pending the outcome of a comprehensive study to be carried out by the Department of Transportation and other agencies.

In the meantime, the fuel tax discussed above should be implemented. For any projects initiated prior to the enactment or rejection of the recommendations of the DOT study, a minimum of 10% of capital costs should be recovered, as proposed in the Stevenson-Domenici substitute.

3. Comprehensive planning for the inland waterway system. As the costs of the current waterway system have escalated, the need for a comprehensive review of waterway development policy has grown. The commercial waterway industry, according to a recent CBO study, receives the equivalent of 40% of its annual revenues in federal subsidies in the form of free federal waterway operation and construction; the equivalent federal subsidy of other modes is 3% or less. The Stevenson-Domenici study proposal offers an opportunity to develop a coordinated approach to waterway costs within the context of a national transportation system.

This Administration very much wants to establish a fair system of waterway user charges along with the waterway improvements that are needed. However, the President has asked me to emphasize that our desire to establish this system does not mean that we will accept legislation involving insubstantial taxes which are indefinitely delayed. He has asked me to advise you that he will not sign legislation authorizing a new lock and dam at Alton, Illinois unless it establishes a *firm* time-table with an early commencement date for the implementation of a fuel tax which would recover a substantial portion of operating costs. Moreover, acceptable legislation would provide for some capital cost recovery on new waterway construction, pending Congressional enactment or rejection of the recommendations of the DOT study. The Stevenson-Domenici proposal meets these criteria as compared with other proposals that have been circulated recently in the Senate which do not, and would not be signed.

In addition the President has asked me to convey his hope that this bill will not be used as a vehicle for additional costly or extraneous amendments that could jeopardize final enactment of this needed legislation.

I hope that you will be able to support the Stevenson-Domenici substitute, and that we can finally resolve this difficult issue.

Sincerely,

BROCK ADAMS.●

THE EPISCOPAL CHURCH IN HAWAII SUPPORTS HAWAIIAN NATIVE SETTLEMENT STUDY COMMISSION

Mr. MATSUNAGA. Mr. President, I am pleased to be able to inform my colleagues that delegates to the Ninth Annual Diocesan Convention of the Episcopal Church in Hawaii have adopted a resolution strongly supporting the enactment of Senate Joint Resolution 4, which provides for the establishment of a Federal commission to study the historic claims of Native Hawaiians, and which the Senior Senator from Hawaii, Mr. INOUYE and I jointly introduced.

Adoption of the resolution demonstrates the broad support that Senate Joint Resolution 4 enjoys among all of the people of Hawaii. Although my colleagues in the Senate have already given unanimous approval to Senate Joint Resolution 4, I believe that you will find the resolution adopted by the Episcopal Church in Hawaii of interest. I therefore ask unanimous consent that the text of the resolution be printed in the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

EPISCOPAL CHURCH IN HAWAII,
Honolulu, Hawaii.

RESOLUTION 16—HAWAIIAN NATIVE CLAIMS SETTLEMENT COMMISSION RESOLUTION

Whereas, the founding of the Episcopal Church in Hawaii Nei is indebted to the sustained and generous support of native Hawaiians and their deeply concerned Alii in providing for a source of spiritual strength, comfort and challenge for all of Hawaii's people; and

Whereas, the Church has witnessed the tragic history of a once independent and sovereign nation and the decimation of her people in numbers and in spirit; and

Whereas, the Church recognizes the profound distress derived from the torment inflicted upon a generous and giving people who wait patiently for the correction of a sorely felt wrong; and

Whereas, the Church was present at the time of the events of 1893 and ministered to the needs of the last Queen of Hawaii in her time of trial and deprivation; and

Whereas, the Church remembers the acknowledgment of the President of the United States, Grover Cleveland, admitting a grave injustice wrongfully committed with the aid of American militia and diplomatic concurrences; and

Whereas, the Church is aware of Hawaii's Congressional delegation efforts to correct a historical injustice with the introduction of Senate Joint Resolution 4 proposing the establishment of a Hawaiian Native Claims Settlement Commission, therefore

Be it resolved, that the Episcopal Diocese in Hawaii commend Hawaii's Congressional leaders in this most important undertaking of obtaining redress for native Hawaiians; and

Be it further resolved, that this Ninth Annual Convention of the Protestant Episcopal Church in Hawaii urge by resolution of this House the passage of the Hawaiian Native Claim Settlement Commission Resolution in both Houses of Congress during the 97th Congress of the United States; and

Be it further resolved, that this resolution be transmitted to the House of Bishops for their spiritual consent and concurrent support and that copies of this resolution be sent to the 1979 meeting of the General Convention of the Protestant Episcopal Church in the United States urging that similar action be taken by our fellow brothers and sisters in Christ; and

But it further resolved, that this resolution be sent to the Hawaii Congressional delegation, our senators, representatives and the President of the United States.

RESIDUAL OIL ENTITLEMENTS FOR THE U.S. EAST COAST

Mr. JOHNSTON. Mr. President, according to reports in the press, the Department of Energy is preparing to deal yet another blow to domestic energy self-sufficiency. I am referring to two articles, which I will provide for the RECORD, describing the plans for the Department to grant a subsidy of a half billion dollars a year to the importation of petroleum refined in foreign refineries.

I can find no reason on the merits for extending this subsidy at this time. No explanation for the proposal has been provided to the Committee on Energy and Natural Resources which has jurisdiction over the relevant policy area. In any event, to understand the reason for such an intuitively counterproductive policy proposal, a deeper analysis is necessary than we can expect from the Department of Energy.

What is being proposed? The Department plans to dip into the enormous pool of funds to which domestic refiners nationwide contribute to operate the crude oil entitlements program. The Department's plan would divert a portion of those funds to importers of residual fuel oil.

Although residual fuel oil is used throughout the United States as a heavy industrial fuel and for the generation of electricity, by far the heaviest dependence on residual oil occurs in New England. To a lesser extent, the south Atlantic coast and California also use significant quantities of residual fuel oil. The dependence of the U.S. east coast has been almost entirely supplied by imports from Caribbean refineries built there by the major international oil companies—Exxon, Texaco, and Shell.

The subsidy planned by the Department for imports of residual fuel oil will thus be paid for by consumers of refined petroleum products nationwide through the entitlements program and split between the major international oil companies with refineries in the Caribbean and New England consumers.

Why is this necessary at this time? The world market in residual fuel oil, which supplies New England, has been in deep doldrums for over a year. Foreign refineries both in the Caribbean and in Europe have been operating at extremely low capacities. Residual fuel is available on the world market in quantity at depressed prices. There is no obvious reason to want to stimulate those imports through increased subsidy, except that:

First, Caribbean refiners would like to be relieved of the competitive situation they find themselves in; and

Second, New England utilities and residual fuel oil marketers would like lower costs.

I suppose that there are several other groups of businesses which would enjoy Federal help against their competition. I also imagine that my colleagues in the Senate could, individually, tell me of some regions of the country who are in need of lower costs.

We would like to accommodate them all, but unfortunately that is not possible. I do not want to let go by without a protest this departmental proposal to charge my consumers more for the gasoline heating oil and all other petroleum products they consume in order to give a $1.40 per barrel break to importers of foreign-refined residual fuel oil into the U.S. east coast.

These subsidies to refined products imports will make worse an already disastrous situation faced by firms inter-

ested in increasing domestic refinery capacity or in improving the quality of existing capacity. There is just no doubt that the United States should be acting now to build the refineries to reduce New England's dependence on refined products imports. We should be building refineries capable of using the heavy, high sulfur oil which is and will be in surplus domestically and on the world market.

Heavy, high-sulphur oil is and will be cheaper relative to all other types of oil available. The nations with capacity to refine this oil will thus be able to reward their economies with lower energy costs, and all their consumers with lower prices.

The Department's policy of subsidizing residual fuel imports by raising prices paid by everyone else goes in exactly the wrong direction. It encourages imports and reduces the incentive to refine this product domestically. It pushes farther into the future the day when a domestic refining system can be constructed to take advantage of the cheapest oil which will be available in the future.

Beyond the national interest in establishing a firm policy for improved refinery capacity, I do not understand why the administration is seeking to implement a proposal which is so clearly politically motivated and so clearly exacerbates regional differences over energy. The establishment of firm rules for the energy market has been delayed for over 4 years by this sort of regional energy politics. It is not in the national interest, and it is also not necessary. It is a signal of a return to some very divisive policies of the past, policies from which some will gain, but the Nation as a whole will lose.

Mr. President, I ask unanimous consent that an article entitled "Oil Plan Would Aid East at Expense of Rest of U.S.," written by T. R. Reid and published in today's Washington Post, and an article entitled "Subsidy To Increase on Imported Fuel, Helping East Coast," published in the Wall Street Journal of April 27, 1978, be printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Washington Post, May 1, 1978]

OIL PLAN WOULD AID EAST AT EXPENSE OF REST OF U.S.

(By T. R. Reid)

The Carter administration is preparing a complex set of changes in federal energy regulations that could lower heat and power prices for East Coast consumers by as much as half a billion dollars a year at the expense of the rest of the country.

The changes would increase price subsidies for Eastern refiners and oil importers. The increased subsidy would be paid directly by refiners elsewhere, and presumably passed on to those refiners' customers.

Energy Secretary James R. Schlesinger promised a group of senators and staff aides from Eastern states last week that the changes would be proposed "quickly"—perhaps this week.

Before the projected changes in oil regulations can take place, the Energy Department must publish the proposals in the Federal Register and hold public hearings. Then, barring congressional veto, they would go into effect.

East Coast members of Congress, including House Speaker Thomas P. (Tip) O'Neill, Jr. (D-Mass.), have been pressuring the administration for months to change the subsidy rules. Schlesinger, in turn, has been working to win Eastern support for the administration's beleaguered energy legislation.

Thus some members and lobbyists were quick to see Schlesinger's new commitment as a deal to win votes for the energy bills. As further evidence of political motivation, they noted that Schlesinger had also discussed with Rep. John Dingell, a Michigan Democrat who is influential on energy matters, an addition to the new rules that would give similar price subsidies to Michigan oil importers.

An official at the Energy Department said the timing of Schlesinger's promise was not political. "We had to do this because the New England refiners have to know soon what price they'll pay for oil next winter," said the official, who said department regulations require that he remain anonymous.

If Schlesinger did hope for political gain from his promise to the Eastern legislators, he also incurred political loss, because some members from other regions were furious about the proposed changes.

Among them was Sen. J. Bennett Johnston (D-La.), a leading spokesman for domestic oil producers. "They want Johnston's help on their energy bill," said an aide to the senator "But this isn't going to make him more likely to work with Schlesinger on anything."

Johnston told Schlesinger Thursday night that the proposed rules changes, which would make it cheaper for the East Coast to buy imported oil, would undermine the administration's efforts to enhance domestic production.

Analysts at the Energy Department disputed that, but they admitted that no one is sure what the precise impact of the new rules would be.

The changes Schlesinger has promised would affect the government's "entitlements" program, a pricing mechanism that is generally conceded to be unusually complicated, even in the complex world of energy regulation.

"Entitlements" were created to deal with price disparities created by the government's oil pricing rules.

Under federal regulations, domestic oil is considerably cheaper than imported oil. Since the East uses much more imported oil than the rest of the country, Eastern consumers have been paying more for oil than consumers in other regions.

The "entitlements" regulations force refiners using the cheaper domestic oil to pay subsidies ("entitlements") to refiners, utilities, and industries in the East to offset the higher price of imported fuel.

These subsidies have held down the price of oil used in the East, although prices are still about $1.40 higher for each barrel of fuel. At the same time, the subsidies have created a disincentive for domestic refiners to ship oil to East Coast markets. That has increased the East's dependence on imports.

The changes Schlesinger promised last week would more than triple the subsidy Eastern refiners now receive on each barrel of imported residual fuel oil. The subsidy would be offset somewhat by an import fee.

Schlesinger also said he would double the current subsidy for domestic residual oil shipped to East Coast markets.

Energy Department analysts say the result of all this would be a reduction in oil prices in the East and an increase in shipments of oil from the Western U.S. to the East.

If everything worked as the Energy Department plans it, the new changes would please everybody.

Easterners would get lower prices, and Western oil producers would have a profitable new market. The plan might then reduce the current glut of residual oil on the West Coast, which has been an embarrassment to administration spokesmen who keep talking about oil shortages.

But some members of Congress said Schlesinger's plan could not work. They said the new changes would not eliminate the disincentive on domestic sales to Eastern markets. And they warned that foreign oil suppliers would raise their prices to soak up the new subsidies.

If that occurred, neither West Coast producers nor East Coast consumers would gain much under the new rules. Instead, members of the Organization of Petroleum Exporting Countries would be the big winners.

Whatever the economic impact of the new rules, there was no question about one political result of Schlesinger's promise: it made a lot of East Coast members of Congress happy.

The New England Congressional Caucus praised the administration's move, saying it could save consumers from Maine to Florida about $500 million annually in heat and power bills.

But it was not clear whether the changes would swing Eastern votes on the energy bills. Rep. Toby Moffett (D-Conn.), a strong critic of the administration's energy package, said he welcomed the new regulations but considered them "completely separate" from the pending legislation.

[From the Wall Street Journal, Apr. 27, 1978]

SUBSIDY TO INCREASE ON IMPORTED FUEL, HELPING EAST COAST

WASHINGTON.—The Energy Department is preparing to propose new fuel-oil pricing rules that would sharply reduce the price disadvantages of the imported fuel used heavily by East Coast utilities and industries.

The department decided to propose the rule changes after meetings with Sen. Edward Brooke (R., Mass.), whose office said the changes would save New England consumers as much as $12 million a month in utility bills.

Under the plan, which could be proposed as early as next week, East Coast importers of residual fuel oil would receive a greater price subsidy from domestic refiners whose residual fuel oil can be sold at lower prices. With the increased subsidy, known as an "entitlement" in federal oil-price regulations, the price difference between imported fuel oil on the East Coast and the cheaper domestic product would drop to about 63 cents a barrel from $1.40 a barrel, Energy Department officials said.

East Coast industries and utilities have complained for years that they are at a cost disadvantage because they must rely on more expensive imported fuel oil, while fuel users in other regions can more easily use domestically produced fuel, some of which is made from foreign crude oil whose cost is subsidized by entitlements.

To meet these complaints, the government early in 1976 established a partial entitlement subsidy on imported residual fuel oil and halved the subsidy domestic refiners could receive on crude oil they made into fuel for East Coast sale.

But East Coast users still complained that the pricing gap was too large, and in late 1976, the Ford administration proposed new rules to narrow it further. However, the rules never took effect, and Sen. Brooke and others took up the battle with the Carter administration.

Under the agreement reached this week between Sen. Brooke and Energy Secretary James Schlesinger, Easterners would get about the same relief the Ford administration promised in 1976. Imported fuel would still cost about 63 cents a barrel more than

the domestic brands, however, because of the current 63-cent import fee.

Sen. Brooke's office said the agreement had nothing to do with the Carter administration's drive to pass its energy bill because the Senator already supports President Carter's proposals.

Energy Department officials said the price relief to the East to be provided by the rule changes would be paid for by a small price increase on refined petroleum products in all other areas, as well as on refined products other than residual oil even in the East. They estimated the increases at a fraction of a cent per gallon of refined products.

"HOLOCAUST"—AN ELOQUENT PLEA FOR THE GENOCIDE TREATY

Mr. PROXMIRE. Mr. President, for several days I have spoken at length about NBC's "Holocaust," a graphic portrayal of the most hideous aspects of human behavior. My interest in this series is strong, because it demonstrates what I have asserted on the floor of the Senate for the last 11 years—that there is a critical need for the United States to ratify the Genocide Treaty. This treaty makes the kinds of atrocities shown in "Holocaust" crimes under international law.

Why was "Holocaust" such a powerful drama? Not simply because it illustrated the systematic persecution of literally millions of Jews. This had been documented before—even by the Germans themselves. The world has been painfully aware of these brutal actions and the perpetrators of these atrocities have been tried at Nuremberg for their crimes.

No, the force of "Holocaust" came from its human dimension. We are taken through the struggle of Rudi Weiss, a struggle to love, to cope with a changing and frightening world, a struggle to even stay alive. We live his life vicariously.

I ask you to recall the scene in which Rudi's father, Karl, is marched to his death. It is sudden. But it is certain. The black humor of Karl shows that he is prepared, that he has "died" little by little over the course of time. He knows there is no escape from Nazi control.

The impact of this scene is immense. We all have a father. We all feel Rudi's loss deeply. We feel this unbearable sadness to know that his father helplessly walked to the death he knew all too well was coming. Clearly, this is a tragedy that should never happen again.

This is why I again urge support for the Genocide Treaty. I believe the story of Rudi Weiss cannot help but stir strong sentiments against genocide of any kind. These sentiments must be translated into action. We cannot help those killed by the Nazis in World War II. But today, genocide still exists in countries such as Uganda and Cambodia. We must act now. We must ratify the Genocide Convention.

I yield the floor.

The PRESIDING OFFICER. The Senator from West Virginia.

ORDER FOR CONSIDERATION OF S. 2467 ON MAY 15, 1978

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that on May 15, 1978, the majority leader be authorized to proceed to the consideration of the so-called labor reform bill, a bill to amend the National Labor Relations Act to amend the remedies and expedite the procedures under such act, S. 2467, or the House companion bill.

Mr. ALLEN. Reserving the right to object, and I shall not object, I am just wondering if this bill might possibly collide with the President's plane sales package in any way.

Mr. ROBERT C. BYRD. No.

Mr. ALLEN. If so, which would have priority here in the Senate?

Mr. ROBERT C. BYRD. The arms sale item is a privileged matter. The fact that the Senate will proceed to the consideration of S. 2467 would not of necessity conflict with any actions the Senate may wish to take on the arms sale legislation, which would be under the agreement provided for by law.

In the event that cloture would be invoked on the labor bill, then that would pose a problem at that point. However, I would assume that any action the Senate feels constrained to take in connection with the arms sales proposals will be taken prior to such action by the Senate in connection with cloture.

Mr. ALLEN. I thank the distinguished majority leader. I thought it might be well to bring that to the attention of the distinguished majority leader. I had not heard about the priority matter.

Mr. ROBERT C. BYRD. I thank the distinguished Senator from Alabama for raising this important question.

Mr. ALLEN. I have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I commend the majority leader for the simplicity and directness of this request on a bill that almost certainly will be a highly controversial measure. The simplicity of the measure in this form should not deceive our colleagues. This has been under negotiation for a long time. I am delighted with this result.

I might say for our colleagues that the distinguished majority leader indicated to me early on that, knowing this was a controversial measure, he would not proceed to it until he gave me notice in advance that he intended to call, or try to call, this matter up from the calendar. As usual, the majority leader has fulfilled that commitment voluntarily made to me with honor and correctness.

In the last few days we have had a number of conversations about this matter. Several dates have been discussed. A number of Members on this side have been consulted to ascertain their schedules and their convenience. The majority leader has been unfailing in his cooperation in that respect. It is clear, then, that we now have a firm time, that is, May 15, to proceed to the consideration of this matter. It is also implicit in this request that there will be no effort to oppose a motion to proceed with the consideration of this matter, since that is dealt with in this agreement.

I only wanted to refer to this matter so that all those who hear these remarks or read the RECORD may know that the matter was negotiated at some length; and I feel that a satisfactory resolution was made as to the scheduling of a very difficult and potentially very controversial piece of legislation.

Mr. ROBERT C. BYRD. Mr. President, I thank the distinguished minority leader. He has accurately stated the story of the developments, up to this point. As he has indicated, there will undoubtedly be some controversy about this bill. There will be no filibusters on the taking up of the bill, but those who wish to discuss the bill at length will have the opportunity to do so beginning on May 15.

I want to express appreciation to the distinguished minority leader and to the distinguished Senator from Alabama, and other Senators, for their cooperation in the matter. As a result of these discussions it is possible to bring the bill up without any extended dicussion on a motion to proceed. That discussion, then, will be directed to the merits or demerits of the bill when it is before the Senate.

ORDER FOR RECESS UNTIL 11 A.M. TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that when the Senate completes its business today it stand in recess until the hour of 11 a.m. tomorrow morning.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, are there any special orders for the recognition of Senators tomorrow?

The PRESIDING OFFICER. No special orders for the recognition of Senators have been entered.

ERNESTO GARCIA, JR.

Mr. ROBERT C. BYRD. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 958.

The PRESIDING OFFICER (Mr. CULVER) laid before the Senate the following message from the House of Representatives.

APRIL 4, 1978.

Resolved, That the bill from the Senate (S. 958) entitled "An Act for the relief of Ernesto Garcia, Junior", do pass with the following amendments:

Strike out all after the enacting clause, and insert: "That, in the administration of the Immigration and Nationality Act, Ernesto F. Garcia, Junior, may be classified as a child within the meaning of section 101(b)(1) of such Act, upon approval of a petition filed on his behalf by Mr. and Mrs. Ernest Garcia, citizens of the United States, pursuant to section 204 of such Act: *Provided*, That the natural parents or brothers or sisters of the beneficiary shall not, by virtue of such relationship, be accorded any right, privilege, or status under the Immigration and Nationality Act."

Amend the title so as to read: "An Act for the relief of Ernesto F. Garcia, Junior.".

Mr. ROBERT C. BYRD. Mr. President, I move that the Senate agree to the House amendments.

The motion was agreed to.

RECESS TO 11 A.M. TOMORROW

Mr. ROBERT C. BYRD. Mr. President, if there be no further business to come before the Senate, I move that the Senate stand in recess, in accordance with the order previously entered, until the hour of 11 a.m., tomorrow morning.

The motion was agreed to; and, at 4:01 p.m., the Senate recessed until tomorrow, May 2, 1978, at 11 a.m.

NOMINATIONS

Executive nominations received by the Senate May 1, 1978:

NATIONAL TRANSPORTATION SAFETY BOARD

Francis H. McAdams, of the District of Columbia, to be a Member of the National Transportation Safety Board for the term expiring December 31, 1982. (Reappointment.)

IN THE COAST GUARD

The following officers of the United States Coast Guard for promotion to the grade of Rear Admiral:

William H. Stewart.
Paul A. Yost, Jr.
Louis L. Zumstein.

IN THE AIR FORCE

The following officers for appointments in the Reserve of the Air Force to the grade indicated, under the provisions of chapters 35, 831, and 837, title 10, United States Code:

To be major general

Brig. Gen. Paul R. Day, [redacted], Air National Guard of the United States.
Brig. Gen. Richard L. Frymire, Jr., [redacted] Air National Guard of the United States.
Brig. Gen. James C. Smith, [redacted] Air National Guard of the United States.

To be brigadier general

Col. LeRoy R. Bartman, [redacted] Air Natinoal Guard of the United States.
Col. Ronald E. Chytraus, [redacted], Air National Guard of the United States.
Col. Bobby W. Hodges, [redacted], Air National Guard of the United States.
Col. Leslie D. Kampschror, [redacted], Air National Guard of the United States
Col. Irvin G. Ray, [redacted], Air National Guard of the United States

IN THE ARMY

The following-named officer to be placed on the retired list in grade indicated under the provisions of title 10, United States Code, section 3962:

To be general

Gen. Walter Thomas Kerwin, Jr., [redacted], (Age 60), Army of the United States (major general, U.S. Army).

The following-named officer to be placed on the retired list in grade indicated under the provisions of title 10, United States Code, section 3962:

To be lieutenant general

Lt. Gen. Allen Mitchell Burdett, Jr., [redacted] (age 56), Army of the United States (major general, U.S. Army).

The following-named officer to be assigned to a position of importance and responsibility designated by the President under the provisions of title 10, United States Code, section 3066(a) in grade as follows:

To be lieutenant general

Maj. Gen. William Burns Caldwell, III, [redacted], Army of the United States (major general, U.S. Army).

IN THE AIR FORCE

The following officers for appointment in the Regular Air Force, in the grades indicated, under the provisions of section 8284, title 10, United States Code, with a view to designation under the provisions of section 8067, title 10, United States Code, to perform the duties indicated, and with dates of rank to be determined by the Secretary of the Air Force.

MEDICAL CORPS

To be colonel

Silver, James A., [redacted].

To be major

Suter, Darvin K., [redacted].

The following persons for appointment as Reserve of the Air Force in grades, indicated, under the provisions of section 593, title 10, United States Code, with a view to designation under the provisions of section 8067, title 10, United States Code, to perform the duties indicated.

MEDICAL CORPS

To be colonel

Buckley, Clifford, [redacted].

To be lieutenant colonel

Barker, John D., [redacted].
Denker, Arthur G., [redacted].
Fink, Sidney, [redacted].
Johnson, Matthew T., [redacted].
Manassa, Caroline D., [redacted].
Page, Carey P., [redacted].
Perez-Vega, Arnaldo, [redacted].
Spear, Merritt F., [redacted].
Wooley, Galen S., [redacted].

DENTAL CORPS

To be lieutenant colonel

MacDonald, Gerald B., [redacted].

The following Air Force officer for promotion in the Regular Air Force, under the provisions of chapter 835, title 10, United States Code, as amended. Officer is subject to physical examination required by law.

CAPTAIN TO MAJOR

Line of the Air Force

Bledsoe, Peter T., [redacted].

The following officers for promotion in the Air Force Reserve, under the provisions of Sections 8376 and 593, title 10, United States Code.

MAJOR TO LIEUTENANT COLONEL

Line of the Air Force

Page, John P., [redacted].
Roberts, Donald R., [redacted].

MEDICAL CORPS

Nelson, Wilhma B., [redacted].
Omara, David J., [redacted].

IN THE ARMY

Adam, David A., [redacted].
Adamakos, George L., II, [redacted].
Adams, Dexter C., [redacted].
Adams, Terry R., [redacted].
Aiello, Paul J., [redacted].
Aldich, Stephen R., Jr., [redacted].
Alexander, John W., [redacted].
Alguire, Hal K., [redacted].
Alitz, Curtis J., [redacted].
Allen, Charles D., [redacted].
Allen, Charles W., Jr., [redacted].
Alston, Lloyd M. K., Jr., [redacted].
Alt, Anthony T., Jr., [redacted].
Anastos, Robert P., [redacted].
Anderson, Alan A., [redacted].
Anderson, Darcy G., [redacted].
Anderson, Hartmut W., [redacted].
Anderson, John R., [redacted].
Anderson, Mark D., [redacted].
Anderson, Steven M., [redacted].
Andrew, Brad T., [redacted].
Aquino, Bill R., [redacted].
Arczynski, Daniel L., [redacted].
Arduini, Francis J., [redacted].
Armstrong, Gerard A., [redacted].
Armstrong, John L., Jr., [redacted].
Aude, Steven N., [redacted].
Augustine, Joseph S., [redacted].
Austin, Charles E., [redacted].
Aycock, Allison T., [redacted].
Bacon, William G., [redacted].
Baker, Biff L., [redacted].
Baker, Paul N., [redacted].
Baker, Thomas N., Jr., [redacted].
Bangsboll, Mark H., [redacted].
Banks, Keith A., [redacted].
Bannantine, James M., [redacted].
Bannister, James M., [redacted].
Barclay, James O., III, [redacted].
Barnum, Rodney V., [redacted].
Bartlett, Willard E., Jr., [redacted].
Barto, Joseph C., III, [redacted].
Bartocci, John T., [redacted].
Bartolotta, Charles J., [redacted].
Barton, Thomas G., [redacted].
Basile, Joseph A., Jr., [redacted].
Basilica, John P., Jr., [redacted].
Bassa, Reginald L., Jr., [redacted].
Baugh, Bruce J., [redacted].
Beam, Kevin M., [redacted].
Beam, Tony E., [redacted].
Beatty, William D., [redacted].
Beaudry, Bennett C., [redacted].
Becker, John P., [redacted].
Beckman, Martin D. [redacted].
Bega, Richard M., [redacted].
Belter, Michael L., [redacted].

Avcalade, Maryann G.
Barnes, Barbara L.*
Batchelder, Anne L.
Batjer, Christina*
Beckman, Mary J. N.
Bell, Martha L.
Berger, Linda M.*
Bewley, Julie S.
Bills, Martha R.
Bookwalter, Mary T.
Brand, Donna J.*
Brown, Nancy E.
Brownsberger, Martha M.*
Buck, Caryl E.
Bulfinch, Susan H.*
Buzzell, Sandra G.*
Caddy, Diana R.
Catlin, Jo D.
Cheney, Sally S.
Clark, Susan D.
Crowder, Joann L.*
Currer, Ellen H.
Davis, Susan M.*
Denardo, Janet E.
Denton, Marilyn A.*
Dillahunty, Linda L.
Dorpinghaus, Teresa M.*
Dranchak, Mary A.*
Dunn, June A.
Easton, Lila N.
Einis, Ligita
Elleson, Lynn A.*
Elliott, Karen L. P.
Fessler, Joyce Z.
Fitzhenry, Jane M.
Foley, Patricia G.*
Ford, Leanna Y.
Foster, Kimberly J.
Gandy, Janet
Gernes, Deborah S.
Gerou, Deborah K.*
Gertz, Sharon L.
Gillaspy, Deanna D.
Goldstein, Kathleen M.
Griffith, Elizabeth S.*
Gross, Charlotte R.*
Grover, Gretchen G.
Harder, Jane M.
Henry, Candyce S.
Hill, Patricia A.
Hinson, Gertrude R.*
Hoover, Jeane
Hurley, Ellen J.*
Johnston, Patricia*
Jones, Berniece K.
Junge, Gail E.
Katin, Marjorie R. S.*
Keith, Patricia J.
Kirk, Jennie C.
Krafft, Betty L.
Lin, Elizabeth J.*
Lennon, Bernadine A.
Lyle, Linda M.
Marlinski, Pauline A.
Martinez, Jenny L.*
Martinez, Nancy J.
Masker, Kathyrn B.
McAnally, Nancy D.
McCarley, Annette E.
McCray, Linell R.
McLaughlin, Kathlenn M.*
McNiel, Marguerite E.*
Meyer, Mary J.*
Miller, Jeanne M.*
Monthan, Christina H.*
Moore, Deborah N.*
Moose, Susan L.*
Moss, Alice M.
Mulvehill, Pamela M.*
Murray, Cathy C.
Musil, Jeanne A.
Neal, Johnnie R.
Neel, Electra V.
Nielsen, Dana J.
North, Charlotte J.*
Overhauser, Judy A.
Patton, Pamela J.
Paul, Cynthia S.
Paull, Judith A.
Peterson, Willie B.*
Pierce, Mary F.*
Raby, Marjorie J.
Reifsnyder, Rebecca G.
Reynolds, Janice K. A.
Rhedin, Mary M.*
Richardson, Judith A.
Riley, Gerianne S.
Ritchey, Johnaa P.
Rogers, Cecile R.*
Rollins, Dorothy E.*
Rondeau, Ann E.
Sanders, Janis S.
Schertler, Helen M.
Schneider, Margaret W.
Schneider, Virginia A.
Schonberger, Rose A.
Shaffer, Mary D.
Smith, Janice F.*
Smith, Luanne J.
Sorek, Eddy L.
Soroka, Mariane J.*
Suter, Della J.*
Tarantino, Deborah O.
Thompson, Judy H.
Vittitoe, Barbara J.
Waldmann, Catharine
Ward, Dona W.
Waterman, Heather A.*
Watry, Coleen A.*
Wigfall, Agistine L.
Williams, Beth G.
Wilson, Cynthia B.

The following named lieutenants (junior grade) of the United States Navy for temporary promotion to the grade of lieutenant in the various staff corps, as indicated, pursuant to Title 10, United States Code, Section 5773, subject to qualification therefor as provided by law:

HOUSE OF REPRESENTATIVES—*Monday, May 1, 1978*

The House met at 12 o'clock noon.

The Chaplain, Rev. Edward G. Latch, D.D., offered the following prayer:

Come unto Me all ye that labor and are heavy laden and I will give you rest.—Matthew 11: 28.

Eternal Father of our spirits, we lift our hearts unto Thee who art the source of wisdom, strength, and love, praying that we may respond to the leading of Thy spirit as we set out upon the duties of this day. Keep ever before us the vision of a better day for our Nation and for our world. Help us to continue to work for that time when peace and justice, understanding, and good will shall come to new life in the hearts of our people and of all people everywhere. Strengthen us and sustain us all the day long, and when our work is done grant us peace and rest at eventide.

We pray in the spirit of Him who is the Lord of life. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Without objection, the Journal stands approved.

There was no objection.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Chirdon, one of his secretaries.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Sparrow, one of its clerks, announced that the Senate had passed with amendments in which the concurrence of the House is requested, a bill of the House of the following title:

H.R. 7581. An act to amend the Internal Revenue Code of 1954 to provide that certain income from a nonmember telephone company is not taken into account in determining whether any mutual or cooperative telephone company is exempt from income tax.

The message also announced that the Senate had passed bills of the following titles, in which the concurrence of the House is requested:

S. 1819. An act to establish alternatives to criminal prosecution for certain persons charged with offenses against the United States, and for other purposes;

S. 2016. An act to establish fees for services performed by U.S. marshals;

S. 2049. An act to establish fees and allow per diem and mileage expenses for witnesses before U.S. courts;

S. 2072. An act to amend the Jury Selection and Service Act of 1968, as amended, to make the excuse of prospective jurors from Federal jury service on the grounds of distance from the place of holding court contingent upon a showing of hardship on an individual basis;

S. 2074. An act to amend the Jury Selection and Service Act of 1968, as amended, with respect to the selection and qualification of jurors, and to extend to all jurors in the United States district courts the provisions of title 5, United States Code, applicable to Federal employee service-related injuries.

S. 2075. An act to amend the Jury Selection and Service Act of 1968, as amended, by revising the section on fees of jurors and by providing for a civil penalty and injunctive relief in the event of a discharge or threatened discharge of an employee by reason of such employee's Federal jury service;

S. 2411. An act to amend chapter 215 of title 18, United States Code, to authorize payment of transportation expenses for persons released from custody pending their appearance to face criminal charges before that court, any division of that court, or any court of the United States in another Federal judicial district;

S. 2616. An act to amend the Independent Safety Board Act of 1974, as amended, to authorize additional appropriations; and

S. 2789. An act to provide authorization for appropriations for the Office of Rail Public Counsel, and for other purposes.

CONSENT CALENDAR

The SPEAKER. This is Consent Calendar Day. The Clerk will call the first bill on the Consent Calendar.

RECALCULATING THE RETIRED PAY OF CERTAIN SENIOR ENLISTED ADVISERS OF THE MARINE CORPS

The Clerk called the bill (H.R. 10343) to provide for recalculation of the retired pay of individuals who served as sergeant major of the Marine Corps before December 16, 1967.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. McKAY. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Utah?

There was no objection.

PROVIDING FOR CONVEYANCE OF CERTAIN LANDS IN NEVADA TO THE UNIVERSITY OF NEVADA

The Clerk called the Senate bill (S. 917) to provide for conveyance of certain lands adjacent to the Gund Ranch, Grass Valley, Nev., to the University of Nevada.

There being no objection, the Clerk read the Senate bill, as follows:

S. 917

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Interior is authorized to convey to the University of Nevada upon its application the following lands located in the State of Nevada, or any portion thereof, under the provisions of the Act of June 14, 1926, as amended (44 Stat. 741, as amended; 43 U.S.C. 869), but notwithstanding the acreage limitations in subsection (b)(ii) or the limitation on disposition in the last sentence of subsection (c) of the first section of that Act:

1. East half southwest quarter, section 7, township 24 north, range 48 east, 80 acres;

2. Southeast quarter northwest quarter, section 7, township 24 north, range 48 east, 40 acres;

3. South half northeast quarter, section 7, township 24 north, range 48 east, 80 acres;

4. South half northwest quarter, section 8, township 24 north, range 48 east, 80 acres;

5. South half southeast quarter, section 8, township 24 north, range 48 east, 80 acres;

6. West half, section 16, township 24 north, range 48 east, 320 acres;

7. West half southeast quarter, section 16, township 24 north, range 48 east, 80 acres;

8. Southwest quarter northeast quarter, section 16, township 24 north, range 48 east, 40 acres;

9. Entire, section 17, township 24 north, range 48 east, 640 acres;

10. Northeast quarter northwest quarter, section 18, township 24 north, range 48 east, 40 acres;

11. North half northeast quarter, section 18, township 24 north, range 48 east, 80 acres;

12. Northwest quarter northwest quarter, section 20, township 24 north, range 48 east, 40 acres;

13. East half northwest quarter, section 20, township 24 north, range 48 east, 80 acres;

14. East half, section 20, township 24 north, range 48 east, 320 acres;

15. West half, section 21, township 24 north, range 48 east, 320 acres;

16. West half northeast quarter, section 21, township 24 north, range 48 east, 80 acres;

17. Northwest quarter southeast quarter, section 21, township 24 north, range 48 east, 40 acres;

18. West half, section 28, township 24 north, range 48 east, 320 acres;

19. East half section 29, township 24 north, range 48 east, 320 acres;

20. South half northwest quarter, section 4, township 23 north, range 48 east, 80 acres;

21. Southwest quarter, section 4, township 23 north, range 48 east, 160 acres;

22. West half southwest quarter, section 5, township 23 north, range 48 east, 80 acres;

23. Southwest quarter northwest quarter, section 5, township 23 north, range 48 east, 40 acres;

24. East half southeast quarter, section 7, township 23 north, range 48 east, 80 acres;

25. West half west half, section 8, township 23 north, range 48 east, 160 acres;

26. East half east half, section 8, township 23 north, range 48 east, 160 acres;

27. Southwest quarter, section 9, township 23 north, range 48 east, 160 acres;

28. South half northwest quarter, section 9, township 23 north, range 48 east, 80 acres;

29. Northwest quarter, northwest quarter, section 9, township 23 north, range 48 east, 40 acres;

30. West half, section 16, township 23 north, range 48 east, 320 acres;

31. East half east half, section 17, township 23 north, range 48 east, 160 acres;

32. West half west half, section 17, township 23 north, range 48 east, 160 acres;

33. East half, section 18, township 23 north, range 48 east, 320 acres;

34. Lots 3 and 4, east half, southwest quarter, section 19, township 23 north, range 48 east, 110.79 acres;

35. West half southeast quarter, section 19, township 23 north, range 48 east, 80 acres;

36. Northeast quarter, section 19, township 23 north, range 48 east, 160 acres;

37. West half northwest quarter, section 20, township 23 north, range 48 east, 80 acres;

38. East half southwest quarter, section 20, township 23 north, range 48 east, 80 acres;

39. Southeast quarter, section 20, township 23 north, range 48 east, 180 acres;

40. East half northeast quarter, section 20, township 23 north, range 48 east, 80 acres;

41. West half west half, section 21, township 23 north, range 48 east, 160 acres;

42. Northeast quarter, section 29, township 23 north, range 48 east, 160 acres;

43. West half southeast quarter, section 29, township 23 north, range 48 east, 80 acres;

44. West half, section 29, township 23 north, range 48 east, 320 acres;

45. Entire, section 30, township 23 north, range 48 east, 542.28 acres;

46. Entire, section 31, township 23 north, range 48 east, 543.44 acres; and

47. Northwest quarter, section 32, township 23 north, range 48 east, 160 acres.

SEC. 2. No conveyance shall be made under this Act unless application therefor by the University of Nevada is received by the Secretary of the Interior within one year of the effective date of this Act.

SEC. 3. The land conveyed by this Act shall be used for the establishment and operation of a rangeland research station and for the conduct of associated experimental range management and improvement programs. The patent or other document of conveyance issued pursuant to this Act shall incorporate the limitations set forth in this section and shall provide that title to the land will revert to the United States if the land is used for any other purpose.

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

PROVIDING FOR THE REAPPOINTMENT OF A. LEON HIGGINBOTHAM, JR., AS A CITIZEN REGENT OF THE BOARD OF REGENTS OF THE SMITHSONIAN INSTITUTION

The Clerk called the Senate joint resolution (S.J. Res. 106) to provide for the reappointment of A. Leon Higginbotham, Jr., as a citizen regent of the Board of Regents of the Smithsonian Institution.

There being no objection, the Clerk read the Senate joint resolution, as follows:

S.J. RES. 106

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the vacancy in the Board of Regents of the Smithsonian Institution, of the class other than Members of Congress, which will occur by the expiration of the term of A. Leon Higginbotham, Junior, of Pennsylvania on May 11, 1978, be filled by the reappointment of the present incumbent for the statutory term of six years.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

PROVIDING FOR THE REAPPOINTMENT OF JOHN PAUL AUSTIN AS A CITIZEN REGENT OF THE BOARD OF REGENTS OF THE SMITHSONIAN INSTITUTION

The Clerk called the Senate joint resolution (S.J. Res. 107) to provide for the reappointment of John Paul Austin as a citizen regent of the Board of Regents of the Smithsonian Institution.

There being no objection, the Clerk read the Senate joint resolution, as follows:

S.J. RES. 107

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the vacancy in the Board of Regents of the Smithsonian Institution, of the class other than Members of Congress, which will occur by the expiration of the term of John Paul Austin of Georgia on May 11, 1978, be filled

by the reappointment of the present incumbent for the statutory term of six years.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

PROVIDING FOR THE APPOINTMENT OF ANNE LEGENDRE ARMSTRONG AS A CITIZEN REGENT OF THE BOARD OF REGENTS OF THE SMITHSONIAN INSTITUTION

The Clerk called the Senate joint resolution (S.J. Res. 108) to provide for the appointment of Anne Legendre Armstrong as citizen regent of the Board of Regents of the Smithsonian Institution.

There being no objection, the Clerk read the Senate joint resolution, as follows:

S.J. RES. 108

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the vacancy in the Board of Regents of the Smithsonian Institution, of the class other than Members of Congress, caused by the resignation of Robert Francis Goheen of New Jersey on May 14, 1977, be filled by the appointment of Anne Legendre Armstrong of Texas for the statutory term of six years.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

AUTHORIZING SECRETARY OF THE TREASURY TO DESIGNATE AN ASSISTANT SECRETARY TO SERVE IN HIS PLACE AS A MEMBER OF THE LIBRARY OF CONGRESS TRUST FUND BOARD

The Clerk called the Senate bill (S. 2220) to authorize the Secretary of the Treasury to designate an Assistant Secretary to serve in his place as a member of the Library of Congress Trust Fund Board.

There being no objection, the Clerk read the Senate bill, as follows:

S. 2220

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the first paragraph of the first section of the Act entitled "An Act to create a Library of Congress Trust Fund Board, and for other purposes," approved March 3, 1925 (2 U.S.C. 154), is amended by inserting after "Secretary of the Treasury" the following: "(or an Assistant Secretary designated in writing by the Secretary of the Treasury)".

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

The SPEAKER. This concludes the call of the Consent Calendar.

ARMS SALES RESOLUTIONS

(Mr. LONG of Maryland asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LONG of Maryland. Mr. Speaker, I have today introduced a concurrent resolution disapproving the proposed "package" of sales of aircraft to the Middle East at this moment while peace negotiations are hanging in the balance.

This arms package would export additional fear into an area already bristling with distrust. It would break with established congressional policy not to arm our friends against each other.

It would distort priorities by selling expensive arms to an area that has a far greater need for economic development.

It would upset the balance by making planes available to the Arabs who can get arms from several different suppliers, whereas Israel can buy arms only from the United States.

There will be plenty of time later to reconsider the merits of each individual sale after progress has been made in reaching a negotiated settlement. For now, let us give the nations of the Middle East an opportunity—opened up by the Sadat initiative—to achieve peace without further infusions of tension.

REREFERRAL OF PARAGRAPH (1) OF SECTION 351 OF H.R. 11392 TO COMMITTEE ON ARMED SERVICES

Mr. PRICE. Mr. Speaker, I ask unanimous consent that paragraph (1) of section 351 of H.R. 11392 to authorize appropriations to the Department of Energy and the Federal Energy Regulatory Commission pursuant to section 660 of the Department of Energy Organization Act, and for other purposes, which was initially referred solely to the Committee on Interior and Insular Affairs, be rereferred solely to the Committee on Armed Services.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

COMMUNICATION FROM THE CLERK OF THE HOUSE

The SPEAKER laid before the House the following communication from the Clerk of the House of Representatives:

WASHINGTON, D.C.,
April 28, 1978.

Hon. THOMAS P. O'NEILL, Jr.,
The Speaker, House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: I have the honor to transmit herewith a sealed envelope from the White House, received in the Clerk's Office at 2:58 p.m. on Friday, April 28, 1978, and said to contain a message from the President wherein he transmits for the consideration of the Congress a proposed constitution for the Territory of Guam.

With kind regards, I am,

Sincerely,

EDMUND L. HENSHAW, Jr.,
Clerk, House of Representatives.

PROPOSED CONSTITUTION FOR THE TERRITORY OF GUAM—A MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER laid before the House the following message from the President of the United States; which was read, and together with the accompanying papers, referred to the Committee on Interior and Insular Affairs:

To the Congress of the United States:

In accordance with the provisions of Section 5 of the Act of October 21, 1976 (Public Law 94–584), I am hereby transmitting for the consideration of the Congress a proposed constitution for the Territory of Guam. The constitution, drafted by a territorial constitutional convention, was officially submitted to the Secretary of the Interior, who accepted it on my behalf, by the Honorable Ricardo J. Bordallo, Governor of Guam, on March 1, 1978.

Public Law 94–584 requires that I submit the constitution to the Congress, along with my comments. I am confident that the Congress will share my belief that the basic principles incorporated into the constitution provide a firm foundation upon which the people of Guam can assume greater responsibilities of local self-government in political union with the United States. Because it is their constitution, and must be respected as such, I shall confine my comments to those aspects of the document which relate directly and significantly to the territorial-Federal relationship. Accordingly, I would like to bring to the attention of the Congress the following aspects of the proposed constitution:

—Contrary to the express requirement of Section 2(b)(1) of Public Law 94–584 (the Enabling Act), the constitution does not explicitly recognize the sovereignty of the United States over Guam or the supremacy of its laws, a point noted by the Departments of State, Justice, and Interior in their reviews of the document. Accordingly, I ask the Congress to consider complications which could arise with respect to future claims of sovereignty and supremacy should it decline to take any of the corrective actions prescribed in Section 5 of the Enabling Act.

—Article IV, Section 1, of the constitution vests in the elected Governor responsibility for the faithful execution of the Constitution and laws of the United States applicable to Guam. In view of the Supreme Court's decision in *Buckley* v. *Valeo* (424 U.S. 1) that persons who enforce the laws of the United States must be appointed in the constitutionally prescribed manner, I ask the Congress to give careful consideration to this provision. Moreover, I suggest to the Congress that responsibility for the execution of Federal law is not a matter of local self-government and invite the Congress to consider whether the inclusion of such a clause, even if deemed constitutionally permissible, could lead to friction between the Governor and the Federal Government.

—Article V, Section 4(a), of the constitution provides for legislative apportionment on the basis of the number of registered voters in each district. I call to the attention of the Congress of the Supreme Court's admonition in *Burns* v. *Richardson* (384 U.S. 73) and *Ely* v. *Klahr* (403 U.S. 108) that the use of voter registration as a basis may perpetuate under representation of groups constitutionally entitled to participate in the electoral process and is permissible only if it produces a distribution of legislators not substantially different from that which would have resulted from the use of a permissible population basis.

—Article X, Section 4, of the constitution would amend the provision in Section 11 of the Organic Act of Guam (48 U.S. 1423a), which imposes public debt limitations on the territory. In light of the territory's fragile local economy and the continued financial responsibility of the Federal Government for Guam, I ask the Congress to give careful consideration to this provision.

In view of its responsibility under the Territories Clause of the United States Constitution, the Congress may wish to review the proposed constitution for Guam on bases other than just the effect of its provisions on the territorial-Federal relationship to which I have limited my comments.

Specifically, the appropriate committees of the Congress may wish to examine whether certain provisions of the Guam constitution are drafted with sufficient clarity to avoid the type of litigation that could preclude effective government. For example, the elevation to constitutional status of certain rights in Article II of the proposed constitution could cause such a result. Under our own system, many of these same rights are provided for by statute, not by the Constitution itself.

Also, the amendment procedure contained in Article XIV of the proposed constitution does not provide for review by the Congress, a requirement which does pertain to the basic document. The Congress may wish to consider the friction which could arise between Guam and the Federal Government should the constitution be amended in a way which would conflict with United States law.

Accordingly, I have directed the Attorney General and the Secretary of the Interior to provide the appropriate committees of both Houses with such technical advice and assistance as may be required. Both Departments have conducted thorough analyses of the proposed constitution and can offer the Congress additional information and recommended changes in language should the Congress choose to take any of the corrective actions prescribed in Section 5 of the Enabling Act.

I trust these comments will be of use to the Congress in its review.

JIMMY CARTER.

THE WHITE HOUSE, *April 28, 1978.*

RECIPROCAL FISHERIES AGREEMENT FOR 1978 BETWEEN UNITED STATES AND CANADA—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 95–329)

The SPEAKER laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, referred to the Committee on Merchant Marine and Fisheries and ordered to be printed:

To the Congress of the United States:

I transmit herewith a Reciprocal Fisheries Agreement for 1978 between the Government of the United States and the Government of Canada, effected by an exchange of diplomatic notes dated April 10 and April 11, 1978.

The Agreement, which continues through 1978 the provisions of the 1977 Reciprocal Fisheries Agreement with a few modifications, protects important United States interests in our fisheries off Canada and maintains the opportunity for conclusion of long-term maritime arrangements on boundaries, hydrocarbons and fisheries resources, including salmon, between the United States and Canada.

As was the case with the 1977 Reciprocal Fisheries Agreement, positive Congressional action is required to bring the 1978 Agreement into force. I recommend that the Congress give favorable consideration to the Agreement at an early date to establish the legal basis for the continuation of reciprocal United States-Canadian fisheries during 1978.

JIMMY CARTER.

THE WHITE HOUSE, *May 1, 1978.*

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. Pursuant to the provisions of clause 3(b) of rule XXVII, the Chair announces that he will postpone further proceedings today on each motion to suspend the rules on which a recorded vote or the yeas and nays are ordered, or on which the vote is objected to under clause 4 of rule XV.

After all motions to suspend the rules have been entertained and debated and after those motions, to be determined by "nonrecord" votes have been disposed of, the Chair will then put the question on each motion on which the further proceedings were postponed.

PACIFIC FISHERIES DEVELOPMENT ACT AUTHORIZATION

Mr. LEGGETT. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 11657) to authorize appropriations to carry out the Central, Western, and South Pacific Fisheries Development Act until the close of fiscal year 1983, as amended.

The Clerk read as follows:

H.R. 11657

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 3 of the Central, Western, and South Pacific Fisheries Development Act (16 U.S.C. 758e–1) is amended—

(1) by inserting immediately after the word "Interior," the following: "the Secretary of State,"; and

(2) by striking out the words "Samoa and Guam," and inserting in lieu thereof the following: "Samoa, Guam, and the Commonwealth of the Northern Marianas,".

SEC. 2. Section 7 of the Central, Western, and South Pacific Fisheries Development Act (16 U.S.C. 758e–5) is amended—

(1) by striking out "and" immediately after "$3,000,000" the first place it appears therein; and

(2) by striking out "$3,000,000," the second place it appears therein and inserting in lieu theerof the following: "$6,000,000, and for each of fiscal years 1980, 1981, 1982, and 1983, the sum of $6,000,000,".

SEC. 3. This Act shall take effect October 1, 1978.

The SPEAKER. Is a second demanded?

Mr. FORSYTHE. Mr. Speaker, I demand a second.

The SPEAKER. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER. The gentleman from California (Mr. LEGGETT) and the gentleman from New Jersey (Mr. FORSYTHE) will be recognized for 20 minutes each.

The Chair recognizes the gentleman from California (Mr. LEGGETT).

Mr. LEGGETT. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R. 11657, the purpose of which is to increase and extend the authorization of appropriations available to the Secretary of Commerce to carry out the Central, Western, and South Pacific Fisheries Development Act until the close of fiscal year 1983.

At present, $3 million is authorized to be appropriated between July 1, 1976 and September 30, 1979, to carry out the purposes of the act. H.R. 11657, as reported from the Committee on Merchant Marine and Fisheries, would increase that $3 million for the same period to $6 million. It would also authorize $6 million to be appropriated for each of fiscal years 1980, 1981, 1982, and 1983 to implement the act.

Mr. Speaker, in the past the Department of Commerce has financed the Central, Western, and South Pacific fisheries development program with funds under the Saltonstall-Kennedy Act which provides a temporary funding source utilized for short-term fishery development projects. The funding of this program must be placed on a more permanent basis and substantially increased in order to fully realize the potential benefits to the Pacific Island areas, the U.S. tuna industry, and the Nation. An additional $27 million for this purpose would be provided by the appropriations authorized in H.R. 11657.

Mr. Speaker, the skipjack tuna resource of the Central, Western, and South Pacific is a substantially underutilized fishery. Reliable sources estimate that the maximum sustainable yield of skipjack tuna in this region ranges between 800,000 and 1,000,000 tons annually.

However, in 1976, the world catch of skipjack tuna in this area was only 290,000 tons. Of that amount, 200,000 tons was taken by vessels of Japan; 25,000 tons by vessels of Indonesia; 40,000 tons by vessels of the Philippines, and

6,000 tons by vessels of Korea. Insignificant amounts are taken in this region by U.S. vessels but the potential for a new and expanded tuna fishery in this area is tremendous. H.R. 11657 hopefully will provide the necessary funds in order to make this potential a reality.

Mr. Speaker, H.R. 11657 has the strong support of the U.S. tuna industry, the State of Hawaii, the Governors of American Samoa and Guam, and the newly created Commonwealth of the Northern Mariana Islands.

H.R. 11657 was unanimously reported by the Committee on Merchant Marine and Fisheries and I urge its prompt passage.

● Mr. MURPHY of New York. Mr. Speaker, H.R. 11657 would make available the necessary funds to continue the program for the development of the tuna fishery resources in the central, western, and South Pacific Ocean through fiscal year 1983.

This legislation comes at an especially critical period in the 75-year history of the American tuna industry. Over the last several years the American tuna fleet has struggled to eliminate incidental dolphin mortality and comply with regulations promulgated under the Marine Mammal Protection Act. It now appears that these efforts have been successful. Every vessel in the fleet is now employing the special fine mesh net combined with the backdown procedure. This operation prevents the dolphins from becoming entangled and drowning, thus drastically reducing dolphin mortality. As a result of these efforts, no dolphin population is threatened and none is likely to be.

Ironically, just as the obstacles presented by the Marine Mammal Protection Act appear to be behind the fleet, a new and potentially more damaging threat appears to be facing it. The new challenge has come in the form of certain Latin American claims to jurisdiction over the tuna resources landed off their coast. In fact, just recently, Costa Rica and Mexico each seized two American tuna vessels more than 12 miles off its coastal shores.

In addition, both Mexico and Costa Rica have made it very clear that they will not continue as members of the Inter-American Tropical Tuna Commission under the current convention. They wish to renegotiate the convention to guarantee them a larger percentage of the eastern Pacific tuna resource. I am hopeful that the United States can reach an accommodation with these nations. Nevertheless, if the United States is to continue to possess the world's greatest tuna fleet, it is imperative that we develop additional tuna fishing grounds outside of the Eastern Pacific Ocean. This legislation would attempt to accelerate exactly this kind of development.

Mr. Speaker, this bill would do much more than just assist the development of additional tuna fishing areas, however, it would also benefit the economies of the U.S. affiliated Pacific islands. Today, most of these islands depend primarily on an active tourist industry. H.R. 11657 would encourage the expansion of the existing fishing industry in these areas, and the development of new employment opportunities in fishery support industries.

In fact, it has been estimated that as much as 155,000 tons of tuna annually could be taken by U.S. boats operating in this region. Such a catch would provide approximately 4,000 new cannery jobs, involving up to 850 additional fishermen, and generating revenues of over $680 million throughout the economy.

Mr. Speaker, when checking with the Budget Committee, prior to scheduling H.R. 11657 for a vote, I was advised that the bill was in technical violation of section 402(a) of the Budget Act. Language to correct this deficiency has been agreed to by the Budget Committee and has been included in the bill, as amended. Attached to my statement is a brief explanation of the language added to the bill and the reasons therefore.

I now yield such time as he may consume to the Gentleman from California, Congressman LEGGETT, whose Subcommittee has jurisdiction over our valuable tuna fishery resources.

The attachment follows:

ATTACHMENT

Section 402(a) of the Budget Act provides that it shall not be in order in either the House or the Senate to consider any bill or resolution which, directly or indirectly, authorizes the enactment of new budget authority for a fiscal year, unless that bill or resolution is reported in the House or the Senate, as the case may be, on or before May 15 preceding the beginning of such fiscal year.

Section 2(2) of the bill would increase by $3 million the amount authorized to be appropriated for the period beginning July 1, 1976, and ending September 30, 1979, to carry out the purpose of this Act. This section would authorize the enactment of new budget authority for fiscal years 1977, 1978, and 1979 and since it would become effective upon the date of enactment, it would be in violation of section 402(a) of the Budget Act and subject to a point of order because the bill was not reported prior to May 15, 1975.

To correct this violation of section 402(a), a new section 3 was added to the bill to provide that it would take effect on October 1, 1978.

The net affect of this language is to eliminate the section 402(a) violation and to make it clear that the increase in the appropriation authorization applies to fiscal year 1979 only, which is consistent with the intent of the Committee, as spelled out in the Committee Report on the bill.●

Mr. FORSYTHE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R. 11657 which extends the authorization for the Central, Western, and South Pacific Fisheries Development Act. This important act authorizes the Secretary of Commerce to implement a program for the development of the tuna and other latent fishery resources of the far Pacific.

A major thrust of this program is an assessment of the potential for developing a tuna fishery in this area. It is estimated that the skipjack tuna resource of this area is between 800,000 and 1 million metric tons. However, effective methods of harvesting this resource under the difficult conditions of the far Pacific must be designed and demonstrated before a viable commercial fishery can be established.

The Pacific Tuna Development Foundation (PTDF) has ben vested with responsibility for implementing a development program under a cooperative agreement between the Secretary of Commerce, the island nations of the area, and the U.S. tuna industry. In 1977, the PTDF prepared and initiated a 3-year tuna development program designed to meet the various needs of the U.S. tuna industry and the islands. Some of the major accomplishments of this program have been:

The development of a special purse seine net which is suitable for use in the far Pacific.

A demonstration project to determine the effectiveness of live-pond-reared topminnows as a tuna bait source,

An evaluation of the potential of other fishery resources in the district of Truk, and

The construction of specialized tanks to transport live anchovies from California to Hawaii for use in the Hawaiian bait boat fishery.

Despite these accomplishments, more can be done; indeed, more must be done. An expanded U.S. tuna industry in the Central, Western, and South Pacific Ocean would provide substantial economic benefits to the islands in the area. In fact, under the United Nations Charter, the United States is obligated to promote the economic advancement of the inhabitants of its island territories in the Far Pacific. Each of these islands, including Guam, American Samoa, the Northern Mariana Islands and the Trust Territory of the Pacific, have immediate needs for increased employment and industrial growth. At present, the island economies are based predominantly upon fisheries, tourism, and Federal employment. Since commercial fishing activity is at a relatively low level at the current time, fishery development efforts offer one of the major opportunities for economic development in the islands. The development of an expanded tuna fishery in this region will cause a development of support facilities such as transshipment, cold storage, fuels and supplies, and live bait.

Development of the tuna resources in the Central and Western Pacific could also have the beneficial effect of reducing the U.S. seafood balance of payments deficit. In 1976, the total amount of tuna consumed in the United States was 631,000 metric tons, of which 52 percent was imported. An expanded domestic supply of tuna from the Far Pacific would substantially reduce the level of U.S. tuna imports.

Despite the need for a fishery development program and notwithstanding the significant benefits which such a program would provide, no moneys have ever been appropriated pursuant to the Central, Western, and South Pacific Fisheries Development Act. Instead, this program has been financed by contributions from the U.S. tuna industry and the islands, and from funds made available pursuant to the Saltonstall-Kennedy program. Unfortunately, the level of funding which has been available has been relatively low. If the full potential of the fishery resources of the Far Pacific is to be realized, then the program must be fully funded.

Mr. Speaker, H.R. 11657 would authorize the appropriation of adequate funds for this important program, and I urge the adoption of this legislation.

Mr. Speaker, I have no further requests for time.

Mr. LEGGETT. Mr. Speaker, I have no other requests for time.

The SPEAKER. The question is on the motion offered by the gentleman from California (Mr. LEGGETT) that the House suspend the rules and pass the bill H.R. 11657, as amended.

The question was taken.

Mr. MOTTL. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER. Pursuant to clause 3 of rule XXVII, and the Chair's prior announcement, further proceedings on this motion will be postponed.

GENERAL LEAVE

Mr. LEGGETT. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just considered, H.R. 11657.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

CALL OF THE HOUSE

Mr. LEGGETT. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The call was taken by electronic device, and the following Members failed to respond:

[Roll No. 261]

Ambro	Gammage	Nix
Andrews, N.C.	Garcia	Oakar
Archer	Gonzalez	Ottinger
Armstrong	Goodling	Patten

Fraser	Murphy, N.Y.	
Frey	Nichols	

The SPEAKER pro tempore (Mr. BARNARD). On this rollcall 302 Members have recorded their presence by electronic device, a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

HUBERT H. HUMPHREY FELLOWSHIP AT THE WOODROW WILSON INTERNATIONAL CENTER

Mr. NEDZI. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 10392) to establish a Hubert H. Humphrey Fellowship in Social and Political Thought at the Woodrow Wilson International Center for Scholars at the Smithsonian Institution and to establish a trust fund to provide a stipend for such fellowship.

The Clerk read as follows:

H.R. 10392

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Woodrow Wilson Memorial Act of 1968 (20 U.S.C. 80e–80j) is amended—

(1) by redesignating sections 5 through 7 as sections 6 through 8, respectively, and

(2) by inserting after section 4 the following new section:

"HUBERT H. HUMPHREY FELLOWSHIP IN SOCIAL AND POLITICAL THOUGHT

"SEC. 5. (a) There is hereby established in the Center a Hubert H. Humphrey Fellowship in Social and Political Thought.

"(b) Each year the Board shall select a distinguished scholar, statesman, or cultural figure, from the United States or abroad, to serve at the Center for a period of up to one year as the Hubert H. Humphrey Fellow in Social and Political Thought (hereinafter in this section referred to as the "Humphrey Fellow"). Each Humphrey Fellow shall receive compensation in an amount, determined by the Board, not to exceed the annual income of the trust fund established under subsection (d).

"(c) Each Humphrey Fellow shall—

"(1) deliver a Hubert H. Humphrey Memorial Lecture; and

"(2) carry out such projects and work as are consistent with the Humphrey Fellowship.

The Board shall provide for the publication and dissemination of the Hubert H. Humphrey Memorial Lectures.

"(d)(1) There is hereby established in the Treasury of the United States a trust fund to be known as the Hubert H. Humphrey Fellowship Trust Fund (hereinafter in this section referred to as the 'fund'). The Secretary of the Treasury shall deposit in the fund such sums as may be appropriated to the fund under subsection (f) and shall receive into the Treasury and deposit into the fund such sums as may be received as contributions to the fund.

"(2) The Secretary of the Treasury shall invest amounts in the fund in public debt securities with maturities suitable for the needs of the funds and bearing interest at prevailing market rates; and the interest on such investments shall be credited to and form a part of the fund.

"(3) Notwithstanding section 4(a)(2), any gift, bequest, or devise of money, securities or other property for the benefit of the Hubert H. Humphrey Fellowship in Social and Political Thought received by the Board shall, upon receipt, be deposited into the fund as provided by paragraph (1).

"(e) The Secretary of the Treasury shall pay to the Board from amounts received as interest on investments under subsection (d)(2) such sums as the Board determines are necessary and appropriate for the purposes of the Humphrey Fellowship.

"(f) There is authorized to be appropriated to the fund for the fiscal year beginning October 1, 1978, $1,000,000.".

SEC. 2 Section 4(a)(2) of the Woodrow Wilson Memorial Act of 1968 (20 U.S.C. 80g(a)(2)) is amended by striking out "devices" and inserting in lieu therof "devises".

The SPEAKER pro tempore. Is a second demanded?

Mr. FRENZEL. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

Mr. BAUMAN. Mr. Speaker, reserving the right to object, to whom does the second go?

The SPEAKER pro tempore. The gentleman from Minnesota (Mr. FRENZEL).

Mr. BAUMAN. Mr. Speaker, is the gentleman from Minnesota opposed to the bill?

Mr. FRENZEL. Mr. Speaker, the gentleman from Minnesota is in favor of the bill.

Mr. BAUMAN. Mr. Speaker, the gentleman from Maryland is opposed to the bill.

The SPEAKER pro tempore. Does the gentleman from Maryland demand a second?

Mr. BAUMAN. I do, Mr. Speaker.

The SPEAKER, pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Michigan (Mr. NEDZI) will be recognized for 20 minutes, and the gentleman from Maryland (Mr. BAUMAN) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Michigan (Mr. NEDZI).

Mr. NEDZI. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, in testimony which was presented to the Subcommittee on Libraries and Memorials on this particular piece of legislation, Dr. Samuel Beer of Harvard University described Hubert Humphrey as a man of action, powerfully oriented by thought. He was one of the founders of the Woodrow Wilson International Center for Scholars, so it is fitting that this gesture be made within that Center.

The bill establishes a Hubert H. Humphrey Fellowship in Social and Political Thought at the Woodrow Wilson International Center for Scholars at the Smithsonian Institution. The Center is an appropriate home for the fellowship and the fellow, not only because the Center is dedicated to strengthening the bond between the world of scholarship and the world of public affairs, but because Hubert Humphrey was intimately involved with the Center's beginning as its first Chairman of the Board of Trustees.

The Humphrey Fellowship is designed to be awarded annually to a distinguished scholar, statesman, or cultural figure selected by the Board of the Center.

Each Humphrey fellow will serve for a period of up to 1 year. and deliver a Hubert H. Humphrey memorial lecture. The fellow will perform projects and work at the center consistent

with the fellowship, but will be required to make a full-time commitment to the fellowship.

As for the mechanism of funding the fellowship, the bill establishes in the Treasury a Hubert H. Humphrey fellowship trust fund to which $1 million is authorized to be appropriated. Additional gifts received by the Board will also be deposited in the fund. All of the amounts in the fund will be invested by the Secretary in public debt securities.

Precedent for the establishment of this kind of fund is the Truman Scholarship Fund, established in the Treasury in 1975, to which $30 million was appropriated.

The interest on public debt securities is anticipated to average around 6.3 percent. Interest earned will be used to pay the stipend for the fellow, and other costs of the fellowship, including travel and health insurance, as well as clerical support and office services for the fellow will also be paid for from the interest.

Mr. YATES. Mr. Speaker, will the gentleman yield for a question?

Mr. NEDZI. I yield to the gentleman from Illinois.

Mr. YATES. Mr. Speaker, approximately 2 weeks ago the Congress approved and the President signed into law last year a bill passed by the Congress which authorized and appropriated the sum of $5 million for the University of Minnesota in the name of Hubert H. Humphrey.

I wonder what the difference between that legislation and this is, what the difference between the purpose of that legislation and this is?

Certainly no one has greater admiration and respect for Hubert H. Humphrey. He was a very close friend of mine and I am in favor of remembering his tremendous contribution to our country—but I wonder why the establishment of the two funds.

Mr. NEDZI. Mr. Speaker, I am glad the gentleman asked the question, because this particular legislation provides for something unique. There is absolutely no connection between this particular fellowship and the gift to the University of Minnesota which we passed last year. This sets up a fellowship within the Woodrow Wilson Center for scholars.

Mr. YATES. Mr. Speaker, if the gentleman will yield further, what happens at the University of Minnesota with regard to the $5 million which is the gift of our Government to that university? Is not that fund to be used for scholarships and fellowships, too?

Mr. NEDZI. In a sense, it is. The Minnesota Institute is going to train students, as I understand it, in careers in public administration.

This fellowship, on the other hand, is going to be open to mature scholars and statesmen who have made distinguished contributions to the field of science and political affairs.

Mr. YATES. I thank the gentleman.

Mr. NEDZI. Mr. Speaker, I yield to the chairman of the committee, the gentleman from New Jersey (Mr. THOMPSON).

Mr. THOMPSON. Mr. Speaker, in answer to the question of the gentleman from Illinois, this proposal was made well in advance of the Minnesota proposal, which is essentially for undergraduate study and study at the master's level. The reason for this is that the fellowships under the provisos of this legislation are to be put in the Woodrow Wilson Center for International Studies, which is essentially a postdoctoral program and much more limited, although the choice of the selection of the scholars resident in that institute, which are scholars from all over the world, is really radically different from any other institution of its type in the United States.

Mr. YATES. Mr. Speaker, will the gentleman yield?

Mr. NEDZI. I yield to the gentleman from Illinois.

Mr. YATES. Mr. Speaker, I am very much aware of the Woodrow Wilson Center, because it appears before my Appropriations Subcommittee for its funding.

I have the impression that fellowships could now be granted by that institution in the name of Hubert H. Humphrey without the addition of the endowment being set up in this bill; is that true?

Mr. THOMPSON. Not in such an amount as is comtemplated for this particular chair, if we may call it that, at the Institute.

The history of this is that Senator Humphrey and I were the original sponsors of the legislation which created that institution. I would suppose that they could say to one of the fellows right there now that he is the Dwight D. Eisenhower fellow, or whatever, but that is not what this contemplates.

Mr. YATES. The fundamental difference is that this would create an endowment fund for $1 million; is that correct?

Mr. THOMPSON. Yes.

Mr. YATES. Mr. Speaker, apart from that figure, I have the impression that the Woodrow Wilson Center Board which controls the Woodrow Wilson Center could by appropriate resolution set up a Hubert Humphrey scholarship and could assign one of the graduates to be an appropriate fellow for the purpose of social and political thought, which is, I think, the purpose of this bill.

I only want the RECORD to express the question in my own mind, which is whether, having created a $5 million fund to the University of Minnesota, we ought to again be creating a $1 million endowment at this time in the name of our good friend, Hubert Humphrey.

Mr. BEDELL. Mr. Speaker, will the gentleman yield?

Mr. NEDZI. I yield to the gentleman from Iowa.

Mr. BEDELL. Mr. Speaker, this, as I understand it, is a $1 million grant, and the money would be reinvested in Government securities, so that we could expect to make something on the order of between 6 and 7 percent on the investment; is that correct?

Mr. NEDZI. The gentleman is correct.

Mr. BEDELL. So that would amount to 60 some thousand dollars per year?

Mr. NEDZI. It is anticipated the amount would be $63,000 a year or thereabouts.

Mr. BEDELL. As I understand it, one of the things that is to be done would be that the address this person gives would be published, and that would be part of the expense.

Is there any indication at all as to how much money we are talking about for the publishing of that address? Is that a sizable part of the expense or not?

Mr. NEDZI. It would be some part of the $63,000. I would not expect it would be a major part of that $63,000.

Mr. BEDELL. Mr. Speaker, if the gentleman will yield further, I do not mean to nitpick.

Mr. NEDZI. Mr. Speaker, I am sorry that we do not have an estimate of the specific cost. The $63,000 is expected to cover such items as the stipend for the award to the fellow, as well as travel costs. They also anticipate some of the money to go for health insurance benefits, clerical support, Wilson Center administrative costs, office service, telephone, stationary, Xeroxing, publication, and incidental costs associated with the annual lecture and expenses for the special panel incurred in the selection of the Humphrey Fellows.

So the gentleman can see there is a vast number of things that will be covered by this particular amount.

Mr. BEDELL. Mr. Speaker, I suppose the concern I have would be the same as the one indicated by the previous speaker, and that is that the Congress is going to set up this fund in this amount of money and our oversight over that is going to be pretty limited from now on. The Board would spend this money pretty well as it sees fit, at least the return from it. Is that correct or not? Or does the gentleman think that if they are spending $10,000 a year, for instance, to publish a speech which need not necessarily be published, Congress would have any oversight over that?

Mr. NEDZI. Mr. Speaker, I do not think there is any question about oversight. Congress has the power to oversee, and if Congress has the inclination to perform the oversight, they can review a complete report which is submitted by the Woodraw Wilson Center covering all of its income and expenses. Congress has the opportunity for oversight.

That information is going to be there for everyone to see, and certainly the gentleman from Illinois (Mr. YATES) is going to look at this with a fine-tooth comb, if I know him, as he does whenever matters involving the Wilson Center come before him.

Mr. YATES. Mr. Speaker, will the gentleman yield?

Mr. NEDZI. Certainly, I yield to the gentleman from Illinois.

Mr. YATES. Mr. Speaker, as I understand the bill, the appropriation is automatic; the sum of $1 million is set aside in the Treasury?

Mr. NEDZI. Yes. I did not mean to suggest this particular amount came about

by appropriation. The gentleman is quite right.

Mr. YATES. Mr. Speaker, we do review the expenditures and the activities in expending the moneys made available to Woodrow Wilson. However, the $1 million would be deposited in the Treasury to the credit of the Woodrow Wilson Institution, and the sum of approximately $60,000 a year, representing the interest on the $1 million, would be made available to a fellow to cover the expenses that are itemized in the bill, as I understanl it?

Mr. NEDZI. The gentleman is correct.

Mr. YATES. So insofar as the particular operation of this fund is concerned, we would have no supervision over that. We would have a continuing supervision over the expenditures of the Woodraw Wilson Center.

Mr. NEDZI. There is no denying that, but it is hard to believe that the Director of that Center would not be inclined to listen to what the gentleman is saying.

Mr. YATES. There is no question that if the Appropriations Committee wanted to find out about the expenditure of funds in respect to this appropriation, too, it could undertake the appropriate investigation. But ordinarily it would not come up.

Mr. BEDELL. Mr. Speaker will the gentleman yield?

Mr. NEDZI. I yield to the gentleman from Iowa.

Mr. BEDELL. Mr. Speaker would it be proper, in the report or somehow, to indicate to the Woodrow Wilson fund that we expect them to furnish to the proper Appropriations Committee an accounting on how the money from this fund had been expended in the previous year? We are setting up a fund here where you say there will be oversight, but unless we set up a report, it appears to me Congress will not have oversight.

Mr. NEDZI. I think that is part of the law and the procedures at the present time. Moreover, the gentleman has made some legislative history, which I am sure will not go unnoticed at the Woodrow Wilson Center.

Mr. BEDELL. So it would be expected that they would furnish a detailed report on how this money was spent?

Mr. NEDZI. All money.

Mr. BEDELL. I thank the gentleman.

Mr. NEDZI. Mr. Speaker, I have no further requests for time.

The SPEAKER pro tempore. The gentleman from Maryland (Mr. BAUMAN) is recognized for 20 minutes.

Mr. BAUMAN. Mr. Speaker, I yield 2 minutes to the distinguished gentleman from Minnesota (Mr. FRENZEL).

Mr. FRENZEL. Mr. Speaker, I rise in support of H.R. 10392. I note that the bill was reported out of the subcommittee without dissent and alsc reported out of the full Committee on House Administration without conflicting vote.

The unanimous vote of the committee, I hope, is indicative of the spirit in which the House will take up this particular bill. We all know the history and the personality of Senator Humphrey. Many of us knew him personally.

This bill, our committee thought, was a particularly appropriate memorial, because it sets up a specific Wilson fellowship. And under the terms of this particular bill, whoever is the holder of the fellowship will make a significant contribution to political and social thought once a year in a special speech, and will make ongoing contributions through the year.

Our committee thought that this was a particularly good way to honor the memory of Senator Humphrey.

Mr. Speaker, we understand that, although there has been a complaint about the way this thing is funded, there is precedent in the Truman Memorial. We would hope that this bill would be promptly passed by this body.

Mr. SIMON. Mr. Speaker, will my colleague yield?

Mr. FRENZEL. I yield to the gentleman from Illinois.

Mr. SIMON. I thank the gentleman for yielding.

Mr. Speaker, I would just add that this is a program at the Woodrow Wilson Center in which Senator Humphrey took a great deal of personal interest. So in addition to being a constructive program, I think it is an appropriate tribute we can pay the Senator.

Mr. FRENZEL. Mr. Speaker, I thank the gentleman for that contribution.

It is true that Senator Humphrey was associated with the Wilson Institute during most of its lifetime and was always a strong backer of the Woodrow Wilson Institute.

Mr. BAUMAN. Mr. Speaker, I yield myself 5 minutes.

Mr. Speaker, I rise in opposition to this legislation. Enough is enough. I think the taxpayers of the United States are, frankly, fed up with this kind of giveaway. I just wish there were some way that each one of us in this Chamber could feel the pain of paying the taxes that this is going to cost. This is $1 million of hard-earned money from people in your districts being taken, put back into the Treasury of the United States, appropriately enough, invested in the national debt, and the interest every year is going to be paid to the Woodrow Wilson Institute for the selection of a fellow who will deliver a lecture, maybe teach a few classes and hold a project or two, and get paid $35,000, or $40,000 and all his expenses.

How many of the taxpayers in any Member's district would not jump at an offer like that? They would just love to have it.

Mr. Speaker, we are asking average taxpayers who pay about $4,000 a year in taxes on their incomes, struggling to live, to give their taxes to this project.

Mr. Speaker, if we had not already honored Hubert Humphrey, some would say there might be a reason for this action, an appropriate way in which to honor the man. However, within the last 2 weeks the Congress passed a bill which appropriated $5 million for the University of Minnesota for the exact same purpose, honor Hubert Humphrey. That was on top of the millions of dollars which the University of Minnesota has already received in Federal aid.

How long are we going to use the lamentable death of an American leader as a reason for appropriating more and more money? That, I think, is a question which we have to answer.

Mr. Speaker, I just checked with the gentleman from Illinois. He informs me that the Woodrow Wilson Institute received $1.3 million in appropriations last year. The bill before us grants a second million dollars which will go to finance a fellowship at the Institute.

At some point we have to call a halt to this kind of spending. Perhaps we should honor this man. But we did honor this man already.

Let me share with the Members a little secret. They may remember that when the first $5 million Hubert Humphrey Center appropriation went through the House it was going to go only to the University of Minnesota.

The bill came back from the other body with $2.5 million added to memorialize another American leader, Everett Dirksen, by providing those funds to the Everett Dirksen Library in Pekin, Ill.

I hear this pending bill is going over to the other body where they will add an Everett Dirksen scholarship fund, perhaps, for $500,000, since deceased Republican statesmen only get half as much as deceased Democratic statesmen under these new rules under which Congress operates.

Mr. Speaker, what we are voting for today is not just $1 million, but, perhaps, $1½ million. We ought to call a halt somewhere. Do you really mean it when you go back home and talk to the service clubs and various groups and say that you are against spending and deficits and inflation?

We have already honored Hubert Humphrey. But there must be an end to it. Why you have to use this sort of bill to spend still more money is just beyond belief.

Mr. LEVITAS. Mr. Speaker, will the gentleman yield?

Mr. BAUMAN. I yield to the gentleman from Georgia.

Mr. LEVITAS. Mr. Speaker, I thank my colleague for yielding.

First of all, let me say that I believe the Woodrow Wilson Center renders this Nation outstanding service. It is an internationally important arena for bringing together prominent scholars. However, the purpose of this resolution is to earmark $1 million, for an additional new fellowship at the center in honor of the memory of a great American leader, Hubert H. Humphrey.

If we want to honor the name of former Senator Humphrey at the Woodrow Wilson Center, we could simply call upon the Woodrow Wilson Center to designate one of their present fellows as the Hubert Humphrey fellow.

It is well and good and proper to honor the memory of this distinguished American; but to call upon and require the taxpayers of America to do so again is another matter altogether.

Mr. Speaker, I wrote out my personal check recently and sent it to the Hu-

bert Humphrey Memorial Institute in Minnesota because I did want as an individual to participate in that effort to establish that important institute. It was my desire and my decision and my money. However, it seems to me that this $1 million additional funding added to the $1.3 million appropriation of the Woodrow Wilson Institute is going too far. It is making the taxpayers of America contribute to another memorial beyond the $5 million which was authorized for Humphrey Center at the University of Minnesota. We can honor Senator Humphrey and name a fellowship for his memory at the Woodrow Wilson Center but it does not require a new fund and forced contribution from the taxpayers.

Mr. Speaker, I would like to associate myself with the comments of the gentleman from Maryland (Mr. BAUMAN).

Mr. BAUMAN. Mr. Speaker, I thank the gentleman from Georgia (Mr. LEVITAS). He reenforces the point made by the gentleman from Illinois (Mr. YATES) just a moment ago that if honor is the purpose of this legislation, then it could be accomplished at no additional cost, as the gentleman suggests, by the board of directors of the Woodrow Wilson Institute simply setting up a fellowship using the money which the institute is already appropriated from taxpayers' funds.

Mr. Speaker, I yield 3 minutes to the gentleman from Ohio (Mr. ASHBROOK).

Mr. ASHBROOK. Mr. Speaker, I thank the gentleman for yielding.

I could not agree more with what has just been said.

The public gets a pretty good understanding of what we are doing here. They look at a bunch of politicians taking their hard earned tax money to honor other politicians. We do that all the time. We put politicians' names on dams and on buildings. We take the taxpayers' money and honor the people we want to honor, usually our own kind.

As far as lasting memorials to Senators Humphrey and Dirksen are concerned, I imagine there is a certain number of us who really think that we already have living memorials to them—deficit spending.

I think it takes a lot of courage to say that any of us ought to be memorialized. I think that is the way many taxpayers think.

Mr. Speaker, my only experience with the Woodrow Wilson Institute is that I remember a couple of years ago, when I was running for office, one of their scholars was sending letters out in my district for my opponent.

I am somewhat reminded of what unemployment compensation is. That is the time between two jobs when the Government pays me, and I think sometimes these fellowships are the time between two Government jobs when the Government pays the person again.

In that particular respect I might say that the very discredited Governor of the State of Ohio, John J. Gilligan, is the man in question.

I remember writing to the head of the Woodrow Wilson Institute and saying: "Is this proper for one of your fellows to be sending political letters during a political campaign into my district?"

He wrote back and said that really was not proper, but don't worry about it because his fellowship expires in about 3 months.

That was some degree of satisfaction, and salved the wounds I had, thinking that this was not a political organization. But I think the more we do this type of thing the more we are going to turn these into political organizations. Of course, Mr. Gilligan used the fellowship when he was defeated for the governorship of the State of Ohio, and yet he went to even greener pastures when he became the head of the Agency for International Development, further spending taxpayers' money recklessly.

So I think the public generally knows what we are doing when we take their money and lionize or honor our own people. I do not think that should be done. I think the Taft memorial which stands over here near the Capitol should be the type of dedication and memorial that we should epitomize. That was done by private money, done completely by private money. The argument could be made that it was put on a plot of public land. I have no objections to having private money being spent for a memorial to be placed on public land, but, when we start dipping into the taxpayers time after time and honor the people we want to honor, people we served with, people out of our small circle, that is wrong. I think the American people know precisely what we are doing. I think we should defeat this resolution.

Mr. NEDZI. Mr. Speaker, I yield 2 minutes to the gentleman from Minnesota (Mr. VENTO).

Mr. VENTO. Mr. Speaker, Members of the House, I have listened to the debate, and I think that we have to keep in mind that the Government role in terms of support of education is a very important one. Certainly, the Woodrow Wilson Institute has provided a format which has set a track record which we should support. The Woodrow Wilson Center acquired private contributions, and has made a tremendous contribution because, in essence, the education of the individual to participate in public affairs is most important.

The Hubert Humphrey program designation in this case really will provide a catalyst, a method to enable many people to strive for education for years; to strive for education in an open spirit; Humphrey dedicated his life to the service of the U. S. Government, in both the Senate and, of course, as Vice President.

We certainly believe that this will stimulate a significant contribution to that purpose. We do not seek to limit ideas; we do not seek to limit letter writing or limit thought. The pressure here is to stimulate free thought, democracy, education, and excellence, which he emulated in his life.

I think we would do well to pass on this and make a public contribution, which is so necessary and justified in terms of the type of conscientious service H. H. Humphrey rendered to this Nation.

Mr. NEDZI. Mr. Speaker, I have no further requests for time.

Mr. BAUMAN. Mr. Speaker, I yield 5 minutes to the gentleman from California (Mr. ROUSSELOT).

Mr. ROUSSELOT. Mr. Speaker, I thank my colleagues for yielding to me.

My understanding is that the Woodrow Wilson International Center for Scholars at the Smithsonian Institute, now receives $1,300,000 a year, which is a substantial amount. Now, this bill (H.R. 10392) almost doubles that amount.

I wonder if the gentleman from Michigan could tell us why in his judgment, was it so necessary to increase this fellowship fund right at this moment, and then call a segment of that trust fund the Hubert Humphrey Memorial?

By the way, I will tell the gentleman that I voted for the $5 million to be sent to the University of Minnesota, which I thought was a more appropriate living memorial to the Senator from Minnesota. That was the particular institution the Senator himself had designated as a place that would be an appropriate living fund.

I served on the Joint Economic Committee with the distinguished senior Senator from Minnesota. I do not understand why we are using this time and place to almost double the authorization to a Woodrow Wilson Memorial Trust Fund by setting up a sort of subtrust fund to Hubert Humphrey. It just does not make much sense. What was the rationale used in the committee other than the actual motivation to say, "Well, we want to do something for the just deceased senior Senator from Minnesota"?

Mr. NEDZI. Let me say to the gentleman, if he will yield, that this whole matter came up before the proposition to authorize the $5 million for the University of Minnesota.

Mr. ROUSSELOT. This bill (H.R. 10392) before us today came up before this House gave the $5 million?

Mr. NEDZI. Yes, that is correct.

Mr. ROUSSELOT. Then is the gentleman telling us if he had known at that time that there would be another $5 million trust fund it might have made a difference?

Mr. NEDZI. I am not telling the gentleman that.

Mr. ROUSSELOT. Is the gentleman telling us the new rationale for this extra $1 million that we seem to have floating around someplace?

Mr. NEDZI. The rationale is that it is going for an excellent purpose within the Woodrow Wilson International Center for Scholars. As has been indicated, the purposes of the two are entirely different. One is a graduate program designed to train individuals in public administration careers. The other one is a postdoctoral program viewed as something akin to awarding of a Nobel Prize to

people who are outstanding in the field of political science.

Mr. ROUSSELOT. Let me ask the gentleman a question. On the $5 million that we just designated for the University of Minnesota as a memorial to Hubert Humphrey, is there no way that somebody can do a doctoral study and can take advantage of the financing at that institution?

Mr. NEDZI. I suppose, and I do not really know the specific conditions under which the authorization was made. The gentleman knows as well as I do what he voted for that time.

Mr. ROUSSELOT. I think it is very natural, especially for our distinguished colleagues from Minnesota who are very much present here today, to want to have some kind of additional designation. My concern is that it is kind of a caboose attachment to a Woodrow Wilson fellowship fund that is already established as a memorial to another distinguished American, Woodrow Wilson. Why do we want to tack onto this as an afterthought something for Senator Humphrey, whom we have already honored by the $5 million we authorized for an institution in public service which he designated himself?

Mr. VENTO. Mr. Speaker, will the gentleman yield?

Mr. ROUSSELOT. I will be glad to yield to my colleague, the gentleman from Minnesota, in just a minute. I wanted to hear the rationale of the committee.

Mr. NEDZI. Mr. Speaker, the appropriateness for a program of this sort in the Woodrow Wilson International Center for Scholars has already been alluded to, that Hubert Humphrey was in effect one of the founders of this particular institute.

Mr. ROUSSELOT. Mr. Speaker, I am not sure that answer is very satisfying but I appreciate the gentleman trying to explain why we want to add $1 million more to this Wilson fellowship.

Now I yield to the gentleman from Minnesota (Mr. VENTO), who, I am sure, can make a contribution.

Mr. VENTO. The logic is very good. The Humphrey fellowship at this international center will provide an undergraduate program with a direct grant in scholarship aid, not to individual students, but it would set up some format structures of a program that would be anticipated. This of course provides a basic scholarship fund to an individual.

Mr. ROUSSELOT. In a program already established for a very specific purpose under the name of one of our former Presidents—and that is the confusion we interject into this program.

Mr. VENTO. I think this is an appropriate thing to do. We have a cabinet and an administrative structure already dealing with it. I do not think we need to have another one. I think the logic is very good, that we plug into something already going on and something which has been an obvious success.

So I would encourage the gentleman to support the legislation.

Mr. ROUSSELOT. Mr. Speaker, I think I would say to my colleague that we already did, many of us, support the $5 million that was given to the University of Minnesota. I think this would be more than adequate. I do not think anyone has established that the University of Minnesota is prevented from establishing such a doctorate facility under that program. Therefore I really do not believe that this addition is needed, even though it is named after a very worthy former member of the Senate and a former Vice President of the United States.

Mr. Speaker, I would like to ask the chairman of the subcommittee, the gentleman from Michigan, Mr. NEDZI, a question. I notice in the report that the Treasury objected to the provisions of section 5(d)(2), which, as they said, would allow investment of appropriations to the trust fund.

The SPEAKER pro tempore. The time of the gentleman has again expired.

Mr. ROUSSELOT. Mr. Speaker, I would ask the gentleman if I could have 1 more minute.

Mr. NEDZI. Mr. Speaker, how much time do I have remaining?

The SPEAKER pro tempore. The gentleman from Michigan has 9 minutes remaining.

Mr. NEDZI. Mr. Speaker, I yield 1 minute to the gentleman from California.

Mr. ROUSSELOT. Mr. Speaker, I appreciate the gentleman yielding me this additional time.

As I was saying, it says in the report:

> An appropriation is not a sum of money available for investment, but merely a limitation on obligations to expend which an agency may create during a specific period.

Why did you feel that you would not comply with this one request of the Treasury?

Mr. NEDZI. The feeling was that if you are going to have a prize, in effect, for somebody outstanding in a field of this nature, there should be some certainty that the money to pay the prize or pay the expense connected with it is going to be available. As a result we elected to pursue the same kind of course that was pursued in the case of setting up the Truman fellowships.

Mr. ROUSSELOT. That is an assumption that our Committee on Appropriations would not necessarily respond to the legislative dictates of the House.

Well, I thank the gentleman for yielding. I still believe this is an add-on that is really unnecessary.

Mr. NEDZI. Mr. Speaker, I yield 2 minutes to the gentleman from Illinois (Mr. SIMON).

Mr. SIMON. Mr. Speaker, just a brief response to my distinguished colleague, the gentleman from California (Mr. ROUSSELOT).

It is true that we appropriated $5 million for a Minnesota project and that that is an appropriate tribute to the late Senator, but it is also true that he was not just a Minnesota figure, he was a national and an international figure. Here is an opportunity to stretch our minds a little bit and do something that maybe we ought to do anyway by setting aside this money in an unusual kind of situation for an unusual man to pay an unusual tribute to him and, in the process we are all going to be enriched.

Here we are debating $1 million for a tribute that is well spent for the people of this Nation, and for the Woodrow Wilson Center, which Hubert Humphrey had such a great interest in. If it does the kind of a job that I think it will do then I think the gentleman from California (Mr. ROUSSELOT) will come back here one of these years and say to me that it was money well spent. I look forward to that conversation.

Mr. BAUMAN. Mr. Speaker, I yield 1 minute to the gentleman from Illinois (Mr. DERWINSKI).

Mr. DERWINSKI. Mr. Speaker, I believe that this measure deserves support. I believe that Hubert Humphrey, notwithstanding the fact that he was an active partisan leader, and, as such, drew as much opposition as he did in support, and drew more votes for his opponent in 1968 than he was able to obtain, that he was really one of the great American political leaders. I think it is most appropriate, as my colleague, the gentleman from Illinois (Mr. SIMON) has pointed out, that we emphasize the great contribution of Hubert Humphrey to our political system. He was a man of great energy. He was a man who provoked thought. He was a man who provoked countereforts, and this is in the finest sense of our political system. I would think that this memorial to Hubert Humphrey is most appropriate. It is a measure that we in good conscience should support this afternoon.

Mr. BAUMAN. Mr. Speaker, I yield myself 1 minute.

Mr. Speaker, I just want to answer the ambassador from Illinois. The issue here is not Hubert Humphrey or his memory; the issue here is larger than that. The issue is the whole symptomatic problem with the Congress of the United States and the way it spends money without restraint. There is no doubt in my mind that you could think up—the Members of this Chamber—500 ways to memorialize 500 different people spending money for pet projects and worthy causes. We have already memorialized this American leader with a $5 million grant. The issue before us is whether another million dollars—and I understand in Washington that is just "peanuts," to borrow a phrase from downtown—should be spent, but it is still the taxpayers' money. That is the only issue here, and I hope this legislation is defeated.

Mr. NEDZI. Mr. Speaker, just to, I hope, conclude, it is not a million dollars. We are talking about some $63,000 annually.

I have no further requests for time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Michigan (Mr. NEDZI) that the House suspend the rules and pass the bill H.R. 10392.

The question was taken.

Mr. BAUMAN. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 3 of rule XXVII and the Chair's prior announcement, further proceedings on this motion will be postponed.

EXTENSION OF TREASURY FEDERAL RESERVE DRAW AUTHORITY

Mr. MITCHELL of Maryland. Mr. Speaker, I move to suspend the rules and pass the joint resolution (H.J. Res. 816) to extend the authority of the Federal Reserve banks to buy and sell certain obligations.

The Clerk read as follows:

H.J. RES. 816

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That section 14(b) of the Federal Reserve Act is amended by striking out "May 1, 1978" and inserting in lieu thereof "May 1, 1979", and by striking out "April 30, 1978" and inserting in lieu thereof "April 30, 1979".

The SPEAKER pro tempore. Is a second demanded?

Mr. HANSEN. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Maryland (Mr. MITCHELL) will be recognized for 20 minutes, and the gentleman from Idaho (Mr. HANSEN) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Maryland (Mr. MITCHELL).

Mr. MITCHELL of Maryland. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, House Joint Resolution 816 would extend until April 30, 1979, the authority of the Federal Reserve to purchase U.S. public debt obligations up to a limit of $5 billion from the Treasury on a direct basis. Extensions of this authority have been granted on 21 occasions so far since originally being granted by the Congress in 1942. The authority provides a backstop for Treasury cash in debt operations. It assures that the Treasury will be able to raise cash almost instantaneously in emergencies. It has been described by Assistant Secretary of the Treasury David Mosso as a key element in all of the Treasury's financial planning in a national emergency. The authority has been used on 44 occasions, most recently early last fall for a period of 4 days in an amount of $2.5 billion. Currently the authority does not exist. It expired on April 30, 1978. Prompt action to extend it would appear to be in the public interest. Extension is supported by both the Treasury and the Federal Reserve.

Mr. Speaker, at this point I yield to the distinguished minority member of the subcommittee, the gentleman from Idaho (Mr. HANSEN).

Mr. HANSEN. Mr. Speaker, I yield myself such time as I may consume. I am not convinced of the necessity or desirability of this authority, and at the same time it has only been used very sparingly in the past and obviously has not been abused. I have therefore not intended to stand in the way of an extension as provided in House Joint Resolution 816. But I have supported the extension only in order that we can this time definitely hold hearings on the Treasury's debt and cash management operations. Such oversight is within the jurisdiction of the Subcommittee on Domestic Monetary Policy, and the chairman of the subcommittee has agreed that there is little sense to our extending, time after time and year after year, without ever stopping for a while to think about what we are doing, especially in the context of overall Treasury operations.

We have, of course, had a Treasury witness before the subcommittee occasionally to talk about this authority, and the last time was April 5 of this year. But this purpose seems to me to ask for a longer extension than we contemplate. And they really say nothing about the impact of this authority on overall Treasury operations, nor, more importantly, on the effect the authority may or may not have on Federal Reserve monetary policy implementation. I asked the Treasury witness on April 5 whether the usefulness or the need for the authority had not diminished by reason of our giving tax and loan account legislation—that was Public Law 95–147—to the Treasury last year. The response I received was completely inadequate and simply showed that the Treasury has not forced itself to do any high-level strategic thinking about its cash and debt management operations.

Now, Mr. Speaker, I think it is long past time when we should require the Treasury to sit down and think about this subject and discuss it with us; and we should put ourselves in touch with the best thinking of responsible academics and financial experts. And we should legislate in this area for the best long-term interest of efficient management of Government finances.

I note, by the way, that the President has recently directed the cash management study, to undertake a comprehensive review in conjunction with the Treasury of cash management policies and practices throughout the executive branch. Our own interest in investigations through hearings is therefore very timely.

So I have asked the chairman of the subcommittee if he would assure us that oversight hearings on Treasury cash and debt management policies, organization, and practices would be held early this year and this has already been agreed to and scheduled.

Since reporting the bill from committee, substantial rumors have come to my attention that there has been some abuse of this authority. Therefore, I have come to the conclusion that, instead of extending this authority and then investigating it, it would be wiser for us to investigate and then extend. Because of that, I have decided to vote against the resolution.

This authority is not a critical item in the Treasury's debt and cash management toolbox, and no great harm will come of permitting it to remain in suspension, at least while the Subcommittee on Domestic Monetary Policy is holding hearings in June on this subject. If, during those hearings, it becomes clear that the authority is of importance, it can be reinstated with little trouble and little loss of time.

Mr. Speaker, I yield 5 minutes to the gentleman from California (Mr. ROUSSELOT).

Mr. ROUSSELOT. Mr. Speaker, I rise in opposition to the extension of this authority, because I think it is unnecessary and also unwise, as my colleague, the gentleman from Idaho, has said.

House Joint Resolution 816 would extend the Treasury Draw Authority from its present expiration date of April 30, 1978, to April 30, 1979. The authority is for the Federal Reserve banks to purchase obligations directly from the Treasury instead of on the open market.

Several of us in the committee believe this extension would be unnecessary and unwise, and we recommend that it be allowed to expire.

The Treasury Draw Authority was first given in 1942, a time in which techniques of cash and debt management were a good deal cruder than those available today, and a period, too, in which the Federal Reserve's open market operations were much more oriented toward supporting Treasury financing. There was so much emphasis on the Fed making sure that the Treasury did not pay too much for its massive borrowings, that it appeared to make little difference to have some of the borrowing done directly, without recourse to the intermediary market. For many years, the authority was routinely extended on a biennial basis. Immediately after the Second World War, the authority was not used. Then it was used occassionally and then very heavily during the Korean War.

Soon thereafter, the authority fell into desuetude, and was used but once from the mid-1950's to the mid-1960's. Since then, the authority has been used relatively frequently—a couple of times a year. And the justification now offered for this authority is that it is a backstop, permitting the Treasury to carry low levels of idle cash without the risk of running short.

Of course, given about a week's notice, the Treasury can raise the cash it needs in the open market. The Draw Authority is supported to be used when there is an unforeseen emergency and there is not time to have recourse to an auction of bills.

We object to the notion that prudent and businesslike cash management has need for this blank check backstop. We suspect that the true reason for the Treasury's request for the authority lies elsewhere, and our suspicions are confirmed by an examination of cash balances maintained by the Treasury over the last several years. Our analysis of figures supplied to us by the Treasury shows that the Treasury carried cash balances at the Federal Reserve from November 1, 1973, to October 31, 1974, that averaged about $2.3 billion daily. In the following 12-month period, those

balances averaged about $3.2 billion, which is not an insignificant difference. The illuminating point is that during the first of these periods the Treasury Draw Authority had lapsed and was inoperative. One would have supposed, then, that the Treasury would have carried higher cash balances during that time and, when the Draw Authority came on line again, would have been able to carry lower balances with safety. In fact, the experience was just the opposite, and permits us to reject the traditional justification given for routine extension of the authority.

A more potent explanation of the Treasury's desire for this authority can be gleaned from looking at its last use, on September 30, 1977. On that day, it became clear that the law which established the temporary public debt ceiling was going to lapse for a few days. The Treasury then borrowed up to the ceiling, using the Draw Authority with the Federal Reserve so as to maximize its cash balances, to tide it over as far as possible until new legislation was signed. In the event, the obligations were liquidated 4 days later.

In this latest instance, the authority was not used in response to some kind of money market condition, or to facilitate an emergency expenditure, but as an end run around the legislative process. The authority clearly was not being used because exceedingly low levels of cash had been carried in the preceding days, but solely in order to stock up to the maximum extent possible to carry the Treasury over the period then ahead of it.

We consider that this was not an entirely legitimate use of the Draw Authority, and the episode in itself is reason for Congress not to extend the authority pending oversight hearings on Treasury cash and debt management policies and techniques. Surely no great harm can come of expiration. In addition to the evidence I mentioned earlier that the Treasury does not carry lower balances in respect of having the authority, there is the simple fact that the authority is not very often used. Congress can easily afford to suspend this peculiar financing technique, thus avoiding its abuse while its fundamental rationale is examined at length.

Finally, I note that President Carter has recently directed that the Federal Cash Management Study, in conjunction with the Treasury Department, undertake a comprehensive review of cash management policies, practices, and organization throughout the executive branch. We thus have an opportunity, for once, to coordinate our oversight activities with executive initiative.

It is a highly appropriate time to study Treasury cash management policies, instead of mindlessly extending and extending and extending them in the face of prima facie evidence of their abuse. House Joint Resolution 816 should be defeated, pending the necessary oversight hearings.

Mr. MITCHELL of Maryland. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, let me indicate to my distinguished colleague, the gentleman from California (Mr. ROUSSELOT), that I read his dissenting views submitted along with those of the gentleman from New York (Mr. CAPUTO). They were, as usual, meticulously drawn, carefully crafted, and full of logic and dissent.

Let me indicate quite seriously that there is a point to be made in the gentleman's statement and in the statement of the gentleman from Idaho (Mr. HANSEN). On the other hand, it is precisely because of the questions that the gentleman raised that I believe the authorization should be extended for 1 year. The gentleman has admitted that we have taken that step before. As he knows, the Federal Reserve requested an extension until 1981.

Let me indicate to my distinguished colleagues who have raised some question that the subcommittee has already scheduled hearings for late June; I believe the dates are June 26 and 27, or 27 and 28. They will be held no later than that. In those in-depth hearings we will consider the questions raised by my colleagues.

However, I think it would be hasty and premature to let the authority lapse without giving the subcommittee and the full committee an opportunity to explore the questions in depth which the gentleman from California (Mr. ROUSSELOT) has raised on the floor.

So, Mr. Speaker, I urge that we vote for this joint resolution as it is constituted.

Mr. ROUSSELOT. Mr. Speaker, will the gentleman yield?

Mr. MITCHELL of Maryland. I yield to the gentleman from California.

Mr. ROUSSELOT. Mr. Speaker, I appreciate the gentleman's yielding.

Mr. Speaker, let me ask the gentleman this: In the rush to get this authority extended, was the gentleman able to hold any hearings at all on this matter? If he did, how many witnesses testified?

Mr. MITCHELL of Maryland. As I recall, we had 1 witness.

Mr. ROUSSELOT. One witness. Where was that witness from?

Mr. MITCHELL of Maryland. The witness was from the Treasury Department.

Mr. ROUSSELOT. It is natural that the Treasury Department would come up and ask for an extension of authority, is it not?

Mr. MITCHELL of Maryland. Certainly.

Mr. ROUSSELOT. Why did we not think about the justification for extending it for 6 months? I would offer such an amendment if we were able to do so, but we are here on a suspension.

Mr. MITCHELL of Maryland. Mr. Speaker, if the gentleman will permit me to answer, I considered that possibility, but given some strange economic gyrations that have occurred over the last year, I thought it safe to go ahead and extend for 1 year, because of certain unpredictabilities in the economy. Therefore, we did move to extend it for 1 year.

Mr. Speaker, let me assure the gentleman that hearings will take place on this subject in late June.

Mr. ROUSSELOT. Mr. Speaker, if the gentleman will yield further, I appreciate his assurance that extensive hearings will be held, and I also appreciate the gentleman's efforts to cut down the extension of time. I think those were appropriate.

I note in 1978 up to the present date there has been no use of the authority. I know there was one occasion in 1977 when the authority was utilized.

What leads the gentleman to believe that the authority will be needed during the next 6 months?

Mr. MITCHELL of Maryland. Mr. Speaker, I must answer the gentleman by indicating that no one knew we needed the authority in September of last year, but suddenly it was needed, and we had this backstop there to meet that kind of emergency.

I am not a soothsayer. I cannot predict the economic future of this country. I can say that the authority has been used in the past. It was used last September. So, therefore, I would rather err on the side of caution and extend the authority for 1 year.

Mr. ROUSSELOT. Mr. Speaker, if the gentleman will yield further, my understanding is that the only time the Treasury found it necessary last year to use the authority was when we did not quite deal with the question of the temporary debt ceiling limit, so they utilized this legisation as a method of getting around that lack of action on our part; is that not true?

Mr. MITCHELL of Maryland. That is quite right.

Mr. ROUSSELOT. So the Treasury has found a way to get around our action or nonaction as it relates to the debt ceiling, which, of course, I object to. I do not believe it was really ever intended for the purpose of circumventing Congress in another action.

So I still believe that if we let this expire there can be no harm done. They have not had to use it this year, and we are going to speak to the issue of the debt ceiling in July. So I believe that the authority is not needed.

Mr. MITCHELL of Maryland. Mr. Speaker, I respect the gentleman's belief and his desire and his real sincere concern in this area. However, I believe the gentleman is wrong, and I would urge that we approve House Joint Resolution 816.

I think it is wise to extend for 1 year to permit us to have hearings in June, and certainly at the end of those hearings, if other legislative action is indicated I can assure my colleagues on that side of the aisle that it will be initiated by the subcommittee.

Mr. Speaker, I yield such time as he may consume to the gentleman from Tennessee (Mr. ALLEN).

Mr. ALLEN. Mr. Speaker, I rise in support of this resolution. One of the things that persuaded me at the last moment was the comment of my distinguished and good friend, the gentleman from California, in reciting that this law was permitted to lapse in 1973 and 1974. I recall what happened to the interest rates in this country during that period. And when we talk about inflation, there is nothing more inflationary in this country than the spiraling interest rates which people have to pay, which are re-

flected in the price we must pay for everything we buy. And if the Government cannot rely upon the Federal Reserve when needed to fund the necessary debt, obviously, we have to pay increased interest, and if Government bonds are going to yield increased interest, that means all other interest rates are going to increase. That increases the price of homes. It increases the price of goods and services and commodities that are put on the market. For that reason alone I would respectfully urge the Members of this body to support this resolution, in order to give us this additional assurance that the borrowing of the Treasury will not serve to further gyrate the interest rates which the people have to pay in order to borrow the necessary funds for the Government to operate.

Mr. ROUSSELOT. Mr. Speaker, will the gentleman yield?

Mr. ALLEN. I yield to the gentleman from California.

Mr. ROUSSELOT. I appreciate my colleague's yielding.

Mr. Speaker, I would like to point out that this authority primarily was established during World War II when there were substantial needs to borrow from the Federal Reserve Bank by the Treasury because of the exorbitant needs of our wartime effort. Now the war is over and, hopefully, it will remain that way. From 1955 clear down to 1965 the Treasury only used this authority once in all that time. We are not at war. There are far more vehicles and instruments available to the Treasury than there were at that time. And I say to my colleague that this authority just is not needed and really is not an attempt on my part to create an increase in the interest rates that the Treasury has to utilize in the marketplace. But, as the gentleman knows, the cash flow to the Treasury is much greater than it was during those times, even here in peacetime. So I think the proof of history should show we really do not need it.

The gentleman from Maryland has properly guaranteed that there will be extensive and complete hearings. We can come back. I think the suspension method of bringing this bill to the floor disallows the possibility of an amendment to only increase it for 6 months, which I would have been much more willing to support. And so I really do not think that the dangers that the gentleman from Tennessee has properly pointed out are really that present, because we are not at war.

Mr. ALLEN. Mr. Speaker, in response to the gentleman from California (Mr. ROUSSELOT), he makes the point that we are not presently at war. However, we are at war, or should be, against inflation. One of the most potent forces in forcing up prices and inflation is interest rates, as I see it.

We often speak of the wage-and-price spiral; and our noted economists just forget completely how much increased interest rates add to the price of everything we buy, including the taxes which we have to pay to the Government in order to meet the interest payments on our Federal debt.

Mr. Speaker, my distinguished friend, the gentleman from California (Mr. ROUSSELOT), admits in effect, that the authority in the past has not been abused. I do not think that he thinks it is going to be abused during this short extension; and before we extend it for any protracted period, he has been assured that we will have extensive hearings in which he and all others will have opportunity to participate and to hear witnesses. If the authority has not been abused in the past, no one really has any reason to believe that it will be abused in this one year.

Mr. ROUSSELOT. If the gentleman will yield further, Mr. Speaker, my belief was that in September and October it was misused to avoid having to deal with the issue of the debt ceiling increase which we have not acted upon. Therefore, my point is that I think it can be misused; and that is my reason for believing that we should allow this authority to expire.

Mr. ALLEN. Mr. Speaker, quite obviously, again in response to my distinguished friend, if we have a debt ceiling that prevents and does not authorize the Federal Government or the Treasury to issue any additional bonds, there will be no bonds for the Federal Reserve to buy; and a cap on the debt ceiling would take care of that contingency because the only time the Federal Reserve would have any occasion at all to go into the market and buy Federal bonds is when the issuance of those Federal bonds is authorized by the Congress of the United States.

Mr. MITCHELL of Maryland. Mr. Speaker, if the gentleman will yield, let me thank the gentleman from Tennessee (Mr. ALLEN) for his supportive statement. I am in full agreement with the argument that he has raised.

Mr. Speaker, let me just say in conclusion that we have given assurances of timely hearings. We believe it would be premature to close this issue out without timely hearings. Therefore, we would join the gentleman, thanking him for his support, and urge the passage of House Joint Resolution 816.

Mr. ALLEN. Mr. Speaker, I thank the distinguished gentleman from Maryland (Mr. MITCHELL), and I support this joint resolution.

Mr. HANSEN. Mr. Speaker, I yield myself 1 additional minute.

I wish to commend the chairman of the subcommittee, the gentleman from Maryland (Mr. MITCHELL), for his usual thoroughness. However, I regret that I, at this late date, have to oppose this legislation.

Mr. Speaker, I urge the defeat of this joint resolution.

Mr. MITCHELL of Maryland. Mr. Speaker, I have no further requests for time.

The SPEAKER pro tempore (Mr. BARNARD). The question is on the motion offered by the gentleman from Maryland (Mr. MITCHELL) that the House suspend the rules and pass the joint resolution (H.J. Res. 816).

The question was taken.

Mr. ROUSSELOT. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 3 of rule XXVII, and the Chair's prior announcement, further proceedings on this motion will be postponed.

GENERAL LEAVE

Mr. MITCHELL of Maryland. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks, and include extraneous matter, on House Joint Resolution 816, just under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Maryland?

There was no objection.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Debate has been concluded on all motions to suspend the rules.

Pursuant to clause 3, rule XXVII, the Chair will now put the question on each motion on which further proceedings were postponed in the order in which that motion was entertained.

Votes will be taken in the following order:

H.R. 11657; H.R. 10392; and H.J. Res. 816.

The Chair will reduce to 5 minutes the time for any electronic votes after the first such vote in this series.

PACIFIC FISHERIES DEVELOPMENT ACT AUTHORIZATION

The SPEAKER pro tempore. The unfinished business is the question of suspending the rules and passing the bill H.R. 11657, as amended.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from California (Mr. LEGGETT) that the House suspend the rules and pass the bill H.R. 11657, as amended, on which the yeas and nays are ordered.

The vote was taken by electronic device, and there were—yeas 326, nays 23, present 1, not voting 84, as follows:

[Roll No. 262]

The Clerk announced the following pairs:

On this vote:

Mr. Brademas and Mr. Shipley for, with Mr. Stump against.

Until further notice:

Mrs. Boggs with Mr. Andrews of North Carolina.

Mr. Fountain with Mr. Baldus.

Mr. Breckinridge with Mr. Fraser.

Mr. Gammage with Ms. Oakar.

Mrs. Burke of California with Mr. Tucker.

Mr. Young of Missouri with Mrs. Pettis.

Mr. White with Mr. Armstrong.

Mr. Conyers with Mr. Teague.

Mr. Carney with Mr. Lujan.

Mr. Le Fante with Mr. Bonker.

Mr. Kazen with Mr. Mollohan.

Mr. Dellums with Mr. Thornton.

Mr. Eilberg with Mr. Eckhardt.

Mr. Flood with Mr. Evans of Georgia.

Mr. Harrington with Mr. Pressler.

Mr. Rodino with Mr. Luken.

Mr. Rosenthal with Mr. Buchanan.

Mr. Stratton with Mr. Burleson of Texas.

Mr. Waxman with Mr. Don H. Clausen.

Mr. Minish with Mr. Pritchard.

Mr. Nix with Mr. Frey.

Mr. Mann, with Mr. Thone.

Mr. Patten with Mr. Harsha.

Mr. Runnels with Mr. Cavanaugh.

Mr. Russo with Mr. Quie.

Mr. Bowen with Del Clawson.

Mr. Ambro with Mr. Roncalio.

Mr. Dent with Mrs. Heckler.

Mr. Moss with Mr. Cochran of Mississippi.

Mr. Diggs with Mr. Ruppe.

Mr. Meeds with Mr. Hillis.

Mr. Dodd with Mr. Cohen.

Mr. Mikva with Mr. Wampler.

Mr. Krueger with Mr. Weaver.

Mr. Gudger with Mr. Whitley.

Mr. Garcia with Mr. Hyde.

Mr. Jones of North Carolina with Mr. Goodling.

Mr. Miller of California with Mr. Pursell.

Mr. Johnson of Colorado with Mr. Stockman.

Messrs. GLICKMAN, KOSTMAYER, MAGUIRE, ARCHER, and HANSEN changed their vote from "yea" to "nay."

So (two-thirds having voted in favor thereof), the rules were suspended and the bill, as amended, was passed.

The result of the vote was announced as above recorded.

The title was amended so as to read: "A bill to authorize appropriations to carry out the Central, Western, and South Pacific Fisheries Development Act until the close of fiscal year 1983, and for other purposes."

A motion to reconsider was laid on the table.

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER pro tempore. Pursuant to the provisions of clause 3(b)(3), rule XXVII, the Chair announces that he will reduce to a minimum of 5 minutes the period of time within which a vote by electronic device may be taken on all the additional motions to suspend the rules on which the Chair has postponed further proceedings.

HUBERT H. HUMPHREY FELLOWSHIP AT WOODROW WILSON INTERNATIONAL CENTER

The SPEAKER pro tempore. The unfinished business is the question of suspending the rules and passing the bill, H.R. 10392.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Michigan (Mr. NEDZI) that the House suspend the rules and pass the bill (H.R. 10392) on which the yeas and nays are ordered.

The vote was taken by electronic device, and there were—yeas 219, nays 137, not voting 78, as follows:

Mr. GLICKMAN changed his vote from "yea" to "nay."

So (two-thirds having voted in favor thereof) the rules were suspended and the joint resolution was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

AMENDING THE SOCIAL SECURITY ACT TO IMPROVE THE END STAGE RENAL DISEASE PROGRAM

Mr. ROSTENKOWSKI. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the bill (H.R. 8423) to amend titles II and XVIII of the Social Security Act to make improvements in the end stage renal disease program presently authorized under section 226 of that act, and for other purposes, with a Senate amendment thereto, and concur in the Senate amendment with an amendment.

The Clerk read the title of the bill.

The Clerk read the Senate amendment, as follows:

Strike out all after the enacting clause and insert: That (a) title II of the Social Security Act is amended by inserting immediately after section 226 the following new section:

"SPECIAL PROVISIONS RELATING TO COVERAGE UNDER MEDICARE PROGRAM FOR END STAGE RENAL DISEASE

"SEC. 226A. (a) Notwithstanding any provision to the contrary in section 226 of title XVIII, every individual who—

"(1)(A) is fully or currently insured (as such terms are defined in section 214 of this Act) or would be fully or currently insured if his service as an employee (as defined in the Railroad Retirement Act of 1974) after December 31, 1936, were included in the term 'employment' as defined in this Act, or (B) is entitled to monthly insurance benefits under title II of this Act or an annuity under the Railroad Retirement Act of 1974, or (C) is the spouse or dependent child (as defined in regulations) of an individual who is fully or currently insured or would be fully or currently insured if his service as an employee (as defined in the Railroad Retirement Act of 1974) after December 31, 1936, were included in the term 'employment' as defined in this Act, or (D) is the spouse or dependent child (as defined in regulations) of an individual entitled to monthly insurance benefits under title II of this Act or an annuity under the Railroad Retirement Act of 1974; and

"(2) is medically determined to have end stage renal disease; and

"(3) has filed an application for benefits under this section,

shall, in accordance with the succeeding provisions of this section, be entitled to benefits under part A and eligible to enroll under part B of title XVIII, subject to the deductible, premium, and coinsurance provisions of that title.

"(b) Subject to subsection (c), entitlement of an individual to benefits under part A and eligibility to enroll under part B of title XVIII by reasons of this section on the basis of end stage renal disease—

"(1) shall begin with—

"(A) the third month after the month in which a regular course of renal dialysis is initiated, or

"(B) the month in which such individual receives a kidney transplant, or (if earlier) the first month in which such individual is admitted as an inpatient to an institution which is a hospital meeting the requirements of section 1861(e) (and such additional requirements as the Secretary may prescribe under section 1881(b) for such institutions) in preparation for or anticipation of kidney transplantation, but only if such transplantation occurs in that month or in either of the next two months,

whichever first occurs (but no earlier than one year preceding the month of the filing of an application for benefits under this section); and

"(2) shall end, in the case of an individual who receives a kidney transplant, with the thirty-sixth month after the month in which such individual receives such transplant or, in the case of an individual who has not received a kidney transplant, and no longer requires a regular course of dialysis, with the twelfth month after the month in which such course of dialysis is terminated.

"(c) Notwithstanding the provisions of subsection (b)—

"(1) in the case of any individual who participates in a self-dialysis training program prior to the third month after the month in which such individual initiates a regular course of renal dialysis in a renal dialysis facility or provider of services meeting the requirements of section 1881(b), entitlement to benefits under part A and eligibility to enroll under part B of title XVIII shall begin with the month in which such regular course of renal dialysis is initiated;

"(2) in any case in which a kidney transplant fails (whether during or after the thirty-six month period specified in subsection (b)(2)) and as a result the individual who received such transplant initiates or resumes a regular course of renal dialysis, entitlement to benefits under part A and eligibility to enroll under part B of title XVIII shall begin with the month in which such course is initiated or resumed; and

"(3) in any case in which a regular course of renal dialysis is resumed subsequent to the termination of an earlier course, entitlement to benefits under part A and eligibility to enroll under part B of title XVIII shall begin with the month in which such regular course of renal dialysis is resumed.".

(b) Section 226 of such Act is amended—

(1) by striking out subsections (e), (f), and (g), and

(2) by redesignating subsections (h) and (i) as subsections (e) and (f), respectively.

SEC. 2. Part C of title XVIII of the Social Security Act is amended by adding at the end thereof the following new section:

"MEDICARE COVERAGE FOR END STAGE RENAL DISEASE PATIENTS

"SEC. 1881. (a) The benefits provided by parts A and B of this title shall include benefits for individuals who have been determined to have end-stage renal disease as provided in section 226A, and benefits for kidney donors as provided in subsection (d) of this section. Notwithstanding any other provision of this title, the type, duration, and scope of the benefit provided by parts A and B with respect to individuals who have been determined to have end-stage renal disease and who are entitled to such benefits without regard to section 226A shall in no case be less than the type, duration, and scope of the benefits so provided for individuals entitled to such benefits solely by reason of that section.

"(b)(1) Payments under this title with respect to services, in addition to services for which payment would otherwise be made under this title, furnished to individuals who have been determined to have end-stage renal disease shall include (A) payments on

behalf of such individuals to providers of services and renal dialysis facilities which meet such requirements as the Secretary shall by regulation prescribe for institutional dialysis services and supplies (including self-dialysis services in a self-care dialysis unit maintained by the provider or facility), transplantation services, self-care home dialysis support services which are furnished by the provider or facility, and routine professional services performed by a physician during a maintenance dialysis episode if payments for his other professional services furnished to an individual who has end stage renal disease are made on the basis specified in paragraph (3)(A) of this subsection, and (B) payments to or on behalf of such individuals for home dialysis supplies and equipment. The requirements prescribed by the Secretary under subparagraph (A) shall include requirements for a minimum utilization rate for covered procedures and for self-dialysis training programs.

"(2)(A) With respect to payments for dialysis services furnished by providers of services and renal dialysis facilities to individuals determined to have end-stage renal disease for which payments may be made under part B of this title, such payments (unless otherwise provided in this section) shall be equal to 80 percent of the amounts determined in accordance with subparagraph (B); and with respect to payments for services for which payments may be made under part A of this title, the amounts of such payments (which amounts shall not exceed, in respect to costs in procuring organs attributable to payments made to an organ procurement agency or histocompatibility laboratory, the costs incurred by that agency or laboratory) shall be determined in accordance with section 1861(v). Payments shall be made to a renal dialysis facility only if it agrees to accept such payments as payment in full for covered services, except for payment by the individual of 20 percent of the estimated amounts for such services calculated on the basis established by the Secretary under subparagraph (B) and the deductible amount imposed by section 1833(b).

"(B) The Secretary shall prescribe in regulations any methods and procedures to (i) determine the costs incurred by providers of services and renal dialysis facilities in furnishing covered services to individuals determined to have end-stage renal diseases, and (ii) determine, on a cost-related basis or other economical and equitable basis (including any basis authorized under section 1861(v)), the amounts of payments to be made for part B services furnished by such providers and facilities to such individuals. Such regulations shall provide for the implementation of appropriate incentives for encouraging more efficient and effective delivery of services (consistent with quality care), and shall include, to the extent determined feasible by the Secretary, a system for classifying comparable providers and facilities, and prospectively set rates or target rates with arrangements for sharing such reductions in costs as may be attributable to more efficient and effective delivery of services.

"(C) Such regulations, in the case of services furnished by proprietary providers and facilities may include, if the Secretary finds it feasible and appropriate, provision for recognition of a reasonable rate of return on equity capital, providing such rate of return does not exceed the rate of return stipulated in section 1861(v)(1)(B).

"(D) For purposes of section 1878, a renal dialysis facility shall be treated as a provider of services.

"(3) With respect to payments for physicians' services furnished to individuals determined to have end-stage renal disease, the Secretary shall pay 80 percent of the amounts calculated for such services—

"(A) on a reasonable charge basis (but may, in such case, make payment on the basis of the prevailing charges of other physicians for comparable services) except that payment may not be made under this subparagraph for routine services furnished during a maintenance dialysis episode, or

"(B) on a comprehensive monthly fee or other basis for an aggregate of services provided over a period of time (as defined in regulations).

"(4) Pursuant to agreements with approved providers of services and renal dialysis facilities, the Secretary may make payment to such providers and facilities for the cost of home dialysis supplies and equipment and self-care home dialysis support services furnished to patients whose self-care home dialysis is under the direct supervision of such provider or facility, on the basis of a target reimbursement rate (as defined in paragraph (6)).

"(5) An agreement under paragraph (4) shall require that the provider or facility will—

"(A) assume full responsibility for directly obtaining or arranging for the provision of—

"(i) such medically necessary dialysis equipment as is prescribed by the attending physician;

"(ii) dialysis equipment maintenance and repair services;

"(iii) the purchase and delivery of all necessary medical supplies; and

"(iv) where necessary (as determined by the Secretary under regulations), the services of trained home dialysis aides;

"(B) perform all such administrative functions and maintain such information and records as the Secretary may require to verify the transactions and arrangements described in subparagraph (A);

"(C) submit such cost reports, data, and information as the Secretary may require with respect to the costs incurred for equipment, supplies, and services furnished to the facility's home dialysis patient population; and

"(D) provide for full access for the Secretary to all such records, data, and information as he may require to perform his functions under this section.

"(6) The Secretary shall establish, for each calendar year, commencing with January 1, 1979, a target reimbursement rate for home dialysis which shall be adjusted for regional variations in the cost of providing home dialysis. In establishing such a rate, the Secretary shall include—

"(A) the Secretary's estimate of the cost of providing medically necessary home dialysis supplies and equipment;

"(B) an allowance, in an amount determined by the Secretary, to cover the cost of providing personnel to aid in home dialysis; and

"(C) an allowance, in an amount determined by the Secretary, to cover administrative costs and to provide an incentive for the efficient delivery of home dialysis;

but in no event shall such target rate exceed 70 percent of the national average payment, adjusted for regional variations, for maintenance dialysis services furnished in approved providers and facilities during the preceding fiscal year. Any such target rate so established shall be utilized, without renegotiation of the rate, throughout the calendar year for which it is established. During the last quarter of each calendar year, the Secretary shall establish a home dialysis target reimbursement rate for the next calendar year based on the most recent data available to the Secretary at the time. In establishing any rate under this paragraph, the Secretary may utilize a competitive bid procedure, a prenegotiated rate procedure, or any other procedure which the Secretary determines is appropriate and feasible in order to carry out this paragraph in an effective and efficient manner.

"(7) For purposes of this title, the term 'home dialysis supplies and equipment' means medically necessary supplies and equipment (including supportive equipment) required by an individual suffering from end-stage and renal disease in connection with renal dialysis carried out in his home (as defined in regulations), including obtaining, installing, and maintaining such equipment.

"(8) For purposes of this title, the term 'self-care home dialysis support services', to the extent permitted in regulation, means—

"(A) periodic monitoring of the patient's home adaptation, including visits by qualified provider or facility personnel (as defined in regulations), so long as this is done in accordance with a plan prepared and periodically reviewed by a professional team (as defined in regulations) including the individual's physician;

'(B) installation and maintenance of dialysis equipment;

"(C) testing and appropriate treatment of the water; and

"(D) such additional supportive services as the Secretary finds appropriate and desirable.

"(9) For purposes of this title, the term 'self-care dialysis unit' means a renal dialysis facility or a distinct part of such facility or of a provider of services, which has been approved by the Secretary to make self-dialysis services, as defined by the Secretary in regulations, available to individuals who have been trained for self-dialysis. A self-care dialysis unit must, at a minimum, furnish the services, equipment, and supplies needed for self-care dialysis, have patient-staff ratios which are appropriate to self-dialysis (allowing for such appropriate lesser degree of ongoing medical supervision and assistance of ancillary personnel than is required for full care maintenance dialysis), and meet such other requirements as the Secretary may prescribe with respect to the quality and cost-effectiveness of services.

"(c)(1)(A) For the purpose of assuring effective and efficient administration of the benefits provided under this section, the Secretary shall establish, in accordance with such criteria as he finds appropriate, renal disease network areas, such network organizations (including a coordinating council, an executive committee of such council, and a medical review board, for each network area) as he finds necessary to accomplish such purpose, and a national end stage renal disease medical information system. The Secretary may by regulations provide for such coordination of network planning and quality assurance activities and such exchange of data and information among agencies with responsibilities for health planning and quality assurance activities under Federal law as is consistent with the economical and efficient administration of this section and with the responsibilities established for network organizations under this section.

"(B) At least one patient representative shall serve as a member of each coordinating council and executive committee.

"(C) No person—

"(i) with an ownership or control interest (as defined in section 1124(a)(3) in a facility or provider which provides services referred to in section 1861(s)(2)(F) or provides kidney transplants, or

"(ii) who has received remuneration from any such facility or provider in excess of such amounts as constitute reasonable compensation for services or goods supplied to such facility or provider, or

"(iii) who is the spouse, parent, son, daughter, brother, or sister of a person described in clause (i) or (ii) (or who bears such relationship to the spouse of such a person),

shall serve as a member of any network organization.

"(2) The network organizations of each network shall be responsible, in addition to such other duties and functions as may be prescribed by the Secretary, for—

"(A) encouraging, consistent with sound medical practice, the use of those treatment settings most compatible with the successful rehabilitation of the patient;

"(B) developing criteria and standards relating to the quality and appropriateness of patient care; and

"(C) evaluating the procedures by which facilities and providers in the network assess the appropriateness of patients for proposed treatment modalities.

"(d) Notwithstanding any provision to the contrary in section 226, any individual who donates a kidney for transplant surgery shall be entitled to benefits under parts A and B of this title with respect to such donation. Reimbursement for the reasonable expenses incurred by such an individual with respect to a kidney donation shall be made (without regard to the deductible, premium, and coinsurance provisions of this title), in such manner as may be prescribed by the Secretary in regulations, for all reasonable preparatory, operation, and post-operation recovery expenses associated with such donation, including but not limited to the expenses for which payment could be made if he were an eligible individual for purposes of parts A and B of this title without regard to this subsection. Payments for postoperation recovery expenses shall be limited to the actual period of recovery.

"(e)(1) Notwithstanding any other provision of this title, the Secretary may, pursuant to agreements with approved providers of services and renal dialysis facilities, reimburse such providers and facilities (without regard to the deductible and coinsurance provisions of this title) for the reasonable cost of the purchase, installation, maintenance and reconditioning for subsequent use of artificial kidney and automated dialysis peritoneal machines (including supportive equipment) which are to be used exclusively by entitled individuals dialyzing at home.

"(2) An agreement under this subsection shall require that the provider or facility will—

"(A) make the equipment available for use only by entitled individuals dialyzing at home;

"(B) recondition the equipment, as needed, for reuse by such individuals throughout the useful life of the equipment, including modification of the equipment consistent with advances in research and technology;

"(C) provide for full access for the Secretary to all records and information relating to the purchase, maintenance, and use of the equipment; and

"(D) submit such reports, data, and information as the Secretary may require with respect to the cost, management, and use of the equipment.

"(3) For purposes of this section, the term 'supportive equipment' includes blood pumps, heparin pumps, bubble detectors, other alarm systems, and such other items as the Secretary may determine are medically necessary.

"(f)(1) The Secretary shall initiate and carry out, at selected locations in the United States, pilot projects under which financial assistance in the purchase of new or used durable medical equipment for renal dialysis is provided to individuals suffering from end stage renal disease at the time home dialysis is begun, with provision for a trial period to assure successful adaptation to home dialysis before the actual purchase of such equipment.

"(2) The Secretary shall conduct experiments to evaluate methods for reducing the costs of the end stage renal disease program. Such experiments shall include (without being limited to) reimbursement for nurses and dialysis technicians to assist with home dialysis, and reimbursement to family members assisting with home dialysis.

"(3) The Secretary shall conduct experiments to evaluate methods of dietary control for reducing the costs of the end stage renal disease program, including (without being limited to) the use of protein-controlled products to delay the necessity for, or reduce the frequency of, dialysis in the treatment of end stage renal disease.

"(4) The Secretary shall conduct a comprehensive study of methods for increasing public participation in kidney donation and other organ donation programs.

"(5) The Secretary shall conduct a full and complete study of the reimbursement of physicians for services furnished to patients with end stage renal disease under this title, giving particular attention to the range of payments to physicians for such services, the average amounts of such payments, and the number of hours devoted to furnishing such services to patients at home, in renal disease facilities, in hospitals, and elsewhere.

"(6) The Secretary shall conduct a study of the number of patients with end stage renal disease who are not eligible for benefits with respect to such disease under this title (by reason of this section or otherwise), and of the economic impact of such noneligibility of such individuals. Such study shall include consideration of mechanisms whereby governmental and other health plans might be instituted or modified to permit the purchase of actuarially sound coverage for the costs of end stage renal disease.

"(7) The Secretary shall conduct a study of the medical appropriateness and safety of cleaning and reusing dialysis filters by home dialysis patients. In such cases in which the Secretary determines that such home cleaning and reuse of filters is a medically sound procedure, the Secretary shall conduct experiments to evaluate such home cleaning and reuse as a method of reducing the costs of the end stage renal disease program.

"(8) The Secretary shall submit to the Congress no later than October 1, 1979, a full report on the experiments conducted under paragraphs (1), (2), (3), and (7) and the studies under paragraphs (4), (5), (6), and (7). Such report shall include any recommendations for legislative changes which the Secretary finds necessary or desirable as a result of such experiments and studies.

"(g) The Secretary shall submit to the Congress on October 1, 1978, and on October 1 of each year thereafter, a report on the end stage renal disease program, including but not limited to—

"(1) the number of patients, nationally and by renal disease network, on dialysis (self-dialysis or otherwise) at home and in facilities;

"(2) the number of new patients entering dialysis at home and in facilities during the year;

"(3) the number of facilities providing dialysis and the utilization rates of those facilities;

"(4) the number of kidney transplants, by source of donor organ;

"(5) the number of patients awaiting organs for transplant;

"(6) the numer of transplant failures;

"(7) the range of costs of kidney acquisitions, by type of facility and by region;

"(8) the number of facilities providing transplants and the number of transplants performed per facility;

"(9) patient mortality and morbidity rates;

"(10) the average annual cost of hospitalization for ancillary problems in dialysis and transplant patients, and drug costs for transplant patients;

"(11) medicare payment rates for dialysis, transplant procedures, and physician services, along with any changes in such rates during the year and the reasons for those changes;

"(12) the results of cost-saving experiments;

"(13) the results of basic kidney disease research conducted by the Federal Government, private institutions, and foreign governments;

"(14) information on the activities of medical review boards and other network organizations; and

"(15) estimated program costs over the next five years.".

SEC. 3. (a) Section 226(a) of the Social Security Act is amended—

(1) by striking out "specified in subparagraph (B)" and inserting in lieu thereof "specified in paragraph (1)"; and

(2) by striking out "specified in subparagraphs (A) and (B)" and inserting in lieu thereof "specified in paragraphs (1) and (2)".

(b) Paragraphs (2) and (3) of section 226 (e) of such Act (as redesignated by subsection (b)(2) of the first section of this Act) are each amended by striking out "subsection b" and inserting in lieu thereof "subsection (b)".

SEC. 4. (a) Section 1811 of such Act is amended—

(1) by striking out "section 226" and inserting in lieu thereof "sections 226 and 226A";

(2) by striking out "and" at the end of clause (1), and inserting in lieu thereof a comma; and

(3) by inserting immediately before the period the following: ", and (3) certain individuals who do not meet the conditions specified in either clause (1) or (2) but who are medically determined to have end stage renal disease".

(b) Section 1833(a)(1) of the Social Security Act is amended—

(1) by striking out "and" at the end of clause (C), and

(2) by adding the following after "and" in clause (D):

"(E) with respect to services furnished to individuals who have been determined to have end stage renal disease, the amounts paid shall be determined subject to the provisions of section 1881, and".

(c) Section 1833(a)(2) of such Act is amended by inserting "(unless otherwise specified in section 1881)" after "other services".

(d) Section 1861(s)(2) of such Act is amended—

(1) by striking out "and" at the end of clause (D),

(2) by inserting "and" at the end of clause (E), and

(3) by adding the following new clause after subclause (E):

"(F) home dialysis suppplies and equipment, self-care home dialysis suport services, and institutional dialysis services and supplies;".

(e) The first sentence of section 1866(a)(2)(A) of such Act is amended by inserting the following before the period: "(but in the case of items and services furnished to individuals with end stage renal disease, an amount equal to 20 percent of the estimated amounts for such items and services calcu-

lated on the basis established by the Secretary)".

(f) Section 1814(b)(1) of such Act is amended by inserting "and as further limited by section 1881(b)(2)(B)" after "1861(v)".

SEC. 5. The third sentence of section 1817 (b) of the Social Security Act, the third sentence of section 1841(b) of such Act, and section 1876(b)(2)(B) of such Act, are each amended by striking out "Commissioner of Social Security" and inserting in lieu thereof "Administrator of the Health Care Financing Administration".

SEC. 6. The amendments made by the preceding sections of this Act shall become effective with respect to services, supplies, and equipment furnished after the third calendar month which begins after the date of the enactment of this Act, except that those amendments providing for the implementation of an incentive reimbursement system for dialysis services furnished in facilities and providers shall become effective with respect to a facility's or provider's first accounting period which begins after the last day of the twelfth month following the month of the enactment of this Act, and those amendments providing for reimbursement rates for home dialysis shall become effective on July 1, 1979.

REIMBURSEMENT FOR SERVICES OF PHYSICIANS PROVIDED IN TEACHING HOSPITALS

SEC. 7. Section 15(d) of Public Law 93-233 (as amended by section 7(c) of Public Law 93-368 and the first section of Public Law 94-368) is amended by striking out "October 1, 1977" and inserting in lieu thereof "October 1, 1978".

TECHNICAL AMENDMENTS TO MECICARE-MEDICAID ANTI-FRAUD AND ABUSE AMENDMENTS

SEC. 8. (a) The first sentence of section 1905(c) of the Social Security Act is amended—

(1) by striking "and (3)" and inserting in lieu thereof "(3)"; and

(2) by striking out the period at the end thereof and inserting in lieu thereof the following ", and (4) meets the requirements of section 1861(j)(14) with respect to protection of patients' personal funds.".

(b) The fourth sentence of section 1905 (c) of such Act is amended by striking out "clauses (2) and (3)" and inserting in lieu thereof "clauses (2), (3), and (4)".

(c) The Secretary of Health, Education, and Welfare shall, by regulation, define those costs which may be charged to the personal funds of patients in intermediate care facilities who are individuals receiving medical assistance under a State plan approved under the provisions of title XIX of the Social Security Act, and those costs which are to be included in the reasonable cost or reasonable charge for intermediate care facility services as determined under the provisions of such title.

(d)(1) The amendments made by subsections (a) and (b) shall become effective on July 1, 1978.

(2) The Secretary of Health, Education, and Welfare shall issue the regulations required under subsection (c) within 90 days after the date of enactment of this Act but not later than July 1, 1978.

(e) Section 20(c)(2) of the Medicare-Medicaid Anti-Fraud and Abuse Amendments (Public Law 95-142) is amended by striking out "section 1905(g)" and inserting in lieu thereof "section 1903(g)".

Mr. ROSTENKOWSKI (during the reading). Mr. Speaker, I ask unanimous consent that the Senate amendment be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The Clerk read the House amendment to the Senate amendment, as follows:

In lieu of the matter proposed to be inserted by the Senate amendment, insert the following:

That (a) title II of the Social Security Act is amended by inserting immediately after section 226 the following new section:

"SPECIAL PROVISIONS RELATING TO COVERAGE UNDER MEDICARE PROGRAM FOR END STAGE RENAL DISEASE

SEC. 226A. (a) Notwithstanding any provision to the contrary in section 226 or title XVIII, every individual who—

"(1)(A) is fully or currently insured (as such terms are defined in section 214 of this Act) or would be fully or currently insured if his service as an employee (as defined in the Railroad Retirement Act of 1974) after December 31, 1936, were included in the term 'employment' as defined in this Act, or (B) is entitled to monthly insurance benefits under title II of this Act or an annuity under the Railroad Retirement Act of 1974, or (C) is the spouse or dependent child (as defined in regulations) of an individual who is fully or currently insured or would be fully or currently insured if his service as an employee (as defined in the Railroad Retirement Act of 1974) after December 31, 1936, were included in the term 'employment' as defined in this Act, or (D) is the spouse or dependent child (as defined in regulations) of an individual entitled to monthly insurance benefits under title II of this Act or an annuity under the Railroad Retirement of 1974;

"(2) is medically determined to have end stage renal disease; and

"(3) has filed an application for benefits under this section;

shall, in accordance with the succeeding provisions of this section, be entitled to benefits under part A and eligible to enroll under part B of title XVIII, subject to the deductible, premium, and coinsurance provisions of that title.

"(b) Subject to subsection (c), entitlement of an individual to benefits under part A and eligibility to enroll under part B of title XVIII by reasons of this section on the basis of end stage renal disease—

"(1) shall begin with—

"(A) the third month after the month in which a regular course of renal dialysis is initiated, or

"(B) the month in which such individual receives a kidney transplant, or (if earlier) the first month in which such individual is admitted as an inpatient to an institution which is a hospital meeting the requirements of section 1861(e) (and such additional requirements as the Secretary may prescribe under section 1881(b) for such institutions) in preparation for or anticipation of kidney transplantation, but only if such transplantation occurs in that month or in either of the next two months,

whichever first occurs (but no earlier than one year preceding the month of the filing of an application for benefits under this section); and

"(2) shall end, in the case of an individual who receives a kidney transplant, with the thirty-sixth month after the month in which such individual receives such transplant or, in the case of an individual who has not received a kidney transplant and no longer requires a regular course of dialysis, with the twelfth month after the month in which such course of dialysis is terminated.

"(c) Notwithstanding the provisions of subsection (b)—

"(1) in the case of any individual who participates in a self-care dialysis training program prior to the third month after the month in which such individual initiates a regular course of renal dialysis in a renal dialysis facility or provider of services meeting the requirements of section 1881(b), entitlement to benefits under part A and eligibility to enroll under part B of title XVIII shall begin with the month in which such regular course of renal dialysis is initiated;

"(2) in any case in which a kidney transplant fails (whether during or after the thirty-six-month period specified in subsection (b)(2)) and as a result the individual who received such transplant intitiates or resumes a regular course of renal dialysis, entitlement to benefits under part A and eligibility to enroll under part B of title XVIII shall begin with the month in which such course is initiated or resumed; and

"(3) in any case in which a regular course of renal dialysis is a resumed subsequent to the termination of an earlier course, entitlement to benefits under part A and eligibility to enroll under part B of title XVIII shall begin with the month in which such regular course of renal dialysis is resumed.".

(b) Section 226 of such Act is amended—

(1) by striking out subsections (e), (f), and (g), and

(2) by redesignating subsections (h) and (i) as subsections (e) and (f), respectively.

SEC. 2. Part C of title XVIII of the Social Security Act is amended by adding at the end thereof the following new section:

"MEDICARE COVERAGE FOR END STAGE RENAL DISEASE PATIENTS

"SEC. 1881. (a) The benefits provided by parts A and B of this title shall include benefits for individuals who have been determined to have end-stage renal disease as provided in section 226A, and benefits for kidney donors as provided in subsection (d) of this section. Notwithstandnig any other provision of this title, the type, duration, and scope of the benefit provided by parts A and B with respect to individuals who have been determined to have end-stage renal disease and who are entitled to such benefits without regard to sections 226A shall in no case be less than the type, duration, and scope of the benefits so provided for individuals entitled to such benefits solely by reason of that section.

"(b)(1) Payments under this title with respect to services, in addition to services for which payment would otherwise be made under this title, furnished to individuals who have been determined to have end-stage renal disease shall include (A) payments on behalf of such individuals to providers of services and renal dialysis facilities which meet such (requirements as the Secretary shall by regulation prescribe for institutional dialysis services and supplies (including self-dialysis services in a selfcare dialysis unit maintained by the provider or facility), transplantation service, self-care home dialysis support services which are furnished by the provider or facility, and routine professional services performed by a physician during a maintenance dialysis episode if payments for his other professional services furnished to an individual who has end-stage renal disease are made on the basis specified in paragraph (3)(A) of this subsection, and (B) payments to or on behalf of such individuals for home dialysis supplies and equipment. The requirements prescribed by the Secretary under subparagraph (A) shall include requirements for a minimum utilization rate for covered procedures and for self-dialysis training programs.

"(2)(A) With respect to payments for dialysis services furnished by providers of serv-

ices and renal dialysis facilities to individuals determined to have end-stage renal disease for which payments may be made under part B of this title, such payments (unless otherwise provided in this section) shall be equal to 80 percent of the amounts determined in accordance with subparagraph (B); and with respect to payments for services for which payments may be made under part A of this title, the amounts of such payments (which amounts shall not exceed, in respect to costs in procuring organs attributable to payments made to an organ procurement agency or histocompatibility laboratory, the costs incurred by the agency or laboratory) shall be determined in accordance with section 1861(v). Payments shall be made to a renal dialysis facility only if it agrees to accept such payments as payment in full for covered services, except for payment by the individual of 20 percent of the estimated amounts for such services calculated on the basis established by the Secretary under subparagraph (B) and the deductible amount imposed by section 1833(b).

"(B) The Secretary shall prescribe in regulations any methods and procedures to (i) determine the costs incurred by providers of services and renal dialysis facilities in furnishing covered services to individuals determined to have end-stage renal disease, and (ii) determine, on a cost-related basis or other economical and equitable basis (including any basis authorized under section 1861(v)), the amounts of payments to be made for part B services furnished by such providers and facilities to such individuals. Such regulations shall provide for the implementation of appropriate incentives for encouraging more efficient and effective delivery of services (consistent with quality care), and shall include, to the extent determined feasible by the Secretary, a system for classifying comparable providers and facilities, and prospectively set rates or target rates with arrangements for sharing such reductions in costs as may be attributable to more efficient and effective delivery of services.

"(C) Such regulations, in the case of services furnished by proprietary providers and facilities may include, if the Secretary finds it feasible and appropriate, provision for recognition of a reasonable rate of return on equity capital, providing such rate of return does not exceed the rate of return stipulated in section 1861(v)(1)(B).

"(D) For purposes of section 1878, a renal dialysis facility shall be treated as a provider of services.

"(3) With respect to payments for physicians' services furnished to individuals determined to have end-stage renal disease, the Secretary shall pay 80 percent of the amounts calculated for such services—

"(A) on a reasonable charge basis (but may, in such case, make payment on the basis of the prevailing charges of other physicians for comparable services) except that payment may not be made under this subparagraph for routine services furnished during a maintenance dialysis episode, or

"(B) on a comprehensive monthly fee or other basis for an aggregate of services provided over a period of time (as defined in regulations).

"(4) Pursuant to agreements with approved providers of services and renal dialysis facilities, the Secretary may make payments to such providers and facilities for the cost of home dialysis supplies and equipment and self-care home dialysis support services furnished to patients whose self-care home dialysis is under the direct supervision of such provider or facility, on the basis of a target reimbursement rate (as defined in paragraph (6)).

"(5) An agreement under paragraph (4) shall require, in accordance with regulations prescribed by the Secretary, that the provider or facility will—

"(A) assume full responsibility for directly obtaining or arranging for the provision of—

"(i) such medically necessary dialysis equipment as is prescribed by the attending physician;

"(ii) dialysis equipment maintenance and repair services;

"(iii) the purchase and delivery of all necessary medical supplies; and

"(iv) where necessary, the services of trained home dialysis aides;

"(B) perform all such administrative functions and maintain such information and records as the Secretary may require to verify the transactions and arrangements described in subparagraph (A);

"(C) submit such cost reports, data, and information as the Secretary may require with respect to the costs incurred for equipment, supplies, and services furnished to the facility's home dialysis patient population; and

"(D) provide for full access for the Secretary to all such records, data, and information as he may require to perform his functions under this section.

"(6) The Secretary shall establish, for each calendar year, commencing with January 1, 1979, a target reimbursement rate for home dialysis which shall be adjusted for regional variations in the cost of providing home dialysis. In establishing such a rate, the Secretary shall include—

"(A) the Secretary's estimate of the cost of providing medically necessary home dialysis supplies and equipment;

"(B) an allowance, in an amount determined by the Secretary, to cover the cost of providing personnel to aid in home dialysis; and

"(C) an allowance, in an amount determined by the Secretary, to cover administrative costs and to provide an incentive for the efficient delivery of home dialysis;

but in no event shall such target rate exceed 70 percent of the national average payment, adjusted for regional variation, for maintenance dialysis services furnished in approved providers and facilities during the preceding fiscal year. Any such target rate so established shall be utilized, without renegotiation of the rate, throughout the calendar year for which it is established. During the last quarter of each calendar year, the Secretary shall establish a home dialysis target reimbursement rate for the next calendar year based on the most recent data available to the Secretary at the time. In establishing any rate under this paragraph, the Secretary may utilize a competitive-bid procedure, a prenegotiated rate procedure, or any other procedure which the Secretary determines is appropriate and feasible in order to carry out this paragraph in an effective and efficient manner.

"(7) For purposes of this title, the term 'home dialysis supplies and equipment' means medically necessary supplies and equipment (including supportive equipment) required by an individual suffering from end-stage renal disease in connection with renal dialysis carried out in his home (as defined in regulations), including obtaining, installing, and maintaining such equipment.

"(8) For purposes of this title, the term 'self-care home dialysis support services', to the extent permitted in regulation, means—

"(A) periodic monitoring of the patient's home adaptation, including visits by qualified provider or facility personnel (as defined in regulations), so long as this is done in accordance with a plan prepared and periodically reviewed by a professional team (as defined in regulations) including the individual's physician;

"(B) installation and maintenance of dialysis equipment;

"(C) testing and appropriate treatment of of the water; and

"(D) such additional supportive services as the Secretary finds appropriate and desirable.

"(9) For purposes of this title, the term 'self-care dialysis unit' means a renal dialysis facility or a distinct part of such facility or of a provider of services, which has been approved by the Secretary to make self-dialysis services, as defined by the Secretary in regulations, available to individuals who have been trained for self-dialysis. A self-care dialysis unit must, at a minimum, furnish the services, equipment and supplies needed for self-care dialysis, have patient-staff ratios which are appropriate to self-dialysis (allowing for such appropriate lesser degree of ongoing medical supervision and assistance of ancillary personnel than is required for full care maintenance dialysis), and meet such other requirements as the Secretary may prescribe with respect to the quality and cost-effectiveness of services.

"(c)(1)(A) For the purpose of assuring effective and efficient administration of the benefits provided under this section, the Secretary shall establish, in accordance with such criteria as he finds appropriate, renal disease network areas, such network organizations (including a coordinating council, an executive committee of such council, and a medical review board, for each network area) as he finds necessary to accomplish such purpose, and a national end stage renal disease medical information system. The Secretary may by regulations provide for such coordination of network planning and quality assurance activities and such exchange of data and information among agencies with responsibilities for health planning and quality assurance activities under Federal law as is consistent with the economical and efficient administration of this section and with the responsibilities established for network organizations under this section.

"(B) At least one patient representative shall serve as a member of each coordinating council and executive committee.

"(C) The Secretary shall, in regulations, prescribe requirements with respect to membership in network organizations by individuals (i) who have an ownership or control interest in a facility or provider which furnishes services referred to in section 1861(s)(2)(F), or (ii) who have received remuneration from any such facility or provider in excess of such amounts as constitute reasonable compensation for services (including time and effort relative to the provision of professional medical services) or goods supplied to such facility or provider; and such requirements shall provide for the definition, disclosure, and, to the maximum extent consistent with effective administration, prevention of potential or actual financial or professional conflicts of interest with respect to decisions concerning the appropriateness, nature, or site of patient care.

"(2) The network organizations of each network shall be responsible, in addition to such other duties and functions as may be prescribed by the Secretary, for—

"(A) encouraging, consistent with sound medical practice, the use of those treatment settings most compatible with the successful rehabilitation of the patient;

"(B) developing criteria and standards relating to the quality and appropriateness of patient care; and network goals with respect to the placement of patients in self-care settings and undergoing or preparing for transplantation;

"(C) evaluating the procedure by which facilities and providers in the network assess

the appropriateness of patients for proposed treatment modalities;

"(D) identifying facilities and providers that are not cooperating toward meeting network goals and assisting such facilities and providers in developing appropriate plans for correction; and

"(E) submitting an annual report to the Secretary on July 1 of each year which shall include a full statement of the network's goals, data on the network's performance in meeting its goals (including data on the comparative performance of facilities and providers with respect to the identification and placement of suitable candidates in self-care settings and transplantation), identification of those facilities that have consistently failed to cooperate with network goals, and recommendations with respect to the need for additional or alternative services or facilities in the network in order to meet the network goals, including self-dialysis training, transplantation, and organ procurement facilities.

"(3) Where the Secretary determines, on the basis of the data contained in the network's annual report and such other relevant data as may be available to him, that a facility or provider has consistently failed to cooperate with network plans and goals, he may terminate or withhold certification of such facility or provider (for purposes of payment for services furnished to individuals with end stage renal disease) until he determines that such provider or facility is making reasonable and appropriate efforts to cooperate with the network's plans and goals.

"(4) The Secretary shall, in determining whether to certify additional facilities or expansion of existing facilities within a network, take into account the network's goals and performance as reflected in the networks' annual report.

"(5) The Secretary, after consultation with appropriate professional and planning organizations, shall provide such guidelines with respect to the planning and delivery of renal disease services as are necessary to assist network organizations in their development of their respective networks' goals to promote the optimum use of self-dialysis and transplantation by suitable candidates for such modalities.

"(6) It is the intent of the Congress that the maximum practical number of patients who are mentally, socially, and psychologically suitable candidates for home dialysis or transplantation should be so treated. The Secretary shall consult with appropriate professional and network organizations and consider available evidence relating to developments in research, treatment methods, and technology for home dialysis and transplantation. The Secretary shall periodically submit to the Congress such legislative recommendations as the Secretary finds warranted on the basis of such consultation and evidence to further the national objective of maximizing the use of home dialysis and transplantation consistent with good medical practice.

"(d) Notwithstanding any provision to the contrary in section 226 any individual who donates a kidney for transplant surgery shall be entitled to benefits under parts A and B of this title with respect to such donation. Reimbursement for the reasonable expenses incurred by such an individual with respect to a kidney donation shall be made (without regard to the deductible, premium, and coinsurance provisions of this title), in such manner as may be prescribed by the Secretary in regulations, for all reasonable preparatory, operation, and postoperation recovery expenses associated with such donation, including but not limited to the expenses for which payment could be made if he were an eligible individual for purposes of parts A and B of this title without regard to this subsection. Payments for postoperation recovery expenses shall be limited to the actual period of recovery.

"(e)(1) Notwithstanding any other provision of this title, the Secretary may, pursuant to agreements with approved providers of services and renal dialysis facilities, reimburse such providers and facilities (without regard to the deductible and coinsurance provisions of this title) for the reasonable cost of the purchase, installation, maintenance and reconditioning for subsequent use of artificial kidney and automated dialysis peritoneal machines (including supportive equipment) which are to be used exclusively by entitled individuals dialyzing at home.

"(2) An agreement under this subsection shall require that the provider or facility will—

"(A) make the equipment available for use only by entitled individuals dialyzing at home;

"(B) recondition the equipment, as needed, for reuse by such individuals throughout the useful life of the equipment, including modification of the equipment consistent with advances in research and technology;

"(C) provide for full access for the Secretary to all records and information relating to the purchase, maintenance, and use of the equipment; and

"(D) submit such reports, data, and information as the Secretary may require with respect to the cost, management, and use of the equipment.

"(3) For purposes of this section, the term 'supportive equipment' includes blood pumps, heparin pumps, bubble detectors, other alarm systems, and such other items as the Secretary may determine are medically necessary.

"(f)(1) The Secretary shall initiate and carry out, at selected locations in the United States, pilot projects under which financial assistance in the purchase of new or used durable medical equipment for renal dialysis is provided to individuals suffering from end stage renal disease at the time home dialysis is begun, with provision for a trial period to assure successful adaptation to home dialysis before the actual purchase of such equipment.

"(2) The Secretary shall conduct experiments to evaluate methods for reducing the costs of the end stage renal disease program. Such experiments shall include (without being limited to) reimbursement for nurses and dialysis technicians to assist with home dialysis, and reimbursement to family members assisting with home dialysis.

"(3) The Secretary shall conduct experiments to evaluate methods of dietary control for reducing the costs of the end stage renal disease program, including (without being limited to) the use of protein-controlled products to delay the necessity for, or reduce the frequency of, dialysis in the treatment of end stage renal disease.

"(4) The Secretary shall conduct a comprehensive study of methods for increasing public participation in kidney donation and other organ donation programs.

"(5) The Secretary shall conduct a full and complete study of the reimbursement of physicians for services furnished to patients with end stage renal disease under this title, giving particular attention to the range of payments to physicians for such services, the average amounts of such payments, and the number of hours devoted to furnishing such services to patients at home, in renal disease facilities, in hospitals, and elsewhere.

"(6) The Secretary shall conduct a study of the number of patients with end stage renal disease who are not eligible for benefits with respect to such disease under this title (by reason of this section or otherwise), and of the economic impact of such noneligibility of such individuals. Such study shall include consideration of mechanisms whereby governmental and other health plans might be instituted or modified to permit the purchase of actuarially sound coverage for the costs of end stage renal disease.

"(7) The Secretary shall conduct a study of the medical appropriateness and safety of cleaning and reusing dialysis filters by home dialysis patients. In such cases in which the Secretary determines that such home cleaning and reuse of filters is a medically sound procedure, the Secretary shall conduct experiments to evaluate such home cleaning and reuse as a method of reducing the costs of the end-stage renal disease program.

"(8) The Secretary shall submit to the Congress no later than October 1, 1979, a full report on the experiments conducted under paragraphs (1), (2), (3), and (7), and the studies under paragraphs (4), (5), (6), and (7). Such report shall include any recommendations for legislative changes which the Secretary finds necessary or desirable as a result of such experiments and studies.

"(g) The Secretary shall submit to the Congress on April 1, 1979, and April 1 of each year thereafter a report on the end stage renal disease program, including but not limited to—

"(1) the number of patients, nationally and by renal disease network, on dialysis (self-dialysis or otherwise) at home and in facilities;

"(2) the number of new patients entering dialysis at home and in facilities during the year;

"(3) the number of facilities providing dialysis and the utilization rates of those facilities;

"(4) the number of kidney transplants, by source of donor organ;

"(5) the number of patients awaiting organs for transplant;

"(6) the number of transplant failures;

"(7) the range of costs of kidney acquisitions, by type of facility and by region;

"(8) the number of facilities providing transplants and the number of transplants performed per facility;

"(9) patient mortality and morbidity rates;

"(10) the average annual cost of hospitalization for ancillary problems in dialysis and transplant patients, and drug costs for transplant patients;

"(11) medicare payment rates for dialysis, transplant procedures, and physician services, along with any changes in such rates during the year and the reasons for those changes;

"(12) the results of cost-saving experiments;

"(13) the results of basic kidney disease research conducted by the Federal Government, private institutions, and foreign governments;

"(14) information on the activities of medical review boards and other networks organizations; and

"(15) estimated program costs over the next five years.".

SEC. 3. (a) Section 226(a) of the Social Security Act is amended—

(1) by striking out "specified in subparagraph (B)" and inserting in lieu thereof "specified in paragraph (1)"; and

(2) by striking out "specified in subparagraphs (A) and (B)" and inserting in lieu thereof "specified in paragraphs (1) and (2)".

(b) Paragraphs (2) and (3) of section 226 (e) of such Act (as redesignated by subsection (b)(2) of the first section of this Act)

are each amended by striking out "subsection b" and inserting in lieu thereof "subsection (b)".

SEC. 4. (a) Section 1811 of the Social Security Act is amended—

(1) by striking out "section 226" and inserting in lieu thereof "sections 226 and 226A";

(2) by striking out "and" at the end of clause (1), and inserting in lieu thereof a comma; and

(3) by inserting immediately before the period the following: ", and (3) certain individuals who do not meet the conditions specified in either clause (1) or (2) but who are medically determined to have end stage renal disease".

(b) Section 1833(a)(1) of such Act is amended—

(1) by striking out "and" at the end of clause (C), and

(2) by adding the following after "section)," in clause (D): "and (E) with respect to services furnished to individuals who have been determined to have end stage renal disease, the amounts paid shall be determined subject to the provisions of section 1881, and".

(c) Section 1833(a)(2) of such Act is amended by inserting "(unless otherwise specified in section 1881)" after "other services".

(d) Section 1861(s)(2) of such Act is amended—

(1) by striking out "and" at the end of clause (D),

(2) by inserting "and" at the end of clause (E), and

(3) by adding the following new clause after clause (E):

"(F) home dialysis supplies and equipment, self-care home dialysis support services, and institutional dialysis services and supplies;".

(e) The first sentence of section 1866(a)(2)(A) of such Act is amended by inserting the following before the period: "(but in the case of items and services furnished to individuals with end-stage renal disease, an amount equal to 20 percent of the estimated amounts of such items and services calculated on the basis established by the Secretary)".

(f) Section 1814(b)(1) of such Act is amended by inserting "and as further limited by section 1881(b)(2)(B)" after "1861(v)".

SEC. 5. The third sentence of section 1817(b) of the Social Security Act, and the third sentence of section 1841(b) of such Act, and section 1876(b)(2)(B) of such Act, are each amended by striking out "Commissioner of Social Security" and inserting in lieu thereof "Administrator of the Health Care Financing Administration".

SEC. 6. The amendments made by the preceding sections of this Act shall become effective with respect to services, supplies, and equipment furnished after the third calendar month which begins after the date of the enactment of this Act, except that those amendments providing for the implementation of an incentive reimbursement system for dialysis services furnished in facilities and providers shall become effective with respect to a facility's or provider's first accounting period which begins after the last day of the twelfth month following the month of the enactment of this Act, and those amendments providing for reimbursement rates for home dialysis shall become effective on April 1, 1979.

SEC. 7. Section 15(d) of Public Law 93-233 (as amended by section 7(c) of Public Law 93-368 and the first section of Public Law 94-368) is amended by striking out "October 1, 1977" and inserting in lieu thereof "October 1, 1978".

SEC. 8 (a) The first sentence of section 1905(c) of the Social Security Act is amended—

(1) by striking "and (3)" and inserting in lieu thereof "(3)"; and

(2) by striking out the period at the end thereof and inserting in lieu thereof the following ", and (4) meets the requirements of section 1861(j)(14) with respect to protection of patients' personal funds.".

(b) The fourth sentence of section 1905(c) of such Act is amended by striking out "clauses (2) and (3)" and inserting in lieu thereof "clauses (2), (3), and (4)".

(c) The Secretary of Health, Education, and Welfare shall, by regulation, define those costs which may be charged to the personal funds of patients in intermediate care facilities who are individuals receiving medical assistance under a State plan approved under the provisions of title XIX of the Social Security Act, and those costs which are to be included in the reasonable cost or reasonable charge for intermediate care facility services as determined under the provisions of such title.

(d)(1) The amendments made by subsections (a) and (b) shall become effective on July 1, 1978.

(2) The Secretary of Health, Education, and Welfare shall issue the regulations required under subsection (c) within 90 days after the date of enactment of this Act but not later than July 1, 1978.

(e) Section 20(c)(2) of the Medicare-Medicaid Anti-Fraud and Abuse Amendments (Public Law 95-142) is amended by striking out "section 1905(g)" and inserting in lieu thereof "section 1903(g)".
